12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 13, 2005

Prerequisites: NONE

Course Synopsis:

Many students are employed in the hospitality industry in this community. There is a need for trained employees at the entry level for food preparation and service. This course will offer the student an opportunity to learn the skills necessary in this area of employment focusing on breakfast preparation.

This course will enhance the school environment and improve student performance through sale of healthy breakfast choices. With the outlook of increased tourism visits towards 2010, these skills will be in great demand.

Learning Resources:

Cooking videos
Internet - Health Canada, Canada's Nutrition Guide

Additional Information:

With the governments mandate for healthier schools, this course will be one opportunity to meet this outcome by providing students with healthy breakfast choices.
This course has been offered at David Thompson Secondary School since 1998, usually in the second semester of each year. It is a popular grade 12 course with a wide variety of students enrolled. Many grade 11 students take it after Social Studies 11. An added benefit for them is the ability to get a grade 12 credit while in grade 11. An unexpected delight in enrolment is grade 12 students that have already taken History 12, but did not have the time to study in detail because of the high-paced nature of History 12. For counsellors, Conflict in the 20th Century 12 has been a course that has enabled them to easily schedule students with timetable difficulties or students that have come to David Thompson Secondary after the start of the school year. It provides students an interesting, non-academic grade 12 course that any grade 12 student (and several grade 11 students) can take and be successful in.

Course Synopsis:
This is a history of the twentieth century course with content modelled after History 12 but delivered in a way that is similar to Civics 11. The course will examine the following topics:
The World of 1919
The Interwar Period
World War II
The Cold War
The World After the Cold War and into the 21st century
Canada's Role in the 20th Century

Learning Resources:
Since this course has been offered to students at David Thompson Secondary since Sept. 1998, numerous resources already exist in the school. Access to one of the computer labs is often required as is the approved text, DeMarc, Neil, The World This Century: Working With Evidence. London: Collins Educational, 1994

Additional Information:

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 14, 2002

Prerequisites: Social Studies 10

Course Synopsis:

This course will focus on the following topics:
- Contemporary social, political, economic and technological events at the local, provincial, national and international levels
- Bias and point of view
- Primary vs. secondary source materials
- News events from various geo-political presepectives
- Historical context of significant world local, national and international events
- The role of significant individuals

The course will also develop the following skills:
- language and vocabulary
- reading and comprehension
- critical thinking
- oral expression and listening
- effective research and writing
- media literacy
- cooperative-group work
- debating

Learning Resources:

Internet access
CBC news
Local and national newspapers
Library resources

Optional: CBC "News in Review" video series
Course Synopsis:

The Fire Academy Training 12 (FACT 12) course is designed to prepare students for direct entry into the College of the Rockies Structure Fire Academy Training Program. Candidates for the course and subsequent programs will be expected to successfully fulfill the selection and screening process as outlined in the COTR Academy Program specificaitons.

Successful candidates will be trained in a pre-entry Stucture Fire Suppression program tha encompasses theoretical and practical componenets. The theoretical component will be based on National Fire Protection Association (NFPA) standards as well as the International Fire Service Training Association (IFSTA) training curriculum. Sudents who successfully complete the required standards will be awarded direct entry into the Fire Academy Program in Cranbrook immediately after graduation in accordance with the College of the Rockies.

Learning Resources:

IFSTA Manual
Video Edu-Kits
Fire Department Apparatus

Additional Information:

This course is developed in cooperation with and courtesy of the College of the Rockies and the City of Cranbrook Fire Department (Chief Gerald Fox). This is a tremendous opportunity for students to acquire the basic firefighter skills that will facilitate entry into the Fire Academy Training program at the College of the Rockies in Cranbrook. At all times, safety of the students will be paramount. At no time will a student of the FACT 12 course be permitted to train or respond in any way without the personal attendant assigned from the fire department. The course will be delivered in a way to ensure a complete fit with the requirements of the Academy at the College of the Rockies. A student's acceptance into the Academy program will be the decision of the appropriate personnel from the Academy only. The school will make a recommendation based on student performance to the entrance committee for each student who applies to the program.

School Name: David Thompson Secondary

Course Name: Intro to Trades 12

Course Code: YITR 12

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 19, 2005

Prerequisites: Grade 10

Course Synopsis:

The Introduction to Trades 10 week intensive program provides students with instruction in the following trade areas:

- Team Building Skills/Goal Setting
- Occupational First Aid Level 1
- Computers/TOEWS
- Conflict Resolution on the Job
- Welding
- Electrical
- Tiling
- Painting
- WCB Hazard Recognition
- Transportation Endorsement
- Trades Math
- Forklift Certification
- Plumbing
- Automotive
- S100
- WHMIS

This course helps prepare students for basic work in the trades industry and/or for further education and training in trades. Students work on a variety of practical projects and are given instruction on basic tools and safety. A variety of certificates are included in the program such as First Aid, WHMIS, Transportation of Dangerous Goods, S-100 Fire Suppression and Safety, Basic Rigging and Forklift Training.

Learning Resources:

Dependant on the trade

Additional Information:

This program is a partnership effort between the College of the Rockies and David Thompson Secondary School. All such partnerships are guided by the COTR/DTSS partnership agreement.

Course Name: Web Page Design 12

Course Code: YWD 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: April 11, 2006

Prerequisites: None

Course Synopsis:

This course has been developed to support students that want to learn web design. This course will introduce students to all aspects of web design. They will start by learning about the basics of design and format for web pages. They will then be introduced to publishing works online. Finally they will work through a series of units that will allow them to create a working web page with increasing functionality.

Learning Resources:

• Software: Dreamweaver 8
• Macromedia Dreamweaver 8 Hands on Training

Additional Information:

Enrichment activity could be development of a web page for a teacher or course.

This course could lead into a Web Master work experience course where students are responsible for the maintenance of the DTSS student web site. At the same time working with the new students taking Web Master 1 and mentoring them for their success.

Grade Level of Course:  
☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 2

Number of Hours of instruction: 50

Date Approved: June 8, 2004

Prerequisites: None

Course Synopsis:

Animation Arts focuses on developing the knowledge, skills and attitudes students need to appreciate and create digital animation. Students will have the opportunity to utilize computer technologies to create and manipulate images to express or elicit specific audience responses. In developing digital animation students apply elements of interactive website design and development, animation authoring, defining audience goals and creative media composition. Students examine current use of animation and critically evaluate existing practice in the field.

In Animation Arts 11, students have opportunities to:
- develop skills required to use digital technologies as tools for animation
- design, create and present digital animations that reflects their own individuality and creativity
- examine current usage and influences of animation art on society and use that knowledge to anticipate future developments
- develop animation art literacy in order to make informed critical decisions in response to their own and others' animation production
- explore career options related to animation areas and develop skills useful in pursuing those options

Course Synopsis:

Art Metal 11 is a 2 credit Fine Arts and Design course designed to teach students basic metal art and design skills. This is a project based course that will require the students to design and build projects emphasizing expression and aesthetic appeal. Students will explore 2-D design elements using metal fabrication and casting techniques. This course supports the Fine Arts and Design Focus Area. It may also provide students with opportunities to gather portfolio evidence for the Arts and Design aspect.

Learning Resources:

Art books with images of silhouettes and shapes.
Access to a computer lab for internet resources of metal art.
Art books with 2D and 3D design images
Books with information about metal casting and jewellery casting techniques.
Metal Textbook

Additional Information:

This course has been taught at Golden Secondary School since 2000.

Course Name: Creative Cuisine 11

Course Code: YCRCU 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 50

Date Approved: December 14, 2004

Prerequisites: NONE

Course Synopsis:

Creative Cuisine 11 focuses on encouraging students to use their creative expressions by connecting the artistic value in food to the practical skills of food preparation for the enjoyment of food in a social context. There is a strong emphasis on design by having students make connections to the elements and principles of design through laboratory experiences that push the ordinary into the creative. In society, where food plays many roles, students will research and investigate these roles in various cultures and ethnic groups. Through this experience, students will foster a better understanding and knowledge of the multicultural richness and varied social customs in the preparation and sharing of food. Students will have the opportunity to express their learning through group presentations, demonstrations, laboratory experiences, written work, multi-media presentations, demonstrations, laboratory experiences, written work, multi-media presentations or oral reports; and self and peer evaluations. Students will develop various skills related to planning recipes and meals, presentation of food for aesthetics, management of time, budget and supplies and safe food handling practices. Students will gain an awareness of the nutritional importance of food and its role in our physical maintenance and wellness.

Date Approved: May 14, 2005

Prerequisites: None

Course Synopsis:

Hospitality Foods 11 focuses on quantity food preparation and service and is designed to fill a growing demand in the food service industry to building student confidence and skill level to better equip them for entry level jobs. The course provides students with basic skills and knowledge in areas of food safety, equipment operation and maintenance, ordering and receiving of food, quantity food preparation, basic nutrititional concerns and menu planning, and front-end service. Students will work cooperatively to plan, prepare and serve appealing, nutritionally balanced meals to the school population. Students learn to market the menu items, determine pricing and determine how meals will be served by considering environmental, time and financial factors. The units are organized under the curriculum organizers of safety, sanitation and equipment; principles of food preparation, food preparation skills and food service.

Course Name: Leadership 12

Course Code: YLEAD 12

Category: Other

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June 8, 2004

Prerequisites: Recommended Leadership 10 or permission of the instructor following application process

Course Synopsis:

This course will deal with the theoretical and practical applications of human relations. The time in class will be spent primarily on event implementation, management and evaluation. The students will develop peer helping skills, practice efficient public speaking, be involved in promotion and running of school events. However, the focus will be on school and community-wide relations.

Learning Resources:

- CASAA Leadership Handbook (Canadian Association of Student Activities and Advisors)
- CIRA Student Leadership Development Guide (Canada Intramural Recreation Association)
- NASSAP National Association of Secondary School Principals
- Focus Area Guide/Portfolio Guide - Ministry of Education

Additional Information:

Obviously this course will differ by region, dependent on community needs and geographic location. It will also be dependent on the strengths of the teacher, composition of the class itself and the needs to the school and community.

Course Name: Outdoor Education 10

Course Code: YPR 10A

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: June 8, 2010

Prerequisites: none

Course Synopsis:

This course provides an introduction to outdoor pursuits where students will participate in activities such as climbing, backpacking, cross country skiing, hiking and orienteering. Students will learn about local plants, animals, culture and history in order to develop perspectives on the environment and conservation issues. Students in the senior Outdoor Education class will also engage in Ice Climbing, Rock Climbing, and Canoeing.
This course is extremely dependant on environmental conditions and consequently the outline above will not be rigid. Outdoor activities will depend on the weather, time and the ability of the class. Field Trips will be dependant on the above conditions as well as scheduling. If the instructor is not entirely qualified to teach segments of the course, experts in the field will be hired to ensure complete safety from foreseeable hazards.

Course Synopsis:
This course has been designed to introduce students to the outdoors and to familiarize them with several of the many outdoor pursuits available in the surrounding area. The students will gain an increased awareness of their environment and their place in it while engaging in challenging and new pursuits. There will also be a focus on safety in the outdoors with respect to first aid, survival and objective hazards/potential risk analysis.

Learning Resources:
Red Cross First Aid - Standard and CPR Manual
Bear Aware Program - Ministry of Forests
Avalanche 1 Program: Recreational level (CAA)
Numerous videos for each activity
OUTdoor instructional slides
Equipment - specific to each activity
Resource persons, guest speakers

Additional Information:
This course is extremely dependant on environmental conditions and consequently the outline above will not be rigid. Outdoor activities will depend on the weather, time and the ability of the class. Field Trips will be dependant on the above conditions as well as scheduling. If the instructor is not entirely qualified to teach segments of the course, experts in the field will be hired to ensure complete safety from foreseeable hazards.

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: June 8, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support students in facing the challenges of understanding themselves, interacting with groups, knowing where they come from and gaining awareness of their society. It is important that young people accept these challenges with a thorough base of knowledge rather than racing to opinions that are predicated on media and personal intuition. Through a series of units, students are exposed to the psychological facts, principles and phenomena associated with psychology.

Learning Resources:

- David G. Myers, Psychology (6th Edition)
- Psychology Today, magazine
- Wayne Werten, Themes and Variations (5th Edition)
- Focus Area/Portfolio Guide, Ministry of Education
- Resources consisting of videos, collected articles, magazines and various websites

Additional Information:

Optional topics to cover in Psychology 12 include: Stress and Health, Growth and Development, Motivation and Emotion, Social Psychology and States of Consciousness. These may be included in the course of instruction or be research topics, extra topics or topics of choice for some students for Independent Studies Credit.

Date Approved: June 8, 2004

Prerequisites: None

Course Synopsis:

The technological revolution has changed the way we perceive and interact with society. The use of electronic visual media as communication tools has become increasingly important. This course is meant to provide an introduction to digital video editing. It provides the student with a platform to develop and critique digital video in an intelligent manner and with a critical eye. The course will emphasise our role as creators and the impact of the message generated through the art form. Time will also be invested in developing a critical eye to determine what makes a successful film. Student will learn how to shoot video and prepare to edit and package their product for screening. It is hoped that this course will act as a precursor for senior video production courses (CPVP 12).

Learning Resources:

- iMovie tutorial software (native to IMac computers)
- Video tapes of commercial films that target specific technical and artistic components

Additional Information:

The purpose of this course is to introduce students to the concepts essential to filmmaking. The skills they acquire in this class will prepare them for higher level video production curricula in subsequent grades. Their feature projects will become part of the technical component of their personal portfolio.

School Name: Selkirk Secondary School

Course Name: Creative Writing 12

Course Code: YCWR 12

Category: Other

Grade Level of Course: [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: June 13, 2006

Prerequisites: none

Course Synopsis:

This course has been developed to assist students in enriching their writing skills and gain a greater appreciation of writing, in the following genres: fiction, non-fiction and poetry. Creative Writing includes the full spectrum of writing venues such as descriptive writing, interpretive writing, essays, point of view, personal response and opinion pieces, short stories, letter writing, and editorials; however, creative Writing 12 is an incredible opportunity to explore two genres in depth: poetry and fiction. In addition to this, students learning is enhance by: reading samples of professional writing, traveling to writing festivals (Banff/Calgary), creating print publication (zines) and reading/performing original work in public at the year end (Writings from the Hallways).

Specific Goals:
1. An understanding and appreciation of the creative process.
2. An increased familiarity with the writer’s problems, tools, techniques, and basic forms.
3. A deeper respect and excitement for the power and possibility of language.
4. An enhanced critical awareness and tolerance in what each student reads.
5. An increased objectivity that allows the student to evaluate and revise his or her own work more effectively.
6. The achievement of a higher level of competence in the student’s ability to express herself/himself.
7. An enhanced appreciation of literature.

Learning Resources:

- poetry books (we’ve had 60 poetry books donated from Brick Books)
- Poets in the Classroom (Struthers, B., Klassen, S., ed.)
- resources consisting of videos, articles, magazines, and various websites.

Additional Information:

This is the 9th year of Creative Writing at Selkirk. Many students like to take the course two years in a row to enrich their skills (the other option they can take is Writing 12, which is Ministry Authorized). Many students have gone on to Creative Writing Programs at Universities.

This course meets the ministry requirements for both fine arts and applied skills and students can earn two credits (2) of each upon successful completion of this course.

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 15, 2005

Prerequisites: Interview to determine interest

Course Synopsis:

This is an introductory course to horses and riding. In the course a student with little or no riding experience will explore the world of horses. As well as learning the basics of riding, students will develop a general knowledge of horses, use terminology related to horses and demonstrate correct safety procedures around horses. Those students who choose the optional riding component (at additional cost) will receive approximately 100 hours, during the school week, of working with horses and riding instruction from certified instructors. The optional riding component will be part of the Rocky Mountain Sport School.

This course supports the Graduation Focus Area of Fitness and Recreation. It will also provide students with opportunities to gather portfolio evidence for the aspect Personal Health.

Learning Resources:

Magazines: Horse Care, Horse Journal, Dressage Today

Websites: Western Canada Veterinary College, Horse Council BC

Guest speakers: Farrier, Trainer

Equine Canada Learn to Ride Program

Canadian Pony Club Riding Levels Program

Videos will be purchased as funds allow
**Additional Information:**

There will be a partnership between Rocky Mountain School District and Windover Equestrian Center providing the Equine Canada Instructor/Coaches and facilities to ensure a quality practical riding educational experience. In delivering the Equine Program there will also be a partnership between Selkirk Secondary and Continuing Education. A BC Certified teacher will provide the theory component; thus providing quality educational experience that will earn credits towards the BC Graduation Dogwood certificate.

The proposed Equine Studies Program is designed to include the following BC credit courses:
- Equine Studies 10: Introduction to horses and riding
- Equine Studies 11: Skills in horsemanship and knowledge of horse management
- Equine Studies 12: Advanced equestrian skills and research into related careers
- Equine Studies Wk Experience: Career Preparation in the Horse Industry

Students have the opportunity to become members of Pony Club (at their own expense) and may be tested and receive certification at Pony Club levels. Students who are a member of the BC Summer Games Team will receive credit for Athlete 10 (UXSA 10). Students who attain a Canadian Pony Club Level B Certificate will receive 4 credits toward Applied Skills 11 (UCPC 11); while students who attain a Canadian Pony Club Level B2 will receive 4 credits toward Applied Skills 12 (UCPC 12).

Students will be given the opportunity as part of the course to travel to Spruce Meadows in Calgary Alberta to view “The Masters”, an international show jumping venue. Students will also take field trips to a breeding farm and demonstrations of various sports e.g., jumping, dressage, reining etc.

Safety will be addressed in a comprehensive manner. Students will receive Safety instruction both in the classroom and at the equestrian center. Parents will be asked to attend a safety informational meeting to advise them of both the risks and the precautions being taken; in addition, parents will be asked to sign a waiver as is customary in the sport of horses.

Number of Hours of instruction: 100

Date Approved: May 15, 2005

Prerequisites: Equine Studies 10 or equivalent

Course Synopsis:

This is an intermediate course where the students further their knowledge in all areas of horsemanship. Students will receive instruction on topics such as the following: horse, physiology, buying and care of a horse, individual research projects on topics of their interest and Equine related businesses. Students will begin in depth study on their chosen riding discipline, for example, dressage, jumping, barrels etc.

All students will continue to develop their riding skills. Those students who choose the optional riding component (at additional cost) will continue to receive approximately 100 hours, during the school week, of riding instruction from certified Canadian Equestrian Federation coaches and have the opportunity to receive certification for Pony Club Levels and/or Equine Canada Rider Levels in English and/or Western.

This course supports the Graduation Focus Area of Tourism & Hospitality, Science & Applied Science, Trades & Technology, Business & Applied Business as well as Fitness and Recreation. It may also provide students with opportunities to gather portfolio evidence for the following aspects: Education and Career Planning, Employability Skills, Community Involvement & Responsibility and Personal Health.

Learning Resources:

Magazines: HorseCare, Horse Journal, Dressage Today
Websites: Western Canada Veterinary College, Horse Council BC
Guest speakers: Farrier, Trainer
Equine Canada Learn to Ride Program
Canadian Pony Club Riding Levels Program
There will be a partnership between Rocky Mountain School District and Windover Equestrian Center providing the Equine Canada Instructor/Coaches and facilities to ensure a quality practical riding educational experience. In delivering the Equine Program there will also be a partnership between Selkirk Secondary and Continuing Education. A BC Certified teacher will provide the theory component; thus providing quality educational experience that will earn credits towards the BC Graduation Dogwood certificate.

The proposed Equine Studies Program is designed to include the following BC credit courses:
Equine Studies 10 - and introduction to horses and riding
Equine Studies 11: Skills in horsemanship and knowledge horse management
Equine Studies 12: Advanced equestrian skills & research into related careers
Equine Studies Wk Experience: Career Preparation in the Horse Industry

Students have the opportunity to become members of Pony Club (at their own expense) and may be tested and receive certification at Pony Club levels. Students who are a member of the BC Summer Games Team will receive credit for Athlete 10 (UXSA 10). Students who attain a Canadian Pony Club Level B Certificate will receive 4 credits toward Applied Skills 11 (UCPC 11); while students who attain a Canadian Pony Club Level B2 will receive 4 credits toward Applied Skills 12 (UCPC 12). Students who are a member of the BC Summer Games Team will receive credit for Athlete 10 (UXSA 10).

Students will be given the opportunity as part of the course to travel to Spruce Meadows in Calgary Alberta to view “The Masters”, an international show jumping venue. Students will also take field trips to a breeding farm and demonstrations of various sports eg., Jumping, Dressage, Reining etc.

Safety will be addressed in a comprehensive manner. Students will receive Safety instruction both in the classroom and at the equestrian center. Parents will be asked to attend a safety informational meeting to advise them of both the risks and the precautions being taken; in addition, parents will be asked to sign a waiver as is customary in the sport of horses.

Course Synopsis:

This is an advanced course in horsemanship. In this course students will develop riding skills equivalent to Pony Club Level C / Rider 2 under certified Canadian Equestrian Federation coaches. They will have the opportunity to receive more advanced certification for Pony Club Levels and/or Equine Canada Rider Levels in English and/or Western. Students will demonstrate proficient riding skills in their chosen discipline, be it dressage, jumping, barrels, or other. As well as the 50 hours of riding instruction, students will receive an equivalent amount of theory including research on areas of choice, horse training, and possible careers; this will include development of business plans and post secondary education. This course may support the Graduation Focus Areas of Business and Applied Business, Trades, Tourism, Science and Applied Science, as well as Fitness and Recreation. It may, depending on the area of study the student chooses, also provide students with opportunities to gather portfolio evidence for the following aspects: Education and Career Planning, Employability Skills, Responsibility, Arts and Design, Community Involvement and Responsibility, and Personal Health.

Learning Resources:

• Magazines eg. “HorseCare”, “Horse Journal”, Dressage Today
• Websites eg. Western Canada Veterinary College in Saskatoon, Horse Council BC
• Guest speakers eg Farrier, Trainer
• Equine Canada Learn to Ride Program
• Canadian Pony Club Riding Levels Program

www.bcsta.org
Additional Information:

There will be a partnership between Rocky Mountain School District and Kimberley Community Businesses (Windover Equestrian Center) providing the necessary expertise and facilities to ensure a quality equestrian educational experience. In delivering the Equine Program there will also be a partnership between Selkirk Secondary School and Continuing Education.

The Equine Program is composed of the following courses:
• Equestrian Studies 10 - an introduction to horses
• Equestrian Studies 11 - skills in horsemanship & related careers
• Equestrian Studies 12 – advanced equestrian skills
• Equestrian Studies Wk Experience – Careers with Horses

Safety will be addressed in a comprehensive manner. Students will receive safety instruction both in the classroom and at the equestrian center. Parents will be asked to attend a safety informational meeting to advise them of both the risks and the precautions being taken; in addition, parents will be asked to sign a waiver as is customary in the sport of horses.

Course Name: Forensic Science 11

Course Code: YFSC 11

Category: Science and Applied Sciences

Grade Level of Course: [ ] 10 [x] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 9, 2007

Prerequisites: Science 10, Principles of Math 10, at least one of Biology, Chemistry, or Physics 11

Course Synopsis:

Students will gain and apply knowledge from human physiology, math, computer technology, chemistry, physics, anthropology, entomology, medicine, social sciences and the Canadian criminal justice system. The course will be inquiry based through labs, case studies, field trips and guest speakers. The activities will teach and strengthen student skills in reading, technical and professional writing, critical thinking and problem solving, observation, interpretation, and reasoning. Students will repeatedly apply a scientific inquiry approach to the problem of an unsolved crime, whether real or fictional.

Learning Resources:

Criminal Code of Canada
How to Use the Criminal Code of Canada Workbook
Introductory Forensic Science Educational Activities
Advanced Forensic Science Education Activities
Introductory Forensic Science Crime Case Studies
Forensic Science for High School Students
Local Resource People (Dentist, RCMP)
Internet Resources

Additional Information:

Requires teacher with specialty training in Biology, Chemistry, Physics, or Forensic Science, or successful teaching experience in senior Biology/Chemistry/Physics. This course as presented should be taught in a high school Chemistry lab setting.

**Course Synopsis:**

Learning Strategies 10 is a course designed to support students identified with learning disabilities or learning difficulties prepare for graduation and life-long learning. The course has been developed to provide students with learning opportunities to gain a clear understanding of their disability and their strengths and weaknesses. As students develop their learning profile, they will have the opportunity to try a repertoire of strategies to identify and develop those learning strategies which empower them to achieve success.

Recognizing the scope of learning differences, strengths and weaknesses, interests and ambitions in career planning, the course must have the flexibility to tailor goals and learning outcomes to meet the needs of individual learners as outlined in their Individual Education Plan (IEP).

**Learning Resources:**

Learning resources in this course are student specific depending on the student IEP.

Resources include but are not restricted to:
- word recognition software
- audio text readers (i.e. Kurzweil)
- typing programs (i.e. All the Right Type)
- scanners
- graphics tablets
- texts on tape
- word processor
- calculators
- planners

Course Synopsis:

Learning Strategies 12 is a course designed to support identified learning disabled students with their preparation for graduation and life-long learning. The course has been developed to provide students with learning opportunities to extend their understanding of their disability so that they are better able to articulate their learning profile. In Learning Strategies 11, students identify and apply specific learning strategies which are effective in meeting their educational needs. In Learning Strategies 12, the students take the learning strategies learned in LS 11 and adapt them for use in a variety of learning situations. The focus of this course is on the problem solving process and application and/or adaptation of specific learning strategies to successfully address the different educational challenges they encounter.

This course promotes development of independence of action by students which will assist them to become their own advocate, achieve their educational and career objectives, as well as develop the flexibility to deal with change. In addition, students will explore different career and/or educational opportunities and advocate on their own behalf to gain the information and support they require specific to their disability. Upon completion of the course, their completed self awareness portfolio, which illustrates their learning profile, can be used when pursuing educational or career opportunities.

Recognizing the scope of learning differences, strengths and weaknesses, interests and ambitions in career planning, the course must have the flexibility to tailor goals and learning outcomes to meet the needs of individual learners as outlined in their Individual Education Plan (IEP).

This course is preliminary to the Outdoor Careers 12 and Outdoor Careers 12 Work experience program. This course is dependent on appropriate funding since it involves significant travel, multi-day trips, equipment purchase/replacement and certification.

Course Synopsis:

This course has been designed to enable students to develop skills, attitudes and knowledge regarding the natural environment and to provide students with a background of experience that can prepare them for a career in the outdoor or natural resource sector. The East Kootenay offers a diverse and rich environment as a setting for student experiences.

Learning Resources:
- RedCross First Aid: Standard and CPR Manual
- Bear Aware Program: Ministry of Forests
- Avalanche 1 Program: Recreational level (CAA)
- Numerous videos for each activity
- Outdoor slide instructional series: U of C
- Equipment, specific to each activity
- Resource person

Additional Information:

This course is preliminary to the Outdoor Careers 12 and Outdoor Careers 12 Work experience program. This course is dependent on appropriate funding since it involves significant travel, multi-day trips, equipment purchase/replacement and certification.

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: June 8, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support students in facing the challenges of understanding themselves, interacting with groups, knowing where they come from and gaining awareness of their society. It is important that young people accept these challenges with a thorough base of knowledge rather than racing to opinions that are predicated on media and personal intuition. Through a series of units, students are exposed to the psychological facts, principles and phenomena associated with psychology.

Learning Resources:

- David G. Myers, Psychology (6th Edition)
- Psychology Today, magazine
- Wayne Werten, Themes and Variations (5th Edition)
- Focus Area/Portfolio Guide, Ministry of Education
- Resources consisting of videos, collected articles, magazines and various websites

Additional Information:

Optional topics to cover in Psychology 12 include: Stress and Health, Growth and Development, Motivation and Emotion, Social Psychology and States of Consciousness. These may be included in the course of instruction or be research topics, extra topics or topics of choice for some students for Independent Studies Credit.

Prerequisites: P.E. 10

Course Synopsis:

This course has been developed for those students wanting a more comprehensive course in modern strength and conditioning principles. It would allow students to develop an individual program based on their specific conditioning needs in different sports and activities. It will enable students to make use of all facilities and equipment by offering this course outside of the regular school timetable. Also, it would allow student to continue a physical education and fitness regime without sacrificing an academic block found within the regular school day. Students will learn principles in such techniques as weight training, agility and balance training, nutrition and energy system usage and apply then to a self designed program suited to their specific needs.

Learning Resources:

- Strength Ball Training, Human Kinetics, Goldenberg and Twist, 2002
- The Pilates Body, Broadway Books, Siler, 2000
- www.strengcoach.com - Strength Training

Additional Information:

This is a new course based on a pilot project designed and implemented in 1996. Schools will need access to fitness facilities and modern strength and conditioning equipment. Students will develop strength and conditioning programs that can be adapted to their changing fitness goals and personal fitness level. The ultimate goal is to enable students to maintain a fitness program, with appropriate changes for their entire life.

Prerequisites: None

Course Synopsis:

Criminology 11 is a course that covers current trends and issues in the legal system that are examined along with exploration of criminal and deviant behaviour. In conjunction with a look at Justice System careers, and the workings of criminal courts, the course analyzes the Young Offenders Act, Youth Court, and young people in conflict with the law.

Grade Level of Course:  

10  11   X  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 11, 2007

Prerequisites:

Course Synopsis:

Criminology is the study of crime, explanations of crime and the examination of crime reduction. Through readings, guest speakers, film, video and class discussions, students will examine the interactions between law and society, law and crime, law and the Criminal Justice System, and the Criminal Justice System and society. Criminology 12 differs from Law 12 in that Criminology is not concerned with knowing the law; instead, it focuses on the dynamics behind the law.

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

10  [X] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 115 - 120

Date Approved: April 12, 2005

Prerequisites: None, but recommended that students have taken a Food Studies course or have some cooking experience

Course Synopsis:

This is a ‘hands-on’ course where students will learn the elements and principles of design and apply them to food. Students will develop and apply skills in food preparation and emphasis will be placed on developing an appreciation for food presentation and food as an edible art form. Some of the edible works of art students will create include: spice art, cookie dough impressions, yeast breads sculptures, garnishes, decorated cakes and many other projects. This course also focuses on developing both team and independent work skills. Students throughout the course will create a photo portfolio of their food creations, which can be used for future studies, job interviews and help to meet some of the requirements for their grad portfolio.

☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 2/2

Number of Hours of instruction: 60/60

Date Approved: December 11, 2007

Prerequisites: None

Course Synopsis:

This course will develop the students’ ability to critically analyze film. It will begin with a survey of the language of film; this includes form, narrative structure, editing, mise-en-scene, cinematography and sound. Students will then be introduced to several approaches of analyzing films; genre study with an emphasis on Film Noir, historical, star analysis, auteur study and independent/national cinema. The first half of the course covers the eras of the Silent Film and the beginnings of sound in the early 1930’s; the second half focuses on the Hollywood Studio Era and the development of international cinema. All students will maintain a film journal and make presentations to the class.

Course Synopsis:

This course has been designed in order to provide a holistic approach to self prescribing exercise for adolescents. Students learn a variety of scientific principles, techniques and methodologies pertaining to strength and conditioning. Students will understand how to condition and train the body in order to practically apply these methods onto themselves and with the hope that they will continue to live a healthy active lifestyle. The base approach of this course is science and knowledge that transforms to the practical use of these methodologies and principles. A variety of units are used in order to cover all topics that are encompassed under the title of Human Performance. Exercise physiology and its subsequent foundations are the corner stone of this class.

Number of Course Credits: 2/4

Number of Hours of Instruction: 57.5/115

Date Approved: January 15, 2008

Prerequisites: None

Course Synopsis:

This course is designed within our school to teach leadership skills to motivated students who then become an integral part of planning and carrying out school activities. These activities fall under the window of student's council, intramural activities and community events. Through the leadership curriculum, students will learn what it means to be a leader and reflect upon their own leadership skills and styles to become more effective in their role within the school. Specific skills that students learn in this course are goal setting, communication, organization, planning, conflict resolution, and public speaking. These skills are applied within the school and community when planning events, leagues, dances, and peer helping/counselling.

Course Synopsis:

This course is designed to instruct students in the various methods and techniques for planning, implementing and evaluating projects related to school activities. Topics include public speaking, communication, teamwork, management skills, self-awareness, human relations, and promotion and staging of school events. An essential part of this class is active "hands on, minds on" experimental learning. In this course students will further develop the skills they currently possess and be given the opportunity to acquire new ones. It is through the activities and programs that are run by the class that the students will learn and practice the concepts and skills of leadership.

Course Code: YCCT 11A

Category: Trades and Technology

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 100-110

Date Approved: January 11, 2011

Prerequisites:

Course Synopsis:

In this course, students will learn the basics of 3D computer modeling for animation. The goal is to acquire knowledge of computer modeling techniques and to be able to produce modeled objects for animations and architectural design. Students will gain skills in how to use the Blender, modeling and animation program to make 3D objects ranging from toys to automobiles and architectural structures. Following a series of video tutorials combined with in class lectures they will explore the extensive range of modeling tools available in the Blender program, and since many 3D modeling programs use similar tools and interfaces, acquire skills transferable to other modeling and drafting programs such as MAYA.

The students also learn about other graphic and modeling programs available by searching industry websites for images and textures for their models and scenes. They are shown how to manipulate these images in Photoshop or Gimp if necessary for their projects. All students are required upon completion of the tutorial to design and model a major project of choice, using the majority of modeling tools from the tutorials. They are encouraged to design their projects with an animation in mind but can treat it as an architectural or industrial design project as well. Students who complete all of the tutorials and the major design project early are introduced to the Blender animation portion of the program and are encouraged to produce a small animation.

Learning Resources:

Various Learning resources will be used, depending on availability and time:

- Blender.org wiki and web resources
- Teacher generated video resources
- Teacher resources
- Book Thinking Animation: Bridging the Gap Between 2D and CG
- Book Introducing Character Animation with Blender 2.5
- Book Beginning Blender: Open Source 3D Modeling, Animation, and Game Design

Course Synopsis:

This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Two.

Learning Resources:
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Course Code: YSPD 11

Category: Liberal Arts and Humanities

Grade Level of Course:  

- [ ] 10
- [X] 11
- [ ] 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April 12, 2005

Prerequisites: None

Course Synopsis:

This is a participatory course that provides students with the opportunity to gain credit for their speech and debate experiences. The course will provide instruction in research, writing persuasive speeches, critical analysis, the cross examination process and rebuttal. Students will also be given the opportunity for peer and self evaluation. These skills will be gained through the cross examination and parliamentary style of debate.

The work and effort required for current speech and debate activities will be recognized in a formal way. The students will accumulate their hours of instruction through regularly scheduled club meetings and attendance at tournaments, festivals or other in-class opportunities. The majority of this course involves students working under the supervision of a teacher. The course content includes skills and knowledge required to participate in a presentation venue in either public speaking and/or debate tournaments. Students would be encouraged to register for local, regional or provincial tournament or festival opportunities.

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 29, 2011

Prerequisites: none

**Course Synopsis:**

This course will provide the skills, knowledge, and attitudes necessary for the design, construction, and maintenance of a permaculture environment. The students will engage in project-based, experiential learning activities in the application of permaculture principles to the school surroundings.

Permaculture: “a consciously designed landscapes which mimic the patterns and relationships found in nature, while yielding an abundance of food, fibre, and energy for provision of local needs” (Holmgren).

**Learning Resources:**

There are a variety of resources that will be required for this course, but the most important is the support of the school administration, district board office, and maintenance staff. Students will be engaging in a variety of projects aimed at making the school environment mimic the patterns and relationships found in nature; clearly a positive relationship with all partners involved will be essential to the project’s success.

In terms of actual supplies, there are a variety of books and documentaries that could be useful for this program, but the most important starting point would be Permaculture: Principles and Pathways Beyond Sustainability by David Holmgren.

This course will also require a significant initial investment for tools and infrastructure. However, part of the challenge for the students will be to come up with creative ideas for funding to support their projects. There are a variety of grants available that focus on greening school grounds, as well as potential for the development of an eco-preneurial business model that could enable the course to become self-sufficient.

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites: Russian 9

Course Synopsis:

In the community where Mt. Sentinel Secondary School is located, where a significant portion of the population is made up of people of Russian heritage, it is important for young people to be given opportunities to communicate in Russian. In addition to bringing personal satisfaction, communicative competence in Russian expands national and international career opportunities in many fields such as commerce, hospitality and tourism.

An ability to communicate in Russian also encourages the development of an open-minded attitude towards Russian speaking and other cultural groups, and increases the student's awareness of their own cultures. This is an important goal for citizens of a province as culturally and linguistically diverse as British Columbia.

Learning Resources:

The ministry promotes the establishment of a resource-rich learning environment through the evaluation of educationally appropriate materials in a variety of media and formats. These include, but are not limited to, materials in print video, and software formats as well as combinations of these formats intended for use by teachers and students. The use of learning resources involves the teacher as a facilitator of learning. However, students may be expected to have some choice in materials for specific purposes such as independent outcomes at any particular level. A multimedia approach is encouraged. Some selected resources have been identified to support cross-curricular integration.

- 10
- 11
- 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April 12, 2005

Prerequisites: None

Course Synopsis:

This is a participatory course that motives students to provide mediation to others in their schools and communities. Peer mediation is based on the premise that students frequently relate to other students in a unique way when they are experiencing frustration and conflict in their relationships. Mediation is a way of working with conflict to find creative solutions that strengthen relationships for those in dispute. Students will work under the supervision of a teacher, mentor and/or administrator to provide mediation to students as individuals and/or small groups. Students will develop skills in communication, interpersonal relations, leadership, anger management, teamwork, conflict management, resolution and mediation. Students will also learn the value and complexity of social diversity as they work towards helping disputants create workable solutions.

Course Synopsis:

This course has been developed to assist students in understanding themselves and the behavior of other people (peers, parents, siblings, teachers, employers). Students face many challenges. Psychology 11 will present a framework from which students can begin to build on an understanding of human behavior. This course supports students in facing the challenges of interacting with groups, analyzing behavior, and gaining awareness of society. It is important that young people accept these challenges with a thorough base of knowledge rather than making opinions based on media and personal intuition. Through a series of units, students are exposed to the world of psychology and how it applies to the world in which they live.

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: April 20, 2004

Prerequisites: None

Course Synopsis:

This course is available to students in grades 11 and 12. Students taking the course will produce educational modules (in the form of multimedia productions) and offer them to community members through an innovative "train the trainer" approach. The BTD course is designed to provide students with opportunities to work closely with members of the community and create a sense of leadership and responsibility within the community.

The delivery of BTD in the classroom will focus on the development of leadership skills, self-confidence, creative thinking, and innovative problem solving. Students will have the opportunity to have fun, be creative and share their ideas with community members and classmates.

Students will research and analyse community needs, develop training modules to address those needs and offer the resulting training modules to community members free of charge. Students will decide on the best method of module development based on their analysis of the research, and use the equipment and software necessary to create the presentation. Equipment could include audio recorders, digital video cameras, digital image editors, web page editors, animation programs, video capture programs and others. As students progress through the course they will participate in ongoing evaluations of themselves and their peers.

The curriculum will be organized around three areas:

1. Active living - concepts, personal fitness, sports nutrition, positive attitude.

2. Movement - sport specific skill development, efficient body mechanics (alpine/nordic skiing, archery, bowling, curling, cycling, golf, fitness training, hiking, snow shoeing, racquetball, skating, squash, tennis, weight training).

3. Graduation Portfolio Development - assist the student in the development of his/her individual Graduation Portfolio. He/she will be assisted in the selection and presentation of his/her portfolio evidence that reflects his/her accomplishments, experiences, and plans following graduation. The physical activity standard of a minimum 80 hours of moderate to intense physical activity must be met in grade 11 and/or 12. A course fee (TBA) will be charged for this course since some activities engaged in by the class have a cost to the participant (i.e.: alpine skiing, bowling, fitness gym, golf and others).

The course content may vary each semester depending on class composition, equipment availability, site availability, weather, or other environmental limitations (seasons when course is offered).

School Name: Revelstoke Secondary
Course Name: Jazz Band 11
Course Code: YJE 11

Category: Fine Arts, Design, and Media
Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of Instruction: 100
Date Approved: May 24, 2005

Prerequisites: Jazz Band 10 or have permission from the instructor and be enrolled in an instrumental concert band

Course Synopsis:
The Jazz Band Program is designed to be a supplement to the Instrumental Concert Band Program. Students will learn and continue to improve many skills including jazz improvisation, jazz articulations and techniques, and jazz theory. Students will continue to present performances to the school and the public. The Jazz Band course has a strong emphasis on performance and uses a wide variety of repertoire to teach the basic topics.

All of the topics in the Jazz Band course are interconnected and taught throughout the duration of the course. It is expected that students will continue to learn throughout the year and improve their skills through individual and group practice.

The Jazz Band course focuses and emphasizes performance, since the students have acquired their musical foundation and ensemble skills (such as intonation, rhythm, dynamics, balance, and blend) in the Concert Band courses. All topics relate to performance and are oriented around the repertoire.

Learning Resources:
- Commercial Recordings of various Jazz musicians
- Videos
  - In the Key of Oscar
  - Sousa to Satchmo
  - The Buena Vista Social Club
  - The Glenn Miller Story
  - Yardbird
  - Ray
  - Beyond the Sea
- Multimedia
  - The Breathing Gym
- Finale Music Notation Software
- Garage Band Software
- Books
- Method Books
This course is based on the current Locally Developed Jazz Band Course and on the Instrumental Music Jazz Band Course offered by the Ministry of Education. This course operates outside of the timetable and will require students to perform in the evenings and weekends, including in late June, once classes are finished.

Course Code: YLEAD 10

Category: Fitness and Recreation

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of Instruction: 100

Date Approved: June 8, 2004

Prerequisites: None

Course Synopsis:

This course prepares and motivates students to provide leadership to others as well as benefit individually from the knowledge and skills they will develop. The topics that this course covers includes; self-awareness, leadership and leadership styles, goal setting, organization and time management, decision making and problem solving, teamwork and cooperation, communication skills, public speaking, and conflict resolution and mediation skills. Students will develop these skills in and outside of the classroom through theoretical and practical means. Participation in class activities and volunteering time in the school/community is essential to achieving the course goals.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: June 13, 2006

Prerequisites:

Course Synopsis:

This course builds upon Leadership 11 by encouraging the student to take on a greater leadership role within the school and community. In class students will cover, in depth, topics such as leadership traits and leadership styles, goal setting, organization and time management, decision making and problem solving, teamwork and cooperation, communication skills, public speaking, conflict mediation, and self awareness. Outside of the class, students will have the opportunity to put the knowledge and skills they have learned in class to practical use. They will be expected to find a mentor in the school or community and work with that person in a leadership role - taking on a greater responsibility than previous volunteer hours have required.

Course Name: Teacher Assistant 11

Course Code: YTA 11

Category: Other

Grade Level of Course:  
☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: March 21, 2006

Prerequisites: Teacher’s recommendation, counsellors approval, and completed lower level.

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Learning Resources:

This is a beginning list of learning resources that can be added to this curriculum

1. Employability Skills
   c. Planning 10 IRP
   d. Focus Areas document – Human Services/post-secondary/Career Resources

2. Video equipment
3. Books/texts/articles
   a. 7 Habits of Highly Effective Teens – Steven Covey
   b. Tutoring by Helping – Elizabeth Sabrinisky Foster
4. Work Experience 12 IRP
5. Related Materials
   a. Through CASAA – Canadian Association of Student Advisors www.casaa-resources.net/ (excellent source of student leadership materials.)
   b. Maslow’s Hierarchy of Needs http://web.utk.edu/~gwynne/maslow.HTM

This course provides many opportunities for students to add to their graduation portfolio including letters of reference, information about related careers, photo essays, videotapes and reports.
Student Teacher Assistants do not take the place of either the Classroom Teacher or School Support Workers. Instead they will enhance the learning environment in the classroom by becoming yet another part of the support team for students.

This framework was adapted from a framework developed by Chase Secondary School who recognized the support and information provided several others including the writing team of Kootenay-Boundary (Pat Dooley-Coordinator).

Grade Level of Course:  □ 10   □ 11   X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

Prerequisites: None

Course Synopsis:

This course has been developed to encourage students to explore three European languages and cultures. Students will learn basic Spanish, German and Italian vocabulary and phrases useful for travel. They will examine various aspects of Spanish, German, and Italian culture such as history, geography, art and architecture, music, film, and cuisine. Students will be encouraged to use technology to present their research projects.

Course Name: Fire Management & Silviculture 11

Course Code: YFMS 11

Category: Trades and Technology

Grade Level of Course:  

|   | 10 | X 11 | 12 |

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: Participation in the Forestry Program

Course Synopsis:

The Fire Management and Silviculture course is an introductory course for basic fire suppression and safety. Students explore the role of fire as a natural part of forest ecosystems and forest succession. Silviculture activities include opportunities to learn about seed collection, storage and distribution. Students will also be introduced to the seedling production process – from cone collection to tree planting.

Date Approved: November 26, 2008

Prerequisites: Completion of Grade 10

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Course Code: YVPA 10C
Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: November 26, 2008
Prerequisites: None

Course Synopsis:

This is the same course as YVPA 11C and YVPA 12C (it may be offered at any one of grade 10, 11, OR 12. The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the back bone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities.
To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Golf 10, 11

Course Synopsis:

Golf 12 is the third of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. Students are expected to have gone through the Golf 10 and 11 courses before they attempt the Golf 12 course. There is a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components that take into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught based upon the shots learned in the previous two courses. Students who take this course are expected to know the swing and shots from the previous two courses.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring. This course is organized into four units: Understanding Yourself as a Learner; Planning and Organizing for Learning; Reading for Learning and Writing for Learning. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Grade Level of Course: [ ] 10  [ ] 11  [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Within the Centre for Soccer Excellence (PS10 and PS11) the students will:
?
Receive outstanding instruction in an environment that is committed to athlete long-term development from qualified coaches/teachers.
?
Improve their skill and fitness through a variety of physical activities.
?
Be provided with an environment that will enable them to achieve academic goals and enhance their opportunities to purse post-secondary athletic and/or academic scholarships.
?
Receive sport science instruction including fitness, nutrition, strength training, sport physiology and mental training utilizing a variety of experts.
?
Be presented with opportunities to complete coaching, officiating and first aid certifications.
?
Be provided with a support network and educational opportunities using the school and soccer centre as a catalyst.

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 100
Date Approved: November 26, 2008
Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

- Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
- Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:

- Resiliency 11 is offered as a regular elective in a secondary school curriculum
- Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
- Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  March 8, 2006

Prerequisites:  None

Course Synopsis:

This program is specifically aimed at helping at-risk students to become reoriented and motivated to complete their education by allowing them to explore career options through a combination of unpaid work experience and academic intervention in a non-traditional classroom setting designed to facilitate individual and small group instruction. The program consists of career-related classroom instruction and work experience for secondary students, age 15 or older, who are currently enrolled as full-time students in the regular school program but who have the potential to drop out of school. Students will participate in 2 or 3 different work training experiences provided by the private sector for not more than 10-12 hours a week.

- [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

12  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: March 8, 2006

Prerequisites: None

Course Synopsis:

This course offers both male and female students the opportunity to learn and explore the world of elite sports. It will allow students to enhance their lives through exposure to elite training concepts and participation in elite sport experiences. The students will learn advanced skill analysis, mental and psychological training, goal setting, nutrition, and athletic training. Also the students will learn about and develop core strength, speed, agility, and endurance. The students will be certified in sport officiating, receive training in NCCP Level One coaching theory, and participate in an athletic training programme. Students will also learn the value of community contribution through the volunteer component of the course, which allows students to work with a variety of age groups in the sports community.

**Course Synopsis:**

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Course Synopsis:

This is the same course as YVPA 11C and YVPA 12C (it may be offered at any one of grade 10, 11, OR 12. The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the back bone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities. To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Course Synopsis:

Golf 10 is the first of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. This course is an alternative to Physical Education 10 with the exception that the location for the completion of the program would be on the golf course or practise facility rather than the gymnasium and that golf will be the physical activity focus, along with healthy lifestyles and personal and social responsibility.

This course, as is the case in Golf 11 and 12, leads students through a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components, which takes into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught. Students who take this course are expected to know the golf swing and the different shots, which are taught as extensions of the normal golf swing.

Course Name: Introduction to Recreational Vehicle Technician 12

Course Code: YIRT 12

Category: Trades and Technology

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring. This course is organized into four units: Understanding Yourself as a Learner; Planning and Organizing for Learning; Reading for Learning and Writing for Learning. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

11

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Category: Liberal Arts and Humanities

Grade Level of Course: 10 □ 11 X 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: English 10

Course Synopsis:

This is the first of two courses that will guide students through the diverse field of psychology. Psychology 11 will provide an interesting and comprehensive overview of selected areas in the field of psychology. The scientific study of human behavior will start with an introduction to the history of psychology, including pioneers in the development of modern psychology and the various schools of psychological thought. What psychologists do and careers in psychology will also be described. Psychological methods psychologists use to collect data and observe behavior are investigated. The purpose of statistics and the basic concepts of statistics used in psychology are covered. As well, the ethical use of research with humans and other animals is discussed. The course will look at what the characteristics and origins of abnormal behavior are. Classification of abnormal behaviors and the impact of mental disorders on society will also be discussed. Social psychology, including the following topics: attitude formation, individual and group behavior, bias, discrimination, conformity, obedience, altruism, aggression, plus the development and influence of cults are covered. Theories regarding states of consciousness, including sleep and dreams, and altered states of consciousness, including hypnosis and psychoactive drugs, will be introduced and reviewed. The course will conclude with a unit on the development of personality, theories of personality, and assessment tools used in personality development.

