This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Learning Resources:

School Name: Sir Winston Churchill Secondary

Course Name: Composition 11

Course Code: YCOMP 11

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course is designed to help improve students’ skills by providing them with a variety of writing situations. The course covers modes of composition, methods of organization, and grammar. Students can expect to participate in peer-evaluation, self-evaluation, oral sharing, and publication. They will explore the components of the writing process, examine the purposes of writing, developing the corresponding audience awareness and methodology.

Learning Resources:

- B.C. Ministry of Education B.C. Performance Standards “Writing”
- Videos of effective oral communication i.e.:
  - “Justin Trudeau: A Son’s Eulogy”
  - “I Have a Dream” Rev. Dr. Martin Luther King Jr.
- Searchlights Selected Essays, The Book Society of Canada, 1982
- Helping Students Write to a Prompt, Sydell Rabin, Scholastic, 2002
- Inside Essays II, Douglas Hilker, Harcourt Brace, 1993

Additional Information:

This is a new course based on a province of British Columbia Ministry of Education course entitled Composition 11, and outlined in Composition 11 Curriculum Guide and Resource Book for Teachers, 1982. The original 1982 curriculum has been updated and revised in accordance with current educational practices.

School Name: Sir Winston Churchill Secondary

Course Name: Journalism 12

Course Code: YJOU 12

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

Journalism 12 is a yearlong newspaper reporting course available to students in grades 11 and 12. Students are responsible for producing stories and photographs for the school newspaper. Students will learn the major newspaper story forms including news, sports, features, editorial and opinion. They will compose news and feature photos, and conduct public opinion polls. Students will strive to produce a newspaper meeting professional standards and following Canadian Press style. They will prepare questions, conduct interviews, carry out online and other forms of background research and be responsible for one or more beats (regular coverage areas) in the school. Students will also study the techniques used to present news and in so doing, become informed consumers of media.

Learning Resources:

?Visit to commercial press plant, TV and/or radio station
?Guest speakers from local media (reporters, photographers and editors)
?Articles from various sources on news writing, ethics, design, and business aspects
?Journalistic codes of conduct, such as those of the CBC and the Society of Professional Journalists
?Websites on a range of journalism topics including writing and ethics, design and careers.

Books:

Videos:
-Wag the Dog
-Fahrenheit 9/11
-The Corporation
-Super Size Me
-Broadcast News
-The Insider

Additional Information:

The course lends itself to cross-curricular involvement with Photography, Data Management, and Web Page Design courses. The more students that are involved with the production of the newspaper, the more representative the newspaper. Ideally, the newspaper would be published and distributed to the student population and community. In order to do so, adequate funding is required. Possible sources include: student fees, PAC, advertisements, and fund-raising.

School Name: Sir Winston Churchill Secondary

Course Name: Novice Chef on the Run 11

Course Code: YNCOR 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: None, but Home Economics 8 is strongly suggested.

Course Synopsis:

This course has been developed to support and encourage senior students who have little or no food preparation experience and will be living on their own in the near future. The focus will be on the delivery of nutritious and appetizing meals that can be quickly prepared. Students will learn about choosing healthy foods and planning nutritious meals. They will master basic skills such as safe kitchen and food handling practices; use of basic food equipment, and proper measurement techniques. Students will learn about what to look for when buying foods and do several consumer comparisons on different food products. This course is based on mastering fundamental food preparation techniques and the understanding of the theory that underlies the preparation of healthy, appealing and efficient meals. Students will work in a team setting and learn to read and follow instructions as they progress through the units of breakfast, lunch, supper and one dish and vegetarian meals.

Learning Resources:

The use of current textbooks (as recommended by the Ministry) such as Management and Foods, Foods for Life and Guide to Modern Meals can be used by students along with support material developed by the teacher. Videos that are appropriate will be used.

Teacher references would include the following titles but not exclusively from this list:

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: none

Course Synopsis:

Psychology 11 enables the students to learn about psychology, themselves and others. The students will examine, study and understand various aspects of the field of psychology so they can gain some insights into their own and other’s behaviour. The science of psychology focuses on facts – “what is” rather than on myth “what may be”. Students should be able to analyse themselves and others objectively. Students should also become more aware of how psychology applies to their lives.

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course will provide senior secondary students with the opportunity to explore careers in electronic and desktop publishing, and to develop advanced communication skills in this field. Students will learn concepts in design, layout, font types, size, colour, graphic design, and formatting related to producing documents incorporating text and graphics for commercial publications. Examples of products produced include brochures, newsletters, books, magazine covers, magazines, flyers, advertisements, packaging labels, PowerPoint slides, menus and posters. Through these projects students will apply their creativity, Internet researching abilities, and their knowledge in marketing, advertising, and business. The course is also designed to improve skills in proofreading, editing, language, communications, etiquette, Internet research, Internet communications, and data file management. The students will be encouraged to use their skills in other curricular areas.

Course Name: Feuerstein's Instrumental Enrichment 10

Course Code: YFIE 10

Category: Other

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Feuerstein’s Instrumental Enrichment Program Level II or I

Course Synopsis:

Feuerstein’s Instrumental Enrichment Program reinforces or teaches directly the higher-level thinking skills needed to successfully complete the grade 10/11 curricula. This program was developed by psychologists in Europe and the Middle East forty years ago to teach high-order thinking skills to adolescents to think about how they think (metacognition), to come to understand various thinking processes, and to discover those they do well and those they need to improve on. Although there are extensive sets of exercises and worksheets, the most important activity in this program is the group discussions linking concepts introduced on each worksheet to students’ everyday lives, including home, school, community and the world. The overall objective is to cause students to think analogically at an automatic level and to come to understand the connectedness of events and experiences in their lives to enhance learning, both in and out of school. This linkage is called “bridging” in the F.I.E. Program.

Learning Resources:

§ Each student has a larger portfolio to collect both FIE exercises and bridging ideas
§ A second folder for each student is handed in each day for marking after a lesson.
§ F.I.E. Instrument exercises for each Instrument mentioned

Course Synopsis:

Advanced Piano Skills 10 is designed as a part of a progression of Beginning, Intermediate and Advanced Piano Skills courses to help students learn to perform piano well from a beginning level to a more advanced level. The progression is designed to allow students to begin at a level of expectation appropriate to their technical skills, and to continue to develop their skills in subsequent years.

Students will learn a musical vocabulary and music theory appropriate to their level of performance, and learn to perform songs both in groups and singly. They will perform for appropriate audiences, beginning with their classmates and proceeding to larger audiences as their skill improves.

Course Code: YPLB 12C

Category: Trades and Technology

Grade Level of Course:  

- [ ] 10  [ ] 11  [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: 

The student should demonstrate a basic mechanical aptitude.

Course Synopsis:

This course is designed to introduce the students to the safe use of oxyacetylene welding and Acetylene soldering equipment. Additionally, it will familiarize them with common piping materials, fittings and valves. Also the students will be introduced to the current B.C. Plumbing Code Regulations.

Learning Resources:

#Instructor designed material
#Trades Common Core, Line J, Oxyacetylene Cut and Weld, Queen=s Printer.
#Plumbing Competency E 1, Describe common Piping Materials, Queen=s Printer
#Plumbing Competency E 2, Identify and Select Plumbing Fittings, Queen=s Printer.
#Plumbing Competency E 3, Select and Install Hangers and Supports, Queen=s Printer.
#Plumbing Competency E 4, Describe the Types of Sealants Used By Plumbers, Queen=s Printer.
#Plumbing Competency E 5, Select and Install Piping / Tubing for Specific Applications, Queen=s Printer.
#Plumbing Competency E 6, Identify Plumbing Valves, Queen=s Printer
#Current British Columbia Plumbing Code Regulations, Queen=s Printer

School Name: Templeton Secondary

Course Name: Theatre Criticism 11

Course Code: YTCR 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 □ 11 ✗ 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to provide students with the opportunity to experience different styles of live theatre, film and television productions that are uniquely available in the Lower Mainland. To achieve this, students visit professional and amateur theatre venues, theatre fringe festivals, film festivals, local mainstream and alternative film theatres, as well as various film and television production studios. While various written and oral forms of evaluation are used throughout, as a culmination to the twenty-eight productions students attend throughout the course, students will organize presentations that include a mapping of the local theatre, film and television community, and an assessment of the best productions seen during the school year. Learning outcomes for the course are grouped under the curriculum organizers: Social and Cultural Issues, Exploration, Analysis, Company, and Technological Processes. Students are given the opportunity for self and peer assessments and the overall approach to the course promotes the development of an understanding of the local performing arts community, particularly as this relates to students’ future educational and career choices.

Learning Resources:

• Visits to twenty local theatre (classic/contemporary/musical/experimental/ ethically-based) productions
• Visits to eight local film screenings
• Visits to local area film and television production studios (Lions Gate Studios, Vancouver Film Studios, etc.)
• Visits with local theatre, film, television and print media talent
• Articles and information about the local theatre, film and television communities from the Internet
• Books/Study Guides:
  • Stuart Poyntz (2001/02). History of Film Study Guide Series. (No 1-20). Vancouver: Pacific Cinémathèque

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15-16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Planning 10

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Date Approved:  April 13, 2005

Prerequisites:  None

Course Synopsis:

This course has been developed to allow the individual strengths of students to be paired with school and/or community needs through service activities. Because the role of the Community Service student will vary according to the wide range of needs in secondary schools, elementary schools or outside agencies, a definitive role description cannot be provided. Each student and teacher will develop the student=s service role and the assessment based on the course objectives and individual needs of both student and teacher. It is important that the guiding principal when developing the student=s role is that it must benefit the student.