11  

12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Psychology 11, suggested Biology 11

Course Synopsis:

Psychology 12 is a locally developed course that takes an in-depth look at the biological background of psychology. There will be a focus on the scientific implications of biology and its influence on our conscious and unconscious reactions to a stimulus. Language and intellectual capabilities will be examined and the influence of culture and society on one’s development and retention. The concepts of memory and emotion will be studied in terms of biological basis and practical application within society. A brief review of psychological disorders will lead into the idea of psychotherapies and the various applications and disciplines. The final area of study will be developmental psychology, with an emphasis on the cycles experienced by humans throughout their life.

Course Code: YPA 11A

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

• Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
• Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:

• Resiliency 11 is offered as a regular elective in a secondary school curriculum
• Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
• Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Course Code: YSAIL 12

Category: Fitness and Recreation

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of Instruction: 110

Date Approved: November 10, 2004

Prerequisites: None

Course Synopsis:

Graduates of Sailing 12 will be competent to sail a dinghy in up to 25 knots of breeze. Students will follow Canadian Yachting Association Bronze Sail 4 curriculum in addition to learning about advanced weather forecasting, boat maintenance, racing, and physical fitness skills. Half of the course will take place on-water, where students will become skilled as both skipper and crew of a dinghy. The course will follow learning outcomes in the following subjects: Active Living, Movement, and Personal and Social Responsibility.

Course Name: Statistics 12

Course Code:

Category: Science and Applied Sciences

Grade Level of Course:   10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 8, 2006

Prerequisites: Principles of Mathematics 11

Course Synopsis:

This course has been developed to support and encourage students to develop methods that will allow them to gain knowledge from data. In this course, students will learn how to use statistical concepts and tools. Learning outcomes for the course are grouped under the curriculum organizers: Exploring and Understanding Data, Exploring Relationships Between Variables, Gathering Data, Randomness and Probability, Sampling Models and Proportions, Means, and Inference when Variables are Related. Students are given the opportunity for both theoretical and applied approaches to statistics though the use of lecture based assignments and laboratory work. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting data in a meaningful way.

Date Approved: March 8, 2006

Prerequisites: By recommendation

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and endgame knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Textile Studies 11, Textile Studies 12

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. Students will gain skills and knowledge in the technical aspects of pattern making and the construction of the garments they have designed. Students will redesign commercial patterns and create basic slopers, which are the beginning of flat pattern designs. Students proceed from an original design, applying their knowledge of the elements and principles of design, to full scale patterns, to finished garments. Students will explore the depth of the Canadian Apparel Industry and will focus on major Canadian Designers. Students will prepare for the Skills Canada Women’s Apparel Design and Construction Competition which is held each spring. Students will prepare for and model in a Fashion Show. With these acquired skills students will be able to pursue a career in fashion design.

Number of Hours of Instruction: 120

Date Approved: November 26, 2008

Prerequisites: Completion of Grade 10

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

This is the same course as YVPA 11C and YVPA 12C (it may be offered at any one of grade 10, 11, OR 12. The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the backbone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities.

To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

All of the visual objectives that are in a regular studio course would be the back bone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities.
To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Course Name: First Nations Art Studio 12

Course Code: YVPA 12C

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  
11  
X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2008

Prerequisites: None

Course Synopsis:

This is the same course as YVPA 10C and YVPA 11C (it may be offered at any one of grade 10, 11, OR 12). The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the back bone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities.

To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Category: Choose a Category

Grade Level of Course:  
10 [X]  
11  
12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: None

Course Synopsis:

Golf 10 is the first of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. This course is an alternative to Physical Education 10 with the exception that the location for the completion of the program would be on the golf course or practise facility rather than the gymnasium and that golf will be the physical activity focus, along with healthy lifestyles and personal and social responsibility.

This course, as is the case in Golf 11 and 12, leads students through a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components, which takes into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught. Students who take this course are expected to know the golf swing and the different shots, which are taught as extensions of the normal golf swing.

School Name: Kelowna Senior Secondary

Course Name: Health Science 12

Course Code: YHS 12

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Must be taken in conjunction with Biology 12

Course Synopsis:

Active living and wellness are integral in today’s society as health is being recognized as a basic resource. Fast paced lifestyles are contributing to an increase in cardiovascular disease and high stress environments. In addition to these factors, demographic surveys suggest that the percentage of our population over 50 years of age will increase dramatically over the next ten years. Consequently, there will be career opportunities in the traditional public health care system as well as private health and fitness businesses. The public school system needs to take a step in initiating and promoting interest and experience in this ever-growing sector.

The Health Science 12 course would provide students interested in health, physical fitness and leisure with the opportunity to investigate related career options as they develop fundamental health science related skills. The course will contribute to the physical, intellectual, human, social and career development needs of the students. The overall objective is to allow students to acquire the knowledge, skills and attitudes that will enable them to enhance their quality of life as well as exposing them to a rapidly increasing vocational field.

Health Science 12 will share a few common areas of study with Biology 12; however the focus of study in each course would be different. In Health Science 12 the focus would be placed on the promotion of health in systems of the body as well as examining disorders that may occur that inhibit normal functioning. (For a comparison of the learning outcomes for both courses refer to Appendix A).

Course Name: History of Rock and Roll: Cultural 11

Course Code: YHRR 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: February 23, 2005

Prerequisites: Social Studies 10

Course Synopsis:

This course has been developed to help students to discover the cultural, social and political roots of today's music. They will be encouraged to explore the synthesis of black musical styles brought to North America by the slave trade which were gradually incorporated into the white culture and out of which Rock and Roll was born. They will be further encouraged to look to the future of pop culture as Canadian and North American culture is infused with a widening range of world cultures. Students will combine musical experiences in a critical listening environment with explorations of the global happenings that occurred as the music developed. The units of music will be placed in a time frame as issues surrounding events often find their way into the music of the time. The music and history will be explored together to tie the events and issues to the music of the time in each unit using listening, analysis, discussion, writing, and creative responses. Learning outcomes for the course are grouped under the curriculum organizers: Skills and Processes, Social Issues, Cultural Issues, Political Issues, Religious Issues, and Environmental Issues. As students are given the instruction, support and opportunity to develop skills in collecting, interpreting, and presenting a variety of perspectives on significant issues of the day. Students are given the opportunity for self and peer assessment in each of the seven units.

School Name: Kelowna Senior Secondary

Course Name: Introduction to Recreational Vehicle Technician 12

Course Code: YIRT 12

Category: Trades and Technology

Grade Level of Course:  

☑ 10  ☐ 11  ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Course Name: Philosophy 12

Course Code: YPHIL 12

Category: Liberal Arts and Humanities

Grade Level of Course: 10, 11, x 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: English 10

Course Synopsis:

This is the first of two courses that will guide students through the diverse field of psychology. Psychology 11 will provide an interesting and comprehensive overview of selected areas in the field of psychology. The scientific study of human behavior will start with an introduction to the history of psychology, including pioneers in the development of modern psychology and the various schools of psychological thought. What psychologists do and careers in psychology will also be described. Psychological methods psychologists use to collect data and observe behavior are investigated. The purpose of statistics and the basic concepts of statistics used in psychology are covered. As well, the ethical use of research with humans and other animals is discussed. The course will look at what the characteristics and origins of abnormal behavior are. Classification of abnormal behaviors and the impact of mental disorders on society will also be discussed. Social psychology, including the following topics: attitude formation, individual and group behavior, bias, discrimination, conformity, obedience, altruism, aggression, plus the development and influence of cults are covered. Theories regarding states of consciousness, including sleep and dreams, and altered states of consciousness, including hypnosis and psychoactive drugs, will be introduced and reviewed. The course will conclude with a unit on the development of personality, theories of personality, and assessment tools used in personality development.

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 23, 2005
Prerequisites: Psychology 11, suggested Biology 11

Course Synopsis:

Psychology 12 is a locally developed course that takes an in-depth look at the biological background of psychology. There will be a focus on the scientific implications of biology and its influence on our conscious and unconscious reactions to a stimulus. Language and intellectual capabilities will be examined and the influence of culture and society on one’s development and retention. The concepts of memory and emotion will be studied in terms of biological basis and practical application within society. A brief review of psychological disorders will lead into the idea of psychotherapies and the various applications and disciplines. The final area of study will be developmental psychology, with an emphasis on the cycles experienced by humans throughout their life.

School Name: Kelowna Senior Secondary

Course Name: Reconnecting Youth 11

Course Code: YPA 11A

Category: Health and Human Services

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

• Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
• Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:

• Resiliency 11 is offered as a regular elective in a secondary school curriculum
• Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
• Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: November 8, 2006

Prerequisites: Principles of Mathematics 11

Course Synopsis:

This course has been developed to support and encourage students to develop methods that will allow them to gain knowledge from data. In this course, students will learn how to use statistical concepts and tools. Learning outcomes for the course are grouped under the curriculum organizers: Exploring and Understanding Data, Exploring Relationships Between Variables, Gathering Data, Randomness and Probability, Sampling Models and Proportions, Means, and Inference when Variables are Related. Students are given the opportunity for both theoretical and applied approaches to statistics though the use of lecture based assignments and laboratory work. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting data in a meaningful way.

Prerequisites: By recommendation

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Art Foundations 12

Course Synopsis:

This course is designed for students with a strong interest in visual art that intend to pursue work or study at a post secondary level. By grade 12, these students will already have a firm grounding in most aspects of visual arts and are ready to focus on one or two areas of study. Together with their instructor, they will design an individual area of focus, i.e. portraiture, hand built pottery, colour field painting. This individual area of focus will be supported by art history research that relates to their topic area. As well, supporting the career side of this course will be gallery and curatorial study and a unit that deals with commercial design in graphic, industry and architecture.

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

Course Name: Firefighting 12

Course Code: YPSS 12A

Category: Health and Human Services

Grade Level of Course:  

10  11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  November 26, 2008

Prerequisites:  Completion of Grade 10

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Course Name: First Nations Art Studio 10

Course Code: YVPA 10C

Category: Fine Arts, Design, and Media

Grade Level of Course:  

- [ ] 10  
- [ ] 11  
- [x] 12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

This is the same course as YVPA 11C and YVPA 12C (it may be offered at any one of grade 10, 11, OR 12). The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the back bone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities.

To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Course Synopsis:

Golf 10 is the first of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. This course is an alternative to Physical Education 10 with the exception that the location for the completion of the program would be on the golf course or practice facility rather than the gymnasium and that golf will be the physical activity focus, along with healthy lifestyles and personal and social responsibility.

This course, as is the case in Golf 11 and 12, leads students through a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components, which takes into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught. Students who take this course are expected to know the golf swing and the different shots, which are taught as extensions of the normal golf swing.

11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  
February 23, 2005

Prerequisites:  
None

Course Synopsis:

www.bcsta.org
Media and Current Events is a course designed to prepare and inform the naive or inexperienced mind to critically examine news at all levels and to appreciate the role of the media in selecting, packaging, and delivering the content. The course will examine the historical development of news media and consumer media. Being media literate instills within the individual a ‘media-receptive’ mindset, which encourages the person to actively question both purpose and persuasion.

Students will be expected to use their knowledge, experience, insight and imagination to understand the images – both visual and non-visual – created by the media. They will learn that being media literate requires more than being an active, questioning audience; it also requires applying knowledge and curriculum insight to facilitate an understanding of the intended ‘message’.

A media literate individual will be empowered to make a positive contribution to the world in which he or she lives. Imagination, curiosity, wisdom and sound judgment will enable the student as the audience, to better understand his or her own world and not be led into following or creating a false or incorrect image: an image created for and ‘published’ by agencies external to the self, family and community.

The student will become competent at identifying and ‘reading’ the message and the persuasion linked to this message. Furthermore, students will be able to evaluate the effectiveness of the message and its appropriateness in a specifically defined audience or a broader, public audience.

Students will be expected to enhance their ability to communicate and argue in writing and in voice. To reinforce and facilitate these learning processes, the writing process and the nature of argument are the learning strategies to be employed throughout the course.

This course is contemporary and relevant. Hence, current events and contemporary issues will be utilized to further fuel student and audience interest. Students will be required to submit articles to various local and national publications.

Course work will be expected to be factual, informative and objective. However, due to the nature of this course, students will also be expected to exercise persuasive language as a tool in the defense of argument. Once students experience and comprehend the power and influence of persuasive language, they will be required to exercise their newfound ‘power’ with integrity and taste.

Students will be introduced to basic strategies in the various media, learning how the intended audience or publication will affect the style, format and the content of the ‘the message’. Students will learn that advertisements, film, song, news stories, and photographs can be presented from several points of view, depending on the intent of the producer or editorial policy. Producers, station managers and editors, combined with the demographics of the intended audience, will dictate the style and format of ‘the message’. Finally, students will become aware of the journalists’ responsibility to accurately and objectively inform the public versus the media mandate to ‘sell information’ through sensationalism, exploitation and media capitalism.

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 23, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to allow students with an interest in outdoor education/pursuits an opportunity to explore the many aspects of outdoor leadership, including outdoor trip planning and preparation, wilderness first aid leadership, risk management, route finding and navigation. Through study and practice students will develop outdoor leadership skills.

The course will include many activities outside of school, such as: canoeing, rock climbing, back packing, camping, winter camping. Students will discuss and practice leadership skills and learn to work as a team with a focus on helping one another become effective outdoor leaders. The course will provide students the opportunity to develop their social skills as well as help advance their outdoor skills. Given the outdoor leadership emphasis of the course, it is strongly recommended that students take Outdoor Education 11 or equivalent prior to enrolling in this course.

10  
11  
12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 23, 2005
Prerequisites: Teacher Recommendation

Course Synopsis:

Peer Counselling 11 is designed to provide training to students in communication, interpersonal and counselling intervention skills. Students will also develop greater self-awareness and self esteem through a variety of self exploratory and team building activities. These skills enable students to help their peers with the problem-solving process, and take an active role in helping their peers with the problem solving process, and to create and deliver prevention programs in a Secondary School. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to meet with individuals who work at various aspects of the profession.

Course Name: Peer Counselling 12

Course Code: YPCOU 12

Category: Health and Human Services

Grade Level of Course: [ ] 10  [ ] 11  [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Peer Counselling 12

Course Synopsis:

Peer Counselling 12 is designed as a follow-up course to Peer Counselling 11 but students will be expected to participate as facilitators in Resiliency Skills Training Sessions at our feeder schools as their major project. Students will continue to develop greater self-awareness and self esteem through a variety of self exploratory and team building activities and to practice their counselling skills through interactions with each other at a two day Retreat off campus.

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 23, 2005

Prerequisites: Staff Recommendation

Course Synopsis:

By the end of the Peer Tutoring 11 course, a student will have gained knowledge and skills related to teaching and learning. Students will develop a basic understanding of learning disabilities that impact on student learning and achievement. They will understand the purpose and need for effective communication skills, the variety of teaching and learning styles that people exhibit and the effectiveness of supporting others in a peer relationship. Students will have a greater understanding of the complexity of the teaching-learning process and the importance of human relationships in the process.

Course Name: Philosophy 12

Course Code: YPHIL 12

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10 □ 11 ✔ 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: March 8, 2006

Prerequisites: C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Grade Level of Course:  
- 10
- 11
- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: English 10

Course Synopsis:

This is the first of two courses that will guide students through the diverse field of psychology. Psychology 11 will provide an interesting and comprehensive overview of selected areas in the field of psychology. The scientific study of human behavior will start with an introduction to the history of psychology, including pioneers in the development of modern psychology and the various schools of psychological thought. What psychologists do and careers in psychology will also be described. Psychological methods psychologists use to collect data and observe behavior are investigated. The purpose of statistics and the basic concepts of statistics used in psychology are covered. As well, the ethical use of research with humans and other animals is discussed. The course will look at what the characteristics and origins of abnormal behavior are. Classification of abnormal behaviors and the impact of mental disorders on society will also be discussed. Social psychology, including the following topics: attitude formation, individual and group behavior, bias, discrimination, conformity, obedience, altruism, aggression, plus the development and influence of cults are covered. Theories regarding states of consciousness, including sleep and dreams, and altered states of consciousness, including hypnosis and psychoactive drugs, will be introduced and reviewed. The course will conclude with a unit on the development of personality, theories of personality, and assessment tools used in personality development.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Psychology 11, suggested Biology 11

Course Synopsis:

Psychology 12 is a locally developed course that takes an in-depth look at the biological background of psychology. There will be a focus on the scientific implications of biology and its influence on our conscious and unconscious reactions to a stimulus. Language and intellectual capabilities will be examined and the influence of culture and society on one’s development and retention. The concepts of memory and emotion will be studied in terms of biological basis and practical application within society. A brief review of psychological disorders will lead into the idea of psychotherapies and the various applications and disciplines. The final area of study will be developmental psychology, with an emphasis on the cycles experienced by humans throughout their life.

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

• Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
• Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:

• Resiliency 11 is offered as a regular elective in a secondary school curriculum
• Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
• Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Course Name: Statistics 12

Category: Science and Applied Sciences

Grade Level of Course: □ 10 □ 11 □ □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 8, 2006

Prerequisites: Principles of Mathematics 11

Course Synopsis:

This course has been developed to support and encourage students to develop methods that will allow them to gain knowledge from data. In this course, students will learn how to use statistical concepts and tools. Learning outcomes for the course are grouped under the curriculum organizers: Exploring and Understanding Data, Exploring Relationships Between Variables, Gathering Data, Randomness and Probability, Sampling Models and Proportions, Means, and Inference when Variables are Related. Students are given the opportunity for both theoretical and applied approaches to statistics though the use of lecture based assignments and laboratory work. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting data in a meaningful way.

Date Approved: March 8, 2006

Prerequisites: By recommendation

**Course Synopsis:**

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Course Name: War and Society 12

Course Code: YWSY 12

Category: Liberal Arts and Humanities

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 31, 2005

Prerequisites: Social Studies 11 or permission from instructor

Course Synopsis:

War and Society 12 builds on the foundation of knowledge, skills, and understanding that students gain in social studies from their early years through Grade 11. The curriculum introduces students to the discipline of history as part of their wider education. It also prepares them for continued study in history and careers in the social sciences and humanities.

War and Society 12 is a study of military history from Greece and Rome to the end of the Second World War. The phenomenon of war has had a compelling effect on the social, economic and political life of society, and as such becomes an important focus of historical study. One cannot understand war without understanding its political and social underpinnings. Conversely, one cannot understand political history or cultural development without understanding war. This course is roughly divided between the period leading up to the end of the First World War and a more intensive study of the Second World War.

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through three main processes: computer assisted drafting; computer assisted machining; and computer numerical control. Students will take projects from the design stage right to the completed artifact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Course Name: Career Explorations 10

Course Code: YCE 10

Category: Trades and Technology

Grade Level of Course: [x] 10 [ ] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: None

Course Synopsis:

This program is specifically aimed at helping at-risk students to become reoriented and motivated to complete their education by allowing them to explore career options through a combination of unpaid work experience and academic intervention in a non-traditional classroom setting designed to facilitate individual and small group instruction. The program consists of career-related classroom instruction and work experience for secondary students, age 15 or older, who are currently enrolled as full-time students in the regular school program but who have the potential to drop out of school. Students will participate in 2 or 3 different work training experiences provided by the private sector for not more than 10-12 hours a week.

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

This is the same course as YVPA 11C and YVPA 12C (it may be offered at any one of grade 10, 11, OR 12. The historic and current visual culture that our First Nations have created is arguably the strongest visual arts force in our country today. Such a powerful force deserves and can maintain an entire course at the high school level. This would be a studio visual arts course based in the cultural context of First Nations visual art. The main emphasis would be the visual development of each student within that context. All of the visual objectives that are in a regular studio course would be the backbone of this course: composition, colour theory, line, shape as well as the skills of drawing, painting and sculpting. The cultural context would be the fuel and the purpose of the visual activities. To ensure a rich and diverse cultural experience, as often as possible, members from the First Nations community will be relied upon.

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved:  February 23, 2005
Prerequisites:  None

Course Synopsis:

Golf 10 is the first of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. This course is an alternative to Physical Education 10 with the exception that the location for the completion of the program would be on the golf course or practise facility rather than the gymnasium and that golf will be the physical activity focus, along with healthy lifestyles and personal and social responsibility.

This course, as is the case in Golf 11 and 12, leads students through a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components, which takes into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught. Students who take this course are expected to know the golf swing and the different shots, which are taught as extensions of the normal golf swing.

Grade Level of Course:  
10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Must be taken in conjunction with Biology 12

Course Synopsis:

Active living and wellness are integral in today’s society as health is being recognized as a basic resource. Fast paced lifestyles are contributing to an increase in cardiovascular disease and high stress environments. In addition to these factors, demographic surveys suggest that the percentage of our population over 50 years of age will increase dramatically over the next ten years. Consequently, there will be career opportunities in the traditional public health care system as well as private health and fitness businesses. The public school system needs to take a step in initiating and promoting interest and experience in this ever-growing sector.

The Health Science 12 course would provide students interested in health, physical fitness and leisure with the opportunity to investigate related career options as they develop fundamental health science related skills. The course will contribute to the physical, intellectual, human, social and career development needs of the students. The overall objective is to allow students to acquire the knowledge, skills and attitudes that will enable them to enhance their quality of life as well as exposing them to a rapidly increasing vocational field.

Health Science 12 will share a few common areas of study with Biology 12; however the focus of study in each course would be different. In Health Science 12 the focus would be placed on the promotion of health in systems of the body as well as examining disorders that may occur that inhibit normal functioning. (For a comparison of the learning outcomes for both courses refer to Appendix A).

Grade Level of Course: ☒ 10 ☐ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring. This course is organized into four units: Understanding Yourself as a Learner; Planning and Organizing for Learning; Reading for Learning and Writing for Learning. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Name: Philosophy 12

Course Code: YPHIL 12

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: English 10

Course Synopsis:

This is the first of two courses that will guide students through the diverse field of psychology. Psychology 11 will provide an interesting and comprehensive overview of selected areas in the field of psychology. The scientific study of human behavior will start with an introduction to the history of psychology, including pioneers in the development of modern psychology and the various schools of psychological thought. What psychologists do and careers in psychology will also be described. Psychological methods psychologists use to collect data and observe behavior are investigated. The purpose of statistics and the basic concepts of statistics used in psychology are covered. As well, the ethical use of research with humans and other animals is discussed. The course will look at what the characteristics and origins of abnormal behavior are. Classification of abnormal behaviors and the impact of mental disorders on society will also be discussed. Social psychology, including the following topics: attitude formation, individual and group behavior, bias, discrimination, conformity, obedience, altruism, aggression, plus the development and influence of cults are covered. Theories regarding states of consciousness, including sleep and dreams, and altered states of consciousness, including hypnosis and psychoactive drugs, will be introduced and reviewed. The course will conclude with a unit on the development of personality, theories of personality, and assessment tools used in personality development.

Course Name: Psychology 12

Course Code: YPSY 12

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Psychology 11, suggested Biology 11

Course Synopsis:

Psychology 12 is a locally developed course that takes an in-depth look at the biological background of psychology. There will be a focus on the scientific implications of biology and its influence on our conscious and unconscious reactions to a stimulus. Language and intellectual capabilities will be examined and the influence of culture and society on one’s development and retention. The concepts of memory and emotion will be studied in terms of biological basis and practical application within society. A brief review of psychological disorders will lead into the idea of psychotherapies and the various applications and disciplines. The final area of study will be developmental psychology, with an emphasis on the cycles experienced by humans throughout their life.

Course Name: Reconnecting Youth 11

Course Code: YPA 11A

Category: Health and Human Services

Grade Level of Course: [ ] 10  [x] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

• Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
• Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:

• Resiliency 11 is offered as a regular elective in a secondary school curriculum
• Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
• Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Course Code:

Category: Science and Applied Sciences

Grade Level of Course: 10  11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 8, 2006

Prerequisites: Principles of Mathematics 11

Course Synopsis:

This course has been developed to support and encourage students to develop methods that will allow them to gain knowledge from data. In this course, students will learn how to use statistical concepts and tools. Learning outcomes for the course are grouped under the curriculum organizers: Exploring and Understanding Data, Exploring Relationships Between Variables, Gathering Data, Randomness and Probability, Sampling Models and Proportions, Means, and Inference when Variables are Related. Students are given the opportunity for both theoretical and applied approaches to statistics though the use of lecture based assignments and laboratory work. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting data in a meaningful way.

Number of Hours of instruction: 100-120

Date Approved: March 8, 2006

Prerequisites: By recommendation

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

School Name: Rutland Senior Secondary
Course Name: Environmental Sciences 12
Course Code: YENSC 12
Category: Science and Applied Sciences

Grade Level of Course:  
- [X] 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 23, 2005
Prerequisites: None (Chem & Bi 11 recom)

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of the natural environment. Students learn of the natural world and then spend course time researching the decline in the quality of air, land and water resources, primarily since the onset of the Industrial Revolution. Individual and group projects are designed to investigate specific issues and propose hypothetical solutions to these issues. Students are allowed to design class presentations using techniques which most interest them, including Power Point, skits, games, video, and posters. Learning outcomes for the course include analysis of issues, development of creative avenues to present information, and self and peer assessments. Students are expected to become involved in local and regional environmental action plans. Community sponsors are contacted and larger environmental activities are engaged by the students. The approach outlined above supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting a variety of perspectives on significant issues.

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

	□ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  
	February 23, 2005

Prerequisites:  
	None

Course Synopsis:

Golf 10 is the first of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. This course is an alternative to Physical Education 10 with the exception that the location for the completion of the program would be on the golf course or practise facility rather than the gymnasium and that golf will be the physical activity focus, along with healthy lifestyles and personal and social responsibility.

This course, as is the case in Golf 11 and 12, leads students through a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components, which takes into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught. Students who take this course are expected to know the golf swing and the different shots, which are taught as extensions of the normal golf swing.

Course Name: Introduction to Recreational Vehicle Technician 12

Course Code: YIRT 12

Category: Trades and Technology

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring. This course is organized into four units: Understanding Yourself as a Learner; Planning and Organizing for Learning; Reading for Learning and Writing for Learning. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Grade Level of Course:  

☐ 10  ☑ 11  ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  March 8, 2006

Prerequisites:  C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Course Name: Production Graphics 10

Course Code: YPRGR 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: February 23, 2005

Prerequisites: None

Course Synopsis:

This course will introduce students to the world of graphics and print media. Students will learn how the graphics industry works and how each component functions together. The emphasis of the program will be to expose students to all aspects of the graphics industry so they can better understand each process. This exposure will be gained by designing and creating their work on industry standard computer programs, outputting their files to a production method, printing their work on traditional printing equipment and assembling and binding their completed projects. Students will also have the opportunity to design and create products using other standard industry equipment, i.e. shirt presses or button makers.

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: None

Course Synopsis:

Students enrolled in this senior course will get first-hand experience working in an industry graphics setting. The first section will continue to expand the students' knowledge in the graphics field. They will focus on improving their design and layout skills by generating new products with school generated clients. This will help them work through a deadline and produce work with more realistic pressures. The second section will introduce them to an ever-growing aspect of the graphics field, interactive media. Students will use all the previous software they are currently familiar with and create an interactive graduation portfolio using Macromedia Flash. This will combine all their design, layout and creativity skills into one final work that can be used with their traditional graduation portfolio or as an interactive and possibly online resume. The third section will give each student the opportunity to focus on one of two aspects of the graphics industry, pre-press or press. Once in their chosen sections, they will learn to communicate with each other just as industry would require it of them. They will spend the remainder of the year working through projects that could come from other teachers, the office or the community. Upon completion, students will have an excellent background in many aspects of the graphics industry. If they choose to continue their education in this field, they will be better able to make an educated decision to which area they would like to pursue.

Prerequisites: English 10

Course Synopsis:

This is the first of two courses that will guide students through the diverse field of psychology. Psychology 11 will provide an interesting and comprehensive overview of selected areas in the field of psychology. The scientific study of human behavior will start with an introduction to the history of psychology, including pioneers in the development of modern psychology and the various schools of psychological thought. What psychologists do and careers in psychology will also be described. Psychological methods psychologists use to collect data and observe behavior are investigated. The purpose of statistics and the basic concepts of statistics used in psychology are covered. As well, the ethical use of research with humans and other animals is discussed. The course will look at what the characteristics and origins of abnormal behavior are. Classification of abnormal behaviors and the impact of mental disorders on society will also be discussed. Social psychology, including the following topics: attitude formation, individual and group behavior, bias, discrimination, conformity, obedience, altruism, aggression, plus the development and influence of cults are covered. Theories regarding states of consciousness, including sleep and dreams, and altered states of consciousness, including hypnosis and psychoactive drugs, will be introduced and reviewed. The course will conclude with a unit on the development of personality, theories of personality, and assessment tools used in personality development.

Course Name: Psychology 12

Course Code: YPSY 12

Category: Liberal Arts and Humanities

Grade Level of Course: [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Psychology 11, suggested Biology 11

Course Synopsis:

Psychology 12 is a locally developed course that takes an in-depth look at the biological background of psychology. There will be a focus on the scientific implications of biology and its influence on our conscious and unconscious reactions to a stimulus. Language and intellectual capabilities will be examined and the influence of culture and society on one’s development and retention. The concepts of memory and emotion will be studied in terms of biological basis and practical application within society. A brief review of psychological disorders will lead into the idea of psychotherapies and the various applications and disciplines. The final area of study will be developmental psychology, with an emphasis on the cycles experienced by humans throughout their life.

School Name: Rutland Senior Secondary
Course Name: Reconnecting Youth 11
Course Code: YPA 11A
Category: Health and Human Services

Grade Level of Course: [ ] 10 [x] 11 [ ] 12
Number of Course Credits: 4
Number of Hours of instruction: 100
Date Approved: November 26, 2008
Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:
- Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
- Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:
- Resiliency 11 is offered as a regular elective in a secondary school curriculum
- Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
- Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Course Synopsis:

Graduates of Sailing 12 will be competent to sail a dinghy in up to 25 knots of breeze. Students will follow Canadian Yachting Association Bronze Sail 4 curriculum in addition to learning about advanced weather forecasting, boat maintenance, racing, and physical fitness skills. Half of the course will take place on-water, where students will become skilled as both skipper and crew of a dinghy. The course will follow learning outcomes in the following subjects: Active Living, Movement, and Personal and Social Responsibility.
Course Synopsis:

This course has been developed to support and encourage students to develop methods that will allow them to gain knowledge from data. In this course, students will learn how to use statistical concepts and tools. Learning outcomes for the course are grouped under the curriculum organizers: Exploring and Understanding Data, Exploring Relationships Between Variables, Gathering Data, Randomness and Probability, Sampling Models and Proportions, Means, and Inference when Variables are Related. Students are given the opportunity for both theoretical and applied approaches to statistics though the use of lecture based assignments and laboratory work. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting data in a meaningful way.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: March 8, 2006

Prerequisites: By recommendation

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Course Code: YLRA 12F

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Chess 12 is a course designed to introduce students to the world of chess. It will give students the opportunity to develop opening strategies, tactical play and end game knowledge; to bring them from a beginner to intermediate level of play (1100 to 1300 CFC rating or an equivalent 200 point increase in rating ability). It will cover a minimum of 15 chess openings; common mid-game strategies and tactics with end-game methods and several checkmating motifs. It will also teach visualization techniques as well as algebraic notation for the recording of games. Chess clock use and chess etiquette will also be taught. There will be a research component on the historic games of several renowned chess masters by reviewing and analyzing a minimum of 30 famous games. This knowledge will then be put into practice with interclass competition and tournaments.

Prerequisites: Completion of Grade 10

Course Synopsis:

With the increasing disappearance of the “baby boomers” in the workforce, there are large numbers of retirements from fire departments across the country. The opportunities for students to enter this “dream” career have never been so numerous. Likewise, fire departments that depend on paid-on-call fire fighters as a significant portion of their workforce need a steady supply of acceptable candidates from which to draw future members. This Fire Fighting 12 course is our attempt to help our students discover and qualify for an exciting, rewarding career of vital service to their community. At the same time, we are assisting our local fire department, Westside Fire / Rescue, to address a recruitment situation in a timely manner.

Course Synopsis:

The Forest Engineering course is an introductory course for road and block layout, and builds on basic information gained in previous Forestry courses. Students will be introduced to road and block layout, review their Geographic Positioning System (GPS) skills and learn hand traversing. An introduction to Terrain Stability for sensitive slopes and the computer program RoadEng are also included.

Course Name: Golf 12

Course Code: YGOLF 12

Category: Fitness and Recreation

Grade Level of Course:  □ 10  □ 11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 23, 2005

Prerequisites: Golf 10, 11

Course Synopsis:

Golf 12 is the third of the series of the Learn, Practice, Play series of golf instruction that the Central Okanagan Golf Academy offers. Students are expected to have gone through the Golf 10 and 11 courses before they attempt the Golf 12 course. There is a natural progression of instruction that sequences the parts of the golf swing. The golf swing is broken down into its components that take into account the swing mechanics as well as the physiological differences in body types. After the swing has been instructed, different shots are taught based upon the shots learned in the previous two courses. Students who take this course are expected to know the swing and shots from the previous two courses.

Course Name: Introduction to Recreational Vehicle Technician 12

Course Code: YIRT 12

Category: Trades and Technology

Grade Level of Course: 10 ☐ 11 ☐ 12 ☑

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 28, 2007

Prerequisites: None

Course Synopsis:

Beginning with the basics, this course develops a student’s technical skills through the production and maintenance of recreational vehicles. The course focuses on the construction of a small RV but also includes maintenance, upgrades and renovations of existing RV’s. Students will learn about the following topics: RV design; frame construction; wall, floor and roof framing; electrical; plumbing; cabinetry; waterproofing and finishing. Students will have some choice in the design of the base unit to be constructed. This is a hands-on, project-based course designed as an introduction, and potentially a stepping stone, to the RV Technician program offered at Okanagan College.

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 8, 2006

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring. This course is organized into four units: Understanding Yourself as a Learner; Planning and Organizing for Learning; Reading for Learning and Writing for Learning. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Prerequisites:  

C+ in Eng. 11 or Eng. 12

Course Synopsis:

Students will develop the various dimensions of their thinking -- imaginative, critical, analytical, and problem-solving skills -- as they work on their essays and oral presentations. Guided practice in analytical reading and in the writing of well-argued prose will help students to articulate, examine, and reflect on their own ideas, as well of those of others. Study of formal and informal reasoning in the particularly rigorous style used in philosophy enables students to develop skills of argument in a systematic way. As students become acquainted with philosophical questions and methods, they learn to think with more insight and clarity about issues touching their own lives and about larger issues in the world around them.

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: November 26, 2008

Prerequisites: None

Course Synopsis:

Resiliency 11 is a course developed from the Reconnecting Youth (RY) prevention program curriculum for high school students who are ‘disconnected’ from school and who are at-risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:
• Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk
• Enhance personal and social protective factors

Resiliency 11 was developed and its effectiveness researched under the following conditions:
• Resiliency 11 is offered as a regular elective in a secondary school curriculum
• Resiliency 11 is delivered for credit in daily class sessions typically 55 - 75 minutes per class during regular school hours.
• Resiliency 11 is taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-20

Course Name: Peer Helping 11

Course Code: YPHEL 11

Category: Health and Human Services

Grade Level of Course:  ☐ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: application and interview

Course Synopsis:

Peer Helping 11 is a program that encourages the development of a positive identity and responsible independence as students experience more control over their environment (the school and community).

The major goals of the program are to augment a school climate that:

- encourages the development of responsible independence and a positive identity.
- promotes school safety by providing an alternative for students seeking help.
- creates opportunities for students to learn how to actively and intentionally use their experiences to gain new levels of confidence and competence.
- encourages opportunities for early intervention to deal with adolescent difficulties, especially in the areas of:
  - how to make and keep friends,
  - achieving in school,
  - loneliness,
  - boredom,
  - understanding and expressing feelings,
  - drugs and alcohol, and
  - getting along with parents.
- involves students in identifying and meeting student perceived needs.

Learning Resources:

Initially, the students will complete an application form for the Peer Helping program. A panel, the makeup of which is still to be determined, will conduct interviews. A maximum of eight students (two per block) will be selected at which time they and their parents will be informed.

The instructor will provide the materials required for this course. Students will be required to keep a separate binder for all the materials and a journal for submission.

A video camera will be made available for students to practise their attending skills, but students will be expected to provide their own tape.
**Additional Information:**

One of the key aspects of this program is that peer helpers can provide a great benefit to the school. It can provide a channel to reach more students and team members can be trained to take care of the “minor” problems so that students with these problems are seen sooner than perhaps they would have and are dealt with while they are of smaller proportion. In addition, students are a good source of ideas. They have energy, they are able to pinpoint key areas of concern and they are sensitive to other students’ problems. Because they see problems in a different way, peer helpers can be invaluable in providing ideas on how to deal with problem situations as well as be a resource to help carry them out.

10  
11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

First Nations programs involve more than the study of the spoken and written word. Language and culture go hand in hand, therefore any heritage language curricula should have a strong cultural component. One of the aims of First Nations language programs should be to assist students in learning their language and understanding their culture. This goal will develop in students an understanding and appreciation of Aboriginal traditions, customs, ceremonies, values and beliefs.

From a very early age, individuals are and should be encouraged to spend time with respectful Elders. In the traditional First Nations cultures, Elders are the teachers and advisors who pass on knowledge, skills and advice to the younger generations. Students are encouraged to talk to knowledgeable Elders in their family, community and Nation.

A First Nations language program must incorporate a holistic perspective of the world, one where honesty and respect are the foundations of the culture. Students are and should be taught to be honest and respect themselves, others and the world around them.

Traditional First Nations cultures meant living in harmony with the natural world. This is an important concept in First Nations cultures. Individuals were and still should be taught to be caretakers of the land and use resources wisely. Individuals are and should be taught to take only what is needed and to give thanks for what is received. Connections between an individual and their environments are integral part of the development of a person.

Learning Resources:

- Carrier Curriculum Binder
- Cultural Teaching aides
- Dr. Berty Segal’s Total Physical Response Program
- Guest speakers, resource people and Elders
- Birchwater Sage, Ulkatcho Food and Medicine Plants, Ulkatcho Curriculum committee, 1996
- Birchwater Sage, Stories of the Grease Trail, Ulkatcho Curriculum Committee, 1993

Prerequisites: none

Course Synopsis:

In this course, students will learn the basics of 3D computer modelling for animation. The goal is to acquire knowledge of computer modelling techniques and to be able to produce modeled objects for animations and architectural/industrial designs.

Students will gain skills in how to use the Rhino modelling program to make 3D objects ranging from toys to automobiles and architectural structures. Following a series of professionally designed tutorials, they explore the extensive range of modelling tools available in the Rhino program, and since many 3D modelling programs use similar tools and interfaces, acquire skills transferable to other modelling and drafting programs such as Lightwave and AutoCad.

The students also learn about other graphic and modelling programs available by searching industry websites for images and textures for their models and scenes. They are shown how to manipulate these images in Photoshop if necessary for their projects.

All students are required upon completion of the tutorial to design and model a major project of choice, using the majority of modelling tools from the tutorials. They are encouraged to design their projects with an animation in mind but can treat it as an architectural or industrial design project as well. Students who complete all of the tutorials and the major design project early are introduced to the Lightwave animation program and are encouraged to produce a small animation.

Learning Resources:

All the learning resources, such as tutorial handouts, instruction manuals, model and animation examples, are already available in the school.

A huge amount of free downloadable textures, images, 3D models, modeling and animation tutorials, as well as free professional advice from the Rhino and Lightwave websites is readily available from the Internet.

School Name: Columneetza Secondary

Course Name: Conservation and Outdoor Recreation Education 10

Course Code: YCORE 10

Category: Other

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

This course is open to all students in Grades 9-12. Anyone 14 years of age and over must successfully complete the entire CORE program before obtaining a B.C. hunting license, however anyone with an interest in the outdoors is welcome to take this course. You can gain credit for taking the Columneetza CORE course (2 credits) without gaining your B.C. Hunter Number by passing the classroom work and not the Practical Gun Handling Test, which is optional.

The course covers the required topics that form the basis for the CORE examinations beginning with hunter education requirements and license provisions of the Wildlife Act, then, conservation, ethics, laws and regulations, survival, firearms, mammals, and birds.

On successful completion of all aspects of the course a $30 fee, payable to the B.C. Wildlife Federation, is required in order to receive a B.C. Hunter Number.

Learning Resources:

- CORE Textbook (2002),
- BC Hunting and Trapping Synopsis (current)
- Videos and Overheads
- Instructor Expertise
- Additional Reading Material (pamphlets and newspaper articles)
- Instructional Posters,
- Hands-on Instructional Aids (i.e. firearms and ammunition)
This course provides an exciting and motivating introduction to the world of video production. The curriculum will focus on basic video camera techniques, basic structure of commercials and public service announcements, basic script writing, and video editing on computer. The pre-production, production, post-production cycle of media development will be explored and experienced.

**Learning Resources:**

- Video and editing equipment manuals
- Articles and information about video production from the Internet
- Back issues of Video Maker Magazine.
- Various Video production “How To” videos
- Books
  - Beginners Final Cut Pro, M Rubin, Peach Pit Press, June 2002

**Additional Information:**

This course has been running in various forms for the past eight years. First at Anne Stevenson, and now at Columnetza. The equipment to run this program is already in place. The program is very popular with students. Students can make copies of their projects for their portfolios.

School Name: Columneetza Secondary

Course Name: Fire Suppression 12

Course Code: YFRS 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 2

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

This course intends to train students in the basic theories behind fire fighting strategies and how to put them into practice. All aspects of fire suppression work and fire line safety are covered, including the fundamentals of fire fighting, radio communications, wilderness survival, fire line safety, pumps and water delivery systems, helicopters and chainsaw safety.

Learning Resources:

Resources for the Ministry of Forests certification are obtained from:
· S-100 Basic Fire Suppression and Safety
· S –111 Fire Weather
· S-185 Fire Entrapment Avoidance
· Fire Behaviour Red Book
· Bear Awareness – Steve Richburg

Other resources:
· Transportation Endorsement Training Guide – WCB
· WHMIS at Work – WCB
· Resumes and Cover Letters – ESP Consulting

Additional Information:

The technical component of this course is delivered by and partnership by members of the Ministry of Forests Protection Branch.

Certified instructors within the School District deliver the Safety Certification aspects to industry standards. Those areas of course content such as Resume Writing and Interview Skills are delivered by professional agencies within the community.

The entire course is delivered outside of the regular school instructional hours.

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

First Nations programs involve more than the study of the spoken and written word. Language and culture go hand in hand, therefore any heritage language curricula should have a strong cultural component. One of the aims of First Nations language programs should be to assist students in learning their language and understanding their culture. This goal will develop in students an understanding and appreciation of Aboriginal traditions, customs, ceremonies, values and beliefs.

From a very early age, individuals are and should be encouraged to spend time with respectful Elders. In the traditional First Nations cultures, Elders are the teachers and advisors who pass on knowledge, skills and advice to the younger generations. Students are encouraged to talk to knowledgeable Elders in their family, community and Nation.

A First Nations language program must incorporate a holistic perspective of the world, one where honesty and respect are the foundations of the culture. Students are and should be taught to be honest and respect themselves, others and the world around them.

Traditional First Nations cultures meant living in harmony with the natural world. This is an important concept in First Nations cultures. Individuals were and still should be taught to be caretakers of the land and use resources wisely. Individuals are and should be taught to take only what is needed and to give thanks for what is received. Connections between an individual and their environments are integral part of the development of a person.

Course Synopsis:

The goal of this course is to introduce students to a new facet of sports, the area of sports injuries.

This course will include both a theory and practical component that will enable students to make quick, clear decisions regarding sport or fitness related injuries. Furthermore they will learn to implement injury prevention strategies and develop the ability to deal confidently with emergency situations and injuries.

Through this course students can be recognized by the Sports Medicine Council of BC with a letter of completion for Taping Level II and Sports First Aid. They will also have the opportunity to become certified in St. John Emergency First Aid and Basic CPR.

Learning Resources:

- Tape and tape supplies
- Best Practices Quarterly from SportMedBC
- A Teacher's Curriculum Guide to Sports Medicine, J. Lauer, Cramer Products Inc.,
- First Aid First on the Scene, St. John Ambulance, 2002
- St. John Ambulance First on the Scene Videos

Course Synopsis:

The Aviation Technology 11 course is designed to acquaint students with the large number of job and career opportunities offered in the aviation/aerospace industry. It is also designed to acquaint students with the knowledge, skills and attitudes relevant to the work place.

Students will have the opportunity to research and explore the history of aviation, theory of flight, aircraft design, construction, and maintenance, aircraft operations, air law, meteorology, navigation and communication, airmanship and safety issues related to aircraft operations.

The course is also designed to give students the knowledge, skills and tools necessary to plan their careers in an informed manner.

Units and lessons will provide students with a varied learning experience. Instructional strategies and course content will incorporate hands on learning, research, field trips, guest speakers, lab work and experimentation, individual and group projects, recommended readings, class discussions…etc. The course also serves to co-ordinate learning in mathematics, science, geography, metal, and drafting areas.

Course Name: Consumer Education 12

Course Code: YCNE 12

Category: Other

Grade Level of Course:  

| 10 | 11 | X 12 |
---|---|---|

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: Planning 10 is recommended

**Course Synopsis:**

Consumer education empowers us and makes us more knowledgeable about the products and services we buy and use. This course is concerned with the skills, attitudes, knowledge and understanding necessary to become an effective consumer. It equips students with the skills to make discerning choices, to sort out problems effectively, and to seek further information and help appropriately. Additionally, it encompasses the responsibilities of consumers as well as their rights.

**Learning Resources:**

The activities throughout this course are age appropriate; that is, they are designed for students in grades 11 or 12 who are exploring their world from the perspective of living independently, away from their parent's home.

The readability of the textbook is higher than that of the interactive site; therefore, additional assistance is provided for those students who require it.

The computers found in the classroom are capable of the technical requirements needed by the site, however, the activities can be printed for the students who are not able to access a computer.

**Additional Information:**

This course has been successfully implemented by Peter Skene Ogden Alternate Program as well as the SMARTT program for the past few years. This BAA process, however, sees the inclusion of an interactive site to promote relevance and engaged and personalized learning.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none, but recommended that students have taken a Food Studies course or have some cooking experience

Course Synopsis:

This is a hands on course where students will learn the elements and principles of design and apply them to food.

Students will develop and apply skills in food preparation and emphasis will be placed on developing an appreciation for food presentation and food as an edible art form. Some of the edible works of art students will create include: spice art, cookie dough impressions, yeast breads sculptures, garnishes, decorated cakes and many other projects. This course also focuses on developing both team and independent work skills.

Students through out the course will create a photo portfolio of their food creations, which can be used for future studies, job interviews and help to meet some of the requirements for their grad portfolio.

Learning Resources:

- Special resource books with ideas for projects
- Videos appropriate for certain projects
- Special Equipment as needed for each project
- Photography equipment

Additional Information:

Flexible access to a computer lab equipped with disc drives make the course run more smoothly, especially if digital photography is used.

School Name: Peter Skene Ogden Secondary

Course Name: Peer Helping 11

Course Code: YPHEL 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: application and interview

Course Synopsis:

Peer Helping 11 is a program that encourages the development of a positive identity and responsible independence as students experience more control over their environment (the school and community).

The major goals of the program are to augment a school climate that:

- encourages the development of responsible independence and a positive identity.
- promotes school safety by providing an alternative for students seeking help.
- creates opportunities for students to learn how to actively and intentionally use their experiences to gain new levels of confidence and competence.
- encourages opportunities for early intervention to deal with adolescent difficulties, especially in the areas of:
  - how to make and keep friends,
  - achieving in school,
  - loneliness,
  - boredom,
  - understanding and expressing feelings,
  - drugs and alcohol, and
  - getting along with parents.
- involves students in identifying and meeting student perceived needs.

Learning Resources:

Initially, the students will complete an application form for the Peer Helping program. A panel, the makeup of which is still to be determined, will conduct interviews. A maximum of eight students (two per block) will be selected at which time they and their parents will be informed.

The instructor will provide the materials required for this course. Students will be required to keep a separate binder for all the materials and a journal for submission.

A video camera will be made available for students to practise their attending skills, but students will be expected to provide their own tape.
One of the key aspects of this program is that peer helpers can provide a great benefit to the school. It can provide a channel to reach more students and team members can be trained to take care of the "minor" problems so that students with these problems are seen sooner than perhaps they would have and are dealt with while they are of smaller proportion. In addition, students are a good source of ideas. They have energy, they are able to pinpoint key areas of concern and they are sensitive to other students' problems. Because they see problems in a different way, peer helpers can be invaluable in providing ideas on how to deal with problem situations as well as be a resource to help carry them out.

School Name: Peter Skene Ogden Secondary

Course Name: Psychology 11

Course Code: YPSY 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: Science 10

Course Synopsis:

This course provides a student with an introduction to the study of psychology. The primary emphasis of the course will be on understanding human psychological development and how one’s behaviour impacts others.

Learning Resources:

Access to library, CD-ROM encyclopaedia, Internet resources

Additional Information:

This course has been taught to independent learners at The Alternate and SMARTT programs at Peter Skene Ogden Secondary School since 2002 as a CP designated course.
School District 27

Status: approved

School Name: Peter Skene Ogden Secondary

Course Name: Textile Arts and Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

   [ ] 10   [X] 11   [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

This course has been developed to allow students to explore the wide array of textile arts and crafts in our world today. Students will develop skills in creating and designing a variety of textile arts and crafts items.

Historical and cultural influences on the creation and development of textile arts and crafts will also be explored. Learning outcomes are from the Applied Skills 11 and Fine Arts 11 IRPs and are outlined in the unit descriptions.

Students will be given opportunities for self and peer assessment in addition to the teacher’s assessment and feedback. This course is intended to benefit students of all learning abilities and skill levels.