Course Name: Self and Society 11

Course Code: YSAS 11

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course has been developed as the first part of a two part course designed to provide academically gifted students in the University Transition Program with the essential skills and concepts that prepare them for early entrance to UBC. The course provides opportunities for students to problem solve and learn collaboratively as they work through four interdisciplinary units: Human Development, Social Justice, Media Awareness, and Environmental Stewardship. Through the creation and use of an electronic portfolio, students learn to monitor and reflect on their learning throughout the course and consider their learning at the end of the year in light of their own individual education plan.

Learning Resources:

· Speakers from UBC campus and Lower Mainland community (i.e., Ad Busters, Condomania, UBC Wellness Center, UBC Mentor Center, etc.)
· Films: Pay it Forward, Control Room, Wag the Dog
· UBC History Professor
· Bamfield Marine Station

This list is still being developed

Additional Information:

Please note that this course is being developed in conjunction with Self and Society 12. The intention is that the two courses will be taught as one, with Transition year one and year two students working together. Course content will be the same for both groups, repeated over a two-year cycle. What will differ between Self and Society 11 and Self and Society 12 is the Learning Outcomes. For Self and Society 12 the language of the Learning Outcomes reflects more depth and mastery of the course concepts and material.

School Name: Vancouver Technical Secondary

Course Name: Engineering 12A

Course Code: YENG 12A

Category: Trades and Technology

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

A hands-on, material based course intended to follow up on other courses and provide an advanced introduction to concepts in a wide range of engineering disciplines. The course has a strong emphasis on design and construction. Students are expected to produce projects relevant to the learning outcomes.

Learning Resources:

While there are few learning resources specifically designed for a course of this nature, certain curriculum organizers can be related to the learning resources used in other classes.

- Drafting texts as approved by the ministry for Drafting 11/12

- Safety worksheets appropriate for use in the shop where the course is being taught. Examples include WCB Worksafe material.

- ASTM Materials Handbook

- Programming and Interfacing the PIC Microcontroller, Myke Predko
School District 39

Status: approved

School Name: Vancouver Technical Secondary

Grade Level of Course:  

10   11   X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Engineering 12A

Course Synopsis:

This is a project-oriented course designed to give future engineering students an opportunity to explore an area of engineering of interest to them in greater detail. It will emphasize teamwork, planning, and the design process. It will build upon the instructional content in Engineering 11 and 12A, but will allow the student to explore that material in more depth and application.

Learning Resources:

While there are few learning resources specifically designed for a course of this nature, certain curriculum organizers can be related to the learning resources used in other classes.

- Drafting texts as approved by the ministry for Drafting 11/12

- Safety worksheets appropriate for use in the shop where the course is being taught. Examples include WCB Worksafe material.

Grade Level of Course:  

10  

11  

12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: Presently, there are no prerequisite courses for entry to grades 11 and 12 fashion design courses.

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. Students will gain skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Learning Resources:

Students will use materials that are produced by the teacher and classroom resource books, as well as sources from popular media, the internet and/or library

Resource Books

Additional Information:

This course has been offered in the Vancouver School District for many years. Schools’ facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

Prerequisites: Presently, there are no prerequisite courses for entry to grades 11 and 12 fashion design courses.

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts, while encouraging students to explore the global diversity of design. Students will gain advanced skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Learning Resources:

Students will use materials that are produced by the teacher and classroom resource books, as well as sources from popular media, the internet and/or library

Resource Books

Additional Information:

This course has been offered in the Vancouver School District for many years. Schools’ facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

School Name: Vancouver Technical Secondary

Course Name: Film Studies 10

Course Code: YFIS 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 17, 2007

Prerequisites: Students must be enrolled in Flex Humanities program.

Course Synopsis:

Film Studies 10 is designed for the Flex Humanities Program. The course will be an introduction to film theory, film criticism, film history, and screenplay writing. Students will be exposed to famous and influential films from many different styles, genres, decades, and countries. Students will learn the basic vocabulary of film and learn to look at film from different theoretical perspectives. Students will then learn the basics of screenwriting and write several scripts both individually and collaboratively.

Learning Resources:

Primary Recommended Text:
Giannetti, Louis Understanding Movies

Primary Supporting Texts:
Ebert, Roger The Great Movies (Volume one and two)
Vineyard, Jeremy Setting Up Your Shots: Great Camera Moves Every Filmmaker Should Know
Field, Syd Screenplay: The Foundations of Screenwriting
Wallace, Pamela You Can Write a Movie
Stam, Robert Film Theory: An Introduction

Course Name: Graphic Arts 11B

Course Code: YGAR 11B

Category: Trades and Technology

Grade Level of Course:  
- □ 10
- □ 11
- x 11
- □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Students must be taking or have completed Graphic Arts 11

Course Synopsis:

This is a specialized commercial printing course in Graphic Communication, which introduces students to the processes of production work and printing technology. Students will further their understanding of how Graphic Communication touches every part of our lives with a practical emphasis on technical production skills. Students will gain knowledge of printing and bindery processes used in this industry with hands-on practise in operating the equipment. Students will be expected to meet and conform to the highest safety standards that ensure a safe and accident free environment. This course will emphasise communication skills and a collaborative approach to problem solving through practical work. Projects will require student to work in a realistic setting that mirrors a printing plant with a team approach to producing printed products.

Learning Resources:

- A variety of Graphic Arts Text books
- Manuals and Guides for available Software
- Manuals and Guides for available Equipment
- Industry Periodicals and Design Publications
- “Sample Files” of previously completed work
- Internet sites showcasing work and using sound Graphic Design

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Students must be taking or have completed Graphic Arts 12

Course Synopsis:

This advanced level course in Printing Technology will let students further develop their technical skills in machine operations and requires them to apply creativity, logic, and knowledge to solve real-life print production problems. Students will further their understanding of how Printing Technology serves our societies' need for printed products. Students will use a team approach to problem solving: looking for innovative solutions that use graphics to develop, record, and communicate in a variety of ways. Studying Printing Technology develops students' understanding of economic and business strategies, it sharpens technical skills, and it fosters collaborative work habits.

Learning Resources:

- A variety of Graphic Arts Text books
- Manuals and guides for available Software
- Manuals and guides for available Equipment
- Industry Periodicals and Design Publications
- Paper Swatches and Price Books
- "Sample Files" of previously completed work

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

The intent of this course is to provide students, particularly late arriving ESL students and students with learning disabilities, the opportunity to develop touch keyboarding proficiency and personal business skills and knowledge as a foundation for personal use and career development. Special emphasis will be placed on language development especially vocabulary acquisition appropriate to ESL students as regards their personal and career development. The course is designed to develop keyboarding and business communication skills as well as introduce the students to everyday business skills such as banking, marketing, entrepreneurship and career development. The students will be introduced to personal and business applications and will be encouraged to use their computer keyboarding skills in other curricular areas.

Rationale: As many ESL students have a reduced amount of time in the school system to develop personal and business life skills, this course provides students with the opportunity to develop and enhance these skills. In addition, keyboarding is an important communications tool for both personal and business use. The skills developed in this class will help these students with their day to day financial matters. The units on Post Secondary Transition, Marketing and Entrepreneurship will assist the students in their further Education, Career Development and Employability. Students will be encouraged to develop organization skills that will transfer into their personal and business life.

Learning Resources:

Primary Recommended Text:
Information Processing: Keyboarding, Formatting, and Application Mastery
Chiri, Kutsko, Seraydarian and Stoddard

Primary Supporting Texts:
Typing 300
Rowe, Lloyd and Winger

Supplemental Resources:
Learning Microsoft Office Professional
Blanc, Vento, Singleton and Toliver

Software Requirements: (Typical)
Microsoft Office 2000
All the Right Type
This course is offered as an introduction for students. Students who wish to continue pursuing jewellery design and manufacture may enrol in grade 11 metalwork: Art Metal/ Jewellery. Advanced wax carving, jewellery design, jewellery mold making, chain making and other related topics may be pursued.

Course Synopsis:
This course will give students an introduction to jewellery making techniques. Students will be required to design and construct their own designs using sheet metal and the Lost Wax Casting process. This course will require students to function safely in an industrial atmosphere using tools and equipment. Students will gain knowledge of industrial design and manufacturing processes used in many manufacturing fields.

Learning Resources:
1. Teacher developed handouts and resources relating specifically to units of this course.
2. Small in class library of text and reference books offer project ideas and advanced theory.
3. Internet will be used to help research project ideas and information.

Additional Information:

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 17, 2007

Prerequisites: None

Course Synopsis:

This course will deal with the theoretical and practical applications of human relations. The goal: to develop Youth Leadership to deliver a variety of community based physical recreation and sports activities for elementary school aged children in the Vancouver Technical “Family of Schools”. The time in class will be spent understanding the basic concepts of proactive leadership and how to effectively use the concepts in life and within the school environment. The students will develop peer mediation (restorative action) skills, learn how to run meetings and practice efficient public speaking. Students will have an opportunity to obtain recognized certification in coaching (NCCP Level 1 in one sport), first aid (St. John’s Ambulance), and officiating (in one sport or more). The course will place together the professional resources of the Vancouver Technical Staff, technical expertise from outside agencies and the efforts of our Community Links Team.

Learning Resources:

• The 7 Habits of Highly Effective Teens by Sean Covey
• National and regional coaching, first aid and officiating certification programs already in place
• CASAA Leadership Handbook from the Canadian Association of Student Activity Advisors
• Leadership Lessons – Lessons to Lead By from National Association of Secondary School Principals
• More Leadership Lessons from the National Association of Secondary School Principals

12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: May 3, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students with making a transition from school to a work site. It is designed for 15 -16 year old students who are currently enrolled as full-time students in the regular school program, but who have the potential to drop out of school. It is aimed at helping students to become re-oriented and motivated to complete their education by allowing them to explore career options through unpaid work experience and academic intervention in a non-traditional classroom setting. To support this transition, students will complete a mandatory 20 hours of employment readiness training and skill development prior to placement in the community. Students may complete up to a maximum of 200 hours of on-the-job-experience. The program is designed to allow students:

§ experience the roles and responsibilities of employment
§ appreciate the time constraints imposed in terms of attendance at both school and work
§ relate classroom skills and knowledge to an employment context
§ develop interpersonal skills, career awareness and maturity
§ become aware of the changing nature and demands of the workplace
§ experience the potential career opportunities available in industry
§ increase employment prospects

Additional Information:

Through this opportunity it is expected that students will:
$ learn through experience and on-the-job training in a different way from the way they learn in formal classroom learning settings; they also use what they learn differently
$ be more likely to understand underlying theory when the meaning is explored in specific situations
$ have the opportunity to consolidate previous experience and demonstrate skills
$ gain experience that makes further study more meaningful
$ have the opportunity to learn the culture of the workplace
$ learn, develop and apply skills relevant to the workplace
$ gain information and experience to enable informed career choice and planning
$ experience various work cultures
$ gain confidence
$ make contact with employers
$ gain knowledge of employers’ expectations
$ demonstrate to host employers their potential as employees

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses. In addition, students will have the opportunity to demonstrate increased initiative and to develop self-confidence by getting directly involved in an entrepreneurship education project. Students will begin to recognize the need for life-long learning as a process to expand their career options and achieve their goals as employees, employers, managers, investors, or entrepreneurs.

Prerequisites: Any Studio Art 11, a concurrent Studio Art 12 is recommended

Course Synopsis:

This course has been developed to support and prepare students for post-secondary training in art related fields. Students will examine the variety of careers available that are related to art through research and artistic processes. Students will participate in a variety of artistic processes while learning to present their work in a portfolio format, suited to the submission requirements of their chosen post-secondary facility. Students will research career opportunities in their field of interest, including the required training, availability of training in Canada and abroad, and opportunities for employment in their chosen field. Students will also have the opportunity to prepare a digital portfolio of their work for presentation to facilities. Students will explore twentieth century art movements through research, culminating in a research essay and independent project based upon their findings.

Course Name: Digital Imaging and Photography 10

Course Code: YDIP 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 17, 2007

Prerequisites: None

**Course Synopsis:**

This course has been developed to help students explore current and evolving photographic and digital imaging technologies. Students will learn to use digital cameras, computers and peripherals as image making tools. By studying the elements and principles of design, students will build the foundation to create visually exciting digital imagery, and learn to create web galleries of their work. Learning outcomes for the course are grouped under the curriculum organizers: Image Development and Design Strategies, Context, Visual Elements and Principles of Art and Design, and Materials, Technologies and Processes. As students progress through the different grade levels, more complex techniques, equipment and processes will be added to their knowledge base. In Grade 11 and 12, students will build upon prior knowledge and complete tasks with more complex techniques, equipment and software.

Course Name: Digital Imaging and Photography 11

Course Code: YDIP 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 17, 2007

Prerequisites: None

Course Synopsis:

This course has been developed to introduce students to digital imaging technologies. Students will learn to use digital cameras, computers and peripherals as image making tools. Content will reflect a more mature approach to socially relevant issues and developing personal imagery. Techniques will include editing, enhancing and creating images and creating presentations using digital cameras, computers, and peripherals. Students will gain an understanding of various applications of digital imaging, providing them the opportunity to pursue career options in related fields. Learning outcomes for the course are grouped under the curriculum organizers: Image Development and Design Strategies, Context, Visual Elements and Principles of Art and Design, and Materials, Technologies and Processes.

Course Synopsis:

This course has been developed to help senior students explore digital imaging technologies. Students will learn to use digital cameras, computers and peripherals as image making tools. Content will reflect a more individualized approach to developing imagery digitally. Students will learn advanced photographic techniques, and further their knowledge of editing, enhancing and creating images using digital cameras, computers, and peripherals. Students will further develop a portfolio that reflects their digital imaging skill development and knowledge in preparation for post secondary admission with particular emphasis on career options. Learning outcomes for the course are grouped under the curriculum organizers: Image Development and Design Strategies, Context, Visual Elements and Principles of Art and Design, and Materials, Technologies and Processes.

Note: The organizational structure and how it is implemented is dependent upon each school’s facilities and the teacher expertise.

School Name: Windermere Community Secondary

Course Name: Fashion Design 12A

Course Code: YFASD 12A

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  
11  
12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Presently, there are no prerequisite courses for entry to grades 11 and 12 fashion design courses.

Course Synopsis:

This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. Students will gain skills and knowledge in the technical aspects of pattern making through flat pattern manipulations, pattern drafting techniques, and/or computer generated techniques. Students will complete a process from original design ideas to pattern construction, to prototypes of designs, to finished garments. Learning outcomes for the course are grouped under the units below. This approach supports student skill development and encourages meaningful methods of designing, adapting, modifying, constructing, and evaluating garments.

Learning Resources:

Students will use materials that are produced by the teacher and classroom resource books, as well as sources from popular media, the internet and/or library

Resource Books

Additional Information:

This course has been offered in the Vancouver School District for many years. Schools’ facilities, equipment and resources will vary. Teacher training is essential. In the past, successful students have been accepted to Kwantlen University College, Ryerson Polytechnic University, Parson’s School of Design, FIT and etc.

Course Code: YLEDV 10

Category: Health and Human Services

Grade Level of Course:  
- [ ] 10  
- [x] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 3, 2004

Prerequisites: None, except an interest in Graphic Design and Imagery

**Course Synopsis:**

This course will deal with the theoretical and practical applications of human relations. The time in class will be spent understanding the basic concepts of proactive leadership and how to effectively use the concepts in life and within the school environment. The students will develop peer helping skills, learn how to run meetings, practice efficient public speaking, as well as be involved in the promotion and running of school events. They will also be expected to focus on school and community relations along with raising awareness of the Windermere Leadership Program and its benefits.

**Learning Resources:**

- The 7 Habits of Highly Effective Teens by Sean Covey
- CASAA Leadership Handbook from the Canadian Association of Student Activity Advisors
- Leadership Lessons – Lessons to Lead By from National Association of Secondary School Principals
- More Leadership Lessons from the National Association of Secondary School Principals

**Additional Information:**

This course is part of a District Specified Alternative Program running Grade 8 through 12.

12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April 13, 2005

Prerequisites: Physical Education 10

Course Synopsis:

This half-year course will deal with fitness and healthy living. While improving their present level of fitness, students will acquire knowledge about fitness, training and maintaining an active, healthy lifestyle. Topics will include basic musculoskeletal anatomy, training techniques for cardiovascular fitness, flexibility, balance and strength (including modern core strength training), myths and benefits of fitness training, partner training, record keeping, motivation and nutrition. Students will be expected to design their own training programs that fit into their present lives and can be adapted to suit their future lives.

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April 13, 2005

Prerequisites: Physical Education 10

Course Synopsis:

This is a half-year course, the second of two courses offered consecutively for boys in grade 11 or 12. While the first course would focus primarily on fitness, the emphasis of this course is games and sports. The goal of promoting healthy attitudes and regular physical activity as important parts of each student's lifestyle will be observed, as a variety of games and sports are explored, affording an opportunity to analyse and improve physical competence, maintain personal fitness, and develop effective leadership skills.

Category: Trades and Technology
Grade Level of Course: 10 11 12
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 29, 2004
Prerequisites: Familiarity with computers

Course Synopsis:
This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 5, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:
Some A+ Certification and other Computer Technical manuals.

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Course Synopsis:

The Leadership 12 Theory and Practice course is founded on the belief that students want to become meaningfully involved in their school community. Students leading students is the key to unlocking the potential of leadership within all students. Leadership means having an intentional positive influence on the lives and behaviours of others. Through the study and practice of leadership, students learn to lead effectively, to foster a positive school environment and to mentor others seeking leadership roles.

**Course Synopsis:**

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Course Synopsis:
The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Learning Resources:

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

This course will focus on an introduction to basic black and white photography. Students will be introduced to 35 mm camera operations and darkroom techniques in printing negatives and prints. Students will be encouraged to develop basic design elements and personal imagery through social, political, cultural and historical context.

Learning Resources:

Subscriptions to photo magazines, technical, historical and contemporary reference videos, books, slides and image bank. T.V. and VCR. Internet access for research purposes.

Additional Information:

Darkroom: (available)
Minimum of 10 enlarger stations which include:
· enlarger with adequate lens
· glass plate
· easel
· timer
· grain finder
· set of filters and gray card

Classroom: (available)
Course Synopsis:

The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:

A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets.