Learning Resources:

Resources that are already available in the classroom such as reference books for each craft, videos on specific techniques.

Appropriate guest speakers where they can be fit in.
This is a new course designed to be done by students using one of several independent learning programs available in School District 27. Many universities and colleges offer complete programs in this field. This is an introductory level course designed for the Grade 12 level. This course hopes to educate and empower students to see some aspects of society and the world from a non-traditional perspective.

- [ ] 11
- [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 25, 2004

Prerequisites: none

Course Synopsis:

The course will train students in the basic theories of structural fire fighting strategies and how to apply them. Students will cover all aspects of fire scene and apparatus safety, communications, fire behavior, fire tools and rescue.

Students will receive a minimum of 60 hours of classroom and practical training and must pass a final exam in each unit. The passing grade for each unit is 65 per cent.

This is NOT a certification program but a preparatory course that will help to identify and train potential candidates for Provincially recognized fire fighting training academies.

The skills and attitudes developed place students in preferential positions when pursuing National Fire Protection Association (NFPA) 1001 certification and job placements in the career of structural fire fighting.

Learning Resources:

Additional Information:

Students will also be involved with fire prevention education, fire inspections and community work.

Course Synopsis:

This course encourages, prepares, and motivates students to become leaders throughout the school and the community. Students will develop leadership qualities, communication and teamwork skills, conflict management using basic psychology, and organizational strategies.

Students will also gain an appreciation for the amount of effort required to be an effective leader. Students will acquire an appreciation for the importance of contributing to their school and community and learn what a satisfying experience it can be to help out.
Musical Theatre became a Locally Developed course in the Cariboo-Chicotin School District in 1993. It has been proven to be a very popular course since the beginning and in 2003 WLSS presented both a fall and spring musical.

The course has run with great success and continues to be financially supported by the community who deems it a beneficial and worthwhile cause.

Course Synopsis:

This course has been developed to support and encourage the students to experience the thrill of performing in a live Musical Theatre production. The course explores a balance in acting, singing and dancing. Students are required to fundraise for the cost of the musical.

The course runs outside of the regular timetable and outside school hours. Students will audition for this course in June and again for parts after the fall semester starts. Musical Theatre will run for 120 hours either the first two or the second and third terms. Students in grades 8, 9, or 10 will be permitted to participate in this course.

Learning Resources:

- Experience of the instructor
- Script
- Musical Score
- WLSS Band teacher

Additional Information:

Musical Theatre became a Locally Developed course in the Cariboo-Chicotin School District in 1993. It has been proven to be a very popular course since the beginning and in 2003 WLSS presented both a fall and spring musical.

The course has run with great success and continues to be financially supported by the community who deems it a beneficial and worthwhile cause.
The outdoors is used by a great number of people including campers, hunters, fishers, hikers, snowmobilers, etc. for recreation. Sometimes their experience is less than pleasant as the result of bear encounters or becoming lost, for example. This course seeks to prepare those individuals for the unexpected. More than that, however, it seeks to re-introduce them to some of the skills that our ancestors had for living off the land and we have forgotten and to instill within the students a sense of respect for the environment and its inhabitants.

Learning Resources:

- Videos including a series of four Search and Rescue vignettes, “Kindling and Fire Lighting”, “Matchless Fire by Friction”, etc.
- Newspaper and magazine articles and accounts of true-life incidents.
- Outdoor Survival manual “Outdoor Safety and Survival” as previously published by the Department of Land, Parks and Housing, B.C. Government.
- Pamphlets as published by various government and outdoors agencies including “Bears in B.C. Parks”, “Survival First Aid”, “Outdoor Ethics”, etc.
- Prepared learning packages as “Bear Aware”, produced by the B.C. Forest Service.

Additional Information:

This is a course that has evolved over time to recognize and assist those students who desire to explore their native heritage. The Common Curriculum Framework for Aboriginal Language and Culture Programs of the Western Canadian Protocol for Collaboration in Basic Education, www.wcp.ca/languages/abor.pdf is an excellent resource to help with additional learning activities.

Course Synopsis:
Aboriginal Culture 11 is a course that allows students to recognize and value local aboriginal culture and First Nations student heritage. It can be delivered on an individual basis or in a class setting. Students choose projects based on their own interests and heritage, and involve band members and elders in their projects. Families can work together to support the student in the projects that are chosen. The goal is to produce products that can be passed on to further generations and tell the stories of the family, clan or band.

Learning Resources:
- First Nations library
- Access to current events in newspapers and magazines
- Internet connection for research,
- Handouts filed in course binder (submitted by students, or compiled by the teacher)
- Local culture and stories

Additional Information:
This is a course that has evolved over time to recognize and assist those students who desire to explore their native heritage.

- Local culture and stories

**Additional Information:**

This is a course that has evolved over time to recognize and assist those students who desire to explore their native heritage.

This is a course that has evolved over time to recognize and assist those students who desire or exhibit leadership and management skills and are currently working in volunteer positions in the school or the community. First developed in the early 90’s.

Course Synopsis:

Career and Community Experiences 11 was developed to recognize those students who desire to volunteer within the community, in various service organizations, clubs, and community activity groups. Course topics will prepare participants for volunteer and leadership roles. Topics include: the environment within which volunteer acts, the systems with which they must contend, motivators that affect all actors in the environment, and how to communicate with and affect the behaviours of other actors in the environment. Topics range from personal application to leadership roles in community, national, and international settings.

Learning Resources:

- Basic psychology and sociology texts in library resources
- Access to current events in newspapers and magazines
- Internet connection for research, i.e. ERIC clearing house
- Handouts filed in course binder (submitted by students, or compiled by the teacher; i.e. Leonard, Beauvais and Scholl; A self concept-based model of work motivation; 1995 – paper presented at the annual meeting of the Academy of Management in August, 1995

Additional Information:

School Name: Correlieu Secondary School

Course Name: Culinary Arts 11

Course Code: YCUA 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Home Economics 10: Foods or Food Studies 11 or 12

Course Synopsis:

Culinary Arts 11 will provide students with the opportunity to work with food as a visual art. Students will learn the terminology used when describing the visual elements and principles of design and apply these elements and principles of design to their products and layout. Students will improve their applied skills in the area of food preparation as they have opportunities to work individually in the preparation of products. Students will develop technological skills in digital photography in the development of their portfolio and be able to gain additional skill in creating public displays. Self and peer-evaluation provides students with the opportunity to practice the use of the terminology used in the course and provide input on products.

The learning outcomes for the course are grouped under the curriculum organizers: Lab Procedures, Elements and Principles of Design, Principles of Food Preparation, Food Preparation, and Evaluation. The organizational structure of the course supports student skill development as students work both individually and as teams in the creative development of a range of products.

Learning Resources:

- Videos
- Internet
- Recipe books
- Magazines
- Text books

Additional Information:

This course was developed by Terry vanMeer, a Home Economics teacher in Fort St. James. In 1998 she agreed to share the curriculum with Home Economics teachers from various districts in the Central Interior at a workshop sponsored by the Quesnel Teachers of Home Economics Specialist Association.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Culinary Arts 11

Course Synopsis:

Culinary Arts 12 will be made available to the student seriously interested in the visual presentation of food. Due to the low enrolment the course will be offered within the Culinary Arts 11 framework and class. The students will follow the same general units and curriculum organizers used in Culinary Arts 11, with variation in some of the specific topics and products.

Part of the student assessment will include the selection of products requiring more advanced technique or skill. Growth in the quality of the student’s work should be apparent in the portfolio produced by the end of the course.

Students will expand their use of terminology when describing the visual elements and principles of design and their application of these elements and principles of design to their products and layout. Students will improve their applied skills in the area of food preparation as they have opportunities to work individually in the preparation of products. Students will develop technological skills in digital photography in the development of their portfolio and be able to gain additional skill in creating public displays. Self and peer-evaluation provides students with the opportunity to practice the use of the terminology used in the course and provide input on products.

The learning outcomes for the course are grouped under the curriculum organizers: Lab Procedures, Elements and Principles of Design, Principles of Food Preparation, Food Preparation, and Evaluation. The organizational structure of the course supports student skill development as students work both individually and as teams in the creative development of a range of products.

School Name: Correlieu Secondary School

Course Name: Fitness 11

Course Code: YFTN 11

Category: Fitness and Recreation

Grade Level of Course:  
☐ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved:  April 30, 2004

Prerequisites: PE 9 with minimum C+, Interview with the instructor, Signed parental permission.

Course Synopsis:

This course has been developed to expose students to training methods used by elite athletes. Students learn training aspects of the 5 conditioning factors: endurance, strength, flexibility, coordination and speed. The course is highly individualized in that each student will be individually assessed before starting on the training regimen. The students learn some basic biochemistry and physiology as it applies to fitness training and sport. The approach supports students to critically evaluate commonly accepted theories of fitness training.

Learning Resources:

- Articles and fitness training information on the internet
- Information from local physiotherapist/fitness training professional
- Use of a local fitness centre

School Name: Correlieu Secondary School

Course Name: Guitar 10

Course Code: YGUIT 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

Guitar 10 focuses on developing the knowledge, skills, and attitudes students require to perform effectively. In this course students have opportunities to:

- develop the techniques required to play the guitar, demonstrating technical competence and stylistic interpretation
- develop an understanding of the aesthetic qualities of music
- develop music literacy
- perform diverse repertoire, exploring how instrumental music differs across cultures and throughout history
- examine the various roles and purposes of instrumental music in society
- explore career opportunities related to music, and develop skills for pursuing those options

Learning Resources:

Instruction resources include: The Mastering the Guitar by Bay and Christiansen as the main textbook, Basic Instructor Guitar by Snyder as a supplementary text, biographical music videos, instructional technique videos, CD’s and tapes of music, popular music books, music from a University of Victoria Guitar course, and music from the internet.

The layout of the classroom allows for students to work at: their seats for theory work, in a large circle to watch guitar demonstrations and participate in whole-class playing and practice, and in smaller groups in four practice rooms. This allows for students to practice assigned work as well as share songs with one another.

Additional Information:

Students have opportunities to perform at concerts and activities in the community, in small groups, individually or accompanying the Choir.
As a pilot class, I would estimate the class has been a success.
Of the 20 students who began in September, two students elected to take it for one semester because of timetable conflicts and two dropped due to personal problems coupled with the time demands.
The tone is set with classroom work for the first two to three weeks to ensure that the message is it is not an “easy credit.”
The best indicator so far is watching the quieter student develop into a more confident individual by the second semester.

Status: approved

School Name: Correlieu Secondary School

Course Name: Outdoor Recreation 12

Course Code: YOR 12

Category: Fitness and Recreation

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: 1. Completion of Physical Education 10 with a C+ or better or Instructors permission.

Course Synopsis:

Outdoor Recreation 12 is an activity oriented course, geared toward the outdoors. All of the activities will have a self-propelled focus. The students are encouraged to have a suitable level of fitness, but this should not discourage them from taking the course. Fitness is a component of the course and is developed within the course. The course content may vary each year, depending on class composition, equipment availability, site availability, weather, or other environmental limitations (seasons when course offered). The activities/pursuits taught may include: map and compass skills, orienteering, introductory recreational avalanche awareness, snowshoeing, telemark skiing, general camp and backpacking skills, backcountry equipment and clothing selection, backcountry food selection, flat water canoeing, mountain biking, animal awareness / safety, indoor rock climbing, and belaying. In each of these activities, skills are introduced in an indoor or outdoor classroom environment. The skills are then put into practice through experiential learning opportunities during multi-day pursuits.

In addition to enjoying and acquiring the skills associated with the pursuits listed above, individual and group safety skills are stressed and taught in each component of the course. Therefore, students must demonstrate a mature and common sense attitude at all times. A second topic that is exemplified throughout the course is the care and appreciation of our backcountry environment. The course attempts to maintain a “Leave No Trace” approach at all times.

Learning Resources:

1. Resources from Argo Road Maintenance and The ministry of Transportation for Mock Avalanche Rescue scenarios.
2. Information and resources from the Caribou Ski Touring Club, Mt. Robson and Bowron Lake Provincial Parks, and Bowron Lake Lodge.
4. If required, please refer to the list of additional resources attached (videos and texts).

Additional Information:

This course is currently taught outside of the regular timetable / school day (in an “X” block format). Classes occur before and after school hours, during the week and on some weekends. The multi day pursuits require the students to miss school days as well as weekend time. Therefore, it is a substantial comment for the students, parents, and the teacher. The course in various forms has been taught in the district for over ten years, initially at MDJS and then at Correlieu Secondary School. There is a fee for the course to cover items such as; equipment rentals, consumables (first-aid/batteries/fuels/etc), travel fees, and permits / user fees.

11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

The students in this course will be involved in activities that will help them develop the communication and problem solving skills necessary when working with people. Using role-play, readings, self-assessment, discussion and video, students will develop skills in communication, assertiveness, and conflict resolution. In role-play, students will apply these skills to a variety of student issues using techniques from several counselling theories. Students will also be available as peer counsellors in the school and they will promote events to raise awareness about student issues in the school. Through field trips students will be introduced to the social services available in their community.

Course Name: Peer Tutoring Helping 11

Course Code: YPTUH 11

Category: Liberal Arts and Humanities

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 30, 2004

Prerequisites: Be referred by the counsellor

Course Synopsis:

The purpose of Peer Tutoring is to enable senior students to help support their younger peers in high school classes.

Senior students with a C+ average are assigned to work with junior high school students on a one-to-one basis or in small groups under the direction of the classroom teacher.

The Peer Tutors complete a self-directed handbook or project. The handbook or project covers the topics of Confidentially and Ethics, Goals and Decisions, Assertiveness, Feelings, Understanding Behavior, Motivation, Helping Skills and Question Techniques.

Learning Resources:

· A Handbook for Peer Tutors by Jane Fletcher 2001
· Peer Helper Program Packet by Lyle Orchison
· Tutoring: Learning by Helping by Elizabeth Sabrinsky Foster, Ed.D. 1992 (out of print)

Additional Information:

Peer Tutoring/helping has been a valued part of the both high schools in Quesnel for many years. Senior students have had the opportunity to develop positive relationships with junior students and practice their helping skills. For some students, this experience has had impact on their career decisions. The junior students have benefited from the support of peers and the extra help they have required to be successful in school. This locally developed course has been revised on a regular basis over the years to ensure that the materials and practices are current.

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of various cultures through the medium of digital video. Students learn to use digital video cameras and editing equipment as they follow the steps in creating a video about a topic of community value or personal interest. As a culmination, students reflect on their work and plan an event to present their video to their school and community. Learning outcomes for the course are grouped under the curriculum organizers: Social and Cultural Issues, Creation, and Analysis, and students are given the opportunity for self and peer assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting a variety of perspectives on significant issues.

Yearbooks (back issues from other institutions and publishers)
Course Synopsis:

Aboriginal Culture 11 is a course that allows students to recognize and value local aboriginal culture and First Nations student heritage. It can be delivered on an individual basis or in a class setting. Students choose projects based on their own interests and heritage, and involve band members and elders in their projects. Families can work together to support the student in the projects that are chosen. The goal is to produce products that can be passed on to further generations and tell the stories of the family, clan or band.

Learning Resources:

- First Nations library
- Access to current events in newspapers and magazines
- Internet connection for research,
- Handouts filed in course binder (submitted by students, or compiled by the teacher)
- Local culture and stories

Additional Information:

This is a course that has evolved over time to recognize and assist those students who desire to explore their native heritage.

Course Name: Career & Community Experiences 11

Course Code: YCCE 11

Category: Other

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites:

- Basic psychology and sociology texts in library resources
- Access to current events in newspapers and magazines
- Internet connection for research, i.e. ERIC clearing house
- Handouts filed in course binder (submitted by students, or compiled by the teacher; i.e. Leonard, Beauvais and Scholl; A self concept-based model of work motivation; 1995 – paper presented at the annual meeting of the Academy of Management in August, 1995

Course Synopsis:

Career and Community Experiences 11 was developed to recognize those students who desire to volunteer within the community, in various service organizations, clubs, and community activity groups. Course topics will prepare participants for volunteer and leadership roles. Topics include: the environment within which volunteer acts, the systems with which they must contend, motivators that affect all actors in the environment, and how to communicate with and affect the behaviours of other actors in the environment. Topics range from personal application to leadership roles in community, national, and international settings.

Learning Resources:

Additional Information:

This is a course that has evolved over time to recognize and assist those students who desire or exhibit leadership and management skills and are currently working in volunteer positions in the school or the community. First developed in the early 90’s.

School Name: McNaughton Centre

Course Name: Culinary Arts 12

Course Code: YCUA 12

Category: Tourism, Hospitality, and Foods

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Culinary Arts 11

Course Synopsis:

Culinary Arts 12 will be made available to the student seriously interested in the visual presentation of food. Due to the low enrolment the course will be offered within the Culinary Arts 11 framework and class. The students will follow the same general units and curriculum organizers used in Culinary Arts 11, with variation in some of the specific topics and products.

Part of the student assessment will include the selection of products requiring more advanced technique or skill. Growth in the quality of the student’s work should be apparent in the portfolio produced by the end of the course.

Students will expand their use of terminology when describing the visual elements and principles of design and their application of these elements and principles of design to their products and layout. Students will improve their applied skills in the area of food preparation as they have opportunities to work individually in the preparation of products. Students will develop technological skills in digital photography in the development of their portfolio and be able to gain additional skill in creating public displays. Self and peer-evaluation provides students with the opportunity to practice the use of the terminology used in the course and provide input on products.

The learning outcomes for the course are grouped under the curriculum organizers: Lab Procedures, Elements and Principles of Design, Principles of Food Preparation, Food Preparation, and Evaluation. The organizational structure of the course supports student skill development as students work both individually and as teams in the creative development of a range of products.

School Name: McNaughton Centre
Course Name: Fitness 11
Course Code: YFTN 11
Category: Fitness and Recreation
Grade Level of Course: 10 [ ] 11 [X] 12 [ ]
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 30, 2004
Prerequisites: PE 9 with minimum C+, Interview with the instructor, Signed parental permission.

Course Synopsis:

This course has been developed to expose students to training methods used by elite athletes. Students learn training aspects of the 5 conditioning factors: endurance, strength, flexibility, coordination and speed. The course is highly individualized in that each student will be individually assessed before starting on the training regimen. The students learn some basic biochemistry and physiology as it applies to fitness training and sport. The approach supports students to critically evaluate commonly accepted theories of fitness training.

Learning Resources:

- Articles and fitness training information on the internet
- Information from local physiotherapist/fitness training professional
- Use of a local fitness centre
School District 28

School Name: McNaughton Centre
Course Name: Guitar 10
Course Code: YGUIT 10
Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of Instruction: 120
Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

Guitar 10 focuses on developing the knowledge, skills, and attitudes students require to perform effectively. In this course students have opportunities to:
- develop the techniques required to play the guitar, demonstrating technical competence and stylistic interpretation
- develop an understanding of the aesthetic qualities of music
- develop music literacy
- perform diverse repertoire, exploring how instrumental music differs across cultures and throughout history
- examine the various roles and purposes of instrumental music in society
- explore career opportunities related to music, and develop skills for pursuing those options

Learning Resources:

Instruction resources include: The Mastering the Guitar by Bay and Christiansen as the main textbook, Basic Instructor Guitar by Snyder as a supplementary text, biographical music videos, instructional technique videos, CD’s and tapes of music, popular music books, music from a University of Victoria Guitar course, and music from the internet.

The layout of the classroom allows for students to work at: their seats for theory work, in a large circle to watch guitar demonstrations and participate in whole-class playing and practice, and in smaller groups in four practice rooms. This allows for students to practice assigned work as well as share songs with one another.

Additional Information:

Students have opportunities to perform at concerts and activities in the community, in small groups, individually or accompanying the Choir.
As a pilot class, I would estimate the class has been a success. Of the 20 students who began in September, two students elected to take it for one semester because of timetable conflicts and two dropped due to personal problems coupled with the time demands. The tone is set with classroom work for the first two to three weeks to ensure that the message is it is not an "easy credit." The best indicator so far is watching the quieter student develop into a more confident individual by the second semester.

**Course Synopsis:**

The course is designed for students to develop a sense of the different forms of leadership. We meet two to three times per week with many hours invested after school to build a strong school culture.

**Learning Resources:**

Being a student council advisor of 12 years prior to September 2003, I had many resources at my disposal in addition to the resources listed at the top of this page.

**Additional Information:**

Course Name: Musical Theatre 11

Course Code: YMUTH 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 2 or 4

Number of Hours of instruction: 60 or 120

Date Approved: April 30, 2004

Prerequisites:

- rehearsal and performance facilities
- scripts

Course Synopsis:

The course is essentially the production of a major musical. Enrollment is by audition and casting is available to all grades, with lead roles going, wherever possible, to students in Grade 11 or 12. Rehearsals are held after school hours. There are four evening performances and two matinee performances. Backstage planning and execution are also part of this course. Sets, lights, advertising and promotion, costumes, and other backstage requirements are handled, wherever possible, by students under the supervision and instruction of a qualified teacher or resource person.

Learning Resources:

- rehearsal and performance facilities
- scripts

Additional Information:

This is an established course with a proven history of success at Correlieu Secondary School.
School District 28

Status: approved

School Name: McNaughton Centre

Course Name: Outdoor Recreation 12

Course Code: YOR 12

Category: Fitness and Recreation

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: 1. Completion of Physical Education 10 with a C+ or better or Instructors permission.

Course Synopsis:

Outdoor Recreation 12 is an activity oriented course, geared toward the outdoors. All of the activities will have a self-propelled focus. The students are encouraged to have a suitable level of fitness, but this should not discourage them from taking the course. Fitness is a component of the course and is developed within the course. The course content may vary each year, depending on class composition, equipment availability, site availability, weather, or other environmental limitations (seasons when course offered). The activities/ pursuits taught may include: map and compass skills, orienteering, introductory recreational avalanche awareness, snowshoeing, telemark skiing, general camp and backpacking skills, backcountry equipment and clothing selection, backcountry food selection, flat water canoeing, mountain biking, animal awareness / safety, indoor rock climbing, and belaying. In each of these activities, skills are introduced in an indoor or outdoor classroom environment. The skills are then put into practice through experiential learning opportunities during multi-day pursuits.

In addition to enjoying and acquiring the skills associated with the pursuits listed above, individual and group safety skills are stressed and taught in each component of the course. Therefore, students must demonstrate a mature and common sense attitude at all times. A second topic that is exemplified throughout the course is the care and appreciation of our backcountry environment. The course attempts to maintain a “Leave No Trace” approach at all times.

Learning Resources:

1. Resources from Argo Road Maintenance and The ministry of Transportation for Mock Avalanche Rescue scenarios.
2. Information and resources from the Caribou Ski Touring Club, Mt. Robson and Bowron Lake Provincial Parks, and Bowron Lake Lodge.
4. If required, please refer to the list of additional resources attached (videos and texts).

Additional Information:

This course is currently taught outside of the regular timetable / school day (in an “X” block format). Classes occur before and after school hours, during the week and on some weekends. The multi day pursuits require the students to miss school days as well as weekend time. Therefore, it is a substantial comment for the students, parents, and the teacher. The course in various forms has been taught in the district for over ten years, initially at MDJS and then at Correlieu Secondary School. There is a fee for the course to cover items such as; equipment rentals, consumables (first-aid/batteries/fuels/etc), travel fees, and permits / user fees.

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites:

**Course Synopsis:**

The students in this course will be involved in activities that will help them develop the communication and problem solving skills necessary when working with people. Using role-play, readings, self-assessment, discussion and video, students will develop skills in communication, assertiveness, and conflict resolution. In role-play, students will apply these skills to a variety of student issues using techniques from several counselling theories. Students will also be available as peer counsellors in the school and they will promote events to raise awareness about student issues in the school. Through field trips students will be introduced to the social services available in their community.

**Learning Resources:**
Roberts, G., Student Workbook to Accompany the Peer Counselling Starter Kit, University of Victoria, Victoria, BC, 1987.

Carr, R. & Saunders, G., Peer Counselling Starter Kit, University of Victoria, Victoria, BC, 1980.

School Name: McNaughton Centre

Course Name: Peer Tutoring Helping 11

Course Code: YPTUH 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Be referred by the counsellor

Course Synopsis:

The purpose of Peer Tutoring is to enable senior students to help support their younger peers in high school classes.

Senior students with a C+ average are assigned to work with junior high school students on a one-to-one basis or in small groups under the direction of the classroom teacher.

The Peer Tutors complete a self-directed handbook or project. The handbook or project covers the topics of Confidentiality and Ethics, Goals and Decisions, Assertiveness, Feelings, Understanding Behavior, Motivation, Helping Skills and Question Techniques.

Learning Resources:

· A Handbook for Peer Tutors by Jane Fletcher 2001
· Peer Helper Program Packet by Lyle Orchison
· Tutoring: Learning by Helping by Elizabeth Sabrinsky Foster, Ed.D. 1992 (out of print)

Additional Information:

Peer Tutoring/Helping has been a valued part of the both high schools in Quesnel for many years. Senior students have had the opportunity to develop positive relationships with junior students and practice their helping skills. For some students, this experience has had impact on their career decisions. The junior students have benefited from the support of peers and the extra help they have required to be successful in school. This locally developed course has been revised on a regular basis over the years to ensure that the materials and practices are current.

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of various cultures through the medium of digital video. Students learn to use digital video cameras and editing equipment as they follow the steps in creating a video about a topic of community value or personal interest. As a culmination, students reflect on their work and plan an event to present their video to their school and community. Learning outcomes for the course are grouped under the curriculum organizers: Social and Cultural Issues, Creation, and Analysis, and students are given the opportunity for self and peer assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting a variety of perspectives on significant issues.

School Name: Quesnel Secondary School

Course Name: Culinary Arts 11

Course Code: YCUA 11

Category: Liberal Arts and Humanities

Grade Level of Course:  
- 10 
- 11 [x] 
- 12 

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Home Economics 10: Foods or Food Studies 11 or 12

Course Synopsis:

Culinary Arts 11 will provide students with the opportunity to work with food as a visual art. Students will learn the terminology used when describing the visual elements and principles of design and apply these elements and principles of design to their products and layout. Students will improve their applied skills in the area of food preparation as they have opportunities to work individually in the preparation of products. Students will develop technological skills in digital photography in the development of their portfolio and be able to gain additional skill in creating public displays. Self and peer-evaluation provides students with the opportunity to practice the use of the terminology used in the course and provide input on products.

The learning outcomes for the course are grouped under the curriculum organizers: Lab Procedures, Elements and Principles of Design, Principles of Food Preparation, Food Preparation, and Evaluation. The organizational structure of the course supports student skill development as students work both individually and as teams in the creative development of a range of products.

Learning Resources:

- Videos
- Internet
- Recipe books
- Magazines
- Text books

Additional Information:

This course was developed by Terry vanMeer, a Home Economics teacher in Fort St. James. In 1998 she agreed to share the curriculum with Home Economics teachers from various districts in the Central Interior at a workshop sponsored by the Quesnel Teachers of Home Economics Specialist Association.

School Name: Quesnel Secondary School

Course Name: Culinary Arts 12

Course Code: YCUA 12

Category: Tourism, Hospitality, and Foods

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: Culinary Arts 11

Course Synopsis:

Culinary Arts 12 will be made available to the student seriously interested in the visual presentation of food. Due to the low enrolment the course will be offered within the Culinary Arts 11 framework and class. The students will follow the same general units and curriculum organizers used in Culinary Arts 11, with variation in some of the specific topics and products.

Part of the student assessment will include the selection of products requiring more advanced technique or skill. Growth in the quality of the student’s work should be apparent in the portfolio produced by the end of the course.

Students will expand their use of terminology when describing the visual elements and principles of design and their application of these elements and principles of design to their products and layout. Students will improve their applied skills in the area of food preparation as they have opportunities to work individually in the preparation of products. Students will develop technological skills in digital photography in the development of their portfolio and be able to gain additional skill in creating public displays. Self and peer-evaluation provides students with the opportunity to practice the use of the terminology used in the course and provide input on products.

The learning outcomes for the course are grouped under the curriculum organizers: Lab Procedures, Elements and Principles of Design, Principles of Food Preparation, Food Preparation, and Evaluation. The organizational structure of the course supports student skill development as students work both individually and as teams in the creative development of a range of products.

School Name: Quesnel Secondary School

Course Name: Fitness 11

Course Code: YFTN 11

Category: Fitness and Recreation

Grade Level of Course: ☑️ 10  ☑️ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites: PE 9 with minimum C+, Interview with the instructor, Signed parental permission.

Course Synopsis:

This course has been developed to expose students to training methods used by elite athletes. Students learn training aspects of the 5 conditioning factors: endurance, strength, flexibility, coordination and speed. The course is highly individualized in that each student will be individually assessed before starting on the training regimen. The students learn some basic biochemistry and physiology as it applies to fitness training and sport. The approach supports students to critically evaluate commonly accepted theories of fitness training.

Learning Resources:

- Articles and fitness training information on the internet
- Information from local physiotherapist/fitness training professional
- Use of a local fitness centre

School Name: Quesnel Secondary School

Course Name: Guitar 10

Course Code: YGUIT 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- 10 [x]  
- 11 [ ]  
- 12 [ ]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 30, 2004

Prerequisites:

**Course Synopsis:**

Guitar 10 focuses on developing the knowledge, skills, and attitudes students require to perform effectively. In this course students have opportunities to:
- develop the techniques required to play the guitar, demonstrating technical competence and stylistic interpretation
- develop an understanding of the aesthetic qualities of music
- develop music literacy
- perform diverse repertoire, exploring how instrumental music differs across cultures and throughout history
- examine the various roles and purposes of instrumental music in society
- explore career opportunities related to music, and develop skills for pursuing those options

**Learning Resources:**

Instruction resources include: The Mastering the Guitar by Bay and Christiansen as the main textbook, Basic Instructor Guitar by Snyder as a supplementary text, biographical music videos, instructional technique videos, CD’s and tapes of music, popular music books, music from a University of Victoria Guitar course, and music from the internet.

The layout of the classroom allows for students to work at: their seats for theory work, in a large circle to watch guitar demonstrations and participate in whole-class playing and practice, and in smaller groups in four practice rooms. This allows for students to practice assigned work as well as share songs with one another.

**Additional Information:**

Students have opportunities to perform at concerts and activities in the community, in small groups, individually or accompanying the Choir.
As a pilot class, I would estimate the class has been a success.

Of the 20 students who began in September, two students elected to take it for one semester because of timetable conflicts and two dropped due to personal problems coupled with the time demands.

The tone is set with classroom work for the first two to three weeks to ensure that the message is it is not an “easy credit.”

The best indicator so far is watching the quieter student develop into a more confident individual by the second semester.

---

**Course Synopsis:**

The course is designed for students to develop a sense of the different forms of leadership. We meet two to three times per week with many hours invested after school to build a strong school culture.

**Learning Resources:**

Being a student council advisor of 12 years prior to September 2003, I had many resources at my disposal in addition to the resources listed at the top of this page.

**Additional Information:**

- [ ] 12

Number of Course Credits: 2 or 4

Number of Hours of instruction: 60 or 120

Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

The course is essentially the production of a major musical. Enrollment is by audition and casting is available to all grades, with lead roles going, wherever possible, to students in Grade 11 or 12. Rehearsals are held after school hours. There are four evening performances and two matinee performances. Backstage planning and execution are also part of this course. Sets, lights, advertising and promotion, costumes, and other backstage requirements are handled, wherever possible, by students under the supervision and instruction of a qualified teacher or resource person.

Learning Resources:

- rehearsal and performance facilities
- scripts

Additional Information:

This is an established course with a proven history of success at Correlieu Secondary School.
This course is currently taught outside of the regular timetable / school day (in an “X” block format). Classes occur before and after school hours, during the week and on some weekends. The multi day pursuits require the students to miss school days as well as weekend time. Therefore, it is a substantial comment for the students, parents, and the teacher. The course in various forms has been taught in the district for over ten years, initially at MDJS and then at Correlieu Secondary School. There is a fee for the course to cover items such as; equipment rentals, consumables (first-aid/batteries/fuels/etc), travel fees, and permits / user fees.

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

The students in this course will be involved in activities that will help them develop the communication and problem solving skills necessary when working with people. Using role-play, readings, self-assessment, discussion and video, students will develop skills in communication, assertiveness, and conflict resolution. In role-play, students will apply these skills to a variety of student issues using techniques from several counselling theories. Students will also be available as peer counsellors in the school and they will promote events to raise awareness about student issues in the school. Through field trips students will be introduced to the social services available in their community.

Learning Resources:

Peer Tutoring/helping has been a valued part of the both high schools in Quesnel for many years. Senior students have had the opportunity to develop positive relationships with junior students and practice their helping skills. For some students, this experience has had impact on their career decisions. The junior students have benefited from the support of peers and the extra help they have required to be successful in school. This locally developed course has been revised on a regular basis over the years to ensure that the materials and practices are current.

Prerequisites:

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of various cultures through the medium of digital video. Students learn to use digital video cameras and editing equipment as they follow the steps in creating a video about a topic of community value or personal interest. As a culmination, students reflect on their work and plan an event to present their video to their school and community. Learning outcomes for the course are grouped under the curriculum organizers: Social and Cultural Issues, Creation, and Analysis, and students are given the opportunity for self and peer assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of collecting, interpreting, and presenting a variety of perspectives on significant issues.

The use of computer-based training in Aviation 11 is representative of the early training model for most students who wish to explore aviation. It complements real flying instruction and is an excellent low-cost, low risk alternative to actual in-airplane instruction.

Holding pre-flight classes in a computer lab allows the instructor accordingly. Light-simulation is scalable and adjusts to class sizes.

In terms of Aviation 11, not students will fly. Any aircraft based flight instruction would need to be arranged outside of class.
This course is supplement to the AVID Tutor Training Program. The AVID Program has a strong tutorial component as its foundation and students who have taken Active Teaching 12 have the knowledge (practical and theoretical) of effective teaching skills and strategies.

Additional Information:

This course is supplement to the AVID Tutor Training Program. The AVID Program has a strong tutorial component as its foundation and students who have taken Active Teaching 12 have the knowledge (practical and theoretical) of effective teaching skills and strategies.

X 11  
12

Number of Course Credits: 4
Number of Hours of instruction: 112
Date Approved: February 7, 2004
Prerequisites: ICTS 11 (A+ certification with B average)

Course Synopsis:
Covers networking and routing basics. Focus on network terminology and protocols, local area networks (LANs), wide-area networks (WANs, Open System Interconnection reference (OSI) model, cabling, tools, routers, router programming, Ethernet, Internet Protocol (IP) addressing, and network standards. Through hands on activities and labs, students will learn how to assemble network media, configure routers, and troubleshoot their work.

Cisco 11 CCNA Certification is the first step toward preparing to take Cisco's CCNA certification.

Cisco 12 CCNA Certification will complete their training for Cisco's CCNA certification.

Learning Resources:
• On-line curriculum is developed by Cisco Systems.
• Software for course can be downloaded for free by a certified instructor.
• Tools supplied.
• Computer (Apple or Windows) with Flash 6 player installed and minimum of 28.8k Internet access.

Additional Information:
Cisco 11 CCNA Certification has been a successful locally developed course at both Sardis Secondary and Chilliwack Secondary since 1998. Students not only receive highschool credits but also transfer credits to UCFV, OUC and CDI. In addition to this students that complete Cisco 12 CCNA Certification have the skill and knowledge to receive Cisco's Industrial level CCNA certification that is recognized world wide.

Grade Level of Course: 10 □ 11 □ 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 22, 2005

Prerequisites:

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. As well, students gain skills and knowledge in the technical aspects of pattern making. Students learn from basic slopers, which are the beginning of flat pattern designs. Students complete a process from the design ideas to ½ full-scale pattern to the finished garment. Learning outcomes from the course are grouped under the units: the skirt, the bodice and the clothing line. Students are given the opportunity for self and peer assessment in each of the units. This approach supports student skill development and encourages meaningful methods of designing, measuring, adapting, constructing, and evaluating garments.

Course Synopsis:

History 11 begins with the French Revolution and its impact on European society as a whole. The course then proceeds to examine the balance of power system which presumably fostered and sustained the longest period of general peace in European history but ultimately gave rise to one of the bloodiest conflicts in human history, World War I. The events of World War I and its culmination, The Treaty of Versailles, form the next segment of this course. The hardships and sacrifices created by World War I in the inter-war period will show students how the seeds of World War II were sown. The course will end with a close look at the events of World War II and how they resulted in the ensuing Cold War and the nuclear arms race.

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: four

Number of Hours of instruction: 100-120

Date Approved: December 3, 2003

Prerequisites: None

Course Synopsis:

The purpose of this course is to develop keyboarding proficiency as personal life skills and as a foundation for career development. This course is designed to teach and improve keyboarding, formatting, proofreading, editing and presentations skills while using industry standard software. The students will be introduced to personal and business applications and encouraged to use their keyboard skills in other curricular areas. Students will also become proficient in MS Word, MS PowerPoint as well as general computer skills such as file management and printing.

Learning Resources:

- Microsoft Word
- Microsoft PowerPoint
- Information Processing, Keyboarding, Formatting and Applications Mastery by Chriri, Kutso, Seraydarina and Stoddard
- Learning Microsoft Office by Fulton, Kaczmarczyk, Plumley, Weixel and Winter
- Keyboarding Drills
- All The Right Type Keyboarding Program
- Typer Shark

Additional Information:

Rationale: Students going into the world of work or post secondary learning need computer/keyboarding skills as basis for their career development. Most jobs today require the use of computer skills. The more proficient students are at computer/keyboarding skill, the better they will perform in their jobs.

Course Name: Leadership 10

Course Code: YLEAD 10

Category: Fitness and Recreation

Grade Level of Course: ☒ 10 ☐ 11 ☐ 12

Number of Course Credits: Four

Number of Hours of instruction: 120

Date Approved:

Prerequisites: Permission of instructors

Course Synopsis:

The Leadership program developed at Chilliwack Secondary School provides opportunities for students to become meaningfully involved in both school and community activities. It is based on the concept that leadership can be developed through a variety of service opportunities. Students who take this course will develop a life long appreciation of the importance of contributing to their communities and helping others. Students interested in enrolling in Leadership apply in writing by submitting a resume and taking part in an interview.

Learning Resources:

Marc Kielbrger, N'Leaders Today', student planners, "Seven Habits of Highly Effective Teens", handouts, poster materials, guest speakers, etc.
Rationale: Affording students an opportunity to organize, run and analyze events enables them to see the value of school and community involvement. Leadership instills in students the value in being an active contributor rather than a passive consumer. The lessons have been developed to enhance opportunities for students to practice community service or, as stated in the Rotary International mission statement, to give "service above self". When the students work together, serving each other, the school, as a whole, benefits.

Category: Health and Human Services

Grade Level of Course:  10  11  12

Number of Course Credits: four

Number of Hours of instruction: 120

Date Approved: February, 2004

Prerequisites: Application and interview

Course Synopsis:

The Learning Concepts 11 course is a challenging combination of teaching/learning theory and application with an emphasis on peer tutoring in a specific area of subject/grade level. This course has a flexible timetable which means that students attend in whichever block fits their timetable. It allows for students to connect with the instructor one-on-one or in a small group in the student's designated block. Students will participate in a once-a-week noon seminar in addition to a scheduled block. Current research literature related to the teaching/learning process is examined, discussed, and applied in practicum situations. Assessment focuses on the students’ use of knowledge and complex reasoning processes rather than on their recall of information. Finally, this course provides students interested in the Human Services and teaching profession an opportunity to experience teaching in a real classroom setting.

Additional Information:

This course is a supplement to the SVID Tutor Training Workshop. The AVID Program has a strong tutorial component as its foundation and students who have taken Learning Concepts 11 have the knowledge, practical and theoretical, of effective skills and strategies.

Grade Level of Course: [ ] 10 [ ] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: April 26, 2005

Prerequisites: Mathematics 8, Grade 10 Status, Mathematics 9 Teacher Recommendation

Course Synopsis:

The mathematics department has developed this preparation course in order to bridge the gaps in student learning and topically support student learning in Principles of Mathematics 10.
Rationale: This course has been developed to help cultivate tomorrow's leaders in recreation and to develop responsible, productive human beings. Through this course, students will learn and demonstrate the organizational skills required to conduct activity programs for other people to enjoy. In this age of teenagers in poor general health and poor cardiovascular fitness, promoting physical activity and recreation is important. Society needs leaders to promote positive physical pursuits and appropriate behavior. These students will be good role models both for their peers and for the young children they work with. They will demonstrate a positive attitude towards achievement in physical activities and fitness, and they will demonstrate social skills which promote acceptable standards of behaviour.

Grade Level of Course:  

☐ 10  ✗ 11  ☐ 12

Number of Course Credits: four

Number of Hours of instruction: 120

Date Approved: February 1, 2004

Prerequisites: English 10, Social Studies 10, strong reading and writing skills

Course Synopsis:

Philosophy 11 begins with a look at the early Greek philosophers and how they laid the intellectual foundation for much of Western civilization. From there, students will be challenged to examine the philosophical implications of various arguments surrounding the existence or non-existence of a supreme being. Concepts of human freedom and sense of being will form the focus of the next segment of the course. Finally, questions surrounding political organization, social reform, science, individualism and the purpose of existence will occupy the latter phases of the course.

Learning Resources:

- George Bernard Shaw, Saint Joan.
- Various videos.

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 22, 2005

Prerequisites: "B" Standing in Humanities 11 courses or recommendation of Humanities teacher

Course Synopsis:

Philosophy 12 is a survey course in world philosophy in which students will discuss a broad range of ideas and issues. Course content includes philosophies of Western, East Indian, Chinese, Native and Latin American thinkers, which are occasionally related with period music to better appreciate the context in which certain ideas developed. Topics for discussion will be divided into three broad units: the nature of right action, the nature of knowledge, and the nature of consciousness - all linked to personal experience and current issues.

The main objectives of this course are to enable students to experience and practice philosophy ("learn by doing"), and to broaden their horizons as they formulate and discuss fundamental questions.
**Course Synopsis:**

This course has been developed to support and encourage students to practice the skills and mind sets which will enable them to safely enjoy the abundant 'alternative-environment activities' in the outdoors.

Students will learn and apply knowledge to prepare for and manage backcountry travel including hiking, mountain biking, snow shoeing, skiing, canoeing and kayaking. Students will learn and demonstrate practical safety skills including risk assessment and rescue, survival and winter survival. Students will gain the knowledge, experience and competence to find their way in the backcountry using a map and compass orientation, Global Positioning system and Alpine route finding skills.

Students will be able to identify indigenous flora and fauna and understand how to utilize them in survival situations. Regular conditioning sessions will enable students to endure the rigors of backcountry travel. Students will have the opportunity to explore various community outdoor offerings. Throughout the course students will practice skills, problem solve and brainstorm in an interactive and supportive group environment.

**Learning Resources:**

Special Training, Facilities or Equipment Required: Wilderness First Aid, Canadian Avalanche Association Snow Smart program, Chilliwack Search and Rescue, Orienteering equipment, Snowshoes, Ski gear, GPS, 2-way radios, camping and backpacking gear, Padding gear, survival gear (equipment to be purchased, borrowed or rented by students or program).

**Additional Information:**

Min "B" in PE 10 or 11 with excellent attendance record
Twelve Minute Run: women 5.5 laps; men 6.5 laps minimum
Weekend availability

School Name: Sardis Secondary
Course Name: Psychology 11
Course Code: YPSY 11
Category: Health and Human Services

Grade Level of Course:  
X 11  
Number of Course Credits: four
Number of Hours of instruction: 120
Date Approved: ,
Prerequisites: None

Course Synopsis:

This Psychology 11 course is designed to ignite a passion in students for psychology's many relevant findings about why people do the things they do, and think the way they think. It is the study of human behaviour and the mind. It provides a foundation for students wanting to satisfy a growing curiosity about themselves, their families, their friends and the world of people around them.

Learning outcomes for the course are grouped under the curriculum domains:
- Psychology and its Methods Domain
- Developmental Domain
- Biopsychological Domain
- Cognitive Domain
- Clinical and Sociocultural Domain

Students will be encouraged to think critically and analytically about behavior, and to understand commonly held myths. They will bring the basic and applied aspects of psychology to life by applying scientific principles to real-world problems. Students will be given the opportunity for self-assessment and will be encouraged to collect, interpret and present a variety of perspectives on significant issues.

Learning Resources:

Special Training, Facilities of Equipment Required: A classroom should be provided with a VCR and a TV monitor. The teacher or instructor should have a degree or background in psychology.

Additional Information:

This introductory course will provide students with a foundation to better understand the next level of Psychology - the Advanced Placement Psychology 12 Course. This course has been offered for seven years and there are presently eight blocks of about 30 students in Psychology 11, which is about 240 students. The textbook, as a guide, will provide a better foundation for the students.

Number of Hours of instruction: 120

Date Approved: May 4, 2011

Prerequisites: Sports Performance 11 (recommended)

**Course Synopsis:**

Sports Performance 12 is a course that will prepare students physically and mentally to be at their best as athletes and as leaders. As an athlete, they will participate in an individualized performance-training regime that includes free-weight Olympic lifts, flexibility training, speed training and agility training. This training will be broken into 4-week Macro-cycles across the semester. Testing will occur every four weeks to monitor the development of each student’s explosive capacity, change of direction, acceleration and flat-out speed. In addition, students will be using a variety of fitness charts and data to determine their relative speed and strength as compared to others of their age and fitness level across North America. Students will be familiarized with the theory behind their performance training as the semester unfolds.

The Leadership portion of this course will be training that prepares students to coach/lead as a part of their school and greater community. Students will be given an opportunity to demonstrate and practice their leadership skills by leading activities and spotting/coaching other students in their class. In addition, students will assemble a portfolio that will be the core of a life-long tool for gaining entry into post-secondary performance programs, scholarship opportunities, and job opportunities.

Course Synopsis:

This course focuses on quantity of food preparation and service. Students develop skills necessary for commercial food preparation as they participate in activities related to receiving, storing, and presenting nutritious foods. Students also have the opportunity to develop attitudes required by food-service professionals and to practice customer service. Students consider their own and their customers' safety while handling equipment and supplies, managing the working environment, and preventing food-borne illness. As they experience the creative preparation and presentation of food, they build an awareness of its social and cultural significance. Students also gain a basic understanding of the economics of operating a food-related enterprise including purchasing, cost accounting and portion control. Students can apply their skills in their homes as well as in public food service facilities. They often choose to use their training to secure entry-level employment in the growing hospitality industry or to pursue careers in the food industry.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 4, 2011

Prerequisites: Strength and Conditioning 11 (recommended)

Course Synopsis:

Strength and Conditioning 12 builds on the foundation of knowledge and development of skills begun in Strength and Conditioning 10 and 11. Students will explore more advanced topics relating to anatomy and physiology and how this knowledge is related to their training. In addition, students will learn more advanced lifting techniques not previously taught in Strength and Conditioning 10 and 11. Students will enhance their fitness and performance levels while developing and demonstrating their leadership skills in a weight room facility. Students will assess and analyze their personal fitness needs, set goals, and develop a personal fitness program around the areas of fitness, nutrition, and technique. Students will reflect on their progress regularly as a way to monitor this progress and improve skills. Furthermore, students will be required to demonstrate their knowledge in a leadership setting where they will be required to teach and coach other peers. Independently, students will be required to apply their knowledge about training and nutrition to the design of specific training and diet plans.

Course Synopsis:

This course is intended for senior students with a strong science background. It is intended to benefit those who intend to pursue post secondary studies in science-based fields. This is a laboratory course, which will expand upon, or be done in conjunction with, some of the basic laboratory work that was done in grade 11. A basic understanding of Macintosh computer programs is essential. Students are involved in the preparation of laboratory material, including solutions, chemical supplies and equipment. In addition, they will be trained in the working procedures of laboratory preparations, including stock accountability (receiving, ordering and inventory), applied mathematics, safety, daily procedures and laboratory organization. Finally a teaching aspect is added to the laboratory technician course, as the student will assist junior students who are attempting laboratory work as part of their honors projects.

Date Approved: April 5, 2004

Prerequisites:

Course Synopsis:

This activity-based course will consist of three segments. The environmental component will focus on increasing student awareness of their environment; emphasis will be placed on the flora, fauna and geography of the Fraser Valley. Students will be encouraged to actively investigate environmental issues particularly those related to the Fraser Valley Region. The second component of the course will focus on personal development in areas such as leadership skills, decision-making, and group cooperation. The goal is to put these skills into action when participating in the outdoor activities. The third component of the course consists of developing basic knowledge, skills and attitudes necessary for safe, comfortable, outdoor experiences. Over a school year students will participate in variety of outdoor experiences such as orienteering, hiking, backpacking, indoor rock climbing and cross country skiing. The third component curriculum with a backpacking trip for several days in late June. Before, during and after these activities students will be challenged to think about their role in the environment and encouraged to develop an environmental ethic by using the environment with a minimum impact.

Grade Level of Course: □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 5, 2004

Prerequisites: B average or special permission

Course Synopsis:

To provide students with further opportunities to develop individual skills & knowledge whilst supporting & encouraging their peers within the school community. Students learn to develop an understanding of individual academic, social, & cultural differences. Students learn to use a variety of approaches, techniques & skills to assist other students' learning process. Activities include the teaching of lessons to peers, analysis of learning styles, development of appropriate learning materials & an understanding of cultural variances. Learning outcomes are grouped under curriculum organizers: Social & Cultural Issues, Creation & Analysis. Students are given the opportunity to self assess & present to their peer group. Students enhance & improve skills in communication, interpersonal relationships, leadership & conflict management, while acquiring an appreciation of the importance of contributing to their communities & helping others. The course is designed to complement the grade 11 tutoring course.