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner. Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  

☐ 10  
☒ 11  
☐ 12

Number of Course Credits: 4

Number of Hours of instruction:

Date Approved:  April 29, 2004

Prerequisites:  Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Course Code: YSCPA 11
Category: Fitness and Recreation
Grade Level of Course: 10 11 12
Number of Course Credits: 4
Number of Hours of instruction: approx. 10
Date Approved: April 28, 2005
Prerequisites: P.E. 10

Course Synopsis:
This class provides an overview of the concepts of physical fitness. This includes the study of health- and skill-related fitness components, an assessment of personal physical fitness levels, and the effects of exercise on fitness. Students will be asked to apply the course’s theory into a practical setting as they are given an opportunity to perform a variety of conditioning methods as well as experience the design and application of an individualized exercise program. Additionally, students will also benefit from the possibility of acquiring dual credits: both the four gained towards their high school graduation, and those gained for an equivalent first-year course at college or university.

Learning Resources:
Concepts of Physical Fitness – Active Lifestyles for Wellness by Corbin, Welk, Corbin, and Welk

Additional Information:
Typical P.E. facilities (Gymnasium, playing fields, weight room, classroom) and equipment.

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 29, 2004

Prerequisites:  None

Course Synopsis:

Transportation, Power and Energy deals with the relationships between power, energy, and the movement of objects and people. In TPE 10 students will be involved in the design, production and testing as they find and model solutions to problems.

During the year students will be developing a wide range of skills through hands-on technology activities. They will be required to communicate ideas to others in words and through graphics. They will also be involved in developing ways of expressing their ideas through assignments, posters, models, drafting, projects, and computer applications. They will have the opportunity to integrate the list below into assignments, projects and skills throughout the school year.

- Design and Drafting Unit
- Computer Aided Design Programs
- Engineering Unit
- Fabrication Unit
- Hand Tool and Machinery Safety

Students build projects to learn the related principles and theory. The project work introduces students to the problem solving approach used to create, repair and maintain technologically related items. Electric motor construction, crash test models, bridge building and testing, boat design and many other practical activities that relate to transportation, application of power, and energy implications used to drive these technologies. This course meets the requirements to obtain 4 credits in Applied Skills.

Learning Resources:

Various materials available from wood, metal, drafting, electronics.

Additional Information:

Light construction tools (band saw, drill press, sanders, etc.), computer access, good lighting, work tables, hand tools.

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Course Synopsis:

This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 5, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:

Some A+ Certification and other Computer Technical manuals.

Additional Information:

Lab and storage areas which are already in place. Serviceable computers, assorted modules and peripherals which are being accumulated from discarded equipment.

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Baking 11 is a course in which the skills and techniques involved in baking are researched and developed. Emphasis will be placed on baking theory, practical knowledge, preparation skills, time management, and the production of products. Students will study the principles involved in each method and the effect they have on the finished products. Functions of ingredients, nutritional value, and the effect of ingredient quality on the final product will also be discussed. Students will also research and test their own recipes and evaluate them based on product standards learned in the course.

Course Synopsis:

The Fine Arts and Technology Education reflect a human need to understand and change our world. Fine Arts and Technology education expresses and communicates human experiences. Students use their thoughts and feelings to design artifacts which meet personal and social needs.

In this course students will combine wood, metals, and stained glass to create projects with an emphasis on creative expression, the elements and principals of design, form over function and craft production. Some activities could include woodcarvings, Intarsia, metal sculpture, jewelry boxes and picture frames using any combination of materials.

Shop safety using the various tools and equipment used for the course is a main part of instructional focus. This course meets the Fine Arts or Applied Skills graduation requirement.

Additional Information:

This course will be taught in a room with no computers. The focus will be on hand drawing skill and a sketchbook is required.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Level 1 ESL

Course Synopsis:

This course supports and encourages ESL students in developing specific English language skills and cultural awareness. ESL students will be placed in situations which will maximize their opportunities to learn standard Canadian English, to interact with their peers, and to exchange cultural information. These needs must be met in such a way that, as they achieve a level of fluency in English commensurate with their age and ability, they will develop mutual respect among different cultures, be able to integrate in Canadian society and develop their academic potential to the fullest extent.

Prerequisites: Photography 11

Course Synopsis:

The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:

A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

School Name: Burnaby Mountain Secondary

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course: 10 □ 11 X 12 □

Number of Course Credits: 4

Number of Hours of Instruction:

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Course Synopsis:
The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Learning Resources:

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

**Course Synopsis:**

Academic Strategies is intended for students who are experiencing difficulties with the literacy skills needed to be successful in academic subjects. The course is designed to be taken concurrently with the students’ regular English class. The main objectives of the course are to enhance reading, writing, and organizational study skills, as well as the synthesis of critical thinking skills for the purposes of test taking, especially the Social Studies 11 Provincial examination. Students will be moving towards the independent utilization of strategies and techniques to fulfill various reading and writing purposes. Students in grade 11 Academic Strategies will consciously begin to choose, apply and evaluate various reading and writing strategies before, during and after reading for a chosen purpose. The intended outcome is to develop their success in comprehending and responding to text. The course will provide:

- Explicit reading instruction with emphasis on vocabulary development and reading comprehension strategies
- Explicit writing instruction with emphasis on the basic units of sentences, paragraphs and essays
- An opportunity for sustained silent reading for pleasure

**Learning Resources:**

Books on tape, high interest / low vocabulary reading materials, class sets of texts focusing on reading and writing strategies, newspaper subscription and a subscription to Maclean’s In-class Program

**Additional Information:**

Classroom space, assistive technology, overhead projector and screen, comfortable lounge area and a dual tape and CD player

Course Name: Animation 11

Course Code: YAN 11

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [x] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Drawing and Painting 9 or 10 recommended

Course Synopsis:

An introductory course in classical animation. Students will be introduced to the principles of animation and drawing for animation. Students will learn to shoot their work on and off computer and use Macintosh computer platform to evaluate and display their completed work. Students will also view animation from a variety of periods and research historical developments related to the animation field. This course is intended for students wishing to explore the process of animation as well as for those intending to continue their education in the field of animation or computer gaming.

Learning Resources:

Col-erase coloured pencils, 11.5 x 14 bond paper, animation cell, animation cell paints, drawing paper, modeling clay, water colour paint, permanent felt markers, general art supplies.

Additional Information:

Room with tables for drawing, adequate storage for student work; Macintosh eMac computer with DVD and CD burner, 160 gigabyte external hard drive, Macro Media Flash, Final Cut Pro, Adobe Photoshop, pencil test software i.e. Toon Boom, scanner, camera stand with digital video camera, Acme paper punch, Acme registration peg bars, light tables, Wacom drawing tablet for computer drawing, laser printer, tape recorder with microphone, copywrite free music and sound effects library, CD player.

Course Code: YAPT 11

Category: Trades and Technology

Grade Level of Course:  ☒ 10  ☒ 11  ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Familiarity with computers

Interview with Facilitator(s)

Course Synopsis:

This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 5, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:

Some A+ Certification and other Computer Technical manuals.

Additional Information:

Lab and storage areas which are already in place. Serviceable computers, assorted modules and peripherals which are being accumulated from discarded equipment.

Course Name: Autobody 11

Course Code: YAB 11

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Mechanics 10 recommended

Course Synopsis:

This course has been developed to support employment opportunities in the autobody industry. Students will learn current techniques in repairing body panels to the primer stage. Learning outcomes for the course are grouped into nine major topics:

1. Safety
2. Hand Tools
3. Oxyacetylene Spot Welding
4. MIG Welding
5. Abrasives
6. Plastic Fillers
7. Basic Damage Analysis
8. Metal Straightening
9. Refinishing Materials

The auto body industry is a growth industry. Many students gain employment from this course or attend workplace training at Vancouver Community College.

Learning Resources:

Textbook and supplies

Additional Information:

Autobody shop, tools and equipment including a paint booth.

Course Name: Baking 11

Course Code: YBK 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

**Course Synopsis:**

Baking 11 is a course in which the skills and techniques involved in baking are researched and developed. Emphasis will be placed on baking theory, practical knowledge, preparation skills, time management, and the production of products. Students will study the principles involved in each method and the effect they have on the finished products. Functions of ingredients, nutritional value, and the effect of ingredient quality on the final product will also be discussed. Students will also research and test their own recipes and evaluate them based on product standards learned in the course.

**Learning Resources:**

Computer, Home Economics equipment, reference books, text books

**Additional Information:**

Home Economics classrooms, lab rooms, equipment, specialized baking equipment

Course Name: Beginning Band 11

Course Code: YBB 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Beginning Band 11/12 focuses on developing the knowledge, skills and attitudes student require to perform in instrumental ensembles. In these courses, students have the opportunities to:
- Develop the techniques required to play instruments
- Develop musical literacy
- Develop an understanding of the aesthetic qualities of music
- Perform a variety of repertoire
- Examine the various roles and purposes of instrumental music in society

Beginning Band 11/12 is a performance based course designed to give students the opportunity to derive educational experiences from participating in an instrumental music ensemble. This ensemble experience allows students to develop an understanding of the aesthetic and technical qualities of an instrumental ensemble. Students develop their abilities in three areas common to all fine arts curricula: Skills and Techniques, Expression, and Context.

Through the process of performance, students will develop the concepts and skills that will enable them to develop their musicianship, their ability to listen and appreciate all music and their ability to express themselves emotionally through music performance. Finally, through participation in rehearsals, students gain confidence, self-esteem and personal discipline.