Category: Fitness and Recreation

Grade Level of Course: ☐ 10 ☐ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 4, 2011

Prerequisites: Sports Performance 11 (recommended)

Course Synopsis:

Sports Performance 12 is a course that will prepare students physically and mentally to be at their best as athletes and as leaders. As an athlete, they will participate in an individualized performance-training regime that includes free-weight Olympic lifts, flexibility training, speed training and agility training. This training will be broken into 4-week Macro-cycles across the semester. Testing will occur every four weeks to monitor the development of each student’s explosive capacity, change of direction, acceleration and flat-out speed. In addition, students will be using a variety of fitness charts and data to determine their relative speed and strength as compared to others of their age and fitness level across North America. Students will be familiarized with the theory behind their performance training as the semester unfolds.

The Leadership portion of this course will be training that prepares students to coach/lead as a part of their school and greater community. Students will be given an opportunity to demonstrate and practice their leadership skills by leading activities and spotting/coaching other students in their class. In addition, students will assemble a portfolio that will be the core of a life-long tool for gaining entry into post-secondary performance programs, scholarship opportunities, and job opportunities.

School Name: W J Mouat Secondary

Course Name: Chemistry Biology University Prep 12

Course Code: YMIS 12

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 5, 2004

Prerequisites: Chemistry 11/Biology 11

Course Synopsis:

Designed for students attempting to qualify for Provincial Scholarships Awards in either Chemistry 12 or Biology 12 and planning to enroll in university science courses. First goal is to ease the transition for students into first year sciences at university and to increase their level of preparation. This will be accomplished by having students study university topics in chemistry, biology, and statistics and perform university level laboratory research and technical report writing. These university topics are not covered in Chemistry 12 or Biology 12 curriculum. Second goal is to allow students more opportunity to study complex problem solving in chemistry and biology based on chemical and biological theories and research. The level of complexity of this problem solving is typical of what is expected in first year university chemistry and biology courses and exceeds that normally found in Chemistry 12 and Biology 12. It is hoped that improved general problem solving skills will increase student scores on both the Chemistry 12 and Biology 12 exam and therefore their chances to earn Provincial and Entrance Scholarships to universities, both are directly tied to Provincial Exam grades. The theme of technology will be used to both support the above two goals and allow the students to be more prepared for the technology of the future. These students will be learning to use technology that other Chemistry 12 and Biology 12 students will not normally be exposed to. They will learn invaluable technological, research, and lab skills that they would not usually be exposed to until first year university.

Course Name: Community Recreation 10

Course Code: YPR 10

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 5, 2004

Prerequisites: None

Course Synopsis:

This course is designed for students who enjoy and desire to be active, but are tired of traditional PE activities like fitness testing, team sports and shuttle runs. This class will introduce the concepts of lifetime sports (as opposed to competitive or pedagogical sports), combating stress related illness through leisure activities, and using adventure outings as motivation towards a healthy active lifestyle. Students will begin to make connections between the activities they are involved in, and a healthy, active, stress-reduced life. A typical week would see the students do a mixture of in-school lifetime sports, and out of school leisure activities, with time set aside during class time to plan six adventure outings per semester. Learning outcomes for the course are divided into activity units, and grouped under the standard physical education curriculum organizers of the cognitive, affective, and psychomotor domains. A major component of the course will be student self-assessment, and will combine both quantitative (based on a rubric to be taught to students and reviewed during the year) and qualitative (periodic written reflective exercises) evaluation.

Course Synopsis:

This course is designed for students who enjoy and desire to be active, but are tired of traditional PE activities like fitness testing, team sports and shuttle runs. This class will further develop the concepts of lifetime sports (as opposed to competitive or pedagogical sports), combating stress related illness through leisure activities. A major course focus will be the development of skills and attitudes necessary to find, plan for, and successfully complete adventure outings as motivation towards a healthy active lifestyle. Students will connect the importance of fitness and wellness to the successful and enjoyable completion of adventure outings. Small scale leadership activities will be an area of emphasis. A typical week would see the students do a mixture of in-school lifetime sports, and out of school leisure activities, with time set aside during class time to plan seven adventure outings per semester. Learning outcomes for the course are divided into activity units, and grouped under the standard physical education curriculum organizers of the cognitive, affective, and psychomotor domains. A major component of the course will be student self-assessment, and will combine both quantitative (based on a rubric to be taught to students and reviewed during the year) and qualitative (periodic written reflective exercises) evaluation.

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 11, 2005

Prerequisites: Textiles 11 & 12 or Teacher

Course Synopsis:

Encourages students to express themselves creatively through the medium of textiles, in the realm of fashion design. The course will cover everything from concept to finished product. This means that the student will explore factors that have influenced fashion in the past and in the present, identify sources of inspiration, study and apply the principles and elements of design, draw, draft and construct original garments. Self and peer assessment play a major role throughout the process. Students may have the opportunity to showcase their garments in one of the many Grad functions (Annual Grad Fashion Show, Grad Banquet, Prom Night) or Drama productions. Upon completion of this course, students will have a portfolio, which is essential for admission into any fashion design/merchandising post-secondary institution.

Course Code: YHRA

Category: Fitness and Recreation

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 4, 2011

Prerequisites: Strength and Conditioning 11 (recommended)

Course Synopsis:

Strength and Conditioning 12 builds on the foundation of knowledge and development of skills begun in Strength and Conditioning 10 and 11. Students will explore more advanced topics relating to anatomy and physiology and how this knowledge is related to their training. In addition, students will learn more advanced lifting techniques not previously taught in Strength and Conditioning 10 and 11. Students will enhance their fitness and performance levels while developing and demonstrating their leadership skills in a weight room facility. Students will assess and analyze their personal fitness needs, set goals, and develop a personal fitness program around the areas of fitness, nutrition, and technique. Students will reflect on their progress regularly as a way to monitor this progress and improve skills. Furthermore, students will be required to demonstrate their knowledge in a leadership setting where they will be required to teach and coach other peers. Independently, students will be required to apply their knowledge about training and nutrition to the design of specific training and diet plans.

Prerequisites: Must be in Gr. 10 or higher

Course Synopsis:

This course will teach students how to produce effective and compelling digital media for print, video and web using Adobe Creative Suite, Adobe After Effects 6.5, and Macromedia Studio MX 2004. Using eMAC computers, students will learn the basics of digital design in a practical setting. They will learn basic principles of typesetting, and basic page, video and web design principles of proximity, alignment, repetition and contrast. Emphasis will be on applying all principles and techniques to broad spectrum of real-live design projects for print, video and web publishing. Ancillary goals of developing English, word-processing and editing skills, the development of teamwork and the ability to work with others, the development of high standards of performance and achievement, and achievement of a degree of competency which will assist students in further education, training or employment. All levels of critical thinking are addressed. Wherever possible students will create publications for their own personal use, school or community use.

Date Approved: March 7, 2005

Prerequisites: Science 10

Course Synopsis:

This course provides hands on learning experience for students interested in developing job-related skills in the agricultural and horticultural sector. Students will gain knowledge and skills in greenhouse operation, landscaping, garden development and garden maintenance. Students will also learn theory relating to many aspects of horticulture, such as: soil composition and fertility, importance of plants to humans, plant hardiness, botany (plant development, parts and classifications) and plan propagation. Practical and project work are major components of this course. Students will complete 3 projects relating to topics covered and will participate daily in development and nurturing of nursery stock in preparation for a culminating plant marketing activity. This activity provides an opportunity for students to develop skill in working with the public while sharing their recently acquired knowledge with community members.

Course Synopsis:

This course is intended for senior students with a strong science background. It is intended to benefit those who intend to pursue post secondary studies in science-based fields. This is a laboratory course, which will expand upon, or be done in conjunction with, some of the basic laboratory work that was done in grade 11. A basic understanding of MacIntosh computer programs is essential. Students are involved in the preparation of laboratory material, including solutions, chemical supplies and equipment. In addition, they will be trained in the working procedures of laboratory preparations, including stock accountability (receiving, ordering and inventory), applied mathematics, safety, daily procedures and laboratory organization. Finally a teaching aspect is added to the laboratory technician course, as the student will assist junior students who are attempting laboratory work as part of their honors projects.

Course Synopsis:

Musical Theatre places its emphasis on experiential learning. The course is intended to provide students with an understanding of the elements of Musical Theatre, examining both performance and technical theatre within the framework of a Musical Theatre Production Company. Musical Theatre provides a creative experience, which fosters well-rounded growth in encouraging creativity, and strong emotional and physical release. Musical Theatre 11 is a course that provides students with a more in-depth study of the Musical Theatre concept, the history of Musical Theatre, an ‘intermediate level’ of Musical Theatre performance and/or technical techniques, and offer students the opportunity to participate in a Musical Theatre production. The course curriculum shall include the following: utilization of advanced characterization, exploration of classical and contemporary musical theatre production styles, exploration of specialized musical theatre styles, attendance at live theatrical experiences, and analysis and evaluation of theatrical experiences. Musical Theatre 11 further develops and refines those acting and theatre concepts and skills outlined in the Musical Theatre 10 curriculum. This advanced course is designed for the highly motivated theatre student who wishes to pursue the study of contemporary dramatic theory through individual study, group discussion, focused research and performance. This course is offered two days per week 'after hours' on a regular basis, primarily in the First Semester. Up to four rehearsals per week and a week of performances is a mandatory part of this course. At the Grade 11 level, students are exposed to introductory and intermediate level acting method but are still granted some opportunities for leadership and solo performance within the framework of a Musical Theatre production. Students will become more eligible and equipped for leading performance and/or technical roles in the production.

Course Name: Sports Performance 12

Course Code: YHRA 12

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 4, 2011

Prerequisites: Sports Performance 11 (recommended)

Course Synopsis:

Sports Performance 12 is a course that will prepare students physically and mentally to be at their best as athletes and as leaders. As an athlete, they will participate in an individualized performance-training regime that includes free-weight Olympic lifts, flexibility training, speed training and agility training. This training will be broken into 4-week Macro-cycles across the semester. Testing will occur every four weeks to monitor the development of each student’s explosive capacity, change of direction, acceleration and flat-out speed. In addition, students will be using a variety of fitness charts and data to determine their relative speed and strength as compared to others of their age and fitness level across North America. Students will be familiarized with the theory behind their performance training as the semester unfolds.

The Leadership portion of this course will be training that prepares students to coach/lead as a part of their school and greater community. Students will be given an opportunity to demonstrate and practice their leadership skills by leading activities and spotting/coaching other students in their class. In addition, students will assemble a portfolio that will be the core of a life-long tool for gaining entry into post-secondary performance programs, scholarship opportunities, and job opportunities.

Course Name: Dance 12B

Course Code: YD 12B

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits:

Number of Hours of instruction: 70

Date Approved: March 30, 2000

Prerequisites: Dance 12A

Course Synopsis:

This course will offer further advancement in Dance in the three areas of Classical Ballet, Jazz and Modern Dance from the Grade 11 course. As in the grade 11 course, much of the work will be enhanced by the inclusion of guest teachers and professionals in the field.

Ample opportunity for performance will be provided. In second semester the dancers will focus on developing more polished and sophisticated dance works and will work towards integrating their skills into their chosen career plans.

Course Name: Drama 10A

Course Code: YDRA 10A

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 90

Date Approved: March 30, 2000

Prerequisites:

**Course Synopsis:**

Drama 10 is a continuation of the skills taught in Drama Major 9.

Students continue their studies theatre techniques, etiquette and history. As well, students begin scriptwriting, play production and directing. In role drama, students will explore contexts derived from real life which can be tailored to the students’ preparation for the future.

**Additional Information:**

Drama Major 10A offers a unique opportunity for the learner to develop as an individual, as a team member and as a member of the artistic community.

Individually, each student is responsible for developing his/her own critical analysis, presentation and playwriting skills. Collaboratively, students will be continuously interacting in small and large groups to produce, direct, create, and present theatrical experiences.

School Name: Langley Fine Arts School

Course Name: Improvisation 10

Course Code: YIMP 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☒ 10 ☐ 11 ☐ 12

Number of Course Credits:

Number of Hours of instruction: 70

Date Approved: March 30, 2004

Prerequisites:

Course Synopsis:

Improvisation is designed as a vehicle for students to explore their potential as risk takers. All arts majors will have the opportunity to expand the boundaries of their self confidence as they slowly increase their willingness to offer and yield stage offers from their peers.

Utilizing games and exercises, students will have the opportunity to develop valuable skills in lateral thinking, team leadership, team responsibility, spontaneity, creative problem solving, respect for other people's ideas and most importantly, self trust.

Additional Information:

Our grade nine and ten students have few opportunities to work on the specific skills inherent in this course. Typically our drama students do not have the opportunity to develop their spontaneous risk taking. In the LFA drama curriculum, improvisation is used as a way into specific scene and play studies, not as a specific goal unto itself. Students from other majors have no other outlet for the type of activities offered by improvisation. Outside of the P.E. program, improvisation is the only opportunity for all the majors to meet and engage in disciplined spontaneous activity.
This course is designed to engage the learner with opportunities to explore aspects of their identity individually and as a collective, working both on their own and in small groups. This course addresses issues around art in the community and the public realm, resulting in the development of citizens who understand and continue to explore the importance of visual culture.

Additional Information:

This course is designed for students who are interested in working with a wide variety of both two and three dimensional materials. Students will have opportunities to explore collage, assemblage and construction techniques using fabric, paper, clay, wood, metal and non-traditional art materials including found materials and "trash"

Course Code: YMU10A

Category: Fine Arts, Design, and Media

Grade Level of Course: 10[] 11[] 12[

Number of Course Credits: 4

Number of Hours of instruction: 90

Date Approved: March 30, 2000

Prerequisites:

Course Synopsis:

Students in this course will further develop their musicianship through performing, composing and listening to music.

Compositional elements to be studied and employed will include:
- Form,
- Compositional Devices,
- Cadences,
- Progressions, and
- Augmented and Diminished triads.

Students will perform a broad range of musical styles in a variety of small ensembles. Students will further develop technical proficiency and establish effective rehearsal techniques. Music from the Baroque period will be listened to and studied in depth.

Additional Information:

At the Fine Arts School it was decided that the school would offer courses within the four major arts areas. Each student at the secondary level would choose a major to pursue in depth. The Music Major course represents the music strand of the Fine Arts Core Subjects. This course is a supplement to their participation in a broad range of performing ensembles including: Concert Band, Jazz Band, Concert Choir and Chamber Choir.

Grade Level of Course:  

Number of Course Credits:

Number of Hours of instruction: 90 hours

Date Approved: April 30, 2004

Prerequisites:

Course Synopsis:

There are several ways in which artists can make sculptures. Traditional methods such as modelling can be done using soft materials like clay, wax, or wet plaster and carving can be done using hard materials like wood, stone, or ivory. Contemporary sculpture ranges greatly to include a variety of methods such as construction and assemblage, and materials such as steel, plastic, foam, and found objects. In this course, students will explore a variety of methods and materials, and will discover sculpture through carved Prehistoric figures; Greek and Roman statues; African masks, Baroque and Neo-classical marbles; and 20th century movements including Cubism, Dada, Surrealism, Pop Art, Land Art and Installation.

Grade Level of Course: 10 11 12

Number of Course Credits:

Number of Hours of instruction: 70

Date Approved: March 30, 2000

Prerequisites:

Course Synopsis:

Visual Art 2D is a studio foundation course. It continues to build on the student's technical skills, placing a greater emphasis on the development of the individual's style and an awareness of their sources of imagery.

This is an intensive course in 2-dimensional art. It covers topics including drawing, acrylic and watercolour painting, the elements and principles of design, image development strategies as well as the development of critical thinking and a study of artists, past and present.

Additional Information:

Students will continue to develop an understanding of two dimensional art through extensive media use, technical, intellectual, artistic awareness and visual expression.

Students will continue to study drawing, painting and printmaking while developing their own personal, authentic imagery.

Students will continue to use goal setting, planning, time-management, self-discipline, cooperation and critical evaluative skills to solve their visual art problems.

Course Synopsis:

This course is designed as an intermediate course in animation. Students will study the personal, social, cultural and historical significance of graphic communications and create work that reflects an understanding of these contexts. They will learn the elements and principles of design and demonstrate their knowledge through both practical and written work. Students will use a variety of software to create their animations, demonstrating their knowledge of storyboarding, scriptwriting, character development, set design and the principles of cinematography. Students will reflect on their own work and learn to critique the work of others. The course will culminate in a project that demonstrates their understanding of the principles of animation.

Number of Course Credits: 4 elective
Number of Hours of instruction: 100 - 120
Date Approved: April 28, 2005
Prerequisites: None bud CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each schools equipment and resources.

Course Synopsis:

This course provides students with a theoretical and practical opportunity to explore the world of digital media in a hands-on, team-based, cooperative learning environment. In this course students will be experimenting, creating, designing and producing projects within the field of media technology. This course addresses the principles, concepts and use of technology in media and communications. The course has been developed to instruct, support and encourage students to become confident users of technology, specifically computers, digital still cameras, video cameras, and video/image editing software and equipment. Through exploration, instruction, guided practice, and reflection, students will begin to develop the skills required to create digital media productions. Students will make use of this media equipment to develop technical skills and use their knowledge of the production process to plan, produce, present and analyse diverse digital media productions. Self and peer evaluation/reflection is an integral part of each project. The learning outcomes for this course are grouped under the following curriculum organizers: Knowledge and Understanding, Creation and Application, Technology, and Analysis.

Course Synopsis:

Media Technology 11 gives senior students the opportunity to continue to explore the diverse and developing field of digital media technology. This course provides grade 11 students with a theoretical and practical opportunity to extend and continue their exploration into the world of digital media in a hands-on, team-based, cooperative learning environment. In this course students will be experimenting, creating, designing and producing projects within the field of media technology. This course addresses more advanced principles, concepts and use of technology in media and communications. Media Technology 11 has been developed to instruct, support and encourage students to be confident users of technology, specifically computers, digital still cameras, video cameras, and video/image editing software and equipment. Through extended exploration, instruction, guided practice, and reflection, students will continue to develop and enhance the skills they acquired in Media Technology 10 to create more complex media productions. Students will use media equipment to develop advanced technical skills and use their knowledge of the production process to plan, produce, present and analyse diverse digital media productions. Self and peer evaluation/reflection is an integral part of each project. As the course progresses, students will build essential skills in the areas of pre-production, production and post-production to create their digital media projects. The course will focus on more advanced camera techniques, video shorts, commercials, public service announcements, and animation (using digital video cameras). The learning outcomes for this course are grouped under the following curriculum organizers: Knowledge and Understanding, Creation and Application, Technology, and Analysis.

Course Synopsis:

Media Technology 12 gives senior students the opportunity to acquire advanced technical knowledge (theory) and to develop advanced skills (practical) in the diverse, dynamic and continually evolving field of media technology. This course provides grade 12 students with the opportunity to develop and put into practice their knowledge and skills in a practical and cooperative learning environment. Through extended exploration, instruction, guided practice, and reflection, students will create, design and produce both school-related and personal media projects. School projects will centre on the planning and production of programming for a school TV station. This course will also focus on advanced principles, concepts and techniques used in the field of media and communications. Students will use media equipment to develop advanced technical skills (including advanced camera and editing techniques) and their knowledge of the production process to plan, produce, present and analyse school-related media productions and broadcasts. Self and peer evaluation/reflection is an integral part of each project. Focus areas of this course include designing and developing TV and media productions, pre-production, production, post-production and presentation (school-wide or classroom). Projects will include video shorts, commercials, public service announcements and newscast (live and recorded) productions. Student activities/assignments will be both individual and team-based. Additional Information:

Upon program completion students may have the opportunity to secure employment through interviews with employers associated with Roofing Contractors’ Association of British Columbia (RCABC).

Through this opportunity it is expected that students will:

• gain skills and experience that makes training relevant
• gain information to enable informed career planning
• gain self-confidence
• develop a network in the trade
• make a transition to paid employment

School Name: Clayton Heights Secondary

Course Name: TV/Video Production 11

Course Code: YTVVP 11

Category: Fine Arts, Design, and Media

Grade Level of Course: □ 10  □ 11  □ 12

Number of Course Credits: 2 Fine Art

Number of Hours of instruction: 115

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

The course has been developed to provide senior students with a theoretical and practical opportunity to explore the world of TV and video production in a hands-on, team-based and cooperative learning environment. This course addresses the principles, concepts and challenges of TV and digital film and video production. In this course students will be designing, creating and producing a variety of TV and video productions. Throughout the course students will be given opportunity to create these productions using computers, digital still cameras, digital video cameras, image and video editing hardware and software. Through exploration, instruction, guided practice, and reflection, students will develop and enhance the skills they require to create TV and video productions. The units in this course have been developed to give students practical experience in all areas of TV and video production, including pre-production, production and post-production. The course will focus on advanced camera and filming techniques, the art of cinematography, longer video productions (i.e. documentaries) as well as advanced editing techniques and post-production (i.e. special effects). Some additional areas where students may be involved are, producing school related video projects, broadcast and/or videotaping of school news or events. Throughout each unit, students will keep track of their project’s progress by completing detailed progress assessments for each production.

School Name: Clayton Heights Secondary

Course Name: Yearbook 11

Course Code: YYB 11

Category: Other

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

This course is designed to enable students to publish the school’s yearbook with the tools available at the site. Students will learn how to complete layouts including gathering the textual and photographic information required, and demonstrating and applying design knowledge using available technology such as computers, cameras and programs. Students will reflect on their work and on the work of others in order to offer suggestions and use editing skills. Students will start to develop skills around time management, communication, creative problem solving, and responsibility to a group and contribution to school society. Students will develop an appreciation for the interdisciplinary nature of publishing which may include: researching, interviewing, surveying, copywriting, editing, choosing type, taking photographs, manipulating photographs, designing, completing layouts, developing computer skills, advertising and distributing the product. Students will develop numerous pieces of work and will have the opportunity to work independently, in small teams and as part of the entire class.

Learning Resources:

Curriculum Guide (School’s Yearbook Publishing Company)
Visual Quickstart Guide (available for a variety of programs) published by Peachpit Press, Berkeley, California
Adobe Illustrator Manual
Adobe Indesign or PageMaker Manual
Connect Me Website by Friesens or similar websites by other publishing companies
Adobe Classroom in a Book Series (available for a variety of programs)

Various other books and manuals for computer programs, design concepts and photography skills

Various web sites offering tips on photography and Adobe programs

Course Name: Yearbook 12

Course Code: YYB 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Recommended Yearbook 11 or have equivalent computer, photography and layout skills.

Course Synopsis:

This course is designed to enable students to demonstrate leadership in the publication of the school's yearbook using management skills. Students will learn how to analyze various layout options from a variety of sources. Students will demonstrate appropriate leadership and mentorship strategies in the selection and application of a suitable yearbook theme. Students will examine the school’s past yearbooks to suggest improvements and identify successful components in order to provide a continuity of purpose. Students will extend the development of their skills around time management, communication, creative problem solving, reflection, career exploration, graduation portfolio development and responsibility to a group and contribution to school society. Students will participate in editing yearbook sections; acting as design, photographic, copy, grade and section editors. Students will lead in the development of numerous pieces of work.

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course:  ☑ 10  ☑ 11  ☑ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None but CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each schools equipment and resources.

**Course Synopsis:**

Creative Writing 10 provides students with an opportunity to explore writing in different genres. Methods of expressing, organizing, editing and publishing are practiced. Students are asked to critically analyze different styles (both in writing and media) and the effect persuasive techniques have on the reader/listener/audience. Students learn to write to achieve a desired effect on the reader/audience.

**Learning Resources:**
Resources useful for reference:

Text:
- Everyday Creative Writing: Panning for gold in the Kitchen Sink, M.C. Smith and S. Greenburg
- Elements of Storytelling, Peter Rubie, 1996
- Creating Characters, Dwight V. Swain, 1997
- Elements of Style, William Strunk Jr. and E.B. White, 1972
- The Writer’s Market, current year
- How to Build a Long-Lasting Fire, Carol Morrison, 1997
- A Passion for Narrative, Jack Hodgins, 1993
- The Practice of Poetry, Eds. Robin Behn and Chase Twichell, 1992
- Real Toads in Imaginary Gardens, S. Policoff and J. Skinner, 1991
- Recipes for Writing, Addison Wesley Publishers
- Writing Accross Cultures, Edna Kovaks, 1994
Writing Incredibly Short Plays and Poems, James H. Norton and Frances Gretton, 1972

For Media Studies:
- Media in Perspective, Harcourt, Brace, Jovanovich Publishers, 1993
- Mass Media and Popular Culture, Harcourt Brace Canada, 2000
- Media Mix, (Nelson's Mini-Anthologies series) Sharon Siam and James Barry, 1994
- Vancouver Sun: Newspaper In Education Package, available from publisher

For Unit 2 "Developing a Narrative Voice:"
- Grimm's Fairytales
Other children's fairytale parodies including:
- The paperbag Princess
- Stinky Cheese Man
- The True Story of the Three Little Pigs
- The Frog Prince Continued

Video Resources:
- Scanning Televisions, (first and second editions with teacher guides), harcourt Canada

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Completed French Language 10

Course Synopsis:

Quelles sont les circonstances entourant l’évolution du journalisme en Amérique? Quelles sont les composantes d’un journal? Comment l’actualité affecte-t-elle le monde d’aujourd’hui? Comment rédige-t-on une nouvelle, un éditorial, une lettre d’opinion? Voici quelques-unes des questions dont nous traiterons dans ce cours. De plus, les élèves devront préparer, puis présenter devant la classe un compte-rendu journalistique; tenir un carnet d’actualité hebdomadaire; planifier, créer et publier une revue scolaire en équipe, etc.

Ce cours permettra à chacun d’enrichir leur vocabulaire, leurs habiletés langagières tant à l’orale qu’à l’écrit, ainsi que leurs habiletés d’écoute. Ce cours amènera aussi l’élève à prendre connaissance du monde qui l’entoure.

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100 - 120

Date Approved: April 27, 2004

Prerequisites: None

Course Synopsis:
This course provides students interested in library or information related careers with an introduction to research skills, library management, organization and services. This course is designed for students who are interested in exploring the potential of computers in communication and electronic information retrieval. Students learn research skills using a variety of technologies and print media.

Learning Resources:
The resources for this course may vary from school to school and thus may impact on the course presentation. The following resources should be available at each school.

- Computers with internet access
- Applicable computer/CD-ROM programs
- Applicable internet resources
- Library circulation software system
- Print and non-print resources

Additional Information:
Students do not require previous computer or library experience to take this class, however, permission of the teacher-librarian is mandatory prior to being accepted in this course. In addition, students must have an excellent attendance record.

Grade Level of Course:  

10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  

April 27, 2004

Prerequisites:  

None

Course Synopsis:

This course addresses the following issues and questions over the course of a semester: How do we come to know? What is the relationship between mind, knowledge and understanding? What does it mean to be conscious? Do animals have consciousness? Does the external world exist or is it just an idea in our mind? How do we know? What constitutes a language? How do we use our language? What is the relationship between thought and language? What constitutes a moral action? Why be moral?

In this course, students will:

• explore the world of philosophy;
• read about and discuss philosophy of mind;
• read about and learn what language is and how it affects us all;
• read about and learn what we mean by ethics and why it is worthy of intellectual discussion;
• develop an essential life skill – the ability to think critically;
• read about and learn how we come to know and what constitutes knowledge;
• and above all
• value and understand that knowledge and being an educated citizen is worthwhile in and of itself.

School Name: Earl Marriott Secondary

Course Name: Theory of Knowledge 12

Course Code: YTKN 12

Category: Other

Grade Level of Course:  

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved:  April 28, 2005

Prerequisites: None

Course Synopsis:

Philosophy 12 provides students with the opportunity to inquire into the tradition of Western Philosophy, asking the most basic questions about human life and its place in the universe. Topics will address questions such as, Who am I? Do humans have free will? Does God exist? What is Justice? and What is Truth? The course will explore philosophical ideas as well as teach students how to think about all that they learn. Readings, assignments and tests will be directed to this end. Students taking this course should be willing to think critically about important issues. To support discussions and goals, students will grapple with the thoughts of such philosophers as Plato, Descartes, Kant, Kierkegaard, and others, exploring issues such as aesthetics, ontology, morality, ethics, epistemology and metaphysics. Finally, in Philosophy 12, students will develop their imaginative, critical, analytical and problem-solving skills through oral and written discussions and presentations of these philosophical ideas. Guided practice in analytical reading and writing of well-argued philosophical prose will help students to articulate examine and reflect on their own and others’ ideas.

Course Name: Business Leadership 12
Course Code: YBMO 12B
Category: Business and Applied Business

Grade Level of Course: 10 11 X 12
Number of Course Credits: 4
Number of Hours of Instruction: 120
Date Approved: November 19, 2009

Prerequisites:

Course Synopsis:

Students will examine the historical foundations of leadership and compare them to contemporary models. They will research why people/employees do things and learn how to motivate others. Students will create learning teams in order to build community and understand team dynamics. Higher order thinking will be promoted through development of critical thinking skills, problem solving and conflict resolution skills. Communication skills (e.g., clarity, accuracy, summary) will be emphasized through presentations and learning the art of negotiation. Multiple forms of business technology will be used for communication application (e.g., text messaging, emailing, tweeting). Students will also explore responsible and ethical leadership. Managing for results will be examined based on employee performance, goal setting, interpersonal skills, team building and developing a motivational program.

School Name: Elgin Park Secondary

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course: □ 10 ☑ 11 □ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None but CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each school's equipment and resources.

Date Approved: December 14, 2006

Prerequisites:

Course Synopsis:

Photo Design 12 provides the opportunity for senior students to advance their knowledge (theory) and skills (practical) in technical and design applications from traditional to digital photography. Students will refine their skills in archival fine art black and white photography through controlled exposures, film processing, developing prints and presentation. Students will increase their expertise in the development of digital image making as it applies to graphic design, in both commercial and personal portfolio applications. In addition, students will analyze and respond to photographs by eminent photographers, acquire critical thinking strategies to examine their own photographs and exhibit their work.

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved:  May 27, 2004

Prerequisites:  None

Course Synopsis:

This course is designed to give students an introduction to animation. Students study the historical significance of graphic communications and create work using these early techniques. They learn the elements and principles of design and demonstrate their knowledge through both practical and written work. Students use a variety of software to create their animations, demonstrating their knowledge of storyboarding, scriptwriting, character development, set design and the principles of cinematography. The course culminates in a project that demonstrates understanding of the principles of animation.

School Name: Fleetwood Park Secondary

Course Name: Outdoor Pursuits 11

Course Code: YPR 11A

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: May 11, 2006

Prerequisites:

Course Synopsis:

This course has been designed to introduce students to the outdoors and to familiarize them with several of the many outdoor pursuits available in the surrounding area. The students will gain an increased awareness of their environment and their place in it while engaging in challenging and new pursuits. There will also be a focus on safety in the outdoors with respect to first aid, survival and potential risks/hazards analysis.

Outdoor activities will depend on the weather, time and the ability of the class. Field Trips will be dependent on the above conditions as well as scheduling.

The activities/pursuits taught may include: map and compass skills, orienteering, snowshoeing, general camp and backpacking skills, backcountry equipment and clothing selection, backcountry food selection, flat water canoeing, mountain biking, animal awareness / safety, indoor rock climbing, and belaying. In each of these activities, skills are introduced in an indoor or outdoor classroom environment. The skills are then put into practice through experiential learning opportunities during multi-day pursuits. In addition to enjoying and acquiring the skills associated with the pursuits listed above, individual and group safety skills are stressed and taught in each component of the course. Therefore, students must demonstrate a mature and common sense attitude at all times. A second topic that is exemplified throughout the course is the care and appreciation of our backcountry environment. The course attempts to maintain a “Leave No Trace” approach at all times.

Status: approved

School Name: Fraser Heights Secondary

Course Name: Art Metal 10

Course Code: YARM 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 110

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students to explore the wide array of metalworking techniques used in Art Metal. Students learn to use the metalworking equipment as they follow the steps in creating Art Metal projects of personal interest. Learning Outcomes for the course are grouped under the curriculum organizers: Health and Safety, Personal and Project Management, Mathematical Applications, Tools and Equipment, Materials, Cutting Processes, and Forming and Joining Processes. The approach supports safe workplace practices, student skill development and encourages meaningful methods of ideation, design, planning, production and evaluation of various Art Metal techniques and projects.

Learning Resources:

• Teacher handouts
• Guest speakers from the community in related fields
• Visit/interview local trades people in related fields
• Articles and information about Art Metal careers on internet
• Books

Additional Information:

This is a new course based on the old locally developed Art Metal course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Other possible units that may be incorporated into the course are lapidary and stained glass. Delivery of the course will be altered to reflect each schools equipment and resources.

School Name: Fraser Heights Secondary

Course Name: Career Transitions 12

Course Code: YCTR 12

Category: Other

Grade Level of Course:  ☑10  ☑11  ☑12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

**Course Synopsis:**

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

School Name: Fraser Heights Secondary

Course Name: Carpentry & Joinery - Furniture Construction 11

Course Code: YCJFC 11

Category: Trades and Technology

Grade Level of Course: ☑ 10  ☑ 11  ☐ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: May 11, 2006

Prerequisites: None

Course Synopsis:

Furniture Construction 11 begins to provide students with the skills and understanding necessary to create professional quality furniture. A solid grounding in case construction including frameless, and frame and panel (rail and style) challenges students with a wide variety of possible projects. With exposure to a variety of techniques they will be able to express their own ideas, culture and experiences in their designs. It is expected that the individual student will take on this challenge by designing or adapting the design for a full sized piece of furniture. The complexity of the project will be based on the student’s prior experience, skills and desires and can easily be tailored to meet the needs of individual students.

Through lectures, demonstrations, media and hands on training students develop both woodworking skills and the proper safety attitude. Students will be introduced to and demonstrate the safe use of hand and power tools. Students will gain and use a basic understanding of design criteria and basic sketching and drafting skills. Students will also be exposed to decision-making based on environmental considerations. Such things as closer utilization of forest products and secondary manufacturing as well as the pro’s and con’s of using particular materials will be discussed both in the light of human health and safety and in the light of the greater ecosystem we live in.

This 4 credit course is designed to easily lead into higher level Ministry approved Carpentry and Joinery 12 courses. There are possibilities for creative hobbies, or careers in vocational construction and design.

Course Name: ESL Writing 10

Course Code: YWESL 10

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 27, 2004

Prerequisites:  

Learning Resources:

ESL Writing 10 is for students at the upper-beginner/lower intermediate (450/nearing 460) level who are ready to learn the specific skills necessary for successful academic writing. The process approach to writing and other typical interactive-classroom techniques will likely be both unfamiliar and undervalued by ESL learners and so must also be explicitly taught. Students experience the process of writing through interesting content combined with focused work on vocabulary, grammar and syntax, and rhetorical patterns. They practice expressing information, ideas and opinions is logical and coherent order and in a variety of written formats. Students gain the skills, experience, and confidence necessary to meet the writing expectations of the Grade 10 English curriculum.

Prerequisites:

Course Synopsis:
This course supports and encourages students to express themselves creatively through the medium of textiles and fashion design with an understanding of functional and aesthetic requirements. Students will analyse factors that have influenced fashion in the historical, cultural and contemporary developments on textile. Students will use the principles and elements of design to draw, draft and effectively construct original garments. Students may have an opportunity to showcase their garments in a school Fashion Show. Upon completion of this course, students will have a portfolio, which is essential for admission into any fashion design/merchandising post-secondary institution.

Course Name: Yearbook 12

Course Code: YYB 12

Category: Other

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Recommended Yearbook 11 or have equivalent computer, photography and layout skills.

Course Synopsis:

This course is designed to enable students to demonstrate leadership in the publication of the school’s yearbook using management skills. Students will learn how to analyze various layout options from a variety of sources. Students will demonstrate appropriate leadership and mentorship strategies in the selection and application of a suitable yearbook theme. Students will examine the school’s past yearbooks to suggest improvements and identify successful components in order to provide a continuity of purpose. Students will extend the development of their skills around time management, communication, creative problem solving, reflection, career exploration, graduation portfolio development and responsibility to a group and contribution to school society. Students will participate in editing yearbook sections; acting as design, photographic, copy, grade and section editors. Students will lead in the development of numerous pieces of work.

Status: approved

School Name: Invergarry Learning Centre

Course Name: Career Transitions 12

Course Code: YCTR 12

Category: Other

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

Course Synopsis:

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

Learning Resources:
- WBC Student Worksafe
  - Downloadable materials include age appropriate scenarios and activities to help students develop a strong safety attitude.
  - http://youngworker.healthandsafetycentre.org/s/Resources-Educators.asp
  - Optional – St. John Ambulance Level One (Emergency) First Aid Certification Program
    - WHMIS
    - WCB Industry-Specific Safety Certification
    - Construction Safety Association of BC
    - CSABC Safety Star Certificate

- Career Cruising (computer software / internet access)
- Web-based resource with electronic portfolio component, classroom / apprenticeship activities, career interest test 'matchmaker'; linked to the Life/Work Designs Blueprint.
  - http://www.careercruising.com/

- WorkinfoNET and linked career-related websites
  - BC WorkinfoNet is home to a collection of labour market and career-related information resources. This clearinghouse is continually updated and expanded.

X 11  

12  

Number of Course Credits: 2 Applied

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Gr. 10 or equivalent

Course Synopsis:

This course contains an introduction to the Cosmetology Industry and the various opportunities available to graduates of this program. This course focuses on professionalism, defining and outlining what professional responsibilities in the workplace may entail. Students will gain knowledge in client care, interpersonal communication, career development, personal and public hygiene, First Aid, public safety and overall salon ecology.

This course covers general and Industry specific chemistry including Trichology.

A minimum of one-third of the course will be career preparation with resume writing, job search skills and interview skills. Salon management, inventory control, marketing and advertising will comprise a portion of this course as well.

Learning Resources:

Textbook: Pivot Point International – Salon Fundamentals
Instructor generated teaching tools – assignments, word lists, handouts
People Skills – textbook by Pivot Point
Resume Writing – Workforce Documents
Videos
Examples and templates – Instructor’s Collection
Guest speakers

Additional Information:

Much of the lessons, especially Unit 7, is conveyed orally and imparts the instructor’s experiences, suggestions and recommendations.
This course must be followed by practical applications of the material to prepare the student for a job in the Cosmetology Industry. Hair styling and haircutting services need to be performed on mannequins and clients to properly prepare students in technical skills and customer service abilities.

**Course Synopsis:**
This course will emphasize the proper hand, shear and other tool positions needed to perform the services accurately.

**Learning Resources:**
Textbook: Pivot Point International – Salon Fundamentals
Instructional Videos – various sources
Instructor generated teaching tools – assignments, word lists, handouts

Course Synopsis:

Blueprint for Life 11 is a career development course, which helps make career development intentional. The course is based on the Blueprint for Life/Work Designs, a national framework of competencies to help Canadians to better manage their lives and work. This course is specifically designed around the third developmental level of competencies intended for senior high school students. It is intended to provide students with instruction, materials, and experience useful in the transition to, and the functioning in the work world and in personal and relationship areas of their adult lives.

The Blueprint for Life/Work Designs provides a list of competencies considered important to develop throughout one’s life/work building process. These competencies are organized in main areas (personal management, learning and work exploration, life/work building) and provide a four level developmental process:

Stage I: Acquisition
Stage during which learners acquire knowledge and understand the knowledge acquired. This stage presents learners with the information that may later serve as the basis for behaviour, learning integration, and self-actualization.

Stage II: Application
Stage during which learners demonstrate their acquisition by putting into action the knowledge acquired. Moving from the dimension of know-ing into the dimension of know-how characterizes this particular stage.

Stage III: Personalization
Stage during which learners are invited to deepen their new learning via assessments using their values, beliefs, and other personal attributes. In this process learners will either make the learning their own or reject it. During this stage, learners will utilize their analytical, critical and synthesis thinking abilities.

Stage IV: Actualization
Stage which calls upon learners’ capacity to recognize and strive for their full potential. The transfer from the process of integration to the process of creation happens during this stage of the learning cycle. Transforming, inventing, conceptualizing, creating and discovering are examples of the types of activities the learners will engage in.

Each student-focused activity in Blueprint for Life 11 relates to a Blueprint competency. In the instruction approach, career development programming is delivered through group activities, career-related lessons that are infused into the academic curricula, classroom life/work simulation and role-playing activities and peer support groups. Assessment is portfolio based on meeting the specific indicators as related to each competency (see below: Assessment).

Course Synopsis:

Blueprint for Life 12 is a career development course, which helps make career development intentional. The course is based on the Blueprint for Life/Work Designs, a national framework of competencies to help Canadians to better manage their lives and work. This course is specifically designed around the fourth developmental level of competencies intended for students who are moving on to the world of work. It is intended to provide students with instruction, materials, and experience useful in the transition to, and the functioning in the work world and in personal and relationship areas of their adult lives.

The Blueprint for Life/Work Designs provides a list of competencies considered important to develop throughout one’s life/work building process. These competencies are organized in main areas (personal management, learning and work exploration, life/work building) and provide a four level developmental process:

Stage I: Acquisition
Stage during which learners acquire knowledge and understand the knowledge acquired. This stage presents learners with the information that may later serve as the basis for behavior, learning integration, and self-actualization.

Stage II: Application
Stage during which learners demonstrate their acquisition by putting into action the knowledge acquired. Moving from the dimension of knowing into the dimension of know-how characterizes this particular stage.

Stage III: Personalization
Stage during which learners are invited to deepen their new learning via assessments using their values, beliefs, and other personal attributes. In this process learners will either make the learning their own or reject it. During this stage, learners will utilize their analytical, critical and synthesis thinking abilities.

Stage IV: Actualization
Stage which calls upon learners’ capacity to recognize and strive for their full potential. The transfer from the process of integration to the process of creation happens during this stage of the learning cycle. Transforming, inventing, conceptualizing, creating and discovering are examples of the types of activities the learners will engage in.

Each student-focused activity in Blueprint for Life 12 relates to a Blueprint competency. In the instruction approach, career development programming is delivered through group activities, career-related lessons that are infused into the academic curricula, classroom life/work simulation and role-playing activities and peer support groups. Assessment is portfolio based on meeting the specific indicators as related to each competency (see below: Assessment)

Course Code: YBMO 12A

Category: Business and Applied Business

Grade Level of Course:  
- [ ] 10
- [ ] 11
- [X] 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: May 11, 2006

Prerequisites: None

**Course Synopsis:**

This course will concentrate on facilitating the development of superior business and interpersonal communication skills. Beginning with the foundations of the communication process, students will develop an understanding of both interpersonal and organizational communication skills for the workplace. Communication in small groups and teams and workplace listening and nonverbal communication skills will be introduced. Techniques for communicating across cultures will be discussed. Students will be introduced to the writing process and techniques to adapt messages to a specific audience. Competent language usage will be an ongoing process throughout the course. Students will learn how to prepare, organize, write and rewrite a variety of business correspondence documents including messages, e-mails, memos, routine letters, negative messages, and persuasive sales messages. Students will learn how to organize, write and understand typical business reports and proposals. Presentation and speaking skills are essential in today’s business community and skills on writing presentations, utilizing electronic aids like PowerPoint and effective delivery techniques will be presented. Time will also be spent on employment communication including studying different types of resumes, writing letters of application and effective employment follow-up letters using current business software.

School Name: Johnston Heights Secondary

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course:  

10  X 11  12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None bud CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each schools equipment and resources.

Category: Other

Grade Level of Course: 10  11  X 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

Course Synopsis:

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

School Name: Johnston Heights Secondary

Course Name: Information Literacy - Library Science 12

Course Code: YIFLL 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: May 11, 2006

Prerequisites: Library Science 10/11 or permission of the Teacher Librarian

**Course Synopsis:**

This course will empower students with the information competency skills necessary to perform both academic and personal research using library resources, electronic databases, and the internet.

Students will be guided through the process of selecting, searching, analyzing, and citing various information resources. The research process will be applied to a variety of information needs: research papers, coursework, careers, and life-long learning. This course will prepare students for college level research.

Information Literacy /Library Science 12 will provide students an opportunity to learn further about library management, organizational and service skills. Students will apply evaluative skills to select and evaluate resources for acquisition and prepare those resources for circulation. Students will execute a promotional activity of the library and/or library resources.

This course will teach research strategies and skills for successfully finding, retrieving, evaluating and using information in various formats. It combines library skills, research methods, and information technology literacy.

Course Name: Recreation Leadership 11

Course Code: YRECL 11

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: May 11, 2006

Prerequisites: Physical Education 10 and/or Recreation Leadership 10

Course Synopsis:

Recreation Leadership 11 will allow students to explore skills, strategies, and provide practical opportunities to develop, enhance, and apply collaborative skills in physically active, leadership settings. Students will explore group dynamics and components of leadership while implementing a variety of physical activities for others to enjoy. They will study, prepare and participate in school and community recreational leadership activities and events such as physical education class mini-lessons, intramurals, tournaments, and play days. To co-ordinate and implement events, students will be provided a safe environment and solid foundation of skills from the personal and social responsibility domain, team building and leadership skill training, and planning and management strategies. They will then extend into the community via elementary school and community-based programs.

Course Name: Theatre Company 11

Course Code: YTHC 11

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [x] 11 [ ] 12

Number of Course Credits: 2 Fine Art

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Audition/Interview or teacher approval

Course Synopsis:

The performance of a theatre work requires the collaborative efforts of the entire theatre company. Students learn about the nature of a theatre company and the interconnected roles and responsibilities of the people who work in it. They examine the requirements for leadership, teamwork, commitment, back-stage and on-stage etiquette, and front-of-house communication and protocol. They learn the synthesis of content and context in the theatre environment. Through participation in the rehearsal and performance process, students learn the skills and attitudes necessary to perform within a theatre company, including valuable personal and interpersonal skills that they can apply in broader social and career contexts.

Course Synopsis:

The performance of a theatre work requires the collaborative efforts of the entire theatre company. Students assume prominent leadership roles and increased responsibility for the success of the theatre company and the interconnected roles and responsibilities of the people who work in it. They apply skills in leadership, teamwork, commitment, back-stage and on-stage etiquette, and front-of-house communication and protocol while working to guide and mentor younger students. They deepen their knowledge in the synthesis of content and context in the theatre environment. Through participation in the rehearsal and performance process, students apply the skills and attitudes necessary to perform within a theatre company, including valuable personal and interpersonal skills that they can apply in broader social and career contexts.

Course Name: ESL Writing 10

Course Code: YWESL 10

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 27, 2004

Prerequisites: Student needs to be at the high beginner/low intermediate level of English acquisition

Course Synopsis:

ESL Writing 10 is for students at the upper-beginner/lower intermediate (450/nearing 460) level who are ready to learn the specific skills necessary for successful academic writing. The process approach to writing and other typical interactive-classroom techniques will likely be both unfamiliar and undervalued by ESL learners and so must also be explicitly taught. Students experience the process of writing through interesting content combined with focused work on vocabulary, grammar and syntax, and rhetorical patterns. They practice expressing information, ideas and opinions is logical and coherent order and in a variety of written formats. Students gain the skills, experience, and confidence necessary to meet the writing expectations of the Grade 10 English curriculum.

Course Synopsis:

Communication is part of our daily life. This course has been developed to support and encourage students to explore the richness and diversity of events in their school environment. Students learn to plan, market, and execute the means to produce a saleable print media product about this environment and its events. Students learn to use a digital camera and the photographic skills required to record these events and to create page layouts to present the event in an attractive manner.

Learning Resources:

Course Name: Desktop Publishing - Business Applications 11

Course Code: YDPBA 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  ☑ 10  ☑ 11  ☑ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: May 11, 2006

Prerequisites: Recommend completion English 10

Course Synopsis:

This desktop publishing for business applications course has been developed to support and encourage students to explore the richness and diversity of publishing in the printed and electronic worlds. The course is designed to facilitate students in learning how to use computer software and desktop publishing skills and layout and design principles to combine text and graphics to produce business application documents that are visually appealing, highly persuasive, and effectively communicate the intended message to a specific audience. Through presentations, guest speakers, and case studies, students will develop an awareness of how businesses utilize desktop publishing and design to market ideas and products to consumers, thereby increasing consumer demand and company profits.

Students will develop an appreciation of various stages of the publishing process including: gathering information through research, surveying, and interviewing; writing of captions, body copy, and headlines; proofing and editing; taking and editing of photographs; creating illustrations and graphics; designing and producing layouts; and targeting and distributing publications to a variety of audiences.

With the publishing and design skills learned in class, students will create the types of publications or projects that are used within the business world: magazines, newspapers, newsletters, brochures, promotional flyers, menus, certificates, books and book jackets, business cards, letterhead and envelopes, packaging, CD and DVD covers, advertisements, calendars, recipe books, catalogues, mailers, postcards, forms, reports, posters, signage, logos, gift cards, greeting cards, web sites, and multimedia presentations. As a final project, students would apply the concepts and skills learned in class to serve the publication needs of the school and community by working as part of a publishing team to produce a school-based newspaper, agenda, or online magazine that records student experiences and opinions from a different perspective and more timely fashion than presented in a traditional yearbook.

A significant focus will be placed on having students critically analyze various publications to explore and reflect upon how the elements and principles of layout and design interact with the content to enhance the overall effectiveness of publications.

Throughout all of the units, there is a focus on giving students an opportunity for self, peer and teacher assessment. Students will be encouraged to continually edit and revise their work to achieve the highest production level possible. By focusing on the production of real-life publications and being part of a production team, students will start to develop skills around time management and production deadlines, quality demands, production costs, creative problem solving, and responsibility to a group or team.

Interdisciplinary nature of this course allows for learning outcomes to be transferred to other subject areas and to assist students in their other course work.