Learning Resources:

Music and music method books for the students.

Additional Information:

Music Room:
Must be acoustically built or adapted for band rehearsals.
Students must have access to a band instrument.
Music stand and chairs for all students
Classroom percussion set that includes a minimum of a snare drum and a bass drum.

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites:  

Course Synopsis:

The course is intended for senior students who wish to develop, strengthen and enhance their writing skills in order to write effectively at the level expected of them in Grades 11 and 12. The course will also prepare students for the written components of the English 12 provincial examination. Students will be introduced to the major components of essay writing, the various essay types and the writing process itself. It is expected that, through this course, students will gain an awareness of their abilities and potential as writers and, by using the tools learned, will develop confidence in their ability to handle any writing tasks presented to them in high school and post-secondary life.

Learning Resources:

Writing textbook that covers the various elements of writing and types of essays, and contains models of these various essay types

Additional Information:

Overhead projector, Computer lab access (optional)
Course Synopsis:

Fine Arts and Technology Education reflect a human need to understand and change our world. It also expresses and communicates human experiences. Students use their thoughts and feelings to design artifacts which meet personal and social needs.

In this course, students will combine wood, metals, and stained glass to create projects with an emphasis on creative expression, the elements and principals of design, form over function and craft production. Some activities could include woodcarvings, Intarsia, metal sculpture, jewelry boxes and picture frames using any combination of materials.

Shop safety using the various tools and equipment used for the course is a main part of instructional focus. This course meets the Fine Arts or Applied Skills graduation requirement.

Additional Information:

This course will be taught in a room with no computers. The focus will be on hand drawing skill and a sketchbook is required.

Category: Business and Applied Business

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 115

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Course Synopsis:

Desktop Publishing 12 builds on the content of Desktop Publishing 11 and further prepares students who may be interested in entering the digital publishing industry. The topic of ethical content as it relates to printed material for public distribution will be discussed. DTP 12 is primarily a practical course and pupils will concentrate on developing skills in using (1) advanced use of graphic design, (2) the Macintosh computer, along with peripherals, (3) software programs for desktop publishing. Students will be given assignments to explore the use of the elements and principles of design. Students will be expected to work independently, developing their own ideas, and research techniques used in the industry as well as contribute to school newsletters and publications

Learning Resources:

Ink cartridges for printers, bond paper for printers, photo quality paper for colour prints, zip discs, blank CD-R and CD-RW discs, practice layout sheets

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets, Minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 3.2 mega-pixel digital camera, flat bed scanner, colour inkjet or bubble jet printer, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, and a word processing software.

Course Synopsis:

The Leadership 12 Theory and Practice course is founded on the belief that students want to become meaningfully involved in their school community. Students leading students is the key to unlocking the potential of leadership within all students. Leadership means having an intentional positive influence on the lives and behaviours of others. Through the study and practice of leadership, students learn to lead effectively, to foster a positive school environment and to mentor others seeking leadership roles.

Prerequisites: None

Course Synopsis:

The Peer Helping 11 Theory and Practice course is founded on the belief that only when understanding of a concept is internalized, can a student go on to explain the same concept to others. This course empowers those students who have been selected as mentors to take on a true leadership role within the program. Not only will they look at the topics covered within the program, they will help develop the content and method whereby this information will be disseminated to their school community. This course empowers the students to truly take ownership of this program and its impact on the school community.

Course Synopsis:

The Peer Mentoring 12 Theory and Practice course examines the underpinnings of the mentorship model and addresses the heart of why this type of program works. Students will examine and implement strategies which will help them develop their skills as mentors and further, take on the role of communicating the necessity of these skills and teaching these skills to other mentors. This course empowers the students to truly take ownership of this program and its impact on the school community.

Course Synopsis:
The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student-run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:
A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets.

Additional Information:
Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  
- X 11

Number of Course Credits: 4

Number of Hours of instruction:

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:
Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers
the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in
more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further
at a post secondary institution. This course focuses on developing student skills that will help them succeed in a
post secondary setting. This will include: critical thinking, essay writing, research and experimental methods,
academic reading, and oral presentation skills.

**Course Synopsis:**

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

**Learning Resources:**

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

Prerequisites: Familiarity with computers, Interview with Facilitator(s)

Course Synopsis:

This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 4, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:

Some A+ Certification and other Computer Technical manuals.

Course Synopsis:

Baking 11 is a course in which the skills and techniques involved in baking are researched and developed. Emphasis will be placed on baking theory, practical knowledge, preparation skills, time management, and the production of products. Students will study the principles involved in each method and the effect they have on the finished products. Functions of ingredients, nutritional value, and the effect of ingredient quality on the final product will also be discussed. Students will also research and test their own recipes and evaluate them based on product standards learned in the course.

Learning Resources:

Computer, Home Economics equipment, reference books, text books

Additional Information:

Home Economics classrooms, lab rooms, equipment, specialized baking equipment

Status: approved

School Name: Burnaby South Secondary

Course Name: Baking 12

Course Code: YBK 12

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: It is preferred that they have taken Baking 11 or Food Studies 11

Course Synopsis:

Baking 12 is a course that focuses on emphasizing more advanced skills and techniques of baking. This course will be valuable for anyone considering a career as a pastry chef or seeking employment in a bakery, restaurant, or catering service. The emphasis will be on baking theory, practical knowledge, preparation skill, time management, and production of products. Presentation is of utmost importance and students will be encouraged to use their creative and artistic skill to create baking masterpieces. Students will be working with the Catering Class at times and be involved with the preparation of desserts for luncheons and other school functions. Prior to the Christmas holidays students will be preparing a care package of holiday baking for an organization of their choosing within the community; for example, The Salvation Army, Old Age Home or a Women's shelter.

School Name: Burnaby South Secondary

Course Name: Beginning Band 11

Course Code: YBB 11

Category: Fine Arts, Design, and Media

Grade Level of Course: □ 10  ● 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

**Course Synopsis:**

Beginning Band 11/12 focuses on developing the knowledge, skills and attitudes student require to perform in instrumental ensembles. In these courses, students have the opportunities to:
- Develop the techniques required to play instruments
- Develop musical literacy
- Develop an understanding of the aesthetic qualities of music
- Perform a variety of repertoire
- Examine the various roles and purposes of instrumental music in society

Beginning Band 11/12 is a performance based course designed to give students the opportunity to derive educational experiences from participating in an instrumental music ensemble. This ensemble experience allows students to develop an understanding of the aesthetic and technical qualities of an instrumental ensemble. Students develop their abilities in three areas common to all fine arts curricula: Skills and Techniques, Expression, and Context.

Through the process of performance, students will develop the concepts and skills that will enable them to develop their musicianship, their ability to listen and appreciate all music and their ability to express themselves emotionally through music performance. Finally, through participation in rehearsals, students gain confidence, self-esteem and personal discipline.

**Learning Resources:**

Music and music method books for the students.

**Additional Information:**

Music Room:
Must be acoustically built or adapted for band rehearsals.
Students must have access to a band instrument.
Music stand and chairs for all students
Classroom percussion set that includes a minimum of a snare drum and a bass drum.

School Name: Burnaby South Secondary

Course Name: Broadcast Communications 11

Course Code: YBC 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: TVP 10 or 11, Media Arts 9/10 or some technical experience, Drama 9/10, introduction to technology

Course Synopsis:

What are the techniques of movie and television entertainment, and how are they applied to achieve the end effect(s)? Everything that goes into a “production” must be carefully planned ahead of time in order to convey the message(s) as effectively as possible. This includes lighting, sound, camera angles, music, graphics, special effects, transitions, editing, and so on. The instructional units included are designed to give participants additional awareness of many of these aspects through hands-on self-directed lab experiences. The coursework is also designed to build upon the materials from Broadcast Communications 10. The instruction will consist of short teacher lectures and demonstrations, followed by students performing a variety of production activities. The end result is to produce entertaining narratives on video for school and other audiences.

Hands-on activities will drive most of the curriculum and reinforce the major learning outcomes. An emphasis on applied problem solving and creative thinking will be present in most of the instruction and activities. Guest speakers and field experiences will support units of study, career awareness and serve to enhance instruction and learning. Work experience placements will be used to enhance the student experience.

Learning Resources:

A variety of SVHS, VHS, Mini DV tapes, a selection of audio & video cables, internet access, text materials

Additional Information:

* a full size classroom for instructional purposes
* a full size television studio for production purposes
* a lighting grid system, set materials
* a 3 chip studio 2 camera system
* a teleprompt system
* an in house communications system
* a professional switching system
* equipment storage/lock up
* several linear A/B roll & several non-linear editing suites
* A "live" broadcast system or the ability to broadcast from the television studio to the school.
* a fleet of at least 6 digital and 6 non-digital cameras
* 12 tripods
* 12 microphones
* XLR cables and storage

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Broadcast Communications 11, TVP 10 or 11

Course Synopsis:

This course provides an exciting and motivating introduction to the world of television entertainment and production. Many areas of the entertainment world and production will be covered. Camera operations, storyboarding/scripting, editing, audio, lighting, hosting, interviewing, directing, historical and ethical issues and safety. Much of the evaluation will be practical and ongoing throughout the year. There will be some written quizzes and taping assignments as well as opportunities to do volunteer work in the school and community. Through assigned readings, the viewing of numerous videos, and the completion of a series of video assignments, students are expected to acquire a thorough understanding of the basic elements of video production. This understanding should include the following areas:

- General audio techniques
- Camera placement and operations.
- The use and characteristics of the various video and audio recording media.
- Lighting techniques, including existing light, bounced light and three-point lighting.
- The differences between standard-definition digital and linear production.
- Elements of effective visual composition.
- Editing techniques.
- A general understanding of postproduction, including associated audio and video equipment.
- The ability to critique the strengths and weakness of video productions.

Learning Resources:

A variety of tapes, SVHS, VHS, Mini DV, a selection of video & audio cables, a variety of TV production text books

Additional Information:

* a full size classroom for instructional purposes
* a full size television studio for production purposes
* a studio grid system for lighting
* a 3 chip studio camera system
* a studio communications system
* a professional video switching system
* equipment storage/lock up
* several (linear and) non-linear editing suites
* a broadcast system with the ability to broadcast to a part of or the whole school or a district/community channel
* a fleet of at least 6 digital and 6 non-digital cameras
* a fleet of tripods, microphones
* some field lighting and sound equipment

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 29, 2004

Prerequisites:  None

Course Synopsis:

This course is designed to give students the opportunity to develop their individual and collective sense of social responsibility through the acquisition and application of leadership skills and theory. Students will develop lifelong skills in the areas of self-image, goal-setting, time management, public speaking, school and community service, public relations, conflict resolution and an understanding of various leadership styles. This will allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Number of Hours of instruction: 100

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

The Leadership 12 Theory and Practice course is founded on the belief that students want to become meaningfully involved in their school community. Students leading students is the key to unlocking the potential of leadership within all students. Leadership means having an intentional positive influence on the lives and behaviours of others. Through the study and practice of leadership, students learn to lead effectively, to foster a positive school environment and to mentor others seeking leadership roles.

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:
This course will focus on an introduction to basic black and white photography. Students will be introduced to 35 mm camera operations and darkroom techniques in printing negatives and prints. Students will be encouraged to develop basic design elements and personal imagery through social, political, cultural and historical context.

Learning Resources:
Subscriptions to photo magazines, technical, historical and contemporary reference videos, books, slides and image bank. T.V. and VCR. Internet access for research purposes.

Additional Information:

Darkroom: (available)
Minimum of 10 enlarger stations which include:
· enlarger with adequate lens
· glass plate
· easel
· timer
· grain finder
· set of filters and gray card

Classroom: (available)

Camera Equipment: (available)
SLR cameras with lens (50 mm and 35-70 mm). Lens caps and lens UV protective lens caps. Camera batteries. Tripods.

Recommended Equipment: (not available, but affordable)

Prerequisites: Photography 11

Course Synopsis:

The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:

A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  
10  
X 11  
12

Number of Course Credits: 4

Number of Hours of instruction:

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.
Learning Resources:
- Psychology, (David Myers), 4th, 5th, 6th, 7th editions
- Study Guide for Myers
- Activities Handbook for Teaching Psychology (Benjamin and Lowan, 1981)

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Grade Level of Course:  ☒ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Familiarity with computersInterview with Facilitator(s)

Course Synopsis:

This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 4, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:

Some A+ Certification and other Computer Technical manuals.

Additional Information:

Lab and storage areas which are already in place. Serviceable computers, assorted modules and peripherals which are being accumulated from discarded equipment.

Grade Level of Course:  ☑️ 10  ☑️ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Must be enrolled in the Young Parent Program (Teen Parenting Program)

Course Synopsis:

The Teen Parenting 11 course was developed in consultation with the B.C. Alliance Concerned for Early Pregnancy and Parenthood (BCACEPP), the Young Parent Program Education Committee and Community Health Personnel. This course was designed to give pregnant and parenting students the opportunity to work and interact with each other in a supportive learning environment to develop a sense of responsibility as a parent through the acquisition and application of effective parenting skills. Students will develop life-long skills in the areas of cooperative planning and problem solving strategies, positive parenting and coping abilities, anger management, financial planning, time management, food safety and meal planning and first aid. At the same time, they will gain an increased awareness and utilization of community resources.

Learning Resources:

Course material specific to the target group and taught by the program teacher and/or facilitated by the Youth and Childcare Worker

School Name: Burnaby South Secondary

Course Name: Television Production 11

Course Code: YTVP 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: TVP 10, Media Arts 9 or 10, Electronics 9, Introduction to Technology 9, or some technical experience

Course Synopsis:

This course provides an exciting and motivating introduction to the world of television production. Many areas of “production” will be covered. Camera operations, storyboarding/scripting, editing, audio, lighting, hosting, interviewing, directing, historical and ethical issues and safety. Much of the evaluation will be practical and ongoing throughout the year. There will be some written quizzes and taping assignments as well as opportunities to do volunteer work in the school and community. Through assigned readings, the viewing of numerous videos, and the completion of a series of video assignments, students are expected to acquire a thorough understanding of the basic elements of video production. Using a dynamic group process, the students will be involved with and produce & provide news programming for the school morning news show, RATV. This understanding should include the following areas:

- General audio
- Camera placement and operations
- The use and characteristics of the various video and audio recording media.
- Lighting techniques, including existing light, bounced light and three-point lighting
- The differences between standard definition digital and linear production
- The elements of effective visual composition
- Editing techniques, linear & non-linear
- A general understanding of postproduction, including associated audio and video equipment
- The ability to critique the strengths and weakness of video productions, their own and others

Learning Resources:

A variety of tapes, SVHS, VHS, Mini DV, a selection of video & audio cables, a variety of TV production text books
Additional Information:

* a full size classroom for instructional purposes
* a full size television studio for production purposes
* a lighting grid system, set materials
* a 3 chip studio 2 camera system
* a teleprompt system
* an in house communications system
* a professional switching system
* equipment storage/lock up
* several linear A/B roll & several non-linear editing suites
* a "live" broadcast system or the ability to broadcast from the television studio to the school.
* a fleet of at least 6 digital and 6 non-digital cameras
* 12 tripods
* 12 microphones
* XLR cables and storage

Course Name: Television Production Services 10

Course Code: YTVS 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Media Arts 9, Drama 9, Electronics 9, Intro to Technology 9

Course Synopsis:

What are the techniques of videotaping, and how are they applied to achieve the end effect? Everything that goes into a video must be very carefully planned ahead of time so that the message can be conveyed as effectively as possible. This includes lighting, camera angle, background music, and transitions between scenes.

The instructional units included are designed to give the participants awareness of these aspects of video, through hands-on experiences. The course will consist of short teacher lecture and demonstration preparation sessions followed by students performing a variety of video production skills. Hands-on activity-based units will drive most of the curriculum and reinforce major learning areas. An emphasis on applied problem solving and creative thinking will be present in most units of instruction. Guest speakers and field visitations will support units of study and career awareness.

Learning Resources:

A variety of tapes, SVHS, VHS, Mini DV, a selection of video & audio cables, text on TV production.

Additional Information:

- A full size classroom for instructional purposes.
- A full size television studio for production purposes.
- A grid system for lighting.
- A 3 chip studio camera system.
- A communication system.
- A professional switching system.
- Equipment storage/lock up.
- Several linear & non-linear editing suites. A broadcast system with the ability to a part of the school.
- A fleet of at least 6 digital and 6 non-digital cameras, tripods, microphones.

School Name: Burnaby South Secondary

Course Name: Transportation, Power & Energy 10

Course Code: YTPAE 10

Category: Trades and Technology

Grade Level of Course:  
10  
11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Transportation, Power and Energy deals with the relationships between power, energy, and the movement of objects and people. In TPE 10 students will be involved in the design, production and testing as they find and model solutions to problems.

During the year students will be developing a wide range of skills through hands-on technology activities. They will be required to communicate ideas to others in words and through graphics. They will also be involved in developing ways of expressing their ideas through assignments, posters, models, drafting, projects, and computer applications. They will have the opportunity to integrate the list below into assignments, projects and skills throughout the school year.

- Design and Drafting Unit
- Computer Aided Design Programs
- Engineering Unit
- Fabrication Unit
- Hand Tool and Machinery Safety

Students build projects to learn the related principles and theory. The project work introduces students to the problem solving approach used to create, repair and maintain technologically related items. Electric motor construction, crash test models, bridge building and testing, boat design and many other practical activities that relate to transportation, application of power, and energy implications used to drive these technologies. This course meets the requirements to obtain 4 credits in Applied Skills.

Learning Resources:

Various materials available from wood, metal, drafting, electronics.

Additional Information:

Light construction tools (band saw, drill press, sanders, etc.), computer access, good lighting, work tables, hand tools.
As the TPE program utilizes materials and processes from a variety of fabrication and design environments, it is necessary that the delivery of the coursework have access to a full spectrum of regular secondary fabrication facilities. Not only does the program have machinery requirements but computer and software requirements as well. Though there are some special environment and equipment requirements for TPE program, by and large these are already in place as part of other Wood, Construction, Metal, and CAD Drafting programs.

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

TPE 11 deals with the relationship between energy, power, and transportation. In this course, students will learn about the fundamental science concepts of TPE. With these concepts, they will then design and build numbers of projects that will further increase their understanding of TPE. Students will build projects to solve challenges and to compete against other class members.

Some activities include:
- windmill models
- small engine
- man powered vehicle
- futuristic transportation
- electrical car

The metal shop will be the main lab facility; therefore, students will be required to work safely and responsibly within an industrial atmosphere. This course meets the requirements to obtain 4 credits in Applied Skills.