- [ ] 10
- [ ] 11
- [x] 12

Number of Course Credits: 4 elective

Number of Hours of Instruction: 120

Date Approved: May 11, 2006

Prerequisites: Recommend Desktop Publishing for Business Applications 11

Course Synopsis:

This course has been developed to support and encourage students to explore the practicality, creativeness and opportunities in the field of Desktop Publishing. Students will be provided with opportunities to expand on their familiarity with the technology and techniques of desktop publishing, layout and design, copy writing, graphic design, photo editing, and photo journalism to create many of the same types of publications that professional companies use in the production of their day-to-day media.. Students will examine historical trends in the content and design of various newspapers and magazines. They will explore in depth how various design decisions influence the overall visual appeal, target specific audiences, and enhance the effectiveness of various business applications in marketing a product or idea.

A primary focus will be on enabling students to further develop their organizational and leadership skills by taking on an editorial leadership role in a large-scale school-based publication such as the production of a printed or online version of a school newspaper or magazine. They will be largely responsible for the editorial aspects of the publication including determining final content, ensuring accuracy and validity of content, editing and proof-reading copy, approving layout designs, assigning duties and titles to members of the production staff, holding regular staff meetings, assisting staff members as needed with their assignments, and ensuring that members of the production team meet deadlines. Students will put their skills to further practical use by creating a non-profit school-based business where they are hired by clubs, organizations, or other groups to create materials to promote various school events or programs, showcase student work, or advertise products. For all projects, it will be the student's responsibility to ensure the overall quality of the publication, to guarantee that the content satisfies the needs of the customer and the consumer, and that the publication is completed within specified time and monetary constraints.

Course Name: Yearbook 12

Course Code: YYB 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Recommended Yearbook 11 or have equivalent computer, photography and layout skills.

Course Synopsis:

This course is designed to enable students to demonstrate leadership in the publication of the school's yearbook using management skills. Students will learn how to analyze various layout options from a variety of sources. Students will demonstrate appropriate leadership and mentorship strategies in the selection and application of a suitable yearbook theme. Students will examine the school’s past yearbooks to suggest improvements and identify successful components in order to provide a continuity of purpose. Students will extend the development of their skills around time management, communication, creative problem solving, reflection, career exploration, graduation portfolio development and responsibility to a group and contribution to school society. Students will participate in editing yearbook sections; acting as design, photographic, copy, grade and section editors. Students will lead in the development of numerous pieces of work.

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 3 elective

Number of Hours of instruction: 120

Date Approved: December 14, 2006

Prerequisites: Broadcasting Recording Arts Technology 11

Course Synopsis:

The course has been developed to provide senior students, interested in producing Radio and audio recording with an advanced theoretical and practical opportunity to explore the world of Radio Broadcasting and Audio production in a hands-on, team-based and cooperative learning environment. This course addresses advanced principles, concepts and challenges of creating Radio and audio recording productions. In this course students will build on the concepts, ideas and practical knowledge gained in Broadcasting Recording Arts Technology 11 combined with what they are learning in Broadcasting Recording Arts Technology 12 to design, create, produce and present complex Radio and Audio productions. Throughout the course students will be given opportunity to create productions that use the latest computer and digital media hardware and software. Through exploration, instruction, guided practice, and reflection, students will create Radio, and Audio recording productions that reflect what they have been studying. The units in this course have been developed to give students practical experience in the major areas of radio broadcasting and audio recording production, including pre-production, production and post-production. The course will focus on advanced radio and digital recording techniques, longer recording productions as well as advanced post-production skills and techniques. Throughout each unit, students will have to keep track of their project’s progress by completing detailed progress assessments for each production.

This course provides students interested in library or information related careers with an introduction to research skills, library management, organization and services. This course is designed for students who are interested in exploring the potential of computers in communication and electronic information retrieval. Students learn research skills using a variety of technologies and print media.

Learning Resources:

The resources for this course may vary from school to school and thus may impact on the course presentation. The following resources should be available at each school.

- Computers with internet access
- Applicable computer/CD-ROM programs
- Applicable internet resources
- Library circulation software system
- Print and non-print resources

Additional Information:

Students do not require previous computer or library experience to take this class, however, permission of the teacher-librarian is mandatory prior to being accepted in this course. In addition, students must have an excellent attendance record.

Course Name: Media Literacy 12

Course Code: YML 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  

11  

12  

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

This course will facilitate the process of becoming media literate. This process includes deconstruction—the knowledge involved in receiving, analyzing, and interpreting media—and construction—the skills required to generate, synthesize and create/deliver media. Through the tandem cornerstones of this course, deconstruction and construction, students will become competent at identifying and “reading” the media text, including the message and the persuasion associated with this message. Furthermore, students will develop skills to evaluate the effectiveness and appropriateness (audience) of the message. To reinforce the development of communication and argument, the course will include the writing process and the nature of argument as learning strategies. Students will be afforded the opportunity to investigate, critique, re-produce, and produce the media.

Although historical events will comprise major sections of the curriculum, this course is contemporary and relevant. Due to the transient nature of popular culture, topical events and contemporary issues will be employed to make sense of our world and encourage student interest. Students will be introduced to how various media texts are created and presented. That is students will understand basic strategies employed by the various media, particularly learning how the intended audience or publication will affect the style, format, and content of the media text: “the message”. By experiencing the media in its many forms, students will become more attentive, more informed, and more responsible consumers and citizens.

Course Name: Recreational Leadership 10

Course Code: YRECL 10

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100 - 120

Date Approved: April 27, 2004

Prerequisites: Successful Completion of Physical Education 9

Course Synopsis:

This course is designed to give the students the knowledge and tools needed to put the theory gained into practice. The course is composed of three units. In the leadership unit, students explore the concept of leadership and different leadership styles. The event planning unit consists of students being able to plan, organize and implement an event in a recreational setting. In the peer teaching unit, students learn group management techniques and lesson design. Developing the students into positive role models in the school and community is an intended outcome of this course.

Learning Resources:

Books:
- CIRA
- National Coaches Certification Program (Level One)
- Student Leader Handbooks
- Team Building- Through Physical Challenges
- Playground Leadership Program

Additional Information:
This course is a revision of a locally developed course that has been taught in the Surrey School District.
Textile Arts & Design 10 introduces students to many methods of manipulating and decorating fibers and fabric. Students are provided with many opportunities to create a variety of textile art-design pieces that represent their personal style and challenge their creative mind. They also discuss, write and report on how cultures from around the world use these techniques as mediums for personal and cultural expression.

Course Name: Yearbook 12

Course Code: YYB 12

Category: Other

Grade Level of Course: □ 10  □ 11  □ 12  □

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Recommended Yearbook 11 or have equivalent computer, photography and layout skills.

Course Synopsis:

This course is designed to enable students to demonstrate leadership in the publication of the school's yearbook using management skills. Students will learn how to analyze various layout options from a variety of sources. Students will demonstrate appropriate leadership and mentorship strategies in the selection and application of a suitable yearbook theme. Students will examine the school's past yearbooks to suggest improvements and identify successful components in order to provide a continuity of purpose. Students will extend the development of their skills around time management, communication, creative problem solving, reflection, career exploration, graduation portfolio development and responsibility to a group and contribution to school society. Students will participate in editing yearbook sections; acting as design, photographic, copy, grade and section editors. Students will lead in the development of numerous pieces of work.

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

Course Synopsis:

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

Course Name: Animation 11

Course Code: YAN 11

Category: Fine Arts, Design, and Media

Grade Level of Course: ☐ 10 ☐ 11 ☑ 12

Number of Course Credits: 2 FA & 2 A

Number of Hours of instruction: 100

Date Approved: April 28, 2005

Prerequisites: None

**Course Synopsis:**

This course is designed as an intermediate course in animation. Students will study the personal, social, cultural and historical significance of graphic communications and create work that reflects an understanding of these contexts. They will learn the elements and principles of design and demonstrate their knowledge through both practical and written work. Students will use a variety of software to create their animations, demonstrating their knowledge of storyboarding, scriptwriting, character development, set design and the principles of cinematography. Students will reflect on their own work and learn to critique the work of others. The course will culminate in a project that demonstrates their understanding of the principles of animation.

School Name: North Surrey Secondary

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None but CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each school's equipment and resources.

Course Name: ESL Writing 11

Course Code: YWESL 11

Category: Other

Grade Level of Course:  

| 10 | 11 | 12 |

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: High Beginner/Low Intermediate level of English

Course Synopsis:

ESL Writing 11 is for students at the upper-beginner/lower intermediate (450/nearing 460) level who are ready to learn the specific skills necessary for successful academic writing. The process approach to writing and other typical interactive-classroom techniques will likely be both unfamiliar and undervalued by ESL learners and so must also be explicitly taught.

Students will experience the process of writing through interesting content combined with focused work on vocabulary, grammar and syntax, and rhetorical patterns. Students will practice expressing information, ideas, and opinions in logical and coherent order and in a variety of written formats. Students will gain the skills, experience, and confidence necessary to meet the writing expectations of the senior level English curriculum.

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

The purpose of Film Studies 11 is to allow students to learn about and develop an artistic appreciation for fine art, foreign, and independent films while comparing them to mainstream films. Students will learn about film festivals and will be expected to analyze components of cinematography. Students will observe, respond to and discuss social, cultural, historical, and political issues and themes that are related to film content. Students will expand their written and oral skills in critiquing films and will be expected to interpret and look for layers of meaning using critical thinking skills. A variety of teaching techniques, activities and learning activities will be utilized to provide students an opportunity to express their ideas, and develop a personal interpretation of the medium of film. A small portion of the course will explore film related careers and the filmmaking processes. A considerable amount of time will be spent viewing films that students most likely would not have seen.

Grade Level of Course:  

10  [ ]

11  [ ]

12  [X]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 19, 2009

Prerequisites:

Course Synopsis:

Laboratory Technology 12 allows students to develop the skills and attitudes related to being a laboratory assistant. The course will provide students with an opportunity to learn and utilize science safety procedures; demonstrate proper laboratory techniques and equipment usage; and prepare and evaluate laboratory demonstrations and experiments for classroom use. Students will receive an indepth study of laboratory and inventory management, as well as workplace organization and preparedness. In addition they will critically evaluate resources for their appropriateness. Students will also be given an opportunity to explore laboratory technology related careers.

Learning Resources:

• Computers with Internet Access
• Data Studio Software

Course Name: Media Literacy 12

Course Code: YML 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10
11
12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

This course will facilitate the process of becoming media literate. This process includes deconstruction—the knowledge involved in receiving, analyzing, and interpreting media—and construction—the skills required to generate, synthesize and create/deliver media. Through the tandem cornerstones of this course, deconstruction and construction, students will become competent at identifying and “reading” the media text, including the message and the persuasion associated with this message. Furthermore, students will develop skills to evaluate the effectiveness and appropriateness (audience) of the message. To reinforce the development of communication and argument, the course will include the writing process and the nature of argument as learning strategies. Students will be afforded the opportunity to investigate, critique, re-produce, and produce the media.

Although historical events will comprise major sections of the curriculum, this course is contemporary and relevant. Due to the transient nature of popular culture, topical events and contemporary issues will be employed to make sense of our world and encourage student interest. Students will be introduced to how various media texts are created and presented. That is students will understand basic strategies employed by the various media, particularly learning how the intended audience or publication will affect the style, format, and content of the media text: “the message”. By experiencing the media in its many forms, students will become more attentive, more informed, and more responsible consumers and citizens.

Course Name: Peer Mediation 12

Course Code: YPED 12

Category: Other

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Peer Mediation 11 recommended

Course Synopsis:

Peer Mediation 12 is designed to build upon the skills, attitudes and knowledge base of Peer Mediation 11 to extend the scope of work the students may take on. This is a participatory course that prepares and motivates students to provide leadership to others in their schools and communities. Peer mediation is based on the premise that students frequently relate to other students in a unique way when they are experiencing frustration and conflict in their relationships. Mediation is a way of working with conflict to find creative solutions that strengthen relationships for those in dispute. Students will work under the supervision of a counsellor, and/or an administrator to provide mediation to students as individuals and/or small groups. Students will develop skills in communication, interpersonal relations, leadership, anger management, teamwork, conflict management, resolution and mediation. Students will also learn the value and complexity of social diversity as they work towards helping disputants create workable solutions.

Course Name: Woodcraft 11

Course Code: YWC 11

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Woodcraft 11 provides students with the opportunity to explore the artistic, craft, cultural, and historic aspects of woodworking. Whereas most woodworking courses focus on the structural and practical uses of wood, woodcraft examines the creative, artistic expressions of this universal medium. Through lectures, demonstrations, media, and guest artisans, students will participate in a hands-on artistic approach to woodworking. In addition, students will be introduced to the safe use of hand and power-tools, and learn the environmental, historical, and cultural connections to woodcrafts around the world. Furthermore, students will be exposed to a variety of woodcraft techniques so that they can acquire the skills and knowledge to express their own ideas in this medium. This 4-credit course can lead to higher-level courses, such as Ministry Course Wood Products 12, and possible vocational and artistic areas, or creative hobbies.

Course Name: Aerobic Fitness 11

Course Code: YAF 11

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: P.E. 10 & Get Fit 10

Course Synopsis:

Aerobic Fitness will allow students to explore the components of physical fitness through aerobic exercise. Students will improve their level of physical fitness, while learning the principles and theories of aerobic fitness training. They will be provided with a solid foundation of basic skills and concepts related to human anatomy and physiology. Students will participate in various forms of aerobic activity such as: low impact aerobics, step aerobics, power walking, sport specific training, core conditioning, balance training, and yoga/stretch classes. To compliment physical training, they will be introduced to the basic concepts of nutrition and strategies to implement changes to their dietary habits. Students will be provided with a safe, effective environment to improve their health and fitness through aerobic activity and the creation of healthy eating habits.

Grade Level of Course: [X] 10  [ ] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: May 27, 2004

Prerequisites: Student needs to be at the high beginner/low intermediate level of English acquisition

Course Synopsis:

ESL Writing 10 is for students at the upper-beginner/lower intermediate (450/nearing 460) level who are ready to learn the specific skills necessary for successful academic writing. The process approach to writing and other typical interactive-classroom techniques will likely be both unfamiliar and undervalued by ESL learners and so must also be explicitly taught. Students experience the process of writing through interesting content combined with focused work on vocabulary, grammar and syntax, and rhetorical patterns. They practice expressing information, ideas and opinions is logical and coherent order and in a variety of written formats. Students gain the skills, experience, and confidence necessary to meet the writing expectations of the Grade 10 English curriculum.

None

Course Synopsis:

This course provides students interested in library or information related careers with an introduction to research skills, library management, organization and services. This course is designed for students who are interested in exploring the potential of computers in communication and electronic information retrieval. Students learn research skills using a variety of technologies and print media.

Learning Resources:

The resources for this course may vary from school to school and thus may impact on the course presentation. The following resources should be available at each school.

- Computers with internet access
- Applicable computer/CD-ROM programs
- Applicable internet resources
- Library circulation software system
- Print and non-print resources

Additional Information:

Students do not require previous computer or library experience to take this class, however, permission of the teacher-librarian is mandatory prior to being accepted in this course. In addition, students must have an excellent attendance record.

School Name: Queen Elizabeth Secondary
Course Name: Weight Training 11
Course Code: YWEI 11
Category: Fitness and Recreation

Grade Level of Course:  

10  
11  [X]  
12  

Number of Course Credits: 4 elective
Number of Hours of instruction: 100 - 120
Date Approved: April 28, 2005
Prerequisites: PE 10

Course Synopsis:

This course has been developed to support and encourage students safe and effective participation in weight training. Weight Training is a continually growing individual fitness endeavor which when performed properly, has numerous health and social implications.

Students will gain hands-on weight training techniques, knowledge of principles of training, safety procedures, adaptations to training and supplement use. Students will be able to develop an individual weight training program and conduct the implementation of the plan in reaching personal goals. Most importantly students who have become disinterested in regular physical education but are interested in weight training have a viable healthy option to non-activity.

Learning Resources:

• Coach and Athletic Director Periodical
• Cohn, Milan & Bojan Struger. Strength & Power Training (Video): Toronto, Ont.: Sport Books Publisher, 2000
• Prokopetz, Shawn. Strength and Conditioning Journals: BAP Publishing

School Name: Queen Elizabeth Secondary

Course Name: Yearbook 12

Course Code: YYB 12

Category: Other

Grade Level of Course:  10  11  X 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100

Date Approved: May 11, 2006

Prerequisites: Recommended Yearbook 11 or have equivalent computer, photography and layout skills.

**Course Synopsis:**

This course is designed to enable students to demonstrate leadership in the publication of the school's yearbook using management skills. Students will learn how to analyze various layout options from a variety of sources. Students will demonstrate appropriate leadership and mentorship strategies in the selection and application of a suitable yearbook theme. Students will examine the school's past yearbooks to suggest improvements and identify successful components in order to provide a continuity of purpose. Students will extend the development of their skills around time management, communication, creative problem solving, reflection, career exploration, graduation portfolio development and responsibility to a group and contribution to school society. Students will participate in editing yearbook sections; acting as design, photographic, copy, grade and section editors. Students will lead in the development of numerous pieces of work.

**Learning Resources:**

School Name: Semiahmoo Secondary

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course: 10  X 11  □ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None but CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each schools equipment and resources.

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 11, 2006

Prerequisites:

Course Synopsis:

Braille 11 is for students who are visually impaired who already have beginning Braille skills and who are ready to learn contracted Braille (Grade II Level Braille) and standard Braille formatting rules. Braille 11 is for students who are ready to interpret and to prepare more advanced Braille materials such as columns, graphs and tables. Students will explore the rich complexity and flexibility of the Braille code and will become familiar with the Braille Authority of North America’s regulations for Braille production. Students will gain the skills, experience and confidence necessary to use the various technologies used to access and produce Braille including additional experience with the more traditional Braille writer and with more advanced technologies such as the computer and Braille notetaker with refreshable Braille display. In addition, students will begin to advocate for Braille materials that are prepared to meet the needs of the student who is visually impaired and according to the Braille Authority of North America’s standards and to increase Braille awareness within their school communities.

Category: Other

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 27, 2008

Prerequisites:

Course Synopsis:

Orientation and Mobility 11 is designed for students who have low vision or who are blind and who are learning how to use a mobility cane for independent travel. As students progress through the course they will develop the skills, knowledge, confidence and motivation required to travel independently, safely, efficiently and gracefully in many familiar and unfamiliar indoor environments and in some outdoor, residential area environments. Students will develop an awareness of the responsibilities involved in travelling independently and will exhibit an appreciation of and an enthusiasm for the importance of O&M techniques and mobility and orientation devices. As students advance through the course, they will begin to advocate more effectively for their O&M needs and will begin taking the steps needed to explore new environments independently making appropriate decisions about how to travel safely and efficiently.

As the course is designed for students who are mobility cane users with varying degrees of visual ability, a few of the examples presented under the PLOs involve strategies that are appropriate only for students with some visual ability. The District O&M Teacher and the student will determine which strategies are most appropriate for a given student.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 27, 2008

Prerequisites:

Course Synopsis:

Orientation and Mobility 12 is designed for students who have low vision or who are blind and who are learning how to use a mobility cane for independent travel. In addition, students completing Orientation and Mobility 12 have mastered most of the skills, concepts and techniques addressed in Orientation and Mobility 11.

As students progress through Orientation and Mobility 12, they will develop the skills, knowledge, confidence and motivation required to travel independently, safely, efficiently and gracefully in familiar and unfamiliar commercial environments. For instance, in addition to further developing their cane and orientation skills, students will learn how to travel on various forms of public transportation including public busses and SkyTrain. They will develop an awareness of the responsibilities involved in travelling independently and will exhibit an appreciation of and an enthusiasm for O&M techniques and mobility and orientation devices, recognizing the usefulness of these tools in increasing their ability to travel safely and with as much independence as possible. As students advance through the course, they will advocate more effectively for their O&M needs and will make appropriate decisions related to safe and efficient travel, enabling them to travel independently in familiar environments and to explore new ones.

Please note:

As Orientation and Mobility 12 is designed for students who are mobility cane users and who have varying degrees of visual ability, a few of the examples presented under the PLOs are strategies that are appropriate only for students with some visual ability. The Orientation and Mobility Teacher and the student will determine which strategies would be most appropriate for a given student.

Some of the PLOs are repeated in several units in the course. Students are expected to perform these PLOs in increasingly complex environments and in conjunction with an increasing number of previously learned skills and techniques.

As a final note, the examples presented under the PLOs are not comprehensive lists of the skills, techniques and concepts associated with each outcome. Instead, they are only a few sample techniques and concepts included in the course outline to assist individuals who are not trained Orientation and Mobility Teachers develop a clearer understanding of the nature of orientation and mobility instruction.

School Name: Student Support Centre

Course Name: Visual Impairment Technology 11

Course Code: YVSIT 11

Category: Other

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4 (electiv

Number of Hours of instruction: 120

Date Approved: November 8, 2007

Prerequisites: See Appendix A

Course Synopsis:

Visual Impairment Technology 11 is designed for students who have visual impairments, in particular those who use Braille. Students will gain a working knowledge of the skills to use technology (such as the computer, screen reader software, Braille notetaker with refreshable Braille display, scanner, OCR software, printer, and Braille embosser), as well as the experience and confidence necessary to do so. In addition, students will learn how to use email and the Internet. Students will develop an awareness of the responsibilities involved with using technology and will develop an appreciation for the importance of technology in increasing their independent access to information and their ability to communicate quickly and without assistance. As a result, students will begin to advocate for the use of technology as they proceed through the course.

Please note:

Students who are blind or who have low vision often use the computer and the notetaker interchangeably. Most students do not master either piece of technology by the end of Grade 12; however, they should have a working knowledge of both pieces of technology before they leave high school. This course is designed to provide them with the skills they need to use the technology at work or at a post secondary institution. Therefore, the following PLOs are to be accomplished using both the computer and the notetaker, except in some specific situations where either piece of technology should be used alone.

Learning Resources:

Additional Information:

Visual Impairment Technology 11- Appendix A

Students completing Visual Impairment Technology 11 must be able to carry out several tasks independently before beginning the course. The skills needed to complete these tasks are listed below.

Before beginning Visual Impairment Technology 11, students will:

• Recognize and identify technology components (e.g., computer, notetaker, scanner, printer, Braille embosser, power and communication cables, etc.)
• Be able to use power and communication cables.
• Connect computer to notetaker.
• Connect computer or notetaker to peripheral devices.
• Practice appropriate safety procedures.
• Store technology safely and independently.
• Be able to use appropriate transport procedures.
• Demonstrate an awareness of ergonomic and health issues related to the use of technology.
• Customize output settings (e.g., screen reader software and refreshable Braille display.)
• Change basic operating system settings (e.g., time and date.)
• Be able to use appropriate power management (e.g., determine battery strength.)
• Be able to use simple troubleshooting strategies (e.g., warm and hard reset.)
• Be able to keyboard
• Be able to use 6 keyed Braille entry

School Name: Sullivan Heights Secondary

Course Name: CAD/CAM/CNC 11

Course Code: YCCC 11

Category: Trades and Technology

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None but CAD 9/10 would be helpful

Course Synopsis:

Computer Assisted Machining 11 has been developed to support and encourage students to look into the expanding and diverse area of computer controlled machining. Students learn to use various software programs that bring the operator through the three main processes: Computer assisted drafting; Computer assisted machining and computer numerical control. They will take projects from the design stage right to the completed artefact as they draw and build projects of interest to others or themselves. They will learn why industry is using CNC machines.

Learning Resources:

Teacher handouts
Guest speakers from the community in related fields
Visit/interview local trades people in related fields
Articles and information about CNC careers on internet
Books

The books needed for resources will be determined by the Software programmes the schools have purchased. The following is useful only if masterCam is used.

Additional Information:

This is a new course based on the old locally developed CNC course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Delivery of the course will be altered to reflect each school's equipment and resources.

Course Name: Career Transitions 12

Course Code: YCTR 12

Category: Other

Grade Level of Course: 10  11  12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

Course Synopsis:

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

Course Code: YAGA 11
Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 2 Fine Art
Number of Hours of instruction: 100 - 120
Date Approved: May 11, 2006
Prerequisites: None

Course Synopsis:

This course is designed to give students an introduction to global issues through art, while providing continuous opportunity for leadership and stewardship in the local and global community. Students will study socio-political art and respond to it in discussion, written work, and creation of their own works of art. They will research a variety of current issues, and interpret each topic through a formal presentation as well as an original and interactive work of art, promoting reflection and discussion. Students will collaboratively design, prepare and manage a Fine Arts event that raises awareness of global issues. Students will summarize their learning and assess their personal growth as a global citizen through writing and creating art in their sketchbook journals.

Grade Level of Course:  

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  May 27, 2004

Prerequisites:  English 8

Course Synopsis:

Creative Writing 10 provides students with an opportunity to explore writing in different genres. Methods of expressing, organizing, editing and publishing are practiced. Students are asked to critically analyze different styles (both in writing and media) and the effect persuasive techniques have on the reader/listener/audience. Students learn to write to achieve a desired effect on the reader/audience.

Learning Resources:
Resources useful for reference:

Text:

Course Name: Interior Design 11

Course Code: YIDN 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: December 14, 2006

Prerequisites: None

Course Synopsis:

This introductory course looks at how human beings occupy space. It will briefly introduce the fundamental factors that create an aesthetic and functional residential living space. The course begins with the basic elements and principles of good design; continues with a contextual close-up analysis of how social, cultural and historical design has evolved; and ends with an introduction to the tools of technology used in today’s world of Interior Design. At the end of the course, the student will have also developed a project portfolio containing a floor plan created with CADD software, a visual/tactile swatch comprised of collected appropriate materials. And lastly, a Power Point presentation will pull together the conceptual material captured through digital photographs of the potential space.

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 100 - 120

Date Approved: April 27, 2004

Prerequisites: None

Course Synopsis:

This course provides students interested in library or information related careers with an introduction to research skills, library management, organization and services. This course is designed for students who are interested in exploring the potential of computers in communication and electronic information retrieval. Students learn research skills using a variety of technologies and print media.

Learning Resources:

The resources for this course may vary from school to school and thus may impact on the course presentation. The following resources should be available at each school.

- Computers with internet access
- Applicable computer/CD-ROM programs
- Applicable internet resources
- Library circulation software system
- Print and non-print resources

Additional Information:

Students do not require previous computer or library experience to take this class, however, permission of the teacher-librarian is mandatory prior to being accepted in this course. In addition, students must have an excellent attendance record.

Course Synopsis:

The purpose of this course is to give students an insight into the organizational structure of libraries and at the same time to provide management and analytical skills that will be of lifelong value. Furthermore, as they assist the Teacher Librarian at the check out desk, this course provides students with an opportunity to practice work related skills in dealing with the public.

Learning Resources:

The resources for this course may vary from school to school and thus may impact on the course presentation. The following resources should be available at each school.

- Computers with internet access
- Applicable computer/CD-ROM programs
- Applicable internet resources
- Library circulation software system
- Print and non-print resources

SUGGESTED LEARNING RESOURCES FOR LIBRARY SCIENCE 11

Books:

(These are suggested book titles. Their availability may vary from school to school)

Application Software:
(The availability of hardware/software may vary from school to school)

Appleworks 6 - Word Processing, Database - (MAC)
Office - Word (PC or MAC)
Office - Powerpoint (PC or MAC)
Office - Excel (PC or MAC)
Dreamweaver (MAC)
Fireworks (MAC or PC)
Photoshop (PC or MAC)
Frontpage (PC)
Epson Scan/or other scanning software
Library circulation software

Online database subscription or access:
E.G. EBSCO, Canadian Newstand

Journals:
(Periodical titles may vary from school to school)
Teacher-Librarian
School Library Journal
Book Report
The Book Mark

School Name: Tamanawis Secondary

Course Name: Woodcraft 11

Course Code: YWC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- 10
- 11 [X]
- 12

Number of Course Credits: 4 elective

Number of Hours of instruction: 100 - 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Woodcraft 11 provides students with the opportunity to explore the artistic, craft, cultural, and historic aspects of woodworking. Whereas most woodworking courses focus on the structural and practical uses of wood, woodcraft examines the creative, artistic expressions of this universal medium. Through lectures, demonstrations, media, and guest artisans, students will participate in a hands-on artistic approach to woodworking. In addition, students will be introduced to the safe use of hand and power-tools, and learn the environmental, historical, and cultural connections to woodcrafts around the world. Furthermore, students will be exposed to a variety of woodcraft techniques so that they can acquire the skills and knowledge to express their own ideas in this medium. This 4-credit course can lead to higher-level courses, such as Ministry Course Wood Products 12, and possible vocational and artistic areas, or creative hobbies.

Number of Course Credits: 4 elective

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Special Training

**Course Synopsis:**

This course prepares students to make successful transitions to post-secondary work, education, or training. Students explore the realities and opportunities of modern workplaces, while refining their employability skills and learning how to manage their careers. Students target appropriate post-secondary education or training options and begin to implement an action plan to support their decisions. This course supports the ministry-authorized Work Experience 12 courses as well as provides students with the opportunity and support for further development and maintenance of the Graduation Portfolio. The course is applicable to all Focus Areas / academic disciplines.

Category: Business and Applied Business

Grade Level of Course: ☑ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 23, 2004

Prerequisites:

Course Synopsis:

This course will develop keyboarding proficiency on the alpha-numeric keyboard and reinforce keyboarding techniques. Emphasis is placed on learning the skill of touch typing. Students will be instructed in personal use and industry standard communications applications. Students will further develop thinking, decision-making, and composition skills. Students’ work habits will be reinforced as they will have to proofread, edit and format their work to meet standard criteria. Students will learn the applications of production work in the context of a word processing program.

Learning Resources:

Books

A keyboarding program such as All the Right Type.

Additional Information:

Number of Hours of instruction: 120

Date Approved: March 23, 2004

Prerequisites:

Course Synopsis:

This course will develop keyboarding proficiency on the alpha-numeric keyboard and reinforce keyboarding techniques. Emphasis is placed on learning the skill of touch typing. Students will be instructed in personal use and industry standard communications applications. Students will further develop thinking, decision-making, and composition skills. Students’ work habits will be reinforced as they will have to proofread, edit and format their work to meet standard criteria. Students will learn the applications of production work in the context of a word processing program.

Learning Resources:

Books

A keyboarding program such as All the Right Type.

Additional Information:

Instruction will require that each student have access to a personal computer, keyboarding software program, word processing software, and internet access if available. The teacher will need training in keyboarding motor skill development, production work criteria and familiarity with a word processing program.

Rationale:

The purpose of this course is for the senior student to develop keyboarding proficiency both for personal use and as a foundation for career development. The student will be introduced to both personal and business applications and is encouraged to use keyboarding skills in other curricular areas.

Research has shown that keyboarding increases performance in reading, spelling, grammar, punctuation, and creative writing; as a result, keyboarding is a communication skill essential in today’s computer-oriented society. Students will be able to apply their learning to future educational experiences and understand that keyboarding is a skill that promotes life long learning.

Organizational Structure:

Unit – Title - Time

Unit 1 - Keyboard Development - 60 hours
Unit 3 - Personal/Business Correspondence - 14 hours
Unit 4 - Multi-Column Tables - 12 hours
Unit 5 - Multi-Page Reports - 14 hours
Unit 6 - Enhanced Display Techniques - 6 hours
Unit 7 - Alternate Letter Styles—Optional - 2 hours
Unit 8 - Career Search Documents - 9 hours
Total Hours - 120 hours

Unit Descriptions:

Unit I: Keyboard Development
Time: 60 hours

Students will become familiar with the techniques used to develop the skill of touch typing on the alpha-numeric keyboard. Teacher directed daily practice will gradually increase the student’s speed and accuracy. Students will also learn a keyboarding program designed to improve skill development. Students will self-assess their work and set realistic goals to work toward maximizing end results. The students will gain an understanding of how to improve speed or how to improve accuracy in order to further enhance performance on straight copy timed writings.

Curriculum Organizer – core concept
It is expected that students will:
1. Understand the benefit that keyboarding by touch provides the learner.
2. Understand how maximizing ones ergonomic environment impacts results positively.
3. Understand the nature of developing a motor skill and how maximum results are best achieved.

Curriculum Organizer – skill development
It is expected that students will:
1. Evaluate the results of teacher directed drills and understand how to apply corrective action in order to progress toward short term and long term skill development goals.
2. Become proficient with a keyboarding software program that focuses on elements of skill development.
3. Practice skill development outside of class and/or apply developing keyboarding skills in other curricular areas.

Curriculum Organizer – analysis
It is expected that students will:
1. Evaluate test results and compare progress to a letter grade scale.

Unit II: Formatting
Time: 3 hours

As well as daily practice of touch typing skill development, students will also learn the criteria for preparing personal use communication documents. The student will explore the parameters of the word processing program and use those features that promotes efficiency in formatting work to produce documents that are of professional quality.

Curriculum Organizer – core concept
It is expected that students will:
1. Learn the capability of the word processing program in order to apply its functions to a variety of production work tasks.

Curriculum Organizer – skill development
It is expected that students will:
1. Learn to adjust line length appropriately to document length.
2. Use the tab key in both absolute and relative contexts.
4. Centre work vertically and horizontally on the page

5. Express cursor moves directly to the beginning or ending of a document page or line.

6. Understand and apply page layout concepts

7. Delete sections of a document

8. Learn the use of overwrite and insert buttons

9. Learn cut and paste functions.

10. Learn to use reveal codes edit feature.

Curriculum Organizer – analysis
It is expected that students will:
1. Use the print preview function to assess appropriate page layout.

2. Use the spell checker and correct spelling errors

Unit III: Personal/Business Correspondence
Time: 14 hours

The student will learn to recognize the difference in tone and familiarity between personal correspondence and business correspondence. The student will recognize that a casual tone is acceptable in personal correspondence but a more formal tone is required in business correspondence. The student will realize that appropriate language and vocabulary are the basis of all business communications. Students will continue with teacher directed speed and accuracy skills development practice.

Curriculum Organizer – core concept
It is expected that students will:
1. Understand the different functions of a letter and a memo; both personal and business in nature.

Curriculum Organizer – skill development
It is expected that students will:
1. Identify the parts of a personal letter and a memo.

2. Format and key a personal letter and a memo.

3. Format and key two business letter styles and two punctuation styles: blocked style, and full block style and open and standard punctuation styles.

4. Format and key special letter features such as a subject line, attention line, enclosure notation, carbon copy, blind carbon copy and postscript.

5. Understand the use of postal codes and directories and prepare envelopes.

6. Apply the merge function of the software program.

Curriculum Organizer – creation
It is expected that students will:
1. Compose a personal letter and a memo.

2. Compose a business letter using special features.

Curriculum Organizer – analysis
It is expected that students will:
1. Assess page layout of document
2. Proofread and correct errors

Unit IV: Multi-Column Tables
Time: 14 hours

Tables serve as an efficient way to convey facts and hence are an effective communication tool. Students will understand the purpose of multi-column tables. A large amount of information can be conveyed in a small amount of space in an organized and clear manner. Students will also learn to incorporate tables into other documents such as reports, letters and memos. Student will continue with teacher directed speed and accuracy skills development practice.

Curriculum Organizer – core concept
It is expected that students will:
1. Understand a variety of uses for the multi-column table.

Curriculum Organizer – skill development
It is expected that students will:
1. Identify the parts of a multi-column table.

2. Format and key multi-column tables.

3. Format and key a multi-column table with headings

4. Learn to key a multi-column table with links to various web sites
e.g. Listed on the itinerary for a visit to Vancouver could be hyper text links to the web sites for the Vancouver Art Gallery, Vancouver Aquarium, and Science World.

Curriculum Organizer – creation
It is expected that students will:
1. Create a table, individual in appearance, enhanced with display techniques such as fonts, background fill, justification styles, and leaders.

2. Create an itinerary for a specific location with web links to areas of special interest for that location.

Curriculum Organizer – analysis
It is expected that students will:
1. Assess page layout for appearance and for clarity of the material presented

2. Proofread and correct errors

Unit V: Multi-Page Reports
Time: 14 hours

The student will learn to format three basic types of report; an unbound report, a left-bound report and a business report. The report will be taught in a natural progression from simple to complex and will vary from one page to several pages in length. Students will be able to produce a report acceptable at a post-secondary level as well as a business report. Students will continue teacher directed speed and accuracy skills development practice.

Curriculum Organizer – core concept
It is expected that students will:
1. Understand the purpose of a multi-page report.

Curriculum Organizer – skill development
It is expected that students will:
1. Learn to identify the parts of a report
2. Plan page layout for an unbound report
3. Key references & title page for an unbound report
4. Key an unbound report
5. Plan page layout for a left bound report

www.bcsta.org
6. Format and key a multi-page left-bound report with headers and page numbers
7. Centre titles over the text line
8. Format and key side headings
9. Format and key a title page for a left bound report
10. Format and key a table of contents
11. Key a left-bound report with footnotes and a bibliography
12. Key superscripts and subscripts
13. Key a report for another curricular area
14. Format and key a business report
15. Key a title page for a business report

Curriculum Organizer – analysis
It is expected that students will:
1. Proofread and assess page layout of an unbound report, a left-bound report and a business report

Unit VI: Enhanced Display Techniques
Time: 6 hours

Students will use software containing special display features to enhance the appearance of production work. Students will use a variety of display options; borders, fonts, background fill, bold, italics, underline, justification options, watermarks, and clipart. Students will continue speed and accuracy skills development practice.

Curriculum Organizer – core concept
It is expected that students will:
1. Understand the function of various production work options such as a place card setting, a greeting card, a certificate of merit, an event program, a banquet menu, an invitation, and an announcement.

Curriculum Organizer – skill level
It is expected that students will:
1. Learn to format and key several types of production work projects such as a place card setting, a greeting card, a certificate of merit, an event program, a banquet menu, an invitation, and an announcement.

Curriculum Organizer – creation
It is expected that students will:
1. Work in groups of 2–4 students to plan an event such as a graduation banquet & dance, an anniversary or other celebration. Each group will co-ordinate documents for each aspect of the event starting with an initial invitation through to the event’s completion. Additional documents would include a program of activities, a banquet menu, place card settings, an announcement regarding an aspect of the event, a certificate of merit designed for a participant and a greeting/thank you card.

2. Students will enhance production work using the special display features available in order to produce work that is individual and unique in appearance.

Unit VII: Alternate Letter Styles – Optional
Time: 2 hours

Curriculum Organizer – skill development
It is expected that students will:
1. Learn the purpose of two alternate letter styles. These are Monarch and Baronial.

2. Learn to format and key each alternate letter style.

Curriculum Organizer – analysis
It is expected that students will:
1. Proofread and assess page layout of alternate letter styles.

Unit VIII: Career Search Documents
Time: 10 hours

www.bcsta.org
Students will understand the importance of Career Search Documents. They will understand the need for and be able to identify types of employment references—personal, educational, and business. Students will understand the procedures for obtaining references.

Curriculum Organizer – skill level
It is expected that students will:
1. Format and key a sample resume
2. Complete an employment application form.

Curriculum Organizer – creativity
It is expected that students will:
1. Compose and key a resume
2. Compose and key a letter of application
3. Compose and key an employment thank you letter.

Curriculum Organizer – analysis
It is expected that students will:
1. Proofread and Assess page layout for a resume, a letter of application, and a thank you letter.

Instructional Component:
1. teacher directed instruction
2. interactive instruction
3. modeling
4. student self-directed instruction
5. personal creativity
6. teacher observation and comment on keyboard technique
7. monitoring of keyboard technique

Assessment Components:
The skill of touch typing will be the focus of this course. Initially one hundred percent of the mark will be based on straight copy speed and accuracy development. A student’s mark will be determined by an average of net words per minute. The length of a timed writing will increase up to a maximum of 5 minutes as the year progresses. The penalty for each error will increase throughout the year, culminating in a deduction of 10 words per error at year end; an industry entry level standard. Speed and Accuracy will account for 60% of the final grade.

Year end average speed scores:
A (86%) - 50 wpm
B (73%) - 45 wpm
C+ (67%) - 40 wpm
C (60%) - 35 wpm
C- (50%) - 30 wpm

As production work is introduced to the student after term one, it will make up an increasing percentage of the grade culminating at year end as 40% of the total.

Type of Assessment Category Detail Weighting (%)
Formative
(60%) Speed & Accuracy
weekly testing of skill development - 60%

Summative
(40%) Production work application
criterion referenced assessment of bi-weekly assignments - 40%
Total 100%

www.bcsta.org
· Weekly testing of timed writing kept in a log book
· Production work portfolio

Personal Communication
· instructor/student
· self-evaluation
· teacher/group instruction

Other
· rating scales
· weekly assessment
· teacher log
· rubrics

Additional Course Information:

Students will have a practical and useful skill to add to a resume which they will be able to employ in other curricular areas, in job application and in transferable skills to other computer software.

Keyboarding 11 meets 80% of the Applied Skills 11 learning outcomes and therefore satisfies the applied skill graduation requirement. These are:

Applied problem solving: Students will develop a portfolio of production work assignments based on personal use and business use applications. After learning the theory applicable to production work, students will problem-solve and create documents of professional quality throughout the year. Touch typing is taking a systems approach to solve a communications problem. The system of applying an organized technique to the alphanumeric keyboard produces a clearly readable product in an efficient and timely manner.

Communications: Students will compose numerous original production work documents. The context of the document will be based on production work theory. The content of the document will be individual and unique to the student. Students will use the communications aspect of the internet by linking web sites with production work. Communications is enhanced by a group assignment implemented near year end. Students will electronically transmit an assignment to the teacher.

Technology: Students will use computer technology on a daily basis and will understand and appreciate the inherent advantages of this powerful tool. They will understand its ability to store work, easily correct errors and manipulate the presentation/appearance of a work in progress. This will encourage experimentation, creativity, and conscientiousness on the part of the user.

Self in Society: Acquiring computer skills allows one to function more fully in a computer-oriented society. The computer will be regarded positively rather than as an unknown and confusing entity to be avoided if possible. Students will realize that the computer will function as an aide and coping tool to the challenges that school and work inevitably present.

Course Synopsis:

Career-related classroom instruction and work experience for secondary students, age 15 or older who are currently enrolled as full-time students in the regular school program but who have the potential to drop out of school. This program is specifically aimed at helping at-risk students to become reoriented and motivated to complete their education by allowing them to explore career options through a combination of unpaid work experience and academic intervention in a non-traditional classroom setting designed to facilitate individual and small group instruction. Students will participate in 2 or 3 different work training experiences provided by the private sector for not more than 10-12 hours a week.

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: March 23, 2004
Prerequisites: None

Course Synopsis:

www.bcsta.org
Media literacy is a course designed to prepare and inform the naive or inexperienced mind for rhetoric, namely media persuasion. Being media literate instills within the individual a ‘media-receptive’ mindset, which encourages the person to actively question both purpose and persuasion.

Students will be expected to use their knowledge, experience, insight and imagination to understand the images – both visual and non-visual – created by the media. They will learn that being media literate requires more than being an active, questioning audience; it also requires applying knowledge and curriculum insight to a media template to facilitate an understanding of the intended ‘message’.

A media literate individual will be empowered to make a positive contribution to the world in which he or she lives. Imagination, curiosity, wisdom and sound judgment will enable the student as the audience, to better understand his or her own world and not be led into following or creating a false or incorrect image: an image created for and ‘published’ by agencies external to the self, family and community.

In this course, becoming ‘media literate’ refers to (1) deconstruction: the knowledge involved in receiving, analyzing, and interpreting media and (2) construction: the skills required to generate, synthesize and create/deliver media. The two focuses of this course – deconstruction and construction—involves the use of a variety of information mediums, and the ‘constructed’ class media will be designated for both in-house and public consumption.

The student will become competent at identifying and ‘reading’ the message and the persuasion linked to this message. Furthermore, students will be able to evaluate the effectiveness of the message and its appropriateness in a specifically defined audience or a broader, public audience.

Students will be expected to enhance their ability to communicate and argue in writing and in voice. To reinforce and facilitate these learning processes, the writing process and the nature of argument are the learning strategies to be employed throughout the course.

This course is contemporary and relevant. Hence, topical events and contemporary issues will be utilized to further fuel student and audience interest. Students will be required to submit articles to various local and national publications.

Course work will be expected to be factual, informative and objective. However, due to the nature of this course, students will also be expected to exercise persuasive language as a tool in the defense of argument. Once students experience and comprehend the power and influence of persuasive language, they will be required to exercise their newfound ‘power’ with integrity and taste.

Students will be introduced to basic strategies in the various media, learning how the intended audience or publication will affect the style, format and the content of the ‘the message’. Students will learn that advertisements, film, song, stories, and photographs can be presented form several points of view, depending on the intent of the producer or editorial policy. Producers, station managers and editors, combined with the demographics of the intended audience, will dictate the style and format of ‘the message’. Finally, students will become aware of the journalists’ responsibility to accurately and objectively inform the public versus the media mandate to ‘sell information’ through sensationalism, exploitation and media capitalism.

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way. Time in class will be divided up between classroom instruction and practical workshops with students acquiring and developing their basic knowledge of leadership; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the promotion and organization of events within the school and community. They will also have the opportunity to learn more about themselves to increase their own self-esteem and ability to deal with adolescent issues.

Course Name: Applied Skills/Fine Arts 10

Course Code: YASFA 10

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [ ] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 20, 2005

Prerequisites: None

Course Synopsis:

This course is designed to give students a choice of exploration in a variety of disciplines that span both the Fine Arts and Applied Skills curricular areas. Where appropriate, students are encouraged to frame their conceptual understanding in ways that may include: Personal, Social, Cultural, and Historical contexts, or through Technology, Communication, and Problem Solving.

The Applied Skills/Fine Arts 10 program offers flexibility and an opportunity for students to choose meaningful units in their elective studies.

Learning Resources:

MacNeill Secondary School is both a new and technologically advanced school. Students in Applied Skills/Fine Arts 10 will have access to a wide range of existing resources, as well as many of those identified within the IRP’s that may include print materials, video, and web-based resources.

Additional Information:

This is a new course to be offered at the grade 10 level. MacNeill Secondary School has a similar existing model that is highly successful at both the grade eight and nine levels. Interest to develop the Applied Skills/Fine Arts 10 course can be found in parents, students, and staff at the school.

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 30, 2006

Prerequisites: The ability to understand abstract concepts and functional use of hands.

Course Synopsis:

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code. The student will be able to produce written output that contains Braille contractions and adheres to standard Braille formatting rules.

As a culmination students will reflect on their work and produce work done in a variety of writing styles for various purposes consistent with the Braille Authority of North America (BANA) regulations. They will write sentences, gain information from many sources.

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code.

This course will allow students a tactile medium to access the prescribed curriculum.

Students will learn Braille to complete an educational program so that they can graduate from High School and pursue college, university or other interests. They will explore curriculum themes, develop projects and research topics of personal interest. Students can use Braille to access the many technological devices and they can explore the world wide web for global business transactions. With Braille this is possible. Proficiency in the use of the Braille code enables the student to succeed academically, socially and in a pursuit of a career.

School Name: A.R. MacNeill Secondary

Course Name: Drumming - Rhythms in World - Music 12

Course Code: YDRWM 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- [ ] 10  
- [ ] 11  
- [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: None

Course Synopsis:

The course is intended to give students credit in Fine Arts at the grade 8-12 level. As Concert Band and Jazz Band operate in a continuum of the learning experience spiral, so too the Drumming -World Beat course is developed paralleling a similar model. The course will allow students with no previous musical training or note reading ability to fully participate in the making of music through active involvement in playing percussion instruments using forms and practices of various types of world music. The course is intended to help students gain appreciation for the rhythms of diverse world cultures through hands on experience. The music of Africa, Brazil and Cuba will form the basis for course content. In addition, students will be able to exercise their own creative musical design and apply it in a group setting. For students who make this course a focus of their graduation requirements, there is potential for a wide variety of performance and recording arts opportunities. Leadership skills and teaching opportunities are also provided for experienced students through work with either small or large ensembles.

Learning Resources:

Personal files and notes from workshops, clinics and one on one lessons given by many including Milton Randall, Dido Morris, Rex Chequer, Joseph Pepe Danza, Sal Ferreras and Raphael Geronimo. I was involved in the early stages of the Vancouver Coalition for World Music (1997) and special thanks to Val Dare of V.S.B. Britannia school who continues to be a wealth of information and support for those interested in teaching world music.

The Djembe: by Serge Blanc, Distributed by Sher Music
Traditional Grooves of West Africa with notes on instruments, geography with a C.D. example of all the notated grooves. An endless array of authentic African rhythms and an invaluable resource for teachers.

Music of South Africa: Rhythms of Resistance, Val Dare, et al. B.C. Teacher’s Federation lesson Aids Service, Vancouver, Canada

Rhythm for Kids: A Samba Unit for Teachers, Eric Hartman, New Traditions Media, Vancouver, Canada

Personal Subscription to: >african@african-drumbeat.co.uk<2;, by yearly subscription, access to many West African Grooves, that I have the right to download as MP3 and also to print notation from.
This course officially started running at Hugh Boyd in September of 1997 with a first class of 17 students. We started with drums purchased by our PAC Committee and loaned by Milton Randall who was a big help to me in getting the program under way. At the time it was the first course of its kind in B.C. Gradually, we have purchased more drums. Since then we have continued to add more elements and rhythmic challenges into the curriculum. The latest of these is Cuban music which we were able to see, hear and receive instruction in when we took a band and drumming group to Cuba in December of 2000.

This year we have had the privilege of working in the classroom with Raphael Geronimo of “Rhumba Calzada” who has been a help in the expansion of our knowledge of Cuban music. This year we have over 125 students enrolled in the drumming program and each class is a multiage group of students from a wide range of cultural backgrounds and academic abilities. There are several students who are working as peer tutors who have had at least two years in the drumming program. There are always public performance opportunities for drumming students and a special extra curricular group called “Drum Circle” that meets twice each week throughout the year.

Drummers from this program have performed on tour with the bands and on their own in the community. The Hugh Boyd Drumming group has been invited to perform at the annual B.C. Music Educators Conference in 2001 and again this year in 2004, and therefore has been acknowledged as a leading program in world music instruction in British Columbia. With our culturally diverse population here in B.C., it is only logical that we teach beyond our European and American traditions. As time goes on, it is hoped that the curriculum of this program will expand to include an even more diverse cultural perspective.

School Name: A.R. MacNeill Secondary

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

Date Approved:  
October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Leadership 10 will incorporate a number of different learning experiences for MacNeill students. While there will be an emphasis on collaboration, students will also be provided with opportunities to work independently. As part of this course, students will explore their own learning styles and needs. This emphasis on metacognition will enable the student, under the direction and guidance of the instructor, to design projects and learning experiences which will best support the learner.

Course Synopsis:

This course has been developed to assist students enhance their understanding of self-awareness, self-esteem, self-efficacy, leadership, problem solving, time management, and organization. Through a variety of delivery formats, use of available technology, and existing school structure, students involve themselves in related applications that may include school assemblies, annual Terry Fox Run, spirit days, and pep rallies. In addition students strengthen their relationship with the community by planning and implementing a variety of self-determined community based projects and service. Elements of Michelle Borba’s “Building Moral Intelligence”, and Sean Covey’s “The 7 Habits of Highly Effective Teens” are integrated throughout the course.

Learning Resources:

MacNeill Secondary School is both a new and technologically advanced school. Students in Leadership 12 will have access to a wide range of existing resources that may include print materials, video, and web-based resources. Guest speakers and related field trips will constitute some of the learning resources.

Additional Information:

This emphasis on metacognition will enable the student, under the direction and guidance of the instructor, to design projects and learning experiences that will best support the learner.
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

**Course Synopsis:**

This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Three.

**Learning Resources:**

- Books
- Internet sites
  - Texas School for the Blind and Visually Impaired
  - Hadley School for the Blind
  - Dog Guide Schools

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Name: Pre-employment Work Readiness 12

Course Code: YPRWE 12

Category: Other

Grade Level of Course:  
- 10
- 11
- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Student must be in Grade 12

Course Synopsis:

Pre-employment is a secondary school completion program for students who may have difficulty fulfilling the requirements necessary for formal graduation.

The program is an alternative option that combines the benefits of educational and vocational upgrading while developing employability skills through the community/school career programs.

Students attend school each morning where they focus on upgrading their basic academic skills. In the afternoon, the students learn within the community at a Work Experience placement. Students do not receive remuneration during Work Experience as the placements are established for their education and to provide them with experience. The work experience is a major focus and provides students with a variety of job experiences that will enable them to make informed job/career choices upon leaving school. In addition, the skills and experience gained will be valuable assets to include on a resume and a reference letter.

Learning Resources:

Heart Beats
This resource consists of over 75 student-friendly lessons and activities on topics such as attitudes for successful career paths, self-exploration, values, career building and awareness, occupational awareness and research, decision-making, goal setting, action planning, educational planning, stereotyping and energizers/icebreakers. Available through Continuing Education Division, Career Development Department 10537 - 44 Street, Edmonton, Alberta.

Grade Level of Course:  

10  [X]  11  [ ]  12

Number of Course Credits: 4

Number of Hours of Instruction: 125

Date Approved:  March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:

Videos:
- Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Additional Information:

Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

School Name: Cambie Secondary

Course Name: Electronic Publishing 11

Course Code: YELPB 11

Category: Fine Arts, Design, and Media

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: None

Course Synopsis:

Course Synopsis: In this course students will
• Learn the business and production techniques involved in Marketing and production of the yearbook. The goal is to, along with Electronic Publications 12 students, produce 100% of the pages required. Students will have a major part in decision-making.
• Gain expertise in using a digital camera at the correct resolution to capture interesting candid photos.
• Learn how to use PhotoShop to manipulate digital images and prepare them for publication.
• Learn to use InDesign to design page layouts for colour and gray-scale pages.
• Conduct a promotional campaign to sell the yearbook, to sell personalization’s and to acquire sponsors.
• Handle cash and other business aspects of the course, such as communication with the publishing company, under supervision of Electronic Publication 12 students.

Learning Resources:

Learning Resources:
• InDesign “Classroom in a book” an introduction to desktop publishing – tutorials, images, samples, etc.
• Curriculum Guidelines from Jostens, the publisher
• Visits from and training sessions held by Josten’s Representative
• Resource library of comparative publications and past J.J. Cambie Yearbooks
• H.J. Cambie’s Computer Lab is equipped with the necessary resources (i.e. Emacs with InDesign, Adobe Photoshop, Adobe Illustrator, a scanner, a laser printer and a digital camera).
Instructional Component: Methodology and Approach

Instructional Strategies Include and promote …
• Lecture supplemented with visual reinforcement (ie.video, models, etc).
• Understanding of basic skills, text, and graphics
• An understanding of journalistic skills
• Establishing design skills
• Ability to work with computer equipment, scanners, and digital cameras
• Dependability of work
• Ability to work effectively as a member of a team
• Assisting students in assessing their success and progress with the learning tasks
• Workshop sessions where students give each other feedback and revise plans

In addition, students will be given the opportunity to demonstrate the following skills …
• Research and organize information
• Acquire practical knowledge for the publication industry
• Communication skills
• Co-operative work
• Participate in establishing goals

Course Name: English As A Second Language 10

Course Code: YESL 10

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: This course is designed for the student who:

**Course Synopsis:**

This course is an enhancement to an ESL student’s cultural and academic understanding. The course is designed to introduce ESL students to develop their expressive and receptive language skills. The course focuses on developing strategies needed to read, write and extract information successfully in English. It also encourages students to use a variety of modes to represent understanding. Throughout the course students are encouraged to participate in authentic real-life/everyday situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Present and Past Tenses. Students identify and compare their own customs to Canadian culture and customs. They are encouraged to take pride in their heritage. Students completing ESL 10 will have acquired advanced beginner level competency. This course is taken in addition to English as a Second Language instruction.

**Course Synopsis:**

The course is planned to extend ESL students’ participation and communication in a variety of modes and addresses specific needs regarding language and culture. Furthermore, as this course is designed for students with an intermediate level of English proficiency, particular emphasis will be placed on purposeful reading and writing. The intent is that students will be able to interact and respond with greater confidence in both familiar and academic settings. The course allows students to access and demonstrate understanding in multiple forms and values drawing on students’ previous knowledge as a means to understand new concepts. Students will continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms including future tense. Students completing this course will have acquired an upper intermediate competency in English. This course is taken in addition to English as a Second language instruction.

School Name: Cambie Secondary

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course:  

- 10
- 11 [X]
- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)

Category: Health and Human Services

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: September 1, 2004

Prerequisites: None

Course Synopsis:

Health Science 12 Program emphasizes:

- Human Physiology & Anatomy
- Exercise Management
- Nutrition
- Injury Prevention & Rehabilitation
- Contemporary Issues in Health
- First Aid & CPR
- Career & Employment Preparation

Learning Resources:

Texts

Equipment:
- Models and Charts: knee joint, skeletons, anatomical torso, and charts
- Pressure Cuffs and Stethoscopes
- Athletic Tape and Accessories
The school is in the process of developing a forensic science unit (Case studies)

Community & Business Involvement:
There are a number of individuals from the community, post-secondary institutions, and businesses who are willing to help with the development and enrichment of our students. For example:

Jeff Watts (Advanced Life Support Paramedic)
- Instructs Canadian Red Cross Responder Program
- Coordinates Ambulance Ride-Along program
- Provides alternate opportunities for First Responders re: providing (a) First Aid at community events and/or (b) skill development (ie. YVR Disaster Drill, MCI Drill in Monroe, Washington, etc.)
- Guest speaker re: forensic science, designer drugs, etc.

Dr. Stan Jung (Chiropractic Doctor)
- Guest Speaker re: Myotomes/Dermatomes and rehabilitation.

Dr. Peter Dodek (Leading Physician at St. Paul’s Hospital Intensive Care Unit)
- Guest Speaker re: procedures/practices in Intensive Care Unit
- Provides opportunities for students to shadow him in the Intensive Care Unit

Stephanie (BC Sports Medicine Council)
- Provides Taping I and II certification for students ($75.00 cost)
- Guest Speaking re: Sports Injury management

Scott Rintoul (RCMP Drug Expert)
- Guest Speaker re: Rave Drugs/Poly drug use

Nanci Guest (Nutritionalist)
- Guest Speaker re: Fad Diets, Supplements, etc.

School Name: Cambie Secondary

Course Name: Leadership – TABLE 38

Course Code: YLEAT11

Category: Liberal Arts and Humanities

Grade Level of Course:  

- [ ] 10  
- [X] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”, developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

- Media (newspapers, videos)
- Internet websites and library resources
- Community organizations and speakers
- Books and articles
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: October 30, 2006

Prerequisites:  

Course Synopsis:

This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Three.

Learning Resources:

• Books

• Internet sites

Course Name: Peer Tutoring 11

Course Code: YPTU 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 20, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Name: Textile Arts and Crafts 11
Course Code: YTAC 11
Category: Fine Arts, Design, and Media
Grade Level of Course: ☑ 10  ☑ 11  ☑ 12
Number of Course Credits: 4
Number of Hours of Instruction: 125
Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
- McCall’s Book of Handcrafts, Nanina Comstock, Random House
- McCall’s Needlework Treasury, Random House
- Exploring Textile Arts, Creative Publishing International
- An Introduction to Crewel Embroidery, Mave Glenny
- Two-Hour Applique, Leslie Allen
- Anchor Complete Embroidery Course, Christina Marsh
- The Batsford Book of Tapestry Weaving, Alec Pearson
- The Complete Guide to Needlecraft, Lucinda Ganderton
- Craft School, Hamlyn
- Embroidery, French Chic
- Crewel Embroidery, Erica Wilson
- Jann Johnson’s Discovery Book of Crafts
- Dye Painting!, Ann Johnston
- Fabric & Fiber Art Works, Sharon McCoubrey
- The Fabric & Yarn Dyer’s Handbook, Tracy Kendall
- Fabric Painting Made Easy, Nancy Ward
- Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
- Reader’s Digest Complete Guide to Needlework
- Small Woven Tapestries, Mary Rhodes
- Tie-Dye! The How-To Book, Virginia Gleser
- Weaving: A Handbook of the Fiber Arts, Shirley Held
- The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
- Knit a Square and Make a Toy by Norma Campbell, Woman’s Weekly Craft Library, 1999
- Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
- The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
- Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
- Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
- Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
- Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
- Creative Sewing Ideas, (646.2 CRF) 1990
- The Evelyn Roth Recycling Book, Roth, Evelyn (*746 ROT) 1975
- The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
- Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Additional Information:

Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students’ projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

School Name: Charles E London Secondary

Course Name: Art Careers 12

Course Code: YARC 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  
10  
11  
X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Art 11, Art 12, Art Career Prep

Course Synopsis:

This is a unique course designed to better prepare visual art and fashion students for post secondary careers in the arts. Primary goals of this course are to:
- explore realistic career options in the visual art and fashion fields
- become informed about the education and training required to pursue a career in the visual arts fields
- continue to develop skills in art making and image development
- build a relevant portfolio of artwork according to post secondary art school entrance guidelines
- compile, catalogue portfolio that will be professionally evaluated at the National Portfolio Day at Emily Carr School of Art and Design

Learning Resources:

As already stated the art department with its considerable resources is completely available, according to the art student’s needs and ideas. In a given assignment the student can decide what mediums and equipment they will need to explore to achieve their goals.

Teacher resources to further the student’s understanding of art and art history are slides, videos, a comprehensive art section in the school library and in the art classroom, and the Internet which is provided by the six computer graphics stations. Information, relevant to the student’s choices of post secondary education are provided by guest lecturers, field trips to art schools and galleries.

School Name: Charles E London Secondary

Course Name: Aviation Technology 11

Course Code: YAVT 11

Category: Trades and Technology

Grade Level of Course:  
- 10  
- 11  
- 12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  September 1, 2004

Prerequisites:  Completion of Gr. 10/Permission of instructor

Course Synopsis:

This Aviation Course will acquaint students with the fundamental elements of the aviation industry. The Grade 11 course will examine areas such as Basic nd Advanced Aerodynamics, Aircraft Components, Aircraft Inspection, Materials and Hardware, and Information Sources as set out in the Aviation Maintenance Orientation Program. Not only will these two courses explore flight and maintenance, but it will also examine other components of the aviation industry such as Flight Training, Ground Services, Air Traffic Control, Aircraft Dispatch, Hangar/Ramp Services, Aerospace Manufacturing and the Aviation/Aerospace Careers. These areas will be taught in two blocks with a total classroom time of 120 hours.

Not only will this course differ from any in the Richmond School District, but it will be only the second course of its nature in Canada.

Learning Resources:

As previously stated, Charles E. London Secondary School has established links with a number of aviation oriented businesses and institutions. Not only has the aviation industry granted a set amount of monies for this program, they are also helping by way of “In-Kind” contributions.

The cash contributions come by way of the Canadian Aviation Maintenance Council, Ottawa, Bill St. Jean, Executive Director. The Canadian Aviation Maintenance Council is an industry based group and its main goal is to implement occupational standard and national training programs for all aviation maintenance trades and further the advancement of aviation knowledge. In a Letter of Agreement to be signed mid March, the Canadian Aviation Maintenance Council has agreed to fund a portion of the program.

Letter of Agreement
The Canadian Aviation Maintenance Council
and
Charles E. London Secondary School/Site Steering Committee

Site Funding Assistance: Each site will receive over two years a maximum of $80,000.00 ...

The Contribution made by the Canadian Aviation Maintenance Council will be used to buy training aids, course text books, course tours and staff development.

Along with the contribution of the Canadian Aviation Maintenance Council, the aviation community in the lower mainland has offered another $120,000 CND. of “In-Kind” contributions. These contributions come in the way of loaned training aids such as flight simulator time, training aids, course planning, classroom instruction and work experience for the students. The participating companies are as follows:
Additional Information:

This is part of a Career Preparation Aviation program. Students can complete a 10 hour semi-apprenticeship at Air Canada, in conjunction with these Aviation focus courses.

School Name: Charles E London Secondary

Course Name: Broadcasting 11

Course Code: YBRC 11

Category: Trades and Technology

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites:

Course Synopsis:

Broadcasting 11 is an introduction to the world of radio & TV broadcasting, multimedia, audio production, videography & video editing, and careers in the broadcast and film industries. The course also includes a hands-on component -- producing a daily in-house radio show and weekly TV show on the school site.

Learning Resources:

Videos -- Our chief reference material is educational videos. Many of the videos are on subjects such as cinematography, film history, broadcasting inventors, popular music figures, camera/lighting/photography, and music production.

- A Beginning Look at Canada
- Canadian Concepts – Books 2 & 3
- Weaving it Together – Book 2
- BC Law Book for Schools
- The WestCoast Reader
- Teaching to Diversity: Teaching and Learning in the Multi-Ethnic Classroom
- Canada: Who Are We and Where Are We Going?
- Strategies and Resources for Secondary ESL 5 Support: School District #38
- A Beginning Look at Canada
- My Country, Our History
- Multicultural Manners: New Rules of Etiquette for a Changing Society
- Tapestry: Culture Connection
- Tapestry: Patterns of Cultural Identity
- Telephone directories, maps, atlases, various charts, wall charts and posters, and videos related to the topic of Canada and Canadian culture.
Additional Information:

The course requires students to become familiar with all aspects of audio/video equipment, as well as develop script writing, editing, and public speaking skills. In the past 4 years, we have also greatly expanded our presence in the real-world broadcast industry placing students at professional facilities such as:
- the CBC
- Shaw Cable
- CTV News
- CTV Gabereau Show
- CKNW RADIO
- Channel M
- Nettwerk Records
- The Weather Network
- the Knowledge Network
- Roger's Media

While the students have always engaged in multimedia projects, a new element of the course is the CONTENT of these projects. In the past 4 years, we have increasingly concentrated our efforts on making Public Service Announcements that deal with youth issues such as bullying, speeding, alcohol/drug abuse, and smoking. Students have an opportunity to discuss these issues and provide constructive solutions.

Course Name: Electronic Publishing 12

Course Code: YELPB 12

Category: Trades and Technology

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 20, 2005

Prerequisites: None

Course Synopsis:
In this course students will:
• Learn the business and production techniques involved in the marketing and production of the yearbook. The goal is to produce 100% of the pages required. Students will have a major part in decision-making.
• Gain expertise in using a digital camera at the correct resolution to capture interesting candid photos.
• Learn how to use PhotoShop to manipulate digital images and prepare them for publication.
• Learn to use inDesign to design page layouts for colour and gray-scale pages.
• Conduct a promotional campaign to sell the yearbook, to sell personalizations and to acquire sponsors.
• Handle cash and other business aspects of the course, such as communication with the publishing company.

Learning Resources:
• inDesign “Classroom in a book”: an introduction to desktop publishing—tutorials, images, samples, etc.
• Curriculum Guidelines from Jostens, the publisher.
• Visits from and training sessions held by Josten’s Representative
• Resource library of comparative publications and past C.E. London publications
• Tips on design – collection of various publications from Josten’s and other publishing companies
• C. E. London Secondary BE2 Computer Lab is equipped with the necessary resources (i.e. eMacs with inDesign, Adobe Photoshop, Adobe Illustrator, a scanner, a laser printer and a digital camera).

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course:  
☑ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

www.bcsta.org
Additional Information:

Instructional Components:
- Direct instruction
- Interactive instruction
- Collaborative projects
- Case studies
- Experiential learning
- Individual reflections
- Field trips
- Guest Speakers/local environmental organizations
- Perspective Taking/Critical Thinking Strategies

Assessment (and Evaluation) Components:
Authentic Assessment: interviews, observations, products

- Personal Journal 10%
- Tests 10%
- Assignments and Projects 20%
- Presentations (multiple intelligences, multimedia) 20%
- Portfolio/Scrapbook 20%
- School-based and Community Projects 20%

School Name: Charles E London Secondary

Course Name: Introduction to Engineering 11

Course Code: YIEN 11

Category: Science and Applied Sciences

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: 70% in Math and Science 10

Course Synopsis:

This locally developed course is designed to introduce students to the world of engineering.

This is a project-based course where students work in teams to design and construct solutions to engineering/science related problems. Emphasis for the course is on developing student skills in problem solving, teamwork, time management, and oral/written communication.

Students will complete three design projects and one research project over the semester. The design projects will vary from year to year. Projects in the past have involved bridges, catapults, boats, water coolers, devices to help the physically challenged, and devices to improve public safety. For the research project students write a report and make a presentation on a field of engineering in which they are interested.

Students who are interested in careers in science/engineering are encouraged to take this course.

Note:
· This course does not count as a Grade 11 Science or Foundations course.
· This course is a requirement of the Engineering Career Preparation Programme.
· A solid understanding of Science 10 and Math 10 is recommended.

Learning Resources:

There is no text for this course.

Reference material:
· The Seven Habits of Highly Effective People
· Engineering Problem Solving for Mathematics, Science and Technology Education
· A variety of engineering text books and magazines

Community resources:
· UBC Engineering Library
· Course sponsors, e.g. retired engineers, employed engineers local and reasonably close manufacturing plants for field trips

School resources:
· This class needs to be taught in Sc. 2 to have access to the computer network on a daily basis
· This course will require a budget for photocopying (small), resources e.g. drawing software like Canvas, and possible test equipment e.g. a bridge tester, and supplies to construct student projects
Additional Information:

This course is the focus course for our CP Engineering program

Course Name: Leadership – TABLE 38

Course Code: YLEAT 11

Category: Liberal Arts and Humanities

Grade Level of Course: [ ] 10  [x] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

• Media (newspapers, videos)
• Internet websites and library resources
• Community organizations and speakers
• Books and articles

Grade Level of Course:  □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 24, 2006

Prerequisites:  None

Course Synopsis:

This course prepares and motivates students to provide leadership and assistance to others in their schools with special emphasis on mentorship for Grade 8 students. Using the Social Responsibility Rubric as organizer, students will explore aspects of personal and social responsibility within the school community. Students will develop skills in communication, interpersonal relationships, leadership, conflict management and teamwork. They will apply these skills in authentic leadership experiences within the school.

Learning Resources:

B.C. Ministry of Education Graduation Portfolio Program Guide

Career Cruising.com program

Carr, Rey.  Natural Peer Helpers Program.

CASAA Leadership Handbook from the Canadian Association of Student Activity Advisers

Covey, Sean.  The Seven Habits of Highly Effective Teens.

Holloway, Stacey.  Interpersonal Conflict Resolution Skills for Youth

Richmond School District Leadership Program

Tabata, Susanne.  Talk to Me. (VHS)

Thomas, Julie.  Mind Works: The Communication Course

True Colours: Myers-Briggs Personality Type Inventory

Additional Information:

This course will provide students with authentic leadership experiences and the opportunity to explore personal and social responsibility within the school community. Students will learn communication, leadership, conflict management and teamwork skills and apply these to school based activities and programs. The learning outcomes of this course encourage and support students to gain knowledge and skills as Peer Helpers and Leaders and to introduce them to possible career paths in the Helping Professions. Students completing this course will meet most of their Graduation Portfolio requirements.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Name: Photography 12

Course Code: YPHOT 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Photo Level 1 and Photo Level 2

Course Synopsis:
The level 3 portfolio course is for the serious art students who may be interested in pursuing a career in the visual arts field or who may be interested in further developing their personal language through traditional and digital photography.

This course originated because of the need for some students who had completed level 1 and 2 photography and who wanted to continue to explore self-directed topics in photography, graphic arts and multimedia. Such areas include documentary and landscape photography, photojournalism, advertising and product photography, fantastic and theatrical photography, portrait, etc.

This course also provides a doorway into the world of computer graphics and students develop their skills using a variety of computer software that includes Adobe Photoshop, Adobe Illustrator, Painter and Macromedia Director. Students will continue to develop a serious photo portfolio necessary for post secondary art school admission and at this level are expected to be extremely self motivated.

Learning Resources:

Students will make use of the existing resources. London provides a professional graphic arts studio that offers darkroom photography, studio lighting equipment, computer stations with the latest graphic software (Adobe Photoshop, Adobe Illustrator, Adobe Indesign, Painter, Macromedia Director), scanners (negative and image), printers, cameras (35 ml SLR and digital), mounting stations, etc. We have an extensive library that includes books on photo techniques and artist photographers.

Other resources that are available are slides of photographer works, instructional and biographical videos of famous photographers and 6 in-class computer stations that are a wonderful resource for personal research.

Additional Information:

This year, former level 3 student Ricky Reese will return to London Secondary to demonstrate studio photography to our photo classes. Another student who graduated from London Secondary is presently studying in the 2-year photo diploma program at Langara College.

Number of Hours of instruction: 120

Date Approved:   September 1, 2004

Prerequisites:

Course Synopsis:

Teaching and Learning 12 is a survey course designed for students who are considering a profession in Education (e.g.: teacher, classroom assistant or coach), Youth and School Counseling and Social Work.

This course is divided into 24 units clustered into seven domains:

1. Educational Theories (e.g., Teaching for Understanding Model, Suchman Inquiry Model, Synectics: Developing Creative Thinking and Problem Solving, etc. . . .)

2. Learning Styles and Theories (e.g., Multiple Intelligences, Brain theory, and Developmental theory)

3. Social Foundations and Philosophies of Education (e.g., post modernism vs. modernism, feminist theory and multicultural education)

4. The Learning Environment (e.g., behaviour management, establishing a culture of learning, encouragement strategies and professionalism)

5. Instruction (e.g., examining and practicing teaching strategies and implementation theory and practice)

6. Evaluation and Assessment

7. Special Interest Topics in Education

Through readings, dynamic classroom activities, discussion, and interactions with peers and practicing teachers, students will be exposed to various educational issues, methodologies and questions.

Throughout the course, students will engage in self-exploration and value clarification exercises to examine their own beliefs about helping, education a and teaching.

The career preparation program will offer students a 120-hour practicum of their choice. Examples of practicum settings include: elementary or secondary schools, rehabilitation clinics, hospitals, recreational centres, group homes, training departments in corporations or consulting firms.

Course Name: Textile Arts and Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  

XX 11  

X 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall’s Book of Handcrafts, Nanina Comstock, Random House
• McCall’s Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen
• Anchor Complete Embroidery Course, Christina Marsh
• The Batsford Book of Tapestry Weaving, Alec Pearson
• The Complete Guide to Needlecraft, Lucinda Ganderton
• Craft School, Hamlyn
• Embroidery, French Chic
• Crewel Embroidery, Erica Wilson
• Jann Johnson’s Discovery Book of Crafts
• Dye Painting!, Ann Johnston
• Fabric & Fiber Art Works, Sharon McCoubrey
• The Fabric & Yarn Dyer’s Handbook, Tracy Kendall
• Fabric Painting Made Easy, Nancy Ward
• Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
• Reader’s Digest Complete Guide to Needlework
• Small Woven Tapestries, Mary Rhodes
• Tie-Dye! The How-To Book, Virginia Gleser
• Weaving: A Handbook of the Fiber Arts, Shirley Held
• The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
• Knit a Square and Make a Toy by Norma Campbell, Woman’s Weekly Craft Library, 1999
• Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
• The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
• Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
• Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
• Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
• Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
• Creative Sewing Ideas, (646.2 CRF) 1990
• The Evelyn Roth Recycling Book, Roth, Evelyn (‘746 ROT) 1975
• The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Course Name: BioPsychology 12

Course Code: YBPS 12

Category: Health and Human Services

Grade Level of Course:  
- 10  
- 11  
- X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Science 10

Course Synopsis:

BioPsychology will provide students with the opportunity to study and investigate some of the complexities and mysteries of the brain. From the introduction to the discipline of BioPsychology, students will learn the anatomy and physiology of the nervous system. With this foundation, students will then investigate the theories and current research on Abnormal Psychology, Learning and Memory, Sensation and Perception, Mental Diseases/Disorders and Brain Damage.

Learning Resources:

School Name: Hugh Boyd Secondary

Course Name: Braille 11

Course Code: YBR 11

Category: Health and Human Services

Grade Level of Course: ☒ 10  ☒ 11  ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 30, 2006

Prerequisites: The ability to understand abstract concepts and functional use of hands.

Course Synopsis:

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code. The student will be able to produce written output that contains Braille contractions and adheres to standard Braille formatting rules.

As a culmination students will reflect on their work and produce work done in a variety of writing styles for various purposes consistent with the Braille Authority of North America (BANA) regulations. They will write sentences, gain information from many sources.

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code.

This course will allow students a tactile medium to access the prescribed curriculum.

Students will learn Braille to complete an educational program so that they can graduate from High School and pursue college, university or other interests. They will explore curriculum themes, develop projects and research topics of personal interest. Students can use Braille to access the many technological devices and they can explore the world wide web for global business transactions. With Braille this is possible. Proficiency in the use of the Braille code enables the student to succeed academically, socially and in a pursuit of a career.
Learning Resources:

Assessment of Braille Literacy Skills

School Name: Hugh Boyd Secondary

Course Name: Drumming - Rhythms in World - Music 10

Course Code: YDRWM 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: None

Course Synopsis:

The course is intended to give students credit in Fine Arts at the grade 8 -12 level. As Concert Band and Jazz Band operate in a continuum of the learning experience spiral, so too the Drumming -World Beat course is developed paralleling a similar model. The course will allow students with no previous musical training or note reading ability to fully participate in the making of music through active involvement in playing percussion instruments using forms and practices of various types of world music. The course is intended to help students gain appreciation for the rhythms of diverse world cultures through hands on experience. The music of Africa, Brazil and Cuba will form the basis for course content. In addition, students will be able to exercise their own creative musical design and apply it in a group setting. For students who make this course a focus of their graduation requirements, there is potential for a wide variety of performance and recording arts opportunities. Leadership skills and teaching opportunities are also provided for experienced students through work with either small or large ensembles.

Learning Resources:

Personal files and notes from workshops, clinics and one on one lessons given by many including Milton Randall, Dido Morris, Rex Chequer, Joseph Pepe Danza, Sal Ferreras and Raphael Geronimo. I was involved in the early stages of the Vancouver Coalition for World Music (1997) and special thanks to Val Dare of V.S.B. Britannia school who continues to be a wealth of information and support for those interested in teaching world music.

The Djembe: by Serge Blanc, Distributed by Sher Music
Traditional Grooves of West Africa with notes on instruments, geography with a C.D. example of all the notated grooves. An endless array of authentic African rhythms and an invaluable resource for teachers.

Music of South Africa: Rhythms of Resistance, Val Dare, et al. B.C. Teacher’s Federation lesson Aids Service, Vancouver, Canada

Rhythm for Kids: A Samba Unit for Teachers, Eric Hartman, New Traditions Media, Vancouver, Canada

Personal Subscription to: >african@african-drumbeat.co.uk<2;, by yearly subscription, access to many West African Grooves, that I have the right to download as MP3 and also to print notation from.
This course officially started running at Hugh Boyd in September of 1997 with a first class of 17 students. We started with drums purchased by our PAC Committee and loaned by Milton Randall who was a big help to me in getting the program under way. At the time it was the first course of its kind in B.C. Gradually, we have purchased more drums. Since then we have continued to add more elements and rhythmic challenges into the curriculum. The latest of these is Cuban music which we were able to see, hear and receive instruction in when we took a band and drumming group to Cuba in December of 2000.

This year we have had the privilege of working in the classroom with Raphael Geronimo of “Rhumba Calzada” who has been a help in the expansion of our knowledge of Cuban music. This year we have over 125 students enrolled in the drumming program and each class is a multiage group of students from a wide range of cultural backgrounds and academic abilities. There are several students who are working as peer tutors who have had at least two years in the drumming program. There are always public performance opportunities for drumming students and a special extra curricular group called “Drum Circle” that meets twice each week throughout the year.

Drummers from this program have performed on tour with the bands and on their own in the community. The Hugh Boyd Drumming group has been invited to perform at the annual B.C. Music Educators Conference in 2001 and again this year in 2004, and therefore has been acknowledged as a leading program in world music instruction in British Columbia. With our culturally diverse population here in B.C., it is only logical that we teach beyond our European and American traditions. As time goes on, it is hoped that the curriculum of this program will expand to include an even more diverse cultural perspective.

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

School Name: Hugh Boyd Secondary

Course Name: Hair Design 11A

Course Code: YHDSN 11A

Category: Trades and Technology

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: Completion of Grade 10

Course Synopsis:

Hair Design 11A is a theory course which introduces students to the basic principles of hairdressing and the organization and management of a hair salon. Basic principles form the foundation for practical work with clients. Students are introduced to the operation of a hair salon including reception duties, product selection and knowledge, client relations, and record keeping.

Learning Resources:

Course Name: Journalism 12

Course Code: YJOU 12

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: English 10

Course Synopsis:

Journalism 12 is a yearlong newspaper reporting course available to students in grades 10-12. Students are responsible for producing stories and photographs for the school newspaper. Students will learn the major newspaper story forms including news, sports, features, editorials and opinion. They will compose news and feature photos, conduct a public opinion poll, and write a broadcast news script. Students will strive to produce a newspaper meeting professional standards and following the Canadian Press style. They will prepare questions, conduct interviews, carry out online and other forms of background research and be responsible for one or more beats (regular coverage areas) in the school and community. Students will also study the techniques used to present news and in so doing, become informed consumers of media.

Learning Resources:

- Visit to commercial press plant, TV and/or radio station
- Guest speakers from local media (reporters, photographers and editors)
- Articles from various sources on news writing, ethics, design and business aspects
- Journalistic codes of conduct, such as those of the CBC and the Society of Professional Journalists
- Websites on a range of journalism topics including writing and ethics, design and careers.
- Books
Additional Information:

Performance Methods
- Story proposals
- Story drafts
- Photographs
- Projects
- Contributions to monthly newspaper
- Portfolio showing range of year’s published work

Personal Communication
- Group dialogue
- Self evaluation
- Peer evaluation
- Student-teacher dialogue
- Feedback from readers

Other
- Weekly assignments
- Teacher anecdotes
- Records
- Rubrics
- Rating scales

School Name: Hugh Boyd Secondary

Course Name: Leadership – TABLE 38

Course Code: YLEAT11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”, developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

- Media (newspapers, videos)
- Internet websites and library resources
- Community organizations and speakers
- Books and articles
This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Three.

Learning Resources:

- Books

- Internet sites
  - Texas School for the Blind and Visually Impaired
  - Hadley School for the Blind
  - Dog Guide Schools

Additional Information:

This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Course Name: Peer Tutoring 11

Course Code: YPTU 11

Category: Health and Human Services

Grade Level of Course:  

10  X 11  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 20, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  [ ]  11  [X]  12  [ ]

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Additional Information:

Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course:  
- 10
- 11 [X]
- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr

Course Synopsis:

How will the proposed course promote student development?
- to bring Home Economics into line with changing technologies and to encourage students to use these tools as they apply to personal and home use.
- to encourage students to use analytical strategies when dealing with personal and home issues.
- to provide an opportunity and to develop student's skills.
- to provide a non-specialist link through which students can develop their computer skills.

How has this proposal originated and what is its primary purpose?
- the proposal originated through an awareness of the course offering in the Vancouver School District

Purpose:
- to meet the changing needs of Home Economics as a content area.
- to better understand the use of technology and its impact on personal and family living.
- to give students proficiency in computer use through a non-specialist route.

Learning Resources:
Teacher developed materials

Course Name: Leadership – TABLE 38

Course Code: YLEAT11

Category: Liberal Arts and Humanities

Grade Level of Course:  
- [ ] 10  
- [x] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”, developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

- Media (newspapers, videos)
- Internet websites and library resources
- Community organizations and speakers
- Books and articles
I believe that Media & Culture 11 offers three very exciting opportunities for secondary students in our district.

First, it allows them to look more closely at the workings of the media. We often tend to take the influence of the media for granted because we are so immersed in it: it is like the air we breathe. Hopefully, the course allows students to approach this powerful force from a more informed standpoint.

Second, the Distributed Learning aspect of Media & Culture 11 gives students in all schools a chance to participate in the course, an opportunity not limited by the location at which the program is offered or by a lack of teaching personnel.

Third, it allows them to use the exciting technology that is e-mail to learn and communicate ideas.

With the increase of on-line education offered by post-secondary institutions, I believe my students will be better prepared to access a greater range of future learning possibilities.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

School Name: Hugh McRoberts Secondary

Course Name: Strength & Conditioning 12

Course Code: YSCD 12

Category: Choose a Category

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: September 1, 2004

Prerequisites: Strength & Conditioning 11

Course Synopsis:

How will the proposed course promote student development?
- the aim of the course will be to continue to enable students to enhance their quality of life through active living.
- through professional instruction and guidance students will continue to build on their knowledge of the basic principles of strength and conditioning and begin to research more advanced principles and strategies of lifetime fitness.
- By completing the Grade 12 component of this course students will gain a more advanced and in-depth knowledge, skills and attitude necessary to incorporate physical activity into regular routines, leisure pursuits, and career requirements throughout life. Students will also learn how to manage their own personal sport training development beyond basic lifestyle health and fitness.

How will the proposed course enhance the educational program at the school?
- Physical Education and the addition of Strength and Conditioning are integral parts of the total education package. Students who participate in regular physical education classes enjoy enhanced memory and learning, better concentration, and increased problem-solving abilities. They are willing to take appropriate risks, and have a more positive attitude toward self and others. Positive personal and social behaviours improve school climate, resulting in better attendance and reduced violence.

How has this proposal originated and what is it primary purpose?
- The proposal originated through awareness that many students in our school were seeking more information on how to develop a personalized strength and conditioning program. Many felt that it should be offered as a course.
- As well, through an awareness that the course is being presently run in many other school districts in B.C.

Purpose:
- to meet the needs of our students and to give students proficiency in the development and participation in strength and conditioning through instruction and active participation.

Learning Resources:

- CFES
- Introduction to Weight Training for Young Adults
- Anatomy Weight Training
- Guest Speakers
- field trips to community weight rooms and training centres.

Course Synopsis:

How will the proposed course promote student development?
· The aim of the course will be to enable students to enhance their quality of life through active living
· Through professional instruction and guidance students will be introduced to the basic principles of strength and conditioning, to enable them to continue with various options that relate to lifetime fitness.
· By completing this course the student will gain the knowledge, skills and attitude necessary to incorporate physical activity into regular routines, leisure pursuits, and career requirements throughout life. Striving for an active, healthy lifestyle fosters personal growth and the ability to meet the challenges of society.

How will the proposed course enhance the educational program at the school?
· Physical Education and the addition of Strength and Conditioning are integral parts of the total education package. Students who participate in regular physical education classes enjoy enhanced memory and learning, better concentration, and increased problem-solving abilities. Grade Level of Course:  □ 10  □ 11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
- McCall’s Book of Handcrafts, Nanina Comstock, Random House
- McCall’s Needlework Treasury, Random House
- Exploring Textile Arts, Creative Publishing International
- An Introduction to Crewel Embroidery, Mave Flenn
- Two-Hour Applique, Leslie Allen
- Anchor Complete Embroidery Course, Christina Marsh
- The Batsford Book of Tapestry Weaving, Alec Pearson
- The Complete Guide to Needlecraft, Lucinda Ganderton
- Craft School, Hamlyn
- Embroidery, French Chic
- Crewel Embroidery, Erica Wilson
- Jann Johnson’s Discovery Book of Crafts

Course Name: Animation 10

Course Code: YAN 10

Category: Fine Arts, Design, and Media

Grade Level of Course: [x] 10  [ ] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100 Hours

Date Approved: April 24, 2006

Prerequisites: None

Course Synopsis:

The purpose of this course is to give students the opportunity to explore the possibilities provided by the animation industry. In this course, students will be introduced to Computer generated (CG) animation where they will learn about computer production, lighting, camera techniques and three-dimensional drawing techniques.

In general, the intention is to enhance the artistic and computer abilities of students and to provide directional choices for students heading toward post secondary education in the animation industry.

Learning Resources:

Learning Resources are provided through the teachers knowledge of the software, the computer help files, tutorial books from the software provider and after market publishers.

Additional Information:

Each assignment has three assessment components.

The ideation component is the sketching or brainstorming part of the assignment. Students must explain and sketch their proposal for the assignment. This component also helps the teacher to ensure all projects are unique and within the capabilities of the student.

The student self-evaluation component allows the student to critique their own work and to mark themselves based on a set of criteria and sometimes on a few criteria set by themselves.

The student peer evaluation is designed to get the students to evaluate their peers based on a set of criteria but more important, to get the students to see what each other are doing. I find this promotes the exchange of ideas and techniques.

The teacher evaluation is based on a set of criteria printed on the bottom of the assignment sheets. Each project is marked with the student present to clarify their technique and to hear the teacher’s critique.

Prerequisites: The ability to understand abstract concepts and functional use of hands.

Course Synopsis:

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code. The student will be able to produce written output that contains Braille contractions and adheres to standard Braille formatting rules.

As a culmination students will reflect on their work and produce work done in a variety of writing styles for various purposes consistent with the Braille Authority of North America (BANA) regulations. They will write sentences, gain information from many sources.

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code.

This course will allow students a tactile medium to access the prescribed curriculum.

Students will learn Braille to complete an educational program so that they can graduate from High School and pursue college, university or other interests. They will explore curriculum themes, develop projects and research topics of personal interest. Students can use Braille to access the many technological devices and they can explore the world wide web for global business transactions. With Braille this is possible. Proficiency in the use of the Braille code enables the student to succeed academically, socially and in a pursuit of a career.

Additional Information:

Performance Methods
• Contracted Braille
• Projects
• Portfolio/binders/computer files
• Braille products evaluation
• Presentation of completed works
• Maintaining assignments on note taker
**Instructional Component:**
At the beginning of each project students will receive a handout describing the process of what we are about to do, including sample visuals and an outline of assessment. Explaining the process thoroughly, and providing inspiration, involves many visual aids, examples, and historical references. New techniques will be introduced through hands-on demonstrations, where students will clearly be able to see the process of what they are about to do. Studio time will provide opportunities for the instructor to provide one-on-one instruction to help each individual with his/her project.

**Assessment Component:**
Assignments will be broken down into the following criteria. These criteria will be introduced at the beginning of each project, and referred to intermittently throughout the unit.

- **Process:** any preliminary work or research in their sketchbooks.
- **Creativity:** the concept or idea behind the project - imagination, originality, and thoughtfulness are encouraged.
- **Technique:** effective use of materials and craftsmanship.
- **Studio/Effort:** this includes use of class time, effort and studio clean up.

**Course Synopsis:**
Classical Animation 11 provides students with the basic knowledge of drawing techniques used in animation. The focus of this course will be on acquiring basic skills such as still life drawing, figure drawing, colour theory, perspective and character development.

**Learning Resources:**
A variety of resources, ranging from books and film/video to internet sites, will be used throughout this course. The following are examples of just a few of many resources:
- The Illusion of Life by Frank Thomas and Ollie Johnston
- The Animator’s Survival Kit by Richard Williams
- Cartoon Animation by Preston Blair
- Film Cartoons by Preston Blair
- [www.karmatoons.com](http://www.karmatoons.com)
- [www.animationtoolworks.com](http://www.animationtoolworks.com)

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

Course Name: Fashion Design 12

Course Code: YFASD 12

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 □ 11 □ 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites:

Course Synopsis:

Fashion Design 12 is a course that provides both theory and practice in creating designs and applying them to fabric for self-designed garments. Students explore the fundamentals of drawing the fashion figure, fabric rendering, colours and textures. History and present trends influence the projects the students create.

Learning Resources:

Textbooks:

- Fashion!
- Fashion Sketchbook by Bina Abling
- Inside Fashion Business
- Patterns by the Flat Pattern Method

Course Name: Leadership – TABLE 38

Course Code: YLEAT11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”, developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

- Media (newspapers, videos)
- Internet websites and library resources
- Community organizations and speakers
- Books and articles
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Number of Hours of instruction: 120

Date Approved: May 20, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  □ 10  ☑️ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall’s Book of Handcrafts, Nanina Comstock, Random House
• McCall’s Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

• direct instruction
• indirect instruction
• interactive instruction
• independent instruction
• modeling
• practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

School Name: R C Palmer Secondary

Course Name: Braille 11

Course Code: YBR 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 30, 2006

Prerequisites: The ability to understand abstract concepts and functional use of hands.

Course Synopsis:

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code. The student will be able to produce written output that contains Braille contractions and adheres to standard Braille formatting rules.

As a culmination students will reflect on their work and produce work done in a variety of writing styles for various purposes consistent with the Braille Authority of North America (BANA) regulations. They will write sentences, gain information from many sources.

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code.

This course will allow students a tactile medium to access the prescribed curriculum.

Students will learn Braille to complete an educational program so that they can graduate from High School and pursue college, university or other interests. They will explore curriculum themes, develop projects and research topics of personal interest. Students can use Braille to access the many technological devices and they can explore the world wide web for global business transactions. With Braille this is possible. Proficiency in the use of the Braille code enables the student to succeed academically, socially and in a pursuit of a career.

**Course Synopsis:**

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

**Learning Resources:**

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

- [x] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”, developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn.

Students will engage in activities that build their skill sets and help them plan for and achieve success with learning tasks they encounter across the school day. Students will also learn how organization, reading and writing are complex activities that require analysis and constant monitoring.

This course is organized into four units:
- Understanding Yourself as a Learner
- Planning and Organizing for Learning
- Reading for Learning
- Writing for Learning

Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

**Additional Information:**

Students will have access to texts covering all reading levels.
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O&M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

**Course Synopsis:**

This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life. The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Two.

**Learning Resources:**

- **Books**

- **Internet sites**
  - Texas School for the Blind and Visually Impaired
  - Hadley School for the Blind
  - Dog Guide Schools

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

School Name: R C Palmer Secondary

Course Name: Textile Arts and Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall’s Book of Handcrafts, Nanina Comstock, Random House
• McCall’s Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen
• Anchor Complete Embroidery Course, Christina Marsh
• The Batsford Book of Tapestry Weaving, Alec Pearson
• The Complete Guide to Needlecraft, Lucinda Ganderton
• Craft School, Hamlyn
• Embroidery, French Chic
• Crewel Embroidery, Erica Wilson
• Jann Johnson’s Discovery Book of Crafts
• Dye Painting!, Ann Johnston
• Fabric & Fiber Art Works, Sharon McCoubrey
• The Fabric & Yarn Dyer’s Handbook, Tracy Kendall
• Fabric Painting Made Easy, Nancy Ward
• Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
• Reader’s Digest Complete Guide to Needlework
• Small Woven Tapestries, Mary Rhodes
• Tie-Dye! The How-To Book, Virginia Gleser
• Weaving: A Handbook of the Fiber Arts, Shirley Held
• The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
• Knit a Square and Make a Toy by Norma Campbell, Woman’s Weekly Craft Library, 1999
• Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
• The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
• Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
• Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
• Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
• Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
• Creative Sewing Ideas, (646.2 CRF) 1990
• The Evelyn Roth Recycling Book, Roth, Evelyn (*746 ROT) 1975
• The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Status: approved

School Name: Richmond Secondary

Course Name: International Studies 11

Course Code: YINST 11

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Program Planning Booklet and then an interview process

Course Synopsis:

The purpose of this course is to apply a number of learning disciplines to the study of a “developing” (third world) country, then partake in an extended field trip to the country to achieve a couple of specific goals. Apply what the students have learned in the classroom and exercise it in a “hands on” real cultural experience and provide humanitarian service through a work experience situation.

Learning Resources:
1. Main Texts:
   a. Text covering geography, history, politics, economics, sociology, anthropology, religion and domestic studies;
   b. Text covering art, architecture, music and drama
   c. Text introducing conversational language

2. Supplemental Books to Cover the Literature Component:
   a. One novel in translation
   b. One play in translation
   c. Selected poetry in translation

3. Reference Journals:
   a. Great Expectations (A Journal of World Travel)
   b. Under One Sun (A World Perspective of Children in Developing Countries)
   c. The New International (Amnesty International)
   d. The Courier (A Window Open on the World)

4. Teacher Resources:
   a. Teaching About World Cultures - Focus on Developing Countries
   b. Global Issues - Activities and Resources for the High School Teacher
   c. Teaching Global Awareness Using the Media
   d. Teaching About Cultural Awareness
   e. Teaching About Human Rights - Issues of Justice in a Global Age
   f. Exploring the Third World - Development in Asia and Latin America
   g. World ways - Bringing the World into the Classroom
   h. Make a World of Difference - Activities for Global Learning
   i. The Universal Curriculum - Teaching Action and Ideas Book

5. Teacher Resources (Audio Visual Resources) - when the country is selected, the following materials will be rented, purchased, borrowed or produced by me:
   a. Slide sets for all units
   b. Cassettes and CDs on music and culture
   c. 16mm and videos from
      i. The National Film Board
      ii. Richmond Resource Centre
      iii. IDERA (International Development Education Resource Centre)
The initial idea for the course came from small group discussions at a staff educational retreat. At the time we were dealing with the Year 2000 document and brainstorming for ideas in the construction of new courses that adhere to the principles of the Year 2000. Rob Scarr, Roman Hammerschmidt, Bob Carkner and myself were the members of the group at the time.

When the decision was made on my part to develop the course, it was first important to bring together the original members of that group, re-acquaint them with the idea and invite them to participate in putting the course together. Monica Pamer also attended that meeting.

I put together a one page brief on the course and we spent an hour discussing its merits. It was decided by all that this would be a very unique course (first of its kind in Canada), interdisciplinary, and would address many things recommended in the Year 2000 document. I was given permission to develop that course on my own with principal Bob Carkner overseeing all developments.

The proposal was taken to the School Collegiate Council where it was endorsed.

As well as relying on the direction given by Mr. Carkner I was also fortunate to receive the expertise of Mr. Pat Clark, head of Global Education for the BCTF, and Mr. Gary Hinkleman who is director of operation for World Youth Canada. Mr. Hinkleman in particular was most encouraged, found the idea for the course both unique and long overdue. World Youth Canada has since opened an education division that works with any school(s) interested in travel and working on projects in Developing Countries. On an extra curricular basis, World Youth Canada was contracted by the Campbell River School District to arrange a visitation for 18 Grade 11/12 students to a small village in Bandung, Java for 6 weeks to do relief work. It was a pilot project and most successful. A high school in Victoria did the same, sending 20 Grade 12 students to Malaysia. Again, it was the Victoria School Board who commissioned World Youth Canada to make all travel enquiries, set up host families to stay with, and researched work projects.

I was given permission to develop that course on my own with principal Bob Carkner overseeing all developments.

The proposal was taken to the School Collegiate Council where it was endorsed.

As well as relying on the direction given by Mr. Carkner I was also fortunate to receive the expertise of Mr. Pat Clark, head of Global Education for the BCTF, and Mr. Gary Hinkleman who is director of operation for World Youth Canada. Mr. Hinkleman in particular was most encouraged, found the idea for the course both unique and long overdue. World Youth Canada has since opened an education division that works with any school(s) interested in travel and working on projects in Developing Countries. On an extra curricular basis, World Youth Canada was contracted by the Campbell River School District to arrange a visitation for 18 Grade 11/12 students to a small village in Bandung, Java for 6 weeks to do relief work. It was a pilot project and most successful. A high school in Victoria did the same, sending 20 Grade 12 students to Malaysia. Again, it was the Victoria School Board who commissioned World Youth Canada to make all travel enquiries, set up host families to stay with, and researched work projects.

School Name: Richmond Secondary

Course Name: LAND Career 11

Course Code: YLNDC 11

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: 17-19 years old and ESL Level 1 or Level 2

Course Synopsis:

Students completing Career 11 (which is for Newcomers) will have acquired an ability with English as a Second Language beyond the beginner level in conjunction with an exploration of potential post-secondary and career options. They will have made personal connections with the school and the larger local community.