Additional Information:

Category: Trades and Technology

Grade Level of Course: 10 ☐ 11 ☐ 12 ☑

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 28, 2005

Prerequisites: 1) TPE 11

Course Synopsis:

Transportation-Power-Energy 12 (TPE) TPE 12 deals with the relationship between transportation, power, and energy. In this course, students will learn about the fundamental science concepts of TPE. With these concepts, students will then design and build numbers of projects that will further increase their understanding of TPE. Students can build on their concepts learned in TPE 11 and apply these principles and processes to more complex activities at this next level. Students will design and construct projects to solve challenges and to compete against other class members in both an individual and group environment.

Some activities include:
- Studying hydraulic mechanics
- Steam engine mechanics
- Developing, designing, and producing finished robotics.
- Studying heat energy and looking at how it affects different metals
- Studying hardness of materials and metallurgy and looking at the relationship between these properties and how their qualities are used for different modes of transportation.

The metal shop will be the main lab facility; therefore, students will be required to work safely and responsibly within an industrial atmosphere.

This course meets the requirements to obtain 4 credits in Applied Skills.

Learning Resources:

Resources will come from block funding and student fees

Additional Information:

As the TPE program utilizes materials and processes from a variety of fabrication and design environments, it is necessary that the delivery of the coursework have access to a full spectrum of regular secondary fabrication facilities. Not only does the program have machinery requirements but computer and software requirements as well. These, however, can be readily found in current Technology Education classes in Burnaby.

Though there are some special environment and equipment requirements for TPE program, by and large these are already in place in Burnaby Technology Education rooms as part of other Wood, Construction, Metal, and Cad/Drafting programs. What is not, can be acquired through annual purchasing, Casino and other fund raising.

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11, and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Learning Resources:

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

Prerequisites: 1) recommendation from a teacher, counselor, administrator and/or CPAdvisor 2) application submission

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10B is the second of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. This course will enable students to build upon and refine their knowledge and skills learned in the previous course. Students who successfully complete Workplace Training 10B can choose to continue in Workplace Training 12C. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Number of Course Credits: 4

Number of Hours of instruction: 115

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Grade Level of Course:  
☐ 10  ☑ 11  ☐ 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 29, 2004
Prerequisites: Students will be below grade level in reading and writing.

Course Synopsis:

Academic Strategies is designed to be taken concurrently with the students' regular English class. It will enhance reading, writing and organizational/study skills.

The course will provide:

· Explicit reading instruction with emphasis on vocabulary development, fluency and reading comprehension,
· A variety of comprehension strategies that will increase understanding of content in the various academic subjects,
· Sustained silent and oral reading,
· A published spelling program,
· Opportunity for recreational reading,
· Direct instruction on the reading process (pre, during, and post) which will help students become strategic readers.

Learning Resources:

Books on tape, fiction, non-fiction books, high interest/low vocabulary materials, software.

Additional Information:

Learning Centre/Classroom
Assistive technology
**Course Synopsis:**

Academic Strategies is intended for students who are experiencing difficulties with the literacy skills needed to be successful in academic subjects. The course is designed to be taken concurrently with the students' regular English class. The main objectives of the course are to enhance reading, writing, and organizational study skills, as well as the synthesis of critical thinking skills for the purposes of test taking, especially the Social Studies 11 Provincial examination. Students will be moving towards the independent utilization of strategies and techniques to fulfill various reading and writing purposes. Students in grade 11 Academic Strategies will consciously begin to choose, apply and evaluate various reading and writing strategies before, during and after reading for a chosen purpose. The intended outcome is to develop their success in comprehending and responding to text. The course will provide:

- Explicit reading instruction with emphasis on vocabulary development and reading comprehension strategies
- Explicit writing instruction with emphasis on the basic units of sentences, paragraphs and essays
- An opportunity for sustained silent reading for pleasure

**Learning Resources:**

Books on tape, high interest / low vocabulary reading materials, class sets of texts focusing on reading and writing strategies, newspaper subscription and a subscription to Maclean's In-class Program

**Additional Information:**

Classroom space, assistive technology, overhead projector and screen, comfortable lounge area and a dual tape and CD player
Classroom space, assistive technology, overhead projector and screen, comfortable lounge area and dual tape and CD stereo

Date Approved: April 28, 2005

Prerequisites: Nil

Course Synopsis:

This course has been developed to support employment opportunities in the automotive industry. Students will learn and demonstrate an understanding of automotive theory and practical repair and maintenance of various automotive systems, as well as personal safety habits suitable for use in today’s vast automotive industry.

Learning Outcomes for the course are grouped into nine major topics:

1. Safety
2. Hand Tools
3. Use of various shop equipment
4. Engine theory
5. Fuel systems
6. Lubrication systems
7. Cooling systems
8. Electrical systems
9. Brake systems

Learning Resources:

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Beginning Band 11/12 focuses on developing the knowledge, skills and attitudes student require to perform in instrumental ensembles. In these courses, students have the opportunities to:

- Develop the techniques required to play instruments
- Develop musical literacy
- Develop an understanding of the aesthetic qualities of music
- Perform a variety of repertoire
- Examine the various roles and purposes of instrumental music in society

Beginning Band 11/12 is a performance based course designed to give students the opportunity to derive educational experiences from participating in an instrumental music ensemble. This ensemble experience allows students to develop an understanding of the aesthetic and technical qualities of an instrumental ensemble.

Students develop their abilities in three areas common to all fine arts curricula: Skills and Techniques, Expression, and Context.

Through the process of performance, students will develop the concepts and skills that will enable them to develop their musicianship, their ability to listen and appreciate all music and their ability to express themselves emotionally through music performance. Finally, through participation in rehearsals, students gain confidence, self-esteem and personal discipline.

Learning Resources:

Music and music method books for the students.

Additional Information:

Music Room:
Must be acoustically built or adapted for band rehearsals.
Students must have access to a band instrument.
Music stand and chairs for all students
Classroom percussion set that includes a minimum of a snare drum and a bass drum.

Grade Level of Course:  

- [ ] 10
- [x] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction:

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others – the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Learning Resources:

Course Name: Transportation, Power & Energy 10

Course Code: YTPAE 10

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Transportation, Power and Energy deals with the relationships between power, energy, and the movement of objects and people. In TPE 10 students will be involved in the design, production and testing as they find and model solutions to problems.

During the year students will be developing a wide range of skills through hands-on technology activities. They will be required to communicate ideas to others in words and through graphics. They will also be involved in developing ways of expressing their ideas through assignments, posters, models, drafting, projects, and computer applications. They will have the opportunity to integrate the list below into assignments, projects and skills throughout the school year.

- Design and Drafting Unit
- Computer Aided Design Programs
- Engineering Unit
- Fabrication Unit
- Hand Tool and Machinery Safety

Students build projects to learn the related principles and theory. The project work introduces students to the problem solving approach used to create, repair and maintain technologically related items. Electric motor construction, crash test models, bridge building and testing, boat design and many other practical activities that relate to transportation, application of power, and energy implications used to drive these technologies. This course meets the requirements to obtain 4 credits in Applied Skills.

Learning Resources:

Various materials available from wood, metal, drafting, electronics.

Additional Information:

Light construction tools (band saw, drill press, sanders, etc.), computer access, good lighting, work tables, hand tools.

11  [X]

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 29, 2004

Prerequisites:  None

Course Synopsis:

TPE 11 deals with the relationship between energy, power, and transportation. In this course, students will learn about the fundamental science concepts of TPE. With these concepts, they will then design and build numbers of projects that will further increase their understanding of TPE. Students will build projects to solve challenges and to compete against other class members.

Some activities include:
· windmill models
· small engine
· man powered vehicle
· futuristic transportation
· electrical car

The metal shop will be the main lab facility; therefore, students will be required to work safely and responsibly within an industrial atmosphere. This course meets the requirements to obtain 4 credits in Applied Skills.

Additional Information:

As the TPE program utilizes materials and processes from a variety of fabrication and design environments, it is necessary that the delivery of the coursework have access to a full spectrum of regular secondary fabrication facilities. Not only does the program have machinery requirements but computer and software requirements as well. Though there are some special environment and equipment requirements for TPE program, by and large these are already in place as part of other Wood, Construction, Metal, and CAD Drafting programs.

10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 28, 2005

Prerequisites:  1) recommendation from a teacher, counselor, administrator and/or CPAdvisor 2) application submission

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Learning Resources:

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10B is the second of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. This course will enable students to build upon and refine their knowledge and skills learned in the previous course. Students who successfully complete Workplace Training 10B can choose to continue in Workplace Training 12C. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 115

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Course Synopsis:

The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:

A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  

☑ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction:

Date Approved: April 29, 2004

Prerequisites: Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Human beings are fascinated by each other. Just think about how much time we spend watching people’s behaviour. We watch people on TV, in the movies, and on the stage. We take photographs of friends or family for our own enjoyment and to show others. Sitting in a café or on a park bench, we observe the human scene that passes by in front of us. The extensive live coverage of major events offered by CNN puts the whole world and its people on view. Amateur videotapes are shown on TV, making public what the participants thought they only knew. And then, of course, we watch people through the printed page. Novels and biographies, magazines and newspapers, all rely on our curiosity about other people’s lives to get our attention.