Learning Resources:

- Richmond Review
- Career Connections
- Expanding Your Horizons: A Career Guide
- Career Cruising
- Workskills Book 1 & 2
- Easy guide: City of Richmond
- Richmond School District Work Placement Database
- DVDs, Magazines, Newspapers related to career and post-secondary exploration
- Career and Post-Secondary information sessions

☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  

October 1, 2007

Prerequisites:  

Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

Learning Resources:

• Media (newspapers, videos)
• Internet websites and library resources
• Community organizations and speakers
• Books and articles
This new course is based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Grade Level of Course: ☒ 10 ☐ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: September 1, 2004

Prerequisites: Students must be in Grade 11

Course Synopsis:

Pre-employment is a secondary school completion program for students who may have difficulty fulfilling the requirements necessary for formal graduation.

The program is an alternative option that combines the benefits of educational and vocational upgrading while developing employability skills through the community/school career programs.

Students attend school each morning where they focus on upgrading their basic academic skills. In the afternoon, the students learn within the community at a Work Experience placement. Students do not receive remuneration during Work Experience as the placements are established for their education and to provide them with experience. The work experience is a major focus and provides students with a variety of job experiences that will enable them to make informed job/career choices upon leaving school. In addition, the skills and experience gained will be valuable assets to include on a resume and a reference letter.

Learning Resources:

Heart Beats
· This resource consists of over 75 student-friendly lessons and activities on topics such as attitudes for successful career paths, self-exploration, values, career building and awareness, occupational awareness and research, decision-making, goal setting, action planning, educational planning, stereotyping and energizers/icebreakers. Available through Continuing Education Division, Career Development Department 10537 - 44 Street, Edmonton, Alberta.

School Name: Richmond Secondary

Course Name: Textile Arts and Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall’s Book of Handcrafts, Nanina Comstock, Random House
• McCall’s Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen
• Anchor Complete Embroidery Course, Christina Marsh
• The Batsford Book of Tapestry Weaving, Alec Pearson
• The Complete Guide to Needlecraft, Lucinda Ganderton
• Craft School, Hamlyn
• Embroidery, French Chic
• Crewel Embroidery, Erica Wilson
• Jann Johnson’s Discovery Book of Crafts
• Dye Painting!, Ann Johnston
• Fabric & Fiber Art Works, Sharon McCoubrey
• The Fabric & Yarn Dyer’s Handbook, Tracy Kendall
• Fabric Painting Made Easy, Nancy Ward
• Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
• Reader’s Digest Complete Guide to Needlework
• Small Woven Tapestries, Mary Rhodes
• Tie-Dye! The How-To Book, Virginia Gleser
• Weaving: A Handbook of the Fiber Arts, Shirley Held
• The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
• Knit a Square and Make a Toy by Norma Campbell, Woman’s Weekly Craft Library, 1999
• Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
• The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
• Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
• Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
• Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
• Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
• Creative Sewing Ideas, (646.2 CRF) 1990
• The Evelyn Roth Recycling Book, Roth, Evelyn (*746 ROT) 1975
• The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

• direct instruction
• indirect instruction
• interactive instruction
• independent instruction
• modeling
• practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

- Media (newspapers, videos)
- Environmental internet websites and library resources
- Environmental organizations
- Sustainability Plans and Practices from local organizations
- Sustainability suitcase labs
- Books, articles and movies about environmental sustainability
  - The Future of Life, Edward Wilson
  - From Cradle to Cradle: Remaking the Way We Make Things, William McDonough & Michael Braungart
  - The Eighth Habit: From Effectiveness to Greatness, Stephen Covey
  - The Eleventh Hour (DVD)
  - The Day After Tomorrow (DVD)
  - Take Action! A Guide to Active Citizenship, Marc Kielburger
  - The Inconvenient Truth (DVD)
  - Fostering Sustainable Behavior – Doug McKenzie Mohr
  - Who Killed the Electric Car? (DVD)
  - Erin Brockovich (DVD)
  - The Great Global Warming Swindle Series
  - William Rees, UBC professor: School of Community and Resource Planning
  - Planet Earth Series – DVD
  - Global Warming, theme issue, Time Magazine

Course Name: Plumbing 12A

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application.

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

- Instructor designed material

- OHS regulations & WCB publications

- Qualified WHIMIS instructor

- Qualified First Aid instructor

- Trades Common Core, Line H, Lift Loads, Queen’s Printer

- Trades Common Core, Line A, Use Safe Work Practices, Queen’s Printer

- Trades Common Core, Line I, Erect Ladders and Scaffolds, Queen’s Printer

- TRAC Piping Occupational Core, Line F, Use Specialized Power Tools, Province of British Columbia Ministry of Post-Secondary Education, Queen’s Printer, 1986

- Current B.C. Plumbing Code, BC Building and Standards Branch, Queen’s Printer

- Videos: Ergonomics in the Workplace, The Hearing Video, Portable Fire Extinguishers, The Safety Monitor System, A Bright Arc, Fall Protection, Chemical Hazards, Confined Spaces Deadly Spaces
Additional Information:

Instructional Components:
- direct instruction
- indirect instruction
- re-teaching activities
- skill demonstrations
- skills practice sessions
- videotapes
- group/pairs work
- practical competencies

Assessment Component:
- assignments
- unit tests
- self-tests
- projects
- observation of practical skills
- group work
- observation of employability skills

School Name: Robert Alexander McMath Secondary

Course Name: Plumbing 12B

Course Code: YPLB 12B

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: The student should demonstrate an understanding of basic mathematics and science.

Course Synopsis:

This course is designed to introduce students to plumbing related math and sciences. It will give the student an understanding of the concepts of Grades, Offsets, Elevations, Volumes and Pressures. Additionally; the student will learn to read, draw and interpret piping drawings.

Learning Resources:

- Instructor designed material

- Math and Science, Perimeters, Areas Percentage and Grade, Minister of Alberta Learning, Queens Printer 1998.

- Math and Science, Volumes, Capacities and 45 degree Offsets, Minister of Alberta Learning, Queens Printer 1998.

- Math and Science, Pressure and Atmosphere, Minister of Alberta Learning, Queens Printer 1998.

- Plumber, Line H-1, Draw Simple Details and Use Scales, Queen’s Printer 1998.

- Plumber, Line H-2, Read and Interpret Piping Drawings, Queen’s Printer 1998.

Additional Information:

Instructional Components:
- direct instruction
- indirect instruction
- re-teaching activities
- skill demonstrations
- skills practice sessions
- group/pairs work
- practical competencies

Assessment Component:
- assignments
- unit tests
- self-tests
- projects
- observation of practical skills
- group work
- observation of employability skills

Course Name: Plumbing 12C

Course Code: YPLB 12C

Category: Trades and Technology

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 24, 2006

Prerequisites: The student should demonstrate a basic mechanical aptitude.

Course Synopsis:

This course is designed to introduce the students to the safe use of oxyacetylene welding and Acetylene soldering equipment. Additionally, it will familiarize them with common piping materials, fittings and valves. Also the students will be introduced to the current B.C. Plumbing Code Regulations.

Learning Resources:

- Instructor designed material
- Trades Common Core, Line J, Oxyacetylene Cut and Weld, Queen’s Printer.
- Plumbing Competency E-1, Describe common Piping Materials, Queen’s Printer
- Plumbing Competency E-2, Identify and Select Plumbing Fittings, Queen’s Printer.
- Plumbing Competency E-3, Select and Install Hangers and Supports, Queen’s Printer.
- Plumbing Competency E-4, Describe the Types of Sealants Used By Plumbers, Queen’s Printer.
- Plumbing Competency E-5, Select and Install Piping / Tubing for Specific Applications, Queen’s Printer.
- Plumbing Competency E-6, Identify Plumbing Valves, Queen’s Printer
- Current British Columbia Plumbing Code Regulations, Queen’s Printer

Course Name: Textile Arts and Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course: □ 10  □□ 11  □□□ 12

Number of Course Credits: 4

Number of Hours of instruction: 125

Date Approved: March, 2004

Prerequisites:

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall’s Book of Handcrafts, Nanina Comstock, Random House
• McCall’s Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen
• Anchor Complete Embroidery Course, Christina Marsh
• The Batsford Book of Tapestry Weaving, Alec Pearson
• The Complete Guide to Needlecraft, Lucinda Ganderton
• Craft School, Hamlyn
• Embroidery, French Chic
• Crewel Embroidery, Erica Wilson
• Jann Johnson’s Discovery Book of Crafts
• Dye Painting!, Ann Johnston
• Fabric & Fiber Art Works, Sharon McCoubrey
• The Fabric & Yarn Dyer’s Handbook, Tracy Kendall
• Fabric Painting Made Easy, Nancy Ward
• Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
• Reader’s Digest Complete Guide to Needlework
• Small Woven Tapestries, Mary Rhodes
• Tie-Dye! The How-To Book, Virginia Gleser
• Weaving: A Handbook of the Fiber Arts, Shirley Held
• The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
• Knit a Square and Make a Toy by Norma Campbell, Woman's Weekly Craft Library, 1999
• Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
• The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
• Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
• Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
• Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
• Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
• Creative Sewing Ideas, (646.2 CRF) 1990
• The Evelyn Roth Recycling Book, Roth, Evelyn (746 ROT) 1975
• The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

- direct instruction
- indirect instruction
- interactive instruction
- independent instruction
- modeling
- practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Course Name: Environmental Sustainability 11

Course Code: YESU 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 5, 2007

Prerequisites: Science 10

Course Synopsis:

Environmental Sustainability 11 provides students with the opportunity to learn in an experiential way the concepts, skills, and attitudes needed to understand the practices and issues related to environmental sustainability, climate change, impact of humans on the natural environment and natural resources and conservation. Students will be invited to reflect on their personal and collective impact on the environment and thus will select and explore an environmental focus, create a plan, implement and evaluate the plan in the school and community to begin to take action to make a difference. As a result, the ultimate goal of Environmental Sustainability 11 is to support students to find viable ways to diminish their ecological footprint, become global citizens and make a difference by becoming more socially responsible. Students will learn to teach others so that it becomes part of everyone’s responsibility.

Learning Resources:

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 1, 2007

Prerequisites: Students can take the course in grade 10, 11 and/or 12

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way – self awareness, self esteem, self efficacy, leadership, time management, organization, communication, and implementation. Time will be divided up between the theoretical and practical with students acquiring and developing their basic knowledge of leadership; exploring ways to create effective “cultures of integrity”; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas. Students will be involved in the implementation, promotion and organization of events and projects within the school and community. They will also have the opportunity to learn more about themselves as leaders, strengths and stretches, and develop a leadership growth plan.

- [ ] 10
- [x] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 30, 2006

Prerequisites: The ability to understand abstract concepts and functional use of hands.

Course Synopsis:

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code. The student will be able to produce written output that contains Braille contractions and adheres to standard Braille formatting rules.

As a culmination students will reflect on their work and produce work done in a variety of writing styles for various purposes consistent with the Braille Authority of North America (BANA) regulations. They will write sentences, gain information from many sources.

For students who are visually impaired, this course has been developed in order that they develop Braille competencies in Braille reading and writing and to explore the richness complexity and flexibility in the use of the Braille code.

This course will allow students a tactile medium to access the prescribed curriculum.

Students will learn Braille to complete an educational program so that they can graduate from High School and pursue college, university or other interests. They will explore curriculum themes, develop projects and research topics of personal interest. Students can use Braille to access the many technological devices and they can explore the world wide web for global business transactions. With Braille this is possible. Proficiency in the use of the Braille code enables the student to succeed academically, socially and in a pursuit of a career.

Course Code: YOM 12

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: October 30, 2006

Prerequisites: 

Course Synopsis:

This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Three.

Learning Resources:

- Books

- Internet sites
  - Texas School for the Blind and Visually Impaired
  - Hadley School for the Blind
  - Dog Guide Schools

Additional Information:

This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Course Synopsis:

This course has been developed to support and encourage learners to understand how people learn and to gain insight into how they as individuals learn. This course has both an instructional and work experience component. Students will engage in activities that build their skill sets and help them plan for and achieve success as peer tutors. Course work will build students’ understanding of the skills and dispositions necessary to be an effective tutor. Students will also learn how organization, reading and teaching are complex activities that require analysis and constant monitoring. This course is organized into seven units: (1) How We Learn: Learning Styles and Modalities; (2) Helping Others Learn: Instructional Strategies; (3) Planning and Presenting: Lessons and Approaches; (4) Reading for Learning (5) Social Responsibility; and (6) Understanding the Needs of Exceptional Learners. Each of these units has a rigorous research base that supports the need for adolescents to first, develop an awareness, and second, a working knowledge of these domains and how to plan and monitor their success in each of these areas.

Course Synopsis:

The course is designed to enable the student to develop skills and techniques in a variety of textile arts and crafts and to apply the knowledge of the principles of art, colour and other design elements to their projects.

Textile Arts and Crafts will provide students with the opportunity to learn the techniques of embroidery, cross stitch, applique, quilting, knitting, crochet, knotting, use of sewing machines and paper flower construction. Students will use learned techniques to construct a variety of projects. These learned skills may be used and enjoyed throughout their lives.

Learning Resources:
Books:
• McCall's Book of Handcrafts, Nanina Comstock, Random House
• McCall's Needlework Treasury, Random House
• Exploring Textile Arts, Creative Publishing International
• An Introduction to Crewel Embroidery, Mave Glenny
• Two-Hour Applique, Leslie Allen
• Anchor Complete Embroidery Course, Christina Marsh
• The Batsford Book of Tapestry Weaving, Alec Pearson
• The Complete Guide to Needlecraft, Lucinda Ganderton
• Craft School, Hamlyn
• Embroidery, French Chic
• Crewel Embroidery, Erica Wilson
• Jann Johnson's Discovery Book of Crafts
• Dye Painting!, Ann Johnston
• Fabric & Fiber Art Works, Sharon McCoubrey
• The Fabric & Yarn Dyer's Handbook, Tracy Kendall
• Fabric Painting Made Easy, Nancy Ward
• Making Beautiful Hemp & Bead Jewelry, Mickey Baskett
• Reader's Digest Complete Guide to Needlework
• Small Woven Tapestries, Mary Rhodes
• Tie-Dye! The How-To Book, Virginia Gleser
• Weaving: A Handbook of the Fiber Arts, Shirley Held
• The New Macrame: Contemporary Knotted Jewelry & Accessories, Katie DuMont
• Knit a Square and Make a Toy by Norma Campbell, Woman's Weekly Craft Library, 1999
• Timeless Treasures, The New Berlin Co. Style #2962 (this is more of a 6 page fold out brochure - cross stitching fridge magnets)
• The Practical Encyclopedia of Sewing by Dorothy Wood, 2002, distributed by Select Publications (sewing, patchwork and embroidery)
• Handbook of Stitches, Grete Peterson and Elsie Svennas, 1977

Books in School Library
• Textile Techniques in Metal for Jewelers, Sculptors, and Textile Artists, Fisch, Arline M., (746 FIS) 1975
• Art and Design in Textiles, Ward, Michael, (677 WAR) 1973
• Creating Art from Fibers and Fabrics, Meilach, Dona Z., (746 MEI) 1974
• Creative Sewing Ideas, (646.2 CRF) 1990
• The Evelyn Roth Recycling Book, Roth, Evelyn (*746 ROT) 1975
• The Weaving, Spinning, and Dyeing Book, Brown, Rachel (746.1 BRO) 1978

Videos:
• Introduction to Weaving, Public Library 746.14 CHA

Students may also use internet access, classroom resource library, school and community libraries, DVDs, and work in partnership with a variety of small craft and textile related businesses in our community. There may also be guest speakers who will introduce related techniques and materials.
Additional Information:

Instructional Component:
During the course of the year, the students will complete a variety of projects.

After being given instruction on the tools and basic techniques, the students will complete projects in which they have applied artistic principles and elements to textile design and craft design. The course is different from art courses in that the emphasis is on the use of a variety of sewing tools and equipment. It is also different from the clothing and textiles courses where the emphasis is on clothing construction and garment fitting.

Individual learning needs will be met by allowing students the opportunity to choose their projects according to skill ability and level of interest. This course is accessible to special needs students who are given more basic skills/projects tailored to their ability level. ESL students enjoy the course, as successful completion is not dependent on English language proficiency.

Some of the methodologies of instructional delivery include:

• direct instruction
• indirect instruction
• interactive instruction
• independent instruction
• modeling
• practical creativity

Assessment Component:
The majority of the assessment is based on a practical evaluation of the students' projects. A criterion referenced assessment mode will be used for evaluation. Students will be a part of the evaluation process. In consultation with the teacher, students will be involved in the determination of a checklist of skills and marking criteria. Evaluation charts will include student and teacher evaluation. The main focus of evaluation will be on: completion, quality of work, level of difficulty, and class work habits. The use of "I" will be included in the reporting process, where any incomplete work must be completed to a satisfactory level by the following term.

Each project is graded according to the quality of technique used and a design component; 60% technique, 40% design. Practical marks are awarded for samples of techniques.

Grade Level of Course: 10, 11, 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15 - 16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Learning Resources:

• The Graduation Portfolio and Focus Areas Program Guide, Ministry of Education;
• CareerScope, Amundsen and Poehnell
• The Get Real Game, National Life/Work Centre
• Real Times/Real Life, National Life/Work Centre

11  [ ]

12  [ ]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Social Studies 11

Course Synopsis:

This course provides students with an opportunity to explore how gender influences the structuring of social, economic and political relationships. As well it examines current issues of concern to young women and men about to join the adult world. Through guest speakers, film, video, class discussion and readings, students will be encouraged to critically examine how men's and women's lives are shaped by their gender, and to thoughtfully reflect upon possibilities for their future lives. This course is open to both males and females in Grades 11 and 12.

Learning Resources:

A wide variety of resources are utilized including text and video. There is no global textbook but content is drawn from the resources below as well as popular media of press, internet, magazines, etc.

School Name: Britannia Community Secondary

Course Name: Honour Strings 11

Course Code: YHSTR 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4 each

Number of Hours of instruction: 120 each

Date Approved: April 13, 2005

Prerequisites: Students enter the course by audition. Appropriate instrumental experience (in previous Strings cour

Course Synopsis:

These courses are designed for highly motivated students. Students in Honour Strings 11 and Honour Strings 12 will work together as a chamber ensemble (“Honour Orchestra”) on more sophisticated repertoire (i.e. original music rather than arrangements). The ensemble is conducted and coached intensively by the instructor during class time, but performs in concert without a conductor. The ensemble offers many leadership opportunities, and qualified students rotate through the various leadership roles. Leadership roles in Honour Orchestra generally go to students enrolled in Honour Strings 12, while students enrolled in Honour Strings 11 generally play supportive team roles and are mentored by the leading senior students. The ensemble also provides opportunities for solo BAA Honour Strings 11, p. 2 roles (concertos) with chamber orchestra accompaniment. Students will also form smaller groups such as quartets and trios, to develop the skills and musicianship needed to work in an intensive team environment.

Learning Resources:

Analogous to the IRP for Instrumental Music Orchestral Strings 11 or 12, but with a focus on more demanding music that will motivate and reward the students at the appropriate higher level.
The mission of a Mini school such as Byng Arts is to provide carefully chosen students, who enter by audition in the case of Byng Arts, with intensified and enriched training in their field(s) of specialization.

The students in the Byng String Program fall into three categories: (1) students for whom Music—and Strings in particular—is their subject of principal focus and special devotion, and which is their reason for attending Byng Arts; (2) students attending Byng Arts Mini School for BAA Honour Strings 11, p. 4 whom Music is one of several components in their performing arts orientation; and (3) students in the regular Byng Secondary program with string instrument experience who also participate in the String Program. Each year, the String Program accepts, by audition, 15 highly qualified string instrument players into the Byng Arts Mini School. These students constitute the first of the three groups just described, and they choose Byng because they want to be involved in intensified and enriched courses all the way through to Grades 11 and 12. All the students in the String program need to receive Strings teaching that requires an appropriate level—and time commitment—commensurate with their longer-range goals. But the extent of enrichment in the String Program as a whole must reflect the needs of the first group—the students who come from all over Vancouver to attend Byng Arts because they wish to specialize in Strings and know that Byng is the only secondary school in the city with a program that can truly address their needs.

In an enriched program, each student's progress reflects the amount of time invested in developing and improving skills. Just as in all the performing arts, and in skating, gymnastics, and most other athletic endeavors, making progress towards real excellence requires not just excellent training, but a significant and continuous investment of time with a coach. (Individual practice is also essential, but regular coaching and guidance cannot be forfeited.) At Byng Arts, there are on average 30 String students in Grades 11 and 12 who come to Byng for exactly this sort of extra investment. It is essential, therefore, that these can have extra hours per week by working in Honour Orchestra (by enrolling in Honour Strings 11 or Honour Strings 12) as an extra course in addition to Senior Orchestra (which includes students enrolled in Instrumental Music Orchestral Strings 11 or Instrumental Music Orchestral Strings 12).

There are additional reasons why students should be allowed to take both these courses. Senior Orchestra is a larger ensemble, performing repertoire for string orchestra, while Honour Orchestra (comprising students in Honour Strings 11 and Honour Strings 12) constitutes a smaller strings Chamber Orchestra, with its own distinct repertoire. It is essential that the most advanced students, who will enroll in Honour Strings 11 or Honour Strings 12, also learn the larger repertoire in Senior Orchestra (by enrolling in Instrumental Music Orchestral Strings 11 or Instrumental Music Orchestral Strings 12), to gain vital experience playing in a large ensemble as well as in a chamber ensemble.

Category: Trades and Technology

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Prerequisites: Data Management 12, Business Information Management 12 or Marketing 12

Course Synopsis:

This course has been developed to enhance the skills students learn in a structured classroom setting. Students apply the skills learned in the classroom to actual practice by working one-on-one with business education teachers. Students must be responsible and mature and be able to take tasks from start to finish with little supervision. Independence and problem-solving and decision-making skills are encouraged and promoted as well as communication and interpersonal skills.

Learning Resources:

-Computer software
-Computer manuals and other reference tools
-Teachers
-Internet

Additional Information:

This course has been an integral part of the business education curriculum at David Thompson Secondary School for over thirty years. The emphasis of the course has grown and shifted with the change in technology. This course complements the skills learned in the structured class setting. It empowers students to take their problem-solving and critical thinking skills to a higher level. It encourages them to develop initiative and a professional work ethic.

School Name: David Thompson Secondary

Course Name: Business Communications 12

Course Code: YBUC 12

Category: Business and Applied Business

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Recommended: Computer Keyboarding and Communications 9/10/11/12

**Course Synopsis:**

This course is designed to go hand in hand with Career Preparation Work Experience, community volunteering, part-time job search, and employment. It begins with self-analysis using the tools of interest, aptitude, skills, and values; tests, checklists, and questionnaires. It moves on to securing a job by looking at job search, resumes, and interviews. It next makes the assumption the student or graduate secures a job and considers techniques to properly perform the job, make sure the employee keeps the job, and lastly considers acceptable routes for advancing on the job. Along the way, special problems of interpersonal relations, anger management, and problem solving are explored and solutions found. Throughout the course students are introduced to and gain practice in various electronic media, specialized business documents, public speaking, telephone techniques, business meetings, international travel, cultural differences, and deportment.

**Learning Resources:**

- Computer hardware
- Computer software
- Computer manuals and other reference tools
- Printers
- Teachers
- Internet
- Video and Digital Cameras
- TV’s and VCR’s
- Web Cams and Headsets with Microphones
- Speakers’ Lecterns
- Fax machines

**Additional Information:**

This course was originally designed as a co-requisite for students taking Career Preparation Work Experience. It prepared them for their two or three weeks spent out at employers. Over the years, many students not taking Work Experience have signed up for the course. A former student came back to report that this course was one of the best she had taken in preparing her for Business courses in college. Others who have gone directly into the working world had come back to tell how valuable the course has been to them in the practical world of business.

Course Code: YBIM 11

Category: Business and Applied Business

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: May 3, 2004

Prerequisites: Computer Fundamentals 9/11 or basic computer knowledge + a min. keyboarding speed of 20 WPM

Course Synopsis:

This course has been developed to enhance students' proficiency in keyboarding skills and speed to meet employment standards. The course strives to give students a high level of skill in word processing by teaching students skills in composing, formatting, editing, proofreading, and printing a variety of business documents; students also utilize desktop publishing software for various projects; and students evaluate and use standard records management procedures to establish and maintain filing systems. Students are encouraged to focus on the integration of the skills, technology, and business attitudes required in a modern business environment. In addition, students are strongly encouraged to be independent, and to develop their communication, problem-solving, decision-making and interpersonal skills.

Learning Resources:

- Computer software
- Computer manuals and other reference tools
- Teachers
- Internet

Additional Information:

This course has been developed to bring students’ skills closer to employment standards. Students require additional instruction time, skills development, and composition practice to meet these business standards which include empowering students to take their problem-solving and critical thinking skills to a higher level. It also encourages them to develop initiative as well as a professional work ethic.

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

**Course Synopsis:**

This course has been developed to help students meet the economic and financial challenges of adulthood and assist them in their transition to either a post-secondary or work environment. It presents information that will be relevant throughout their lifetimes in the areas of investment and savings, career management, career search strategies and self-assessment. Students have the opportunity to upgrade and enhance their knowledge of multimedia and presentation formats that will be useful in achieving their personal and career goals. A mentorship component, which is integrated throughout the course, helps students focus on the road ahead and provides support and advice about career and course selections.

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

**Course Synopsis:**

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

School Name: David Thompson Secondary

Course Name: Children’s Literature and Creative Writing 11

Course Code: YCLCW 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  
10  
11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

Children’s Lit and Creative Writing will be an enjoyable, interesting, language based elective course open to students with a range of abilities. We will examine the elements of children’s literature and creative writing with the ultimate goal of students creating their own literature. Much of the assigned reading will be traditional Western stories such as Grimm’s fairy tales and Aesop’s Fables. Students will be encouraged to share literature from other cultures. Students will examine techniques that authors use such as setting, theme, point of view and figurative language and apply them to their own writing. All genres will be explored.

Learning Resources:

Possible titles of novels include:

- Winnie the Pooh
- Charlotte’s Web
- Alice’s Adventures in Wonderland
- Through the Looking Glass
- A Wrinkle in Time
- The Princess and the Goblin
- Tlulku
- The Princess Bride
- Wizard of Earthsea
- Seaward
- The Twits
- The Witches
- James and the Giant Peach
- Velveteen Rabbit

Possible titles of children’s poetry include:

- Where the Sidewalk Ends
- The Sneetches and other Stories

Possible titles of videos include:

- Aladdin
- The Wizard of Oz
- Shrek
- Finding Nemo
Additional Information:

Students who successfully complete this course will satisfy the requirements of “Arts and Design” component of the Graduation Portfolio. An additional goal is to inspire the students to study creative writing further by enrolling in Writing 12.

Course Name: Engineering 12A

Course Code: YENG 12A

Category: Trades and Technology

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

A hands-on, material based course intended to follow up on other courses and provide an advanced introduction to concepts in a wide range of engineering disciplines. The course has a strong emphasis on design and construction. Students are expected to produce projects relevant to the learning outcomes.

Learning Resources:

While there are few learning resources specifically designed for a course of this nature, certain curriculum organizers can be related to the learning resources used in other classes.

- Drafting texts as approved by the ministry for Drafting 11/12

- Safety worksheets appropriate for use in the shop where the course is being taught. Examples include WCB Worksafe material.

- ASTM Materials Handbook

- Programming and Interfacing the PIC Microcontroller, Myke Predko

April 13, 2005

Prerequisites:  

Engineering 12A

Course Synopsis:

This is a project-oriented course designed to give future engineering students an opportunity to explore an area of engineering of interest to them in greater detail. It will emphasize teamwork, planning, and the design process. It will build upon the instructional content in Engineering 11 and 12A, but will allow the student to explore that material in more depth and application.

Learning Resources:

While there are few learning resources specifically designed for a course of this nature, certain curriculum organizers can be related to the learning resources used in other classes.

-Drafting texts as approved by the ministry for Drafting 11/12

-Safety worksheets appropriate for use in the shop where the course is being taught. Examples include WCB Worksafe material.

-ASTM Materials Handbook

-Programming and Interfacing the PIC Microcontroller, Myke Predko
Ideally the class should be kept small to accommodate the tutorial aspect of the course. It would be best if the teacher had the ability to use the students’ course work and texts to model the strategies and ensure success.

Course Synopsis:

This self-directed applied skills course is designed to allow students to advance their computer skills and knowledge from their current level of understanding. Organizational skills will be developed while students explore and use various hardware, software and digital equipment available throughout the program. Projects will allow students to gather, process and organize information in a logical and/or creative manner. Graphics will be manipulated and edited by using and comparing several programs. Communication skills will be developed from a wide variety of assignments set to benefit each individual’s computer awareness and interests. Group and individual projects will enable students to present creative professional looking documents and demonstrate their ability to communicate effectively to a set audience. Multimedia programs and equipment will assist students who wish to complete portfolio requirements for graduation. Successful completion of this 4-credit course meets the "Information and Technology" component of the Graduation Portfolio.

Course Name: Journalism 12

Course Code: YJOU 12

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

Journalism 12 is a yearlong newspaper reporting course available to students in grades 11 and 12. Students are responsible for producing stories and photographs for the school newspaper. Students will learn the major newspaper story forms including news, sports, features, editorial and opinion. They will compose news and feature photos, and conduct public opinion polls. Students will strive to produce a newspaper meeting professional standards and following Canadian Press style. They will prepare questions, conduct interviews, carry out online and other forms of background research and be responsible for one or more beats (regular coverage areas) in the school. Students will also study the techniques used to present news and in so doing, become informed consumers of media.

Learning Resources:

?Visit to commercial press plant, TV and/or radio station
?Guest speakers from local media (reporters, photographers and editors)
?Articles from various sources on news writing, ethics, design, and business aspects
?Journalistic codes of conduct, such as those of the CBC and the Society of Professional Journalists
?Websites on a range of journalism topics including writing and ethics, design and careers.

Books:

Videos:
-Wag the Dog
-Fahrenheit 9/11
-The Corporation
-Super Size Me
-Broadcast News
-The Insider

Additional Information:

The course lends itself to cross-curricular involvement with Photography, Data Management, and Web Page Design courses. The more students that are involved with the production of the newspaper, the more representative the newspaper. Ideally, the newspaper would be published and distributed to the student population and community. In order to do so, adequate funding is required. Possible sources include: student fees, and fund-raising.

Course Name: Peer Mediation 12

Course Code: YPED 12

Category: Choose a Category

Grade Level of Course:  

10  [ ]  11  [ ]  12  [X]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  January 17, 2007

Prerequisites:  Peer Mediation 11

Course Synopsis:

Peer Mediation 12 is designed to be the most advanced course offered in the DTSS Conflict Resolution Program. Topics discussed in Planning 10 and the introductory Peer Mediation 11 course are extended and further integrated into the students’ repertoire. An added component to this course is the study of selected topics in mediation; namely, dealing with intense emotions; shifting from positions to interests; mediating with groups; advanced skill development; and legal and ethical considerations to name a few. Students will also study the emerging literature in mediation.

Peer Mediation 12 is an off-timetable course. The students who successfully proceed through the intake process will be allocated a class time through the 8-block rotation. This will allow the students to be available for mediation referrals, which can be requested by any student or staff, and will be assigned by the subject teacher after consultation with the appropriate grade counselor. Having the students available through the entire 8-block rotation is also important because it allows more flexibility for student-led programming in other classes in the school.

All students will be expected to attend a four-day intensive training session in late August or early September and weekly classes throughout the year held before or after school. These classes will be augmented by two training modules which will direct the students in their fulfillment of the practicum component of the course. The first will be a series of three one-day workshops. These will be held each term dealing with facilitating leadership skills, respect and social responsibility at our school. This training will enable students to conduct lessons, on the same topics, with junior classes. The second will be participation in outreach programming to our feeder schools with the DT Community Schools Team, which will be conducted during the students’ assigned block times. Lastly, and most importantly, students will be expected to mediate disputes between students in our school community.
**Learning Resources:**

**Additional Information:**

This course requires that students be able to attend a day camp of four days and attend some classes at times outside regular school hours.

This course requires a teacher with some background training in Restorative Justice or Mediation. The course also requires that the subject teacher works with Trinity Theater, or have prior experience in the Trinity Theater training program.

School Name: David Thompson Secondary

Course Name: Peer Tutoring 12

Course Code: YPTU 12

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 127

Date Approved: April 13, 2005

Prerequisites: Grade 11 or 12 only

Course Synopsis:

Peer Tutoring 12 is a practical hands-on course where grades 11 and 12 students develop knowledge and skills related to peer tutoring. Students receive instruction through a series of noon-hour workshops as well as through a year long placement in a peer tutoring situation.

Areas of focus of this course include:
- Role and responsibilities of a peer tutor
- Communication skills, and interpersonal skills
- Learning disabilities/difficulties and learning styles
- Strategies and skill development (goal setting and organizational skills, learning strategies and study skills, test-preparation and test-taking skills)
- Tutoring techniques for one-to-one and group learning

Learning Resources:

Tutor’s own textbooks (for strategies/skills exercises)
Tutor’s David Thompson Agenda
Learning Styles Inventory
A wide variety of strategies/skills
Material from Learning Disabilities Association
Videotapes

Additional Information:

This course has been successfully offered as a Locally Developed Course at David Thompson (SD#39) for eight years.

Course Name: Plumbing 12A

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course: [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application.

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

#Instructor designed material

#OHS regulations & WCB publications

#Qualified WHMIS instructor

#Qualified First Aid instructor

#Trades Common Core, Line H, Lift Loads, Queen=s Printer

#Trades Common Core, Line A, Use Safe Work Practices, Queen=s Printer

#Trades Common Core, Line I, Erect Ladders and Scaffolds, Queen=s Printer

#TRAC Piping Occupational Core, Line F, Use Specialized Power Tools, Queen=s Printer

#Province of British Columbia Ministry of Post Secondary Education, Queen=s Printer, 1986

#Current B.C. Plumbing Code, BC Building and Standards Branch, Queen=s Printer

#Videos: Ergonomics in the Workplace, The Hearing Video, Portable Fire Extinguishers, The Safety Monitor System, A Bright Arc, Fall Protection, Chemical Hazards, Confined Spaces Deadly Spaces

Category: Trades and Technology

Grade Level of Course:  
- [x] 10
- [ ] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: None

**Course Synopsis:**

This four-credit course is designed to leverage a young person's natural interest in robotics and flight to achieve a number of important learning outcomes. Following an introduction to the basics of technical drawing, students will design and build projects in a constructively competitive environment to supplement theoretical work on the physics of robot and aircraft mechanisms and components. Students will frame their projects in a holistic context by researching the history of flight and future potential of robotics, and reporting on their findings. The use of open ended, “hands-on” challenges in a technology studies shop environment will provide students with useful hand and machine tool skills, while helping to develop a responsible, safety-conscious attitude that will prepare students for a wide range of future studies in technology-related areas.

**Learning Resources:**

Course Name: Sociology 11A

Course Code: YSOC 11A

Category: Health and Human Services

Grade Level of Course: ☒ 10  ☒ 11  ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Social Studies 10

Course Synopsis:

Sociology 11A enables students to examine and explain how society operates and changes by exploring values, beliefs and institutions of contemporary North American Culture. Sociology 11A is designed to develop within the student a better understanding of group behaviour. The sociological perspective focuses on “what is” rather than “what ought to be.” Students should be able to analyze occurrences around them objectively. Students should also understand the influence of society on their lives as they explore their own value systems and visualize their roles in societal change.

Grade Level of Course: ☑️ 10 ☒ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been created to develop students’ web page design skills. Students will build their web design toolboxes by learning about the different software used in the creation of web sites. Emphasis will be placed on using industry standard software and the latest technology. Learning outcomes are grouped around: Social Issues, Creation, and Analysis. Students will learn design theory, evaluate other web site design, develop a project proposal, develop necessary web page design skills, create and edit their project and reflect on the design process. They will also explore the social implications of copyright infringement, file sharing and plagiarism. It is intended that students will have created a web site, that is well designed and on the Internet by the conclusion of the course.

Grade Level of Course: ☒ 10 ☐ 11 ☐ 12

Number of Course Credits: 2 or 4

Number of Hours of instruction: 60 or 120

Date Approved: May 3, 2004

Prerequisites: None, but Home Economics 8 is strongly suggested

Course Synopsis:

This is a demonstration and hands-on course covering baked products from cookies and cakes to breads and pastries. In this course, students will learn to produce a variety of advanced baked products and the principles involved in each aspect of baking. They will learn to use a variety of baking equipment properly and safely as well as managing time and resources. Students will be engaged in designing ways to improve baked goods nutritionally and/or in flavour, eye appeal and mouth feel. Cultural variations of techniques and products will be studied and compared. Students will work in a team setting and learn to read and follow instructions. They will be introduced to basic skills necessary in pursuing a career in the baking and food industry.

Learning Resources:

The use of current textbooks (as recommended by the Ministry) such as Management and Foods, Food for Life and Guide to Modern Meals can be used by students along with support material developed by the teacher. Instructional videos that are appropriate will be used.

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Course Name: Digital Scrapbooking 10

Course Code: YDGSB 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

Students who have boxes of unorganized photographs and/or possess a multitude of digital images will learn how to process and present these images in attractive, meaningful ways. Students start by retrieving digital photographs and by scanning traditional prints. Then they will learn Adobe Photoshop techniques that are especially relevant to digital photographers. After manipulating images for high-quality output, students will organize the photos into themes (eg. birthdays, holidays, friends, and so on). Finally, after exploring the principles of page design, students will use Adobe InDesign, to create appealing page layouts.

Before leaving the course, students will print a portion (or all) of their Ascrapbooks@ in colour. They will also make electronic versions of it (pdf=s); and, as an option, they will get the chance to make a DVD with the scrapbook as the subject matter. Finally, they will present their creations to the class.

Learning Resources:

- Computer Lab
- Photo editing and page layout software
- Scrapbooking periodicals

Grade Level of Course:  

10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Digital Video Production Intermediate 11

Course Synopsis:

This course has been developed to afford students a greater understanding of the global impact Television has upon them, their society, culture and environment. Through critical evaluation (media literacy) and informed application (media creation) students will not only recognize the many ways television reflects, creates and manipulates reality, they will have a chance to reflect, create and manipulate their own lives by using the tools associated with television (media technology).

Furthermore, students will have the opportunity to incorporate their media skills into other areas of study by producing projects that will give them credit in other courses. The work students produce at this level will demonstrate skills in editing and camera work that will allow them to pursue post secondary education and/or employment in areas of study/work related to new media/digital video.

Learning outcomes for this course are grouped under the curriculum organizers: Media Literacy, Media Production, and Media Technology, and students are given the opportunity for self and peer evaluation of both the Television they watch and the Television they produce.

Course Name: Fibre Arts 10

Course Code: YFIA 10

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 2 or 4

Number of Hours of instruction: 60 or 120

Date Approved: May 3, 2004

Prerequisites: None, but Home Economics 8 is strongly suggested.

Course Synopsis:

This course has been developed to support and encourage students to explore the global diversity of fibre arts as an art form and as a craft, and to encourage students to develop their creativity and skills set. Career option and/or an income supplement for those who excel in this area will be discussed. Fibre Arts is a multi-faceted form of artistic expression that may include some or all of the following techniques appliquéing, beading, embroidering (hand/machine), crocheting, felting, knitting, macramé, quilting, sewing, weaving, and any other form that uses natural or synthetic fibres as its basic material. The elements and principles of design will be taught along with fibre art techniques. Cultural variations of each fibre art technique will be studied and compared.

Learning Resources:

Student will use materials that are produced by the teachers and classroom resource books.

Teacher references would include the following titles but not exclusively from this list:

• Bonsils, Sandy (1999). Quilting your memories: Inspirations for designing with image transfers. Bothwell, WA: That Patchwork Place Inc.

Course Name: Learning Strategies 11

Course Code: YLS 11

Category: Liberal Arts and Humanities

Grade Level of Course: ☑️ 11 ☐ 10 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Resource Team recommendation

Course Synopsis:

This course fills one block of an 8 block timetable and proceeds through the whole year, meeting for 80 minute periods five times over two weeks.

Students are given instruction in a variety of learning strategies which are then applied to their course work in other subjects. The course requires students to develop and demonstrate metacognitive awareness through an analysis of their dominant learning modality, through personal goal setting, through practice activities and tests as well as through keeping a daily journal in which they reflect on their learning strengths or weaknesses that were relevant in their day=s work. Each block, they report on their day=s work with their own assessments of how they applied the appropriate learning strategies.

The Learning Strategies course is an adjunct course to other courses that the students are enrolled in and the Learning Strategies teacher works collaboratively with other subject teachers to support learning for the specific student in a specific course.

School Name: Eric Hamber Secondary

Course Name: Multi-Media 11

Course Code: YMM 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites:

- Teacher written skills assignments
- Mentorship web design examples
- Animation examples
- Color theory
- Drawing
- Books

- Extreme Fonts, Spencer Drate and Jutka Salavetz, Madison Square Press, 1999
- Film Posters of the 60s, Tony Nourmand, The Overlook Press, 1998
- The Album Cover Art of Sound Tracks, Frank Jastfelser and Stephen Kassel, 1997
- Extreme Design, Spencer Drate and Jutka Salavetz, Madison Square Press, 2001

Course Synopsis:

Multimedia 11 has been developed to teach the basics of Macromedia Flash MX, broaden an understanding of graphic design by studying form, space, color and typography and learn to combine media (web, video, photography, and sound) to create a final portfolio project. The students will learn how to use the Timeline, Stage, Grids, Rulers, Guides, Work Area, Tools, Panels and Libraries of Macromedia Flash MX. They will then utilize these skills to develop their own animation or web site in a design style of their making. The class will learn to discuss design as a persuasive language in our culture interconnected with film, music, fashion, television, and advertising. The student will be asked to assess their own work and the work of their peers encouraging a sharing of ideas and promoting an environment where the individual receives feedback throughout their creative process. This feedback system is meant to mimic real world situations in the design field. Mentors will be brought into the classroom to describe their jobs. The mentors will provide feedback to the students on their projects. This dialogue between student, teacher, peer and professional will promote skill development and establish clear design communication to a larger community outside the classroom. The final outcome of the course will be that students are computer literate and are equipped to use similar programs on the Mac and PC platforms. In addition the students will have created a portfolio piece, which will provide detail to a resume in order to continue their studies.

Learning Resources:

- Teacher written skills assignments
- Mentorship web design examples
- Design examples
- Animation examples
- Color theory
- Drawing
- Books

Course Synopsis:

Multimedia 12 has been developed to teach the basics of Maya 3D animation software to improve the students understanding of the art behind animation as well as the technology. This course covers an introduction to the Maya Interface, 3D models using primitives, surfaces, curves (including nurbs and splines), shaders and textures, and animation using keyframes and motion paths. Students will also learn surface deformations, introductions to forward and inverse kinematics, camera and lighting and rendering techniques. The class will learn to discuss animation design as a persuasive sub-culture in our society linked with film, music, fashion, television and advertising. The students will be asked to assess their own work and the work of their peers encouraging a sharing of ideas and promoting an environment where the individual receives feedback throughout their creative process. The feedback system is designed to mimic real world situations in the animation field. Mentors will be brought into the classroom to describe their jobs. The mentors will provide feedback to the students on their projects. The final outcome of the course will be that students are computer literate and equipped to utilize similar programs on Macintosh systems. The students will also have created a personal portfolio piece that they can use to pursue a career or continue education in the animation field.

Learning Resources:

- Teacher written skills assignment
- Maya educational package and tutorials
- Animation examples on film, video and television
- 3D Drawing styles
- Mentorship animation examples and feedback

Course Name: Novice Chef on the Run 11

Course Code: YNCOR 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  [X] 11

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None, but Home Economics 8 is strongly suggested.

Course Synopsis:

This course has been developed to support and encourage senior students who have little or no food preparation experience and will be living on their own in the near future. The focus will be on the delivery of nutritious and appetizing meals that can be quickly prepared. Students will learn about choosing healthy foods and planning nutritious meals. They will master basic skills such as safe kitchen and food handling practices; use of basic food equipment, and proper measurement techniques. Students will learn about what to look for when buying foods and do several consumer comparisons on different food products. This course is based on mastering fundamental food preparation techniques and the understanding of the theory that underlies the preparation of healthy, appealing and efficient meals. Students will work in a team setting and learn to read and follow instructions as they progress through the units of breakfast, lunch, supper and one dish and vegetarian meals.

Learning Resources:

The use of current textbooks (as recommended by the Ministry) such as Management and Foods, Foods for Life and Guide to Modern Meals can be used by students along with support material developed by the teacher. Videos that are appropriate will be used.

Teacher references would include the following titles but not exclusively from this list:

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to help students emotionally, academically and socially. The premise is that peers can provide good role modeling and support for any student in need. Basic counselling skills are taught and practiced. The peer counsellors use these skills to help others and also retain them for use throughout their lives.

Learning Resources:

* Series of handouts developed by instructors
  * Peer Power Book 2, Applying Peer Helper Skills by Judith A. Tindall
  * Exercises n Helping Skills by Gerard Egan

Additional Information:

Staff should be informed as to the role of the Peer Counsellor. To enhance communications between the student body and Peer Counsellor, it is recommended that letterboxes be constructed for each Peer Counsellor. In addition, we feel strongly that the new Peer Counsellors be taken on a retreat (2 nights).

Course Name: Plumbing 12A

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application.

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

#Instructor designed material

#OHS regulations & WCB publications

#Qualified WHMIS instructor

#Qualified First Aid instructor

#Trades Common Core, Line H, Lift Loads, Queen=s Printer

#Trades Common Core, Line A, Use Safe Work Practices, Queen=s Printer

Number of Hours of instruction: 120
Date Approved: January 17, 2007
Prerequisites: None

Course Synopsis:

Communication is part of our daily life. A tremendous part of each day is spent reading, writing and viewing what is going on around us. Everyday events and running of a school could be lost, year-by-year, if not recorded in a school annual. In order to convey the school year as a desirable commodity, it must be presented in an attractive, concise and factual manner.

This course has been developed to support and encourage students to explore the richness and diversity of events in their school environment. Students learn to plan, market, and execute the means to produce a saleable print media product about this environment and its events. Students learn to use a digital camera and the photographic Skills required to record these events. They learn to create page layouts to present the event in an attractive manner. The learning outcomes of this course are grouped using the curriculum organizers: Social and Cultural Issues, Creation, Analysis, Technology and Marketing.

Students are given the opportunity for self, peer and advisor assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of collecting, interpreting and presenting print medium products to their peers.

**Course Synopsis:**

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

- experience the roles and responsibilities of employment
- appreciate the time constraints imposed in terms of attendance at both school and work
- relate classroom skills and knowledge to an employment context
- develop interpersonal skills, career awareness and maturity
- become aware of the changing nature and demands of the workplace
- experience the potential career opportunities available in industry
- increase employment prospects

The materials include age appropriate scenarios and activities to help students develop a strong safety attitude. Download: http://youngworker.healthandsafetycentre.org/s/Resources-Educators.asp

Employment Standards  
http://www.bced.gov.bc.ca/irp/capp/workex.htm
Through this opportunity it is expected that students will:

$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Course Synopsis:

This course builds on the knowledge base and skills developed in Cafeteria 11 and 12. Students will continue to work with a variety of food products and engage in special projects such as catering, special events and non-production specialty items. Students will also be introduced to aesthetics, presentation and marketing of food products. In addition, students will continue to build practical and fine motor skills understanding ergonomics of the kitchen and efficient use of movement in the workplace.

**Course Synopsis:**

This course introduces students to digitizing media for electronic presentation. Students will explore how to combine text and images to create interactive and multimedia documents. Students will use a variety of software programs to create presentations, web pages, animated sequences, and electronic greeting cards. Students will learn 2-D animation and HyperText Mark-up Language to create multi-media documents and presentations that integrate sound and video.

Learning outcomes for the course are grouped under the curriculum organizers: Fundamentals and Implementation. Students are given an opportunity for self and peer assessment in each of the seven units. This course supports incremental skill development. It encourages students to demonstrate their creativity and helps them to develop logical reasoning skills.

**Learning Resources:**

- Books
  - Foundation Flash MX, Kristian Besley, Sham Bhangal, and Amanda Farr, Friends of Ed, April 2002.

Course Name: Fashion Design 11

Course Code: YFASD 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course is an introduction to the art and technology of fashion design using traditional and digital techniques. Students will be encouraged to create a unique fashion design portfolio.

Training will include illustration skills, presentation skills, as well as technical skills used in fashion design. Students will be introduced to the production of textiles (fibres, fabric construction, uses of fabrics, new technologies in fabric construction such as microfibers, nano-technology used in producing wrinkle free fabrics, etc.)

Learning Resources:

Students will use materials that are produced by the teacher, internet resources, fashion magazines, and other popular media.

Corbman, Textiles- Fibre to Fabric, ISBN 0-07-082950-0

Hollen, Norma Pattern Making by the Flat-Pattern Method Carolyn J. Kundel, Prentice Hall, 1999

Tate, Sharon Lee, Inside Fashion Design Addison Wesley Longman, 1999
This course has been offered in the Vancouver School District for many years. Schools' facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. Students will gain skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Learning Resources:

Students will use materials that are produced by the teacher and classroom resource books, as well as sources from popular media, the internet and/or library

Resource Books

Additional Information:

This course has been offered in the Vancouver School District for many years. Schools' facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

Course Name: Fashion Design 12B

Course Code: YFASD 12B

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Presently, there are no prerequisite courses for entry to grades 11 and 12 fashion design courses.

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts, while encouraging students to explore the global diversity of design. Students will gain advanced skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Course Name: Junior Theatre Company 10

Course Code: YJTC 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☒ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Audition Required

Course Synopsis:

This course has been developed to offer junior students an opportunity to learn a variety of theatre techniques, styles and practices through membership in an acting company. The course is based on an ensemble company model that allows students to explore their own creative abilities within the framework of the rehearsal and production process. Students learn to select, cast and produce plays for public performance. As well, they gain experience in publicity, promotion and sales; acting and directing techniques; and developing lighting, costume, sound and set designs. The course culminates in a series of public performances both within the school and community at large.

Learning Resources:

- a wide cross section of theatrical scripts
- theatre production and management resources
- Videos on the art and history of theatre
- A catalogue of CDs, and websites of sound effects and music resources
- Software for the production of promotional materials, rehearsal schedules

Course Name: Yoga For Life 12

Course Code: YYL 12

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 17, 2007

Prerequisites: P. E. 10

Course Synopsis:

This course has been developed to introduce high school students to the principles of Yoga. Yoga not only focuses on the physical postures to improve the body, it deals with all aspects of our being and our lives. Students will work to develop and achieve the harmony of the mind, the body and the spirit which leads to an overall well being. Students will experience Hatha, Power/Ashtanga, and Kundalini styles of Yoga in a safe, peaceful setting with inspirational music. Physical benefits of Yoga include improved muscle tone, strength, flexibility, balance, weight control, detoxification of muscles and organs, reduced tension, deep relaxation, and an improved energy level. Mental benefits include improved concentration, self awareness, self acceptance, compassion, as well as the development of will-power and stress management. Proper body alignment, pranayama (breathing), and meditation will be a key focus of the course. Lessons will also be given on proper nutrition, body physiology, and goal setting. Participants will develop an understanding of the importance of lifetime fitness and well being in a non competitive environment.

Learning Resources:

Books:
• Semperviva Teacher Training Manual - 2006
• Kundalini Yoga Exercise and Meditation Manual - 1999
• The Way of Energy – Peter Ralston
• Hatha Yoga The Hidden Language – Shakti Parwah Kaur Khalsa
• Survival Kit Meditations and Exercises for Stress and Pressure of the Times – by Yogi Bhajan
• The Spirit and Practice of Moving Into Stillness – Erich Schmiffman
• Yoga Mind Body and Spirit – Donna Farhi
• Human Physiology The Mechanisms of Body Function
• Diet and Nutrition The American Medical Association
• The Anatomy Coloring Book – Wynn Kapit / Lawrence Elson
• Ashtanga Yoga introductory poses - DVD

Music:
• Shamanic Dream I and II
• Game of Chantz
• Crimson Collection Series Volumes 4, 5, 6, 7
• Grace by Snatam Kaur
• Krishna Das – Breath of the Heart
• Krishna Das – Light on Life
• Krishna Das – Pilgrim Heart
• Bhagavan Das Now etc.

Grade Level of Course: 10, 11, 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal
classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Course Synopsis:

This course is open to students in grade 10 and aims to provide students with the knowledge and skills that are important in practising responsible citizenship by introducing to students various opportunities to critically analyse and reflect upon personalities, events and issues related to the concept of leadership as well as several hands-on applications of what they will learn. Students are encouraged to examine, understand and exercise their roles, rights and responsibilities within the class, family, school, and community; to gain an appreciation of the different forms of leadership; to develop their own insights and expand their perceptions; to develop and foster a variety of leadership skills; to demonstrate respect for principles of equality and diversity; and to think critically when evaluating information and practise effective communication skills. Students will examine and develop skills related to both personal and group leadership.

This course reflects the belief that students not only should be but want to be meaningfully involved in their school and their community. It follows the understanding that students are capable of taking on roles of responsibility and can affect great change, especially when given the time and guidance to do so.

The overall goal is that by learning more about leadership, students will achieve greater success with regards to making a positive personal impact as well as a greater social impact, on the school and community as a whole.

Learning Resources:

• Seven Habits of Highly Effective Teens by Sean Covey
• Take Action - a Guide to Active Citizenship by Marc & Craig Kielburger
• Contemporary News/Magazine Articles
• Movies depicting issues of leadership and relevant issues, including “Awakenings”, “The Hurricane,” “Bend It Like Beckham,” “Stand & Deliver,” “Schindler’s List,” “Bowling for Columbine”

Additional Information:

Instruction time extends beyond class time to include project time outside of classroom hours.

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course:  
- [ ] 10  
- [ ] 11  
- [x] 12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application.

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites:

Course Synopsis:

This course has been developed to provide students with the opportunity to understand how urban homes are repaired or renovated and to practice their understanding in a practical environment. Students will be encouraged to assess and develop their individual strengths while practicing some basic home repair and improvement techniques.

The major project for the grade 12 courses will be the design and implementation of a small renovation process. Designing and completing the renovation will allow students to practice many of the processes required when performing simple renovations in high humidity environments.

Learning Resources:

- Students will be encouraged to purchase books that they can keep and refer to in the future. Both Taunton’s and Black and Decker provide concise and relevant material for the home.
- Building professionals will be consulted during field trips to local building supply outlets.
- On-Line resources will be explored. Critical assessment of information will be an integral component of the On-line research.

School Name: Killarney Secondary

Course Name: Art History 11

Course Code: YARTH 11

Category: Other

Grade Level of Course:  

10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 13, 2005

Prerequisites:  None

Course Synopsis:

The aspiration of Art History is to examine the personal, social, and historical functions of visual art (architecture, painting, photography, and sculpture). Indeed, this course will encompass a wide range of time periods from ancient art to contemporary movements. Students will draw from local events, such as guided walking tours of the city to examine architecture, as well as visits to galleries, museums, and art shows.

The course will begin by exploring definitions of art in various cultures, covering non-European cultures, such as Asian, African, and South American influences. Eventually we will cover the Renaissance to the present day. Students will have the opportunity to analyze works of art, reflect on the role art performs in various cultures, and assess the relevance of art today. Analyzing and interpreting visual images, presenting critiques, and creating research based projects involving graphic representations and writing, all offer students the opportunity to gain insight and perspective regarding the visual world that surrounds them.

Learning Resources:

- Textbook (if possible)
- Various readings and articles
- CD roms databanks of images
- Books (Da Vinci Code, art books)
- Video clips of films based on art and artists
- Models and examples (camera obscura, clay, architectural models, postcards and posters of images)
- Power-point projector to show slide shows.

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Grade Level of Course:  
☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course is broken up into 2 sections: CCNA 1 and CCNA 2. Upon completion of CCNA1 students have an understanding of networking basics including:

- Basics of Ethernet technologies
- TCI/IP
- Network media
- IP addressing
- Routing

Upon completion of CCNA2 students have an understanding of routers and routing including:

- Basics of configuring routers
- Routing protocols
- TCP/IP concepts
- Access lists
- Networking troubleshooting skills

Learning Resources:

- Online Curriculum
- Packet Tracer
- Class notes
- Handouts
- Computers to practice the concepts learned
The Course Content varies with specific reference to Event Organization and Management as determined by the teacher’s submission of project proposals and student’s submission of group projects. The nature and scope of projects will determine the event planning and organization and the required time allotment. (For example, “Spirit of Giving” campaign also involved building a float for the Santa Claus Parade with proposal and completion deadlines.)

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: Leadership 11

**Course Synopsis:**

The Leadership 12 Course is designed to allow students to be engaged in a variety of leadership pursuits and experiences as they play a more prominent role as leaders involved in leading various groups, events and activities. Through the study, practice and acquisition of skills learned in Leadership 11, students will further develop their personal portfolios and continue with providing service and leadership to the school and community. The course will provide opportunities for all students to develop the knowledge, skills and attitudes towards effective leadership. Students will become better socially responsible citizens of the school and community through meaningful dialogue and interaction with students, staff and parents thus enhancing a positive school and community environment.

**Learning Resources:**

- CIRA Manual (Canadian Intramural Recreation Association Manual)
- Articles and Information about project proposals and group fundraising ideas on the Internet
- Community organizations for student volunteer services (City of Vancouver: “Truck Rodeo”, Vancouver Marathon Water Station, Nikkei Centre, Killarney Community Centre etc.)
- Conflict Resolution Skills Information and field trip to Justice Institute
- Books

**Additional Information:**

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 13, 2005

Prerequisites: Presently, there are no prerequisite courses for entry to grades 11 and 12 fashion design courses.

Course Synopsis:
This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. Students will gain skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Learning Resources:
Students will use materials that are produced by the teacher and classroom resource books, as well as sources from popular media, the internet and/or library

Resource Books

Additional Information:
This course has been offered in the Vancouver School District for many years. Schools’ facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

Prerequisites: Science 10

Course Synopsis:

Given the increased exposure the field of forensic has received in recent years, the goal of this course is to give students and opportunity to experience forensics before post secondary education. Forensic science is the study and use of basic scientific concepts and technologies related to solving crime and society.

Learning Resources:

Additional Information:

In order to fully appreciate the field of forensic science, this is intended to be a hands on course involving number labs and activities. Supplies will need to be replenished and purchased over the course of the year. A student workbook will also be supplied. As a result a course fee is expected for this course.

Status: approved

School Name: King George Secondary

Course Name: Novice Chef on the Run 11

Course Code: YNCOR 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None, but Home Economics 8 is strongly suggested.

Course Synopsis:

This course has been developed to support and encourage senior students who have little or no food preparation experience and will be living on their own in the near future. The focus will be on the delivery of nutritious and appetizing meals that can be quickly prepared. Students will learn about choosing healthy foods and planning nutritious meals. They will master basic skills such as safe kitchen and food handling practices; use of basic food equipment, and proper measurement techniques. Students will learn about what to look for when buying foods and do several consumer comparisons on different food products. This course is based on mastering fundamental food preparation techniques and the understanding of the theory that underlies the preparation of healthy, appealing and efficient meals. Students will work in a team setting and learn to read and follow instructions as they progress through the units of breakfast, lunch, supper and one dish and vegetarian meals.

Learning Resources:

The use of current textbooks (as recommended by the Ministry) such as Management and Foods, Foods for Life and Guide to Modern Meals can be used by students along with support material developed by the teacher. Videos that are appropriate will be used.

Teacher references would include the following titles but not exclusively from this list:

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course:  
- [ ] 10  
- [x] 11  
- [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application.

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

#Instructor designed material

#OHS regulations & WCB publications

#Qualified WHMIS instructor

#Qualified First Aid instructor

#Trades Common Core, Line H, Lift Loads, Queen=s Printer

#Trades Common Core, Line A, Use Safe Work Practices, Queen=s Printer

#Trades Common Core, Line I, Erect Ladders and Scaffolds, Queen=s Printer

#TRAC Piping Occupational Core, Line F, Use Specialized Power Tools,
#Province of British Columbia Ministry of Post Secondary Education, Queen=s Printer, 1986

#Current B.C. Plumbing Code, BC Building and Standards Branch, Queen=s Printer

#Videos: Ergonomics in the Workplace, The Hearing Video, Portable Fire Extinguishers, The Safety Monitor System, A Bright Arc, Fall Protection, Chemical Hazards, Confined Spaces Deadly Spaces

Status: approved

School Name: Kitsilano Secondary

Course Name: Annual Design 12

Course Code: YAND 12

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10  [ ] 11  [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Annual Production 11 and 12

Course Synopsis:

Students take on leadership roles as Editors or Section Heads. They ensure principles of fair and equitable reporting, copyright and privacy law, and all required computer skills passed on to junior members. Students review what constitutes good design and develop both theme and content guides for the production of annual pages, as well as Multi-Media content issued as an adjunct to the Yearbook. The student designers and develop the Ladder, Cover Design, Folios, Font choices and all other elements of the Annual. Budget planning and modification of the Annual specifications to meet budget plans are done in cooperation with the teacher/advisor. This course is a continuation of Annual Production 11 and 12, which should all be taught concurrently, building on the team dynamic of students with a variety of skill levels and experience.

Learning Resources:

- Manuals and Guides issued by publisher for specific software applications
- Visits from and training sessions held by representative of Publishing Company
- Resource library of comparative Publications
- “Ideas File” of various publications
- “Legacy Report” created as a guide by previous Annual Production classes.
- Internet sites dedicated to showcasing Yearbooks and awarding prizes to outstanding products

Additional Information:

This course is unique in that students take on a major teaching and leadership role to collectively produce a product that must be finished at a given time. As there will be students with varying degrees of experience mentoring is a major aspect of this course. The entire school population counts on the final product and deadlines are set by an outside company, so Annual Production is also a rare experience, as students have to deal with absolute deadlines throughout the year.

In schools where the Annual has to be sold to students (or financed through advertising), the course can also contain a component of marketing. In some schools this component of Annual Production is taken over by a senior Marketing class, in others it is part of the process in this course. In either case budget planning is a component handled either by the teacher/advisor and/or by the student editors taking this course.

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: Students should have completed English 10 and Annual Production 11

Course Synopsis:

Students develop further the technical and critical skills to publish the Annual of their High School. Principles of fair and equitable reporting, copyright and privacy law, and all required computer skills are reviewed. Having worked through the process of producing the annual once before, returning students should mentor the development of junior students and take on a leadership role. Students review what constitutes good design and practice the application of the latter through the design and production of annual pages, as well as Multi-Media content issued as an adjunct to the Yearbook.

This course is a continuation of Annual Production 11 and leads to Annual Design 12, which should all be taught concurrently, building on the team dynamic of students with a variety of skill levels and experience.

Learning Resources:

Number of Course Credits: 4
Number of Hours of Instruction: 100
Date Approved: May 3, 2004
Prerequisites: None

Course Synopsis:
This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15 -16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:
§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Learning Resources:
Career Paths Online  http://www.careerpathsonline.com/site/main.cfm
Interest inventory, Trades & Technology Quiz, 120 occupational profiles,
Employability Skills Toolkit  ISBN: 007087847-1
The Employability Skills Toolkit is a suite of practical tools designed to help learners use and develop the skills needed to enter, stay in, and progress in the world of work. The Toolkit offers practical support for managing lifelong learning for personal growth and workplace success, and provides information about what employability skills look like and examples of ways to develop and demonstrate skills at home, school, work and in the community (McGraw-Hill Ryerson Ltd. Toll Free Order Line: 1-800-565-5758)
WCB Student WorkSafe
The materials include age appropriate scenarios and activities to help students develop a strong safety attitude.

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Learning Resources:

• The Graduation Portfolio and Focus Areas Program Guide, Ministry of Education;
• CareerScope, Amundsen and Poehnell
• The Get Real Game, National Life/Work Centre
• Real Times/Real Life, National Life/Work Centre
• WCB Student Worksafe
• St. John Ambulance Level One (Emergency) First Aid Certification Program
• WHMIS
• British Columbia’s Employment Standards Act
• Workfutures.bc.ca

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students in their independent exploration of information technology. Students will use critical thinking to solve problems in multi media self-directed term projects. Learning outcomes for the course are grouped under the curriculum areas: Project Design, Research and Development, Term Project Execution and Completion, Presentation and Self-evaluation. Students are given opportunity for self and peer assessment in all of the four learning outcome areas. This approach supports independent student learning and evaluation in the field of information technology.

Learning Resources:

- Computer workstations networked with high speed access to the Internet
- Software to do the different term projects
- Programming workbook, or web base programming libraries
- Access to online web based tutorials

Course Name: Engineering 11

Course Code: YENG 11

Category: Trades and Technology

Grade Level of Course:  

☐ 10  ✗ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to provide students with a hands-on opportunity to solve an engineering problem. Students will work through the challenge of designing, constructing, and testing unique two- or three-wheeled vehicles. Team work and group interaction will be stressed. In order to successfully complete the challenge students must gain an understanding of material properties and their suitability for a given use. Students will become proficient in material fabrication and the safe and efficient use of equipment in the machine shop.

Learning Resources:

• Access to technical literature dealing with steering system design
• Technical manual for operation and maintenance of small gas engines
• Internet access
• CAD software
• Web based material for plans and instructions on the construction of “mini-bikes” to be adapted for student use
• Competition regulations for Vancouver Electric Car Society annual competition

Course Synopsis:

This course will introduce students to the principle processes and functions of the earth’s natural environment, and to the complex problems facing that environment today. By examining issues such as climate change, ozone depletion and controversial practices, as well as positive alternatives to those practices, students will consider the role that humans have to play in influencing the health of the planet. Throughout the course, an emphasis is placed on local environmental issues within the global context.

Learning Resources:

• Internet websites and library resources, including but not limited to:
  † The One-Tonne Challenge website
  † Managing our Natural Resources
  † Geosystems
  † Biomes
  † Écologie
• Video/DVD resources, including but not limited to:
  † The Nature of Things with David Suzuki
  † The Man Who Planted Trees
  † The Lorax
  † The Climate Change Show
  † World Population
  † Deconstructing Supper
• Guest speakers and field trips, including but not limited to:
  † Camosun Bog
  † City Farmer
  † The Seymour Watershed
  † Local hikes with Wild Ed
  † The GVRD Landfill
  † The Shoreline Clean-up

Course Name: Graphic Arts 10

Course Code: YGAR 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- [X] 10  
- [ ] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None, except an interest in Graphic Design and Imagery

Course Synopsis:

This introductory level course in Graphic Art will let students discover and experiment with the skills of conceptualisation, synthesis, and realisation and require them to apply creativity, logic, and knowledge to solve real-life problems. Students start to develop an understanding of how Graphic Design touches every part of our lives and begin to develop production skills. Students will seek individual, innovative solutions and use graphics to develop, record, and communicate these solutions in a variety of ways. Studying Graphic Art develops students' understanding, sharpens their perceptions of design, and creates discerning consumers with awareness of how images influence our decision making process.

Learning Resources:

- A variety of older Graphic Arts Text books (Very dated, but base concepts sound)
- Manuals and guides for available Software and Hardware
- Photography guides and Artists' publications
  - “Sample File” of previously completed work
- Internet sites both showcasing work and using sound Graphic Design

Additional Information:

Graphics involves a rich variety of learning experiences leading to a wide range of career opportunities and so should have considerable appeal to all students. The increased emphasis on creativity and individual choice provided by these courses enables teachers to develop programmes that match their students' requirements with the available technologies. As these technologies vary from school to school, so will the implementation of this course, while the fundamental learning outcomes and goals of the programme will remain intact. The graphic nature of much of the work also makes it accessible to students for whom English is a second language and to those who are limited in their writing or listening skills.

Graphic Arts programmes have been in place for over 30 years in most schools, and are continuously updated to reflect emerging technologies and desired learning outcomes.

This course is currently coded GA10 for grade 9 and 10

This course is currently coded CPGC2A.
Jewellery design and production is an exciting field that leads to a variety of post-secondary programmes and employment opportunities. Students interested in pursuing jewellery can continue their development by taking Jewellery 11 and 12. Jewellery making is an excellent educational vehicle for teaching students to use their creativity to design solutions to problems. It also allows the development of technical skills and encourages the application of skills in ways that are personally and culturally meaningful for the student. This course is suitable for all Grade 9 and 10 students as well as ESL students, and has been adapted for the inclusion of special needs students.

**Course Synopsis:**
This introductory level course in Jewellery Arts will allow students to explore and develop the skills of conceptualisation, synthesis and realisation and apply prior knowledge, logic and creativity to solve real fabrication problems. Through the use of sketchbooks and image journals students will learn to recognise and communicate elements of quality design.

Students will apply design principles through the proper and safe use of tools and materials to create artefacts that function as personal statements of ornamentation. Emphasis will be on safe work practices, appreciating and applying design principles and developing production and fabrication skills using tools and materials to create individual functional jewellery objects.

**Learning Resources:**
- A collection of books and magazines on both design and production of Jewellery
- A collection of students work from past years to be used as examples
- Internet sites relevant to Jewellery design and production
- Teacher generated handouts and worksheets

**Additional Information:**
Jewellery design and production is an exciting field that leads to a variety of post-secondary programmes and employment opportunities. Students interested in pursuing jewellery can continue their development by taking Jewellery 11 and 12. Jewellery making is an excellent educational vehicle for teaching students to use their creativity to design solutions to problems. It also allows the development of technical skills and encourages the application of skills in ways that are personally and culturally meaningful for the student. This course is suitable for all Grade 9 and 10 students as well as ESL students, and has been adapted for the inclusion of special needs students.

School Name: Kitsilano Secondary

Course Name: Latin & Ballroom Dance 10

Course Code: YLBD 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: DNP 9 or DNC 9

Course Synopsis:

Latin and Ballroom Dance 10 will provide students with the opportunity to study beginner to intermediate level Ballroom and Latin dances in a class setting. While developing coordination, flexibility, strength and rhythm, students will study and perform a wide range of culturally inclusive social dance styles including: West Coast swing, jive, mambo, Argentine tango, rueda, rumba, salsa, lindy hop, cha cha cha, waltz, street hustle, fox trot and samba. Students will gain self-confidence by learning and performing their accomplished, choreographed, precision routines. They will have an outlet that enables them to be creative and expressive while learning how to dance a variety of social dances from different cultures. Opportunities will be provided for students to take party in Career Preparation opportunities related to the study, performance and teaching of dance.

Learning Resources:

• The Complete Book of Ballroom Dancing by Richard Stephenson and Joseph Iaccarino
• Numerous CD’s such as Celia Cruz, Swing Kids, Tito Puente, Mambo King, and Forever Tango
• Guest teachers will occasionally be brought in to help demonstrate dance steps, dips and lifts
• Dance Videos and DVDs, video equipment

Additional Information:

This course is now in its third year of instruction at Gladstone Secondary and began in September 2001. The dance program at Gladstone began in 1997 with DNP (Dance and Performance) and DNC (Dance and Choreography) classes with focus on ballet, tap, modern, jazz and cultural dances. The Ballroom and Latin class focuses on partner dances and incorporates skills learned in the regular dance classes, but with an even ratio of girls to boys and at a more advanced and sophisticated level.

Course Name: Link Leadership 11

Course Code: YLLS 11

Category: Health and Human Services

Grade Level of Course: 10 □ 11 ☒ 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: students will have had to complete 12 hours of training- last week of summer.

Course Synopsis:

This course has been developed to support and encourage peer mentoring to incoming grade 8 students; it will encourage senior students to explore the richness and diversity of various cultures and strengthen the morale/relationships among students. As a culmination, students will reflect on their new and existing relationships through the various planned group events and contact they undergo throughout the school year with their assigned grade 8 groups. Learning outcomes for the course are grouped under the curriculum organizers: personal and social responsibility, social and cultural issues, analysis, and creation. Students are given the opportunity for self and peer assessment in each of the nine units.

Learning Resources:

- Guest speakers from:
  o GAB- Lesbian, Gay, Bisexual, and Trans-gender Youth Services
  o Condomania
  o Safe Teen
  - Simulations
  - Field trips
  - Articles and information on leadership and related topics from the Internet
  - Videos
  - Books
  o Career and Personal Planning 8-12, Ministry Of Education, 1995
  o Healthy Attitudes Resource Binder, Vancouver/Richmond Health Board, 1998
  o The 7 Habits of Highly Effective Teens, Covey, S, Fireside, 1998.

Additional Information:

This is a new course based on an internationally developed orientation project called Link Crew and carried out all over the United States by Learning for Living. Recently, the Vancouver School Board has adopted a similar program called the Buddy System. Schools will need adequate funding and staffing to make the course run more smoothly. At least one individual needs to have been trained by the Learning for Living organization and or completed the “Buddy System” workshops carried out by the Vancouver School Board.

Prerequisites:

- Computer workstations and servers networked with high speed access to the Internet
- Software to manage the network
- Programming workbooks related to network issues, Network texts, and online tutorials
- Access to online web based tutorials

Course Synopsis:

This course has been developed to support and encourage students in their exploration of computer network technology. Students will study the two major areas of a network, the hardware devices and the software related to programming servers, switches, routers, access points and portable personal communication devices. They will do this by studying two textbooks, David Groth’s, A+ Complete Study Guide, 3rd edition, and Network + Study Guide, 3rd edition, both published by Sybex Inc., 2003. Network management students will also be involved in the daily support of the school network.

**Course Synopsis:**

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:

$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course will develop the students’ ability to critically analyze film. It will begin with a survey of the language of film; this includes form, narrative structure, editing, mise-en-scene, cinematography and sound. Students will then be introduced to several approaches of analyzing films; genre study with an emphasis on Film Noir, historical, star analysis, auteur study and independent/national cinema. Finally students will begin to synthesize this information as they study thematic issues in a triad of films from different periods and countries. All students will maintain a film journal and make presentations to the class.

Learning Resources:

School Name: Lord Byng Secondary

Course Name: Honour Strings 11

Course Code: YHSTR 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4 each

Number of Hours of instruction: 120 each

Date Approved: April 13, 2005

Prerequisites: Students enter the course by audition. Appropriate instrumental experience (in previous Strings cour

Course Synopsis:

These courses are designed for highly motivated students. Students in Honour Strings 11 and Honour Strings 12 will work together as a chamber ensemble (“Honour Orchestra”) on more sophisticated repertoire (i.e. original music rather than arrangements). The ensemble is conducted and coached intensively by the instructor during class time, but performs in concert without a conductor. The ensemble offers many leadership opportunities, and qualified students rotate through the various leadership roles. Leadership roles in Honour Orchestra generally go to students enrolled in Honour Strings 12, while students enrolled in Honour Strings 11 generally play supportive team roles and are mentored by the leading senior students. The ensemble also provides opportunities for solo BAA Honour Strings 11, p. 2 roles (concertos) with chamber orchestra accompaniment. Students will also form smaller groups such as quartets and trios, to develop the skills and musicianship needed to work in an intensive team environment.

Learning Resources:

Analogous to the IRP for Instrumental Music Orchestral Strings 11 or 12, but with a focus on more demanding music that will motivate and reward the students at the appropriate higher level.
The mission of a Mini school such as Byng Arts is to provide carefully chosen students, who enter by audition in the case of Byng Arts, with intensified and enriched training in their field(s) of specialization.

The students in the Byng String Program fall into three categories: (1) students for whom Music—and Strings in particular—is their subject of principal focus and special devotion, and which is their reason for attending Byng Arts; (2) students attending Byng Arts Mini School for BAA Honour Strings 11, p. 4 whom Music is one of several components in their performing arts orientation; and (3) students in the regular Byng Secondary program with string instrument experience who also participate in the String Program. Each year, the String Program accepts, by audition, 15 highly qualified string instrument players into the Byng Arts Mini School. These students constitute the first of the three groups just described, and they choose Byng because they want to be involved in intensified and enriched courses all the way through to Grades 11 and 12. All the students in the String program need to receive Strings teaching that requires an appropriate level—and time commitment—commensurate with their longer-range goals. But the extent of enrichment in the String Program as a whole must reflect the needs of the first group—the students who come from all over Vancouver to attend Byng Arts because they wish to specialize in Strings and know that Byng is the only secondary school in the city with a program that can truly address their needs.

In an enriched program, each student’s progress reflects the amount of time invested in developing and improving skills. Just as in all the performing arts, and in skating, gymnastics, and most other athletic endeavors, making progress towards real excellence requires not just excellent training, but a significant and continuous investment of time with a coach. (Individual practice is also essential, but regular coaching and guidance cannot be forfeited.) At Byng Arts, there are on average 30 String students in Grades 11 and 12 who come to Byng for exactly this sort of extra investment. It is essential, therefore, that these can have extra hours per week by working in Honour Orchestra (by enrolling in Honour Strings 11 or Honour Strings 12) as an extra course in addition to Senior Orchestra (which includes students enrolled in Instrumental Music Orchestral Strings 11 or Instrumental Music Orchestral Strings 12).

There are additional reasons why students should be allowed to take both these courses. Senior Orchestra is a larger ensemble, performing repertoire for string orchestra, while Honour Orchestra (comprising students in Honour Strings 11 and Honour Strings 12) constitutes a smaller strings Chamber Orchestra, with its own distinct repertoire. It is essential that the most advanced students, who will enroll in Honour Strings 11 or Honour Strings 12, also learn the larger repertoire in Senior Orchestra (by enrolling in Instrumental Music Orchestral Strings 11 or Instrumental Music Orchestral Strings 12), to gain vital experience playing in a large ensemble as well as in a chamber ensemble.

#Plumbing Competency Line I, Install and Repair Fixtures, Queen=s Printer

#Current Fixture Manufacturers Rough in Literature

#Current British Columbia Plumbing Code Regulations, Queen=s Printer
The purpose of this course is to give music students the opportunity of playing in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc...) as it was initially intended to be played, not arrangements. Students learn and build on their knowledge of blending tone, balancing volume (dynamic), articulation techniques, and other such topics with an instrumental group combining wind, string, and percussion instruments. (Ex. A violinist will learn how to balance with a horn player, a trumpet player will try to blend his/her tone with a cellist, a clarinettist will learn to articulate like a viola’s pizzicato.) These students will continue to be enrolled in either a band or strings class but will take symphony as an additional musical experience.
The Ministry of Education in 2002 supplied teachers with the IRP for Instrumental Music 11 and 12. While this document is a wonderful resource to help implement curriculum in instrumental programs within our province, they have not designated full orchestra (symphony) with a heading of its own. Under the category of Instrumental Music 11 and 12, there are four programs: Concert Band, Jazz Band, Orchestral Strings, and Guitar. This course, Symphony, should be the fifth program. Symphony is differentiated from Band and Strings in its unique repertoire, performance techniques (i.e. ensemble’s blend, timbre, and balance), history, and composition.

I appreciate the Board/Authority’s wish to delete redundant courses or not to support courses with “significant overlap of current provincial curriculum”, but Symphony is not a redundant course. The Jazz Band program offers students opportunities to study jazz music, learn jazz-specific articulations, use of a wider variety of brass mutes, jazz history, etc… It is not Concert Band. But I do not know of a Band director that doesn’t teach some jazz music in his/her concert band class at some point in the year. The difference between the two is that the repertoire, history, and the intensity of immersion into the study and make up of an ensemble is what makes the program different. The music studied and the instruments involved in the ensemble are what make Jazz Band different from Concert Band. Symphony is different then Orchestral Strings or Concert Band for the same reasons. Students need to be able to receive graduation credits for Symphony as well as Concert Band and/or Orchestral Strings.

Course Synopsis:

The purpose of this course is to give advanced music students the opportunity of playing in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc…) as it was initially intended to be played, not arrangements. Students learn and build on their knowledge of blending tone, balancing volume (dynamic), articulation techniques, and other such topics with an instrumental group combining wind, string, and percussion instruments. (Ex. A violinist will learn how to balance with a horn player, a trumpet player will try to blend his/her tone with a cellist, a clarinetist will learn to articulate like a viola’s pizzicato.) Course Name: Academic Strategies/ESL Learners 10

Course Code: YASES 10

Category: Business and Applied Business

Grade Level of Course: ☑️ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 100 - 120

Date Approved: April 13, 2005

Prerequisites: This course is designed for the student who:

- Shows an imbalance between oral and written skills

Course Synopsis:

The course is designed to familiarize and extend a student’s abilities to use various strategies independently in order to meet the Learning Outcomes and be successful in content based courses such as English, Social Studies and Science. Emphasis will be on the comprehension of important concepts, linking current information to prior knowledge, and the application of strategies and skills learned. In addition, students will become familiar with a variety of learning skills and Canadian assessment techniques.

Learning Resources:

- You’re in Charge - Writing to Communicate by Frydenberg and Boardman
- Writing in the Content Areas - Practicing the Writing Process 3 by Crowell and Kolba
- The Essay: Practicing the Writing Process 2 by Crowell and Kolba
- The Communication Circuit - Reading and Writing Skills 5th Edition by June Baker
- Mastering Essential English Skills by McClelland, Reynolds, Steet, and Guillory
- Agenda Book
- The LPI Workbook
- Graduation Portfolio
- Some other suggested cross-curricular resources to meet student needs are:
  - Current newspapers and magazine articles
  - Cross-curricular textbooks including novels, short story collections, science and social studies textbooks
  - Planning 10 - Resources

Grade Level of Course: [ ] 10 [x] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Through this opportunity it is expected that students will:

$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently

$ be more likely to understand underlying theory when the meaning is explored in specific situations

$ have the opportunity to consolidate previous experience and demonstrate skills

$ gain experience that makes further study more meaningful

$ have the opportunity to learn the culture of the workplace

$ learn, develop and apply skills relevant to the workplace

$ gain information and experience to enable informed career choice and planning

$ experience various work cultures

$ gain confidence

$ make contact with employers

$ gain knowledge of employers’ expectations

$ demonstrate to host employers their potential as employees

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

School Name: Magee Secondary
Course Name: Chamber Choir 10
Course Code: YCCH 10
Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 100 + 40

Date Approved: January 17, 2007
Prerequisites: Concert Choir

Course Synopsis:

This course has been designed to facilitate and improve on skills already present in the young high school vocalist. In addition to the introduction and development of vocal technique, this course offers opportunities for beginning music literacy, i.e. music theory, sight reading, tone matching and keyboard skills. The ultimate evaluation will conclude with musical performance.

Learning Resources:

- solo materials
- ensemble repertoire
- CD library
- Choral library
- Vocal Technic texts
- Recitals
- Concerts
- Workshops
- Basic observations of singers
- Review / discussion of all vocal / choral
- Sounds

Additional Information:

The Chamber Choir course establishes and offers an intermediate level of musical / personal opportunity for the active singers who seek to go beyond the basics learned in the Concert Choir. Although a substantial challenge for these young singers, the course bears a variety of options, most of which are to advance musical skill development, social maturity, personal identity and artistic presence. It is a viable and significant option for vocal advocates.
The Chamber Choir course establishes and offers a higher level of musical / personal opportunity for the active singers. School Name: Magee Secondary

Course Name: Peer Tutoring 12A

Course Code: YPTU 12A

Category: Health and Human Services

Grade Level of Course: [ ] 10 [ ] 11 [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: For grade 12 students only.

Course Synopsis:

Peer Tutoring 12 is a participation course for Grade 12 students. Peer Tutor will provide direct, individual assistance for learning disabled students under the auspices of the Skills Development Centre. Students will receive on the job@ training, role modeling, lecture and off-campus workshop in the application of sound learning strategies and study skills to apply to academic course work as well as major components of ethical behaviour for Peer Helpers. Emphasis will be placed on specific criteria including: Time Management and Goal Setting, note taking (2 column, Cornell), preparation and execution of expository writing (including WRITER and COPS strategies), various review techniques and appropriate ways to answer tests. Basically, Peer Tutoring 12 students will be immersed in activities which will improve their organization for thinking and learning as well as their active learning skills. Optimally, individual improvements will be transferred to the learning disabled students with whom they work.

Peer Tutoring 12 is an elective course open to all Grade 12 students. For the most part, students who opt to take this course will be assigned as Peer Helpers in the Skills Development Centre. In odd cases, Peer Helpers may be needed as assistants in the Junior Extended Skills, LAP and LALS classes or for relate duties with the District Resource Teacher for the Neurologically Impaired.

Although day to day training is on-going throughout the entire term, Peer Tutoring 12 students are required to attend a one day Peer Tutoring Workshop. During this training session, students will receive intensive training as to the nature of learning disabilities, the types of learning disabilities we encounter at our school, study skills and learning strategies to apply to academic course work, emphatic listening skills, motivational and encouragement techniques, as well as team building and lots of good food and fun.

General expectations for students in Peer Tutoring 12 are for daily interaction between SDC students and Peer Tutors either on a one to one or smaller group cooperative learning engagement. Assessment will include regular evaluation of Peer Helper journals, attendance, workshop and the willingness to participate in positive manners. Peer Helpers generally provide individual intervention in the application of sound study skills and learning strategies to learning disabled youngsters= regular academic course work along with on the job production of notes, graphic organizers and tests for instructional use in the SDC (the quality of which will be mentioned and evaluated). More likely encouragers and motivators, Peer Helpers do not necessarily have to the brilliant academic scholars. Their input not the positive and excellent tone of the school is invaluable.
Peer Tutoring 12 was originally developed at Magee Secondary School to facilitate an appropriate educational setting for a Skills Development Programme which embraced an active learning focus for learning disabled children. The programme has evolved from a small beginning to a school wide programme which promotes active engagement in the learning process throughout the school. The SDC teachers set the criteria and programmes appropriate for each student’s learning needs and the Peer Tutoring 12 students help implement these programmes as effective learning assistants. Always cognizant of the valuable contributions Peer tutors have to offers as a methods of learning, computer expertise, motivational mastery and academic content, the programme has grown from 8 students the first semester in 1989 to over 70 students currently. The work they do is exceptional and it has contributed greatly to the overall success of the Skills Development Centre Programme at Magee.

Learning Resources:

• Video tapes including instructional and demonstrational models
- How Hard Can This Be - Richard Lavoie
- Misunderstood Minds - Mel Levine
- Look What You’ve Done - Robert Brooks
- Look A Little Deeper - David Suzuki
- Learning Disabilities and Social Skills - Richard Lavoie

Optimally, individual improvements will be transferred to the learning disabled students with whom they work.

Peer Tutoring 12 is an elective course open to all Grade 12 students. For the most part, students who opt to take this course will be assigned as Peer Helpers in the Skills Development Centre. In odd cases, Peer Helpers may be needed as assistants in the Junior Extended Skills, LAP and LALS classes or for relate duties with the District Resource Teacher for the Neurologically Impaired.

Although day to day training is on-going throughout the entire term, Peer Tutoring 12 students are required to attend a one day Peer Tutoring Workshop. During this training session, students will receive intensive training as to the nature of learning disabilities, the types of learning disabilities we encounter at our school, study skills and learning strategies to apply to academic course work, emphatic listening skills, motivational and encouragement techniques, as well as team building and lots of good food and fun.

General expectations for students in Peer Tutoring 12 are for daily interaction between SDC students and Peer Tutors either on a one to one or smaller group cooperative learning engagement. Assessment will include regular evaluation of Peer Helper journals, attendance, workshop and the willingness to participate in positive manners. Peer Helpers generally provide individual intervention in the application of sound study skills and learning strategies to learning disabled youngsters= regular academic course work along with on the job production of notes, graphic organizers and tests for instructional use in the SDC (the quality of which will be mentioned and evaluated). More likely encouragers and motivators, Peer Helpers do not necessarily have to the brilliant academic scholars. Their input not the positive and excellent tone of the school is invaluable.
Peer Tutoring 12 was originally developed at Magee Secondary School to facilitate an appropriate educational setting for a Skills Development Programme which embraced an active learning focus for learning disabled children. The programme has evolved from a small beginning to a school wide programme which promotes active engagement in the learning process throughout the school. The SDC teachers set the criteria and programmes appropriate for each student’s learning needs and the Peer Tutoring 12 students help implement these programmes as effective learning assistants. Always cognizant of the valuable contributions Peer tutors have to offers as a methods of learning, computer expertise, motivational mastery and academic content, the programme has grown from 8 students the first semester in 1989 to over 70 students currently. The work they do is exceptional and it has contributed greatly to the overall success of the Skills Development Centre Programme at Magee.

School Name: Magee Secondary

Course Name: Plumbing 12A

Course Code: YPLB 12A

Category: Trades and Technology

Grade Level of Course: 10 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful application

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them with safety regulations in accordance with Worksafe BC and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools.

Learning Resources:

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§experience the roles and responsibilities of employment
§appreciate the time constraints imposed in terms of attendance at both school and work
§relate classroom skills and knowledge to an employment context
§develop interpersonal skills, career awareness and maturity
§become aware of the changing nature and demands of the workplace
§experience the potential career opportunities available in industry
§increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Course Synopsis:

Course Synopsis: This course has been developed for senior secondary students who have previous experience in basic photography techniques and have continuing interest in exploring traditional and evolving photographic formats. Content will reflect a more individualized approach to developing personal imagery. Students will learn advanced photographic techniques, and further their knowledge of utilising computers and peripherals as editing tools. They will further develop a portfolio that reflects their photographic skill development and knowledge in preparation for post secondary admission with particular emphasis on career options. Learning outcomes for the course are grouped under the curriculum organizers: Image Development and Design Strategies, Context, Visual Elements and Principles of Art and Design, and Materials, Technologies and Processes.

*Note: The organizational structure and how it is implemented is dependent upon each school’s facilities and the teacher expertise.

Grade Level of Course:  

10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Physical Education 10

Course Synopsis:

This course will provide students with information and opportunities to develop a personal commitment to a physically active lifestyle and an awareness of the benefits of an active lifestyle.

The first unit will provide an overview of course content and course expectations. Activities included in this unit will encourage class members to work together as a cohesive and supportive group.

The second unit concentrates on improving and maintaining a functional fitness level. Current research and training principles will be used by the students to design a personal fitness program. Revisions to the program will be made after students have initiated their program for a trial period.

The third unit will focus on personal and social responsibility. Students will be involved in a school or community-based project integral to the theme of an active lifestyle. For example, the “Fit For Life 11” class will be organizing the students of the school to participate in the Canadian Heart & Stroke Foundation’s “Jump Rope for Heart” program.

This course was created in response to our senior female students’ desire for a course specifically designed for them: active, informative and enjoyable.

It has been offered at Prince of Wales since 2001, and continues to be a popular elective for the girls. It also fulfils the Graduation Portfolio requirement for 80 hours of moderate to intense physical activity.

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: PE 10

Course Synopsis:

This course provides the opportunity for goal oriented, motivated male and female hockey players to supplement their minor hockey experience and improve their hockey skills. Classes will be held at either the Kitsilano or Kerrisdale arenas and be offered on timetable from approximately 8:30 am – 3:00 pm.

Course content will include the development of technical skills (power skating included), individual tactics, team tactics, team play/systems, strategy and off ice training specific to hockey.

Students will be required to have previous hockey skills (house or rep), a positive attitude and a commitment and desire to improve their skills. Each student requires a full set of CSA approved hockey equipment, including neck guard.

11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: PE 10

Course Synopsis:

This course provides the opportunity for goal oriented, motivated male and female hockey players to supplement their minor hockey experience and improve their hockey skills and knowledge of the sport. Classes will be held at either the Kitsilano or Kerrisdale arenas and be offered on timetable from approximately 8:30 am – 3:00 pm.

Course content will include the development of technical skills (power skating included), individual tactics, team tactics, team play/systems, strategy and off ice training specific to hockey.

Other topics will include nutrition, leadership, (i.e. refereeing and coaching) and field study/lectures pertaining to the business and culture of hockey and its place in Canadian society.

Students will be required to have previous hockey skills (house or rep), a positive attitude, a passion for the game and a commitment and desire to improve their skills. Each student requires a full set of CSA approved hockey equipment, including neck guard.

Course Name: Home Economics Services 12

Course Code: YHES 12

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None – but students must have permission of the Home Economics Department and their counsellor

Course Synopsis:

This course provides students who are interested in the subject of Home Economics with a comprehensive practical work experience. A student who elects to take this course will be interested in learning specific skills and may add these to their forms of evidence for their graduation portfolio.

Learning Resources:

- Fashion!
- Food For Life
- Management and Foods
- The Living Family: A Canadian Perspective
- People in Perspective, Third Edition
- Foodsafe Level 1, 3rd Edition

Additional Information:

Each student will be assigned to a specific block and to a specific teacher within the Home Economics Department. The student will discuss with the teacher which area of Home Economics they want to spend most of their learning time in.

10  
11  
12  

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 13, 2005
Prerequisites: Home Economics – Foods 10

Course Synopsis:

In this course, students will travel around the world without leaving their classroom. Students will learn about the foods, customs, and celebrations of a variety of countries around the world. A wide range of foods known and eaten in countries such as Canada, Mexico, France, Italy, China, and Japan will be prepared, thereby allowing students to practice their culinary skills while developing an appreciation for the uniqueness of each country's cuisine. Students will learn to make fajitas, crepes, fresh pasta, samosas, curries, sushi, pastries, and much more. Unique food preparation equipment as well as unique foods will be introduced. Students will also study nutrition and the factors that influence the food people eat. Field trips to ethnic restaurants will enhance the global gourmet's experience. Special topics such as food artistry and global issues will also be discussed.

Learning Resources:

- Bringing the World into your Classroom - Global Education for Home Economics
- Epicurious.com - food dictionary
- Food For Life textbook
- Multicultural Cooking
- Multiculturalism Through Food
- Prince of Wales library collection
- Spices of the World video series

Additional Information:

This course was created in response to our students’ interest in wanting to take one more Foods and Nutrition course at our school. It was adapted from a half year course that was backed with Career and Personal Planning 11. Students enrolled in this course currently have enjoyed the variety that this course brings to their timetable.
This course is the final course in a five year leadership program offered at Windermere.

10  

11  

12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course introduces each student to a variety of outdoor activities including: hiking and backpacking, ocean kayaking, canoeing, rock climbing, cycle touring, back-country (telemark) skiing, cross-country (Nordic) skiing, essential outdoor skills. We provide instruction in the safe means of participating in each of these activities, and give students the basis for a lifetime of outdoor adventure. In addition, our trips (1 – 8 days in duration) enable us to examine a variety of ecosystems (e.g. alpine, intertial, freshwater, bog, and temperate rainforest). Education about the natural environment and sustainability are fundamental components of the course. We believe that students should understand how the natural environment has an impact on their daily lives, and in turn, what kind of impact their daily lives have on the environment. We provide students with opportunities to learn about the functioning of natural systems, identify their beliefs and opinions, consider a range of views, and ultimately make informed and responsible decisions.

This course has been developed for those students wanting a more comprehensive course in modern strength and conditioning principles. It would allow students to develop an individual program based on their specific conditioning need in different sports, and activities. Students will learn principals in such techniques as weight training, plyometrics, agility and balance training, and apply them to a self designed program suited to their specific needs.

Learning Resources:

• Strength Ball Training, Human Kinetics, Goldenberg and Twist, 2002
• The Pilates Body, Broadway Books, Siler 2000
• www.hc-sc.gc.ca - Health Canada, Canada’s Nutrition Guide
• www.strengthcoach.com - Strength Training
• CFES Fitness Knowledge Course, Canadian Fitness Education Services Ltd. April 2005

Additional Information:

This course not only allows the grade 12 students to continue with weight training for another year it exceeds the requirements of the Graduation Portfolio of 80 hours of physical activity. Also, it will encourage the students to maintain a healthy lifestyle for the rest of their lives.

Category: Trades and Technology

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites:

Course Synopsis:

This course has been developed to provide students with the opportunity to understand how urban homes are repaired or renovated and to practice their understanding in a practical environment. Students will be encouraged to assess and develop their individual strengths while practicing some basic home repair and improvement techniques.

The major project for the grade 12 courses will be the design and implementation of a small renovation process. Designing and completing the renovation will allow students to practice many of the processes required when performing simple renovations in high humidity environments.

Learning Resources:

- Students will be encouraged to purchase books that they can keep and refer to in the future. Both Taunton’s and Black and Decker provide concise and relevant material for the home.
- Building professionals will be consulted during field trips to local building supply outlets.
- Online resources will be explored. Critical assessment of information will be an integral component of the Online research.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:
§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Course Synopsis:

YSCTT 12A combines three distinct modules of instruction (Hand & Machine Tool processes, Technical Drawing, and Mechanics) into one course with each module requiring specific learning objectives, outcomes, and assessment strategies. Together they provide a component of a common core curriculum that will facilitate and support the transition of secondary students into ELTT (Foundation) programs in the colleges of British Columbia, Apprenticeships, or a Trades based career path of their choice. The development of a portfolio of demonstrated skills, assessment rubrics, and externally accredited certification is the central unit that ties all the other units together.

Learning Resources:

This course will require textbooks and multimedia resources that can be incorporated within the web-based activities. Supplies and materials will also be required to facilitate the situated learning activities in the shop. Access to external accreditation will be needed for certification. Students will be encouraged to purchase books that they can keep and refer to in the future. Trade professionals will be consulted, and reported out on, during field trips or work experience outings.

Course Synopsis:

SCT 12 combines four distinct modules of instruction (Safety, Mathematics, Work Experience, and Portfolio development) into one course with each module requiring specific learning objectives, outcomes, and assessment strategies. Together they provide a component of a common core curriculum that will facilitate and support the transition of secondary students into ELTT (Foundation) programs in the colleges of British Columbia, Apprenticeships, or a Trades based career path of their choice. The development of a portfolio of demonstrated skills, assessment rubrics, and externally accredited certification is the central unit that ties all the other units together.

Learning Resources:

This course will require textbooks and multimedia resources that can be incorporated within the web-based activities. Supplies and materials will also be required to facilitate the situated learning activities in the shop. Access to external accreditation will be needed for certification. Students will be encouraged to purchase books that they can keep and refer to in the future. Trade professionals will be consulted, and reported out on, during field trips or work experience outings.

Additional Information:

This course is newly designed and will be piloted in September 2007. Access to shops, classroom space, and computers connected to the internet will be required. The creation of a student cohort will require some creative timetabling to allow the students to be enrolled in all 3 classes on the same day.

Status: approved

School Name: Sir Winston Churchill Secondary

Course Name: Career Exploration 11

Course Code: YCE 11

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15 -16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

- experience the roles and responsibilities of employment
- appreciate the time constraints imposed in terms of attendance at both school and work
- relate classroom skills and knowledge to an employment context
- develop interpersonal skills, career awareness and maturity
- become aware of the changing nature and demands of the workplace
- experience the potential career opportunities available in industry
- increase employment prospects

Through this opportunity it is expected that students will:

- learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
- be more likely to understand underlying theory when the meaning is explored in specific situations
- have the opportunity to consolidate previous experience and demonstrate skills
- gain experience that makes further study more meaningful
- have the opportunity to learn the culture of the workplace
- learn, develop and apply skills relevant to the workplace
- gain information and experience to enable informed career choice and planning
- experience various work cultures
- gain confidence
- make contact with employers
- gain knowledge of employers’ expectations
- demonstrate to host employers their potential as employees