People watching could be viewed as a very popular spectator sport. Psychology is fascinating because it is so complex and diverse. Psychologists are interested in behaviour as well as the mental processes, thoughts, ideas and understanding of human beings. Sometimes, people feel secure and self confident; at other times, they are worried and ill at ease. Perceptions of other individuals and groups can be based on a careful examination of evidence, or tailored to fit preconceptions and biases. People fall in and out of love; nations make war and peace. Individuals slavishly conform to others’ wishes, yet also rebel against restraints on their freedom. It’s not easy to make sense of the social world we live in. Nor is it easy to understand our own behaviour. Just as we can be puzzled by what others do, so can we be puzzled by our own actions. Often we want to know about others so that we can better understand ourselves.

People will be the essence of this course – how we interact with, and think about others — the social side of our existence as human beings. Psychology 11 is intended to be the precursor course for students intending to take Psychology 12 AP.

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Prerequisites: None

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame. Desktop Publishing 12 will build on student’s previous and basic knowledge of 2D digital image creation, capture, & manipulation, and layout & design. Students will be learned advanced technologies and methods of 2D digital image creation, capture, & manipulation, as well as layout and design, using industry standard software.

Learning Resources:

Software – Desktop Publishing Programs

Additional Information:

Course Name: Applications of Leadership-Music 11

Course Code: YALM 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  □ 10   □ 11   □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: Entrance by application

Course Synopsis:

This course is designed to give students the opportunity to develop their individual music and leadership skills.
  · By successfully completing a number of specific units, students will engage in activities that will develop a greater understanding of the role that music plays in their own lives and in society.
  · Students will develop fluency in the elements of music and will learn how to effectively communicate their understanding of those elements to others.
  · Students will develop skills in the areas of problem solving and goal setting.
  · Students will be able to recognize and develop their own specific leadership style. Skills will be developed relating to effective communication, time management and organization.
  · Students will gain skills in the area of music technology
This class also prepares interested students for higher education in music performance and music education. Involvement in this course will offer significant opportunities for the students to evidence and documentation for their graduation portfolio.

Learning Resources:

Computer, music instruments

Additional Information:

Music Room Facility, Music Notation Software, Recording Equipment.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 29, 2004

Prerequisites: Familiarity with computers
Interview with Facilitator(s)

Course Synopsis:

This course has been developed to serve the needs of students who want to better understand how a computer works. It is a hands-on course that introduces students to the system modules that make up a typical personal computer and provides them with the knowledge to effectively troubleshoot and maintain a system. It is meant to develop technical knowledge, promote problem solving and how to work well both with others and independently.

The course is based on the Core Hardware Service Technician requirements for A+ Certification. As part of Units 3 and 5, students will be dispatched to where school computer problems are reported and perform on site diagnosis and, if possible, repair. Curriculum organizers for this course are grouped under Technical Knowledge, Safety, Responsibility, Analysis and Customer Relations.

Learning Resources:

Some A+ Certification and other Computer Technical manuals.

Additional Information:

Lab and storage areas which are already in place. Serviceable computers, assorted modules and peripherals which are being accumulated from discarded equipment.

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2005

Prerequisites: None

Course Synopsis:

Baking 11 is a course in which the skills and techniques involved in baking are researched and developed. Emphasis will be placed on baking theory, practical knowledge, preparation skills, time management, and the production of products. Students will study the principles involved in each method and the effect they have on the finished products. Functions of ingredients, nutritional value, and the effect of ingredient quality on the final product will also be discussed. Students will also research and test their own recipes and evaluate them based on product standards learned in the course.

Learning Resources:

Computer, Home Economics equipment, reference books, text books

Additional Information:

Home Economics classrooms, lab rooms, equipment, specialized baking equipment

Date Approved: April 28, 2005  
Prerequisites: It is preferred that they have taken Baking 11 or Food Studies 11  

Course Synopsis:  
Baking 12 is a course that focuses on emphasizing more advanced skills and techniques of baking. This course will be valuable for anyone considering a career as a pastry chef or seeking employment in a bakery, restaurant, or catering service. The emphasis will be on baking theory, practical knowledge, preparation skill, time management, and production of products. Presentation is of utmost importance and students will be encouraged to use their creative and artistic skill to create baking masterpieces. Students will be working with the Catering Class at times and be involved with the preparation of desserts for luncheons and other school functions. Prior to the Christmas holidays students will be preparing a care package of holiday baking for an organization of their choosing within the community; for example, The Salvation Army, Old Age Home or a Women’s shelter.

Prerequisites: Photography 11

Course Synopsis:

The Photography / Yearbook 12 students will learn to design and prepare the school annual for publishing. Starting from idea development to annual distribution, the book is a student run publication that is overseen by the teacher advisor. Students will learn basic layout design, photography, publishing, budgeting for publication costs, and the elements and principles of design as they apply to book publication. Students will become familiar with how a yearbook can be put together and business relations.

Learning Resources:

A room large enough to accommodate tables for layout production, light table for cropping and creating templates, storage facilities for all work in progress. Basic computer for word processing and templates. In the future, this course resources should include ink cartridges for printers, bond paper for printers, zip discs, blank CD-R and CD-RW discs, practice layout sheets

Additional Information:

Room large enough to accommodate computer pods, and adequate climate control to compensate for heat generated by computers. Work tables for preparing layouts and matting work for framing, lockable storage cabinets. At least 10 SLR cameras with built in flash such as the Canon Eos. Storage containers for all work in progress and all materials necessary for layout page mock-ups. In the future, this course should work to providing a minimum 18 networked Macintosh computers, one network server with monitor, zip drives or memory sticks for data storage, black and white laser printer capable of printing tabloid size paper, 5 mega-pixel camera with bayonet mount lenses, 3.2 mega-pixel digital camera, flat bed scanner, Software: OS X operating system, Publishing software: Adobe Creative suite which includes Adobe Photoshop, Adobe InDesign, Adobe Illustrator, File Maker Pro and a work processing software. This will enable students to learn desk top publishing and become familiar with the various computer programs associated with having this kind of technology.

Prerequisites:  Social Studies 11 or BC First Nations 12 (or Civics 11)

Course Synopsis:

Psychology 12 is a course on human behaviour and basic concepts in modern psychology. This course covers the five major psychological domains: methods, biopsychology, cognitive, developmental, and socio-cultural in more depth than the Psychology 11 course.

This course is recommended for those students who have an interest for Psychology and wish to pursue it further at a post secondary institution. This course focuses on developing student skills that will help them succeed in a post secondary setting. This will include: critical thinking, essay writing, research and experimental methods, academic reading, and oral presentation skills.

Learning Resources:

· Psychology, (David Myers), 4th, 5th, 6th, 7th editions
· Study Guide for Myers
· Activities Handbook for Teaching Psychology (Benjamin and Lowan, 1981)
· Handbook for Teaching Introductory Psychology (Benjamin, Daniel, and Brewer, 1985)
· Teaching of Psychology (the journal of American Psychology teachers from high school through college level)
· The Critical Thinking Companion: For Introductory Psychology, 2nd edition

Multimedia Resources:

· David Myers - PowerPoint Notes
· Digital Media Archive: For Psychology

Video (DVD) Resources:

· The Mind Series, 2nd edition
· Psychology: The Human Experience
· Discovering Psychology Series, Updated edition
· The Brain Series Teaching Module, 2nd edition
· Scientific American Frontiers Series, 2nd edition

Course Synopsis:

The Workplace Training Program is one of the Career Programs’ options designed to link school-based learning with extended work experience. The focus of Workplace Training is the incremental learning of job specific skills while reinforcing employability skill development. Workplace Training 10A is the first of three expanded work experience courses where students participate in a minimum of 120 hours of work experience in their chosen career field during Grades 10, 11 and 12. Students who successfully complete Workplace Training 02A can choose to continue in Workplace Training 10B. Workplace Training enables students to complete high school graduation credits and gain the skills and knowledge required for future employment in their chosen career field. In addition to employability skills, job specific skills are identified and learning outcomes developed to support delivery of these skills.

Learning Resources:

CPAdvisors work with industry representatives to identify job specific entry level skills and develop related learning outcomes for specific occupations.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 115

Date Approved: April 29, 2004

Prerequisites: None

Course Synopsis:

Our schools are the perfect place for students to experience the purpose of publication preparation through the production of the yearbook. When students are exposed to the production of school-based publications, they gain practical skills that are relevant to the world of work. The yearbook production also exposes students to the challenge of working with the business community. Finally, yearbook production provides the opportunity for students to take full responsibility for the success of their publication. They must work collaboratively in order to solve problems and complete the book within a specific, pre-arranged time frame.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites: 

Course Synopsis:

Journalism 11 is a yearlong newspaper reporting course available to students in grades 10-12. Students are responsible for producing stories and photographs for the school newspaper. Students will learn the major newspaper story forms including news, sports, features, editorial and opinion. They will compose news and feature photos, conduct a public opinion poll, and write a broadcast news script.

Students will strive to produce a newspaper meeting professional standards and following Canadian Press style. They will prepare questions, conduct interviews, carry out online and other forms of background research and be responsible for one or more beats (regular coverage areas) in the school. Students will also study the techniques used to present news and in so doing, become informed consumers of media.

☒ 11

☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

Textile Arts and Crafts 11 is designed to provide both theory and practice in the production of craft items. It introduces students to a wide variety of crafts as well as their historical and cultural significance. Through projects made, students have the opportunity to develop and refine many different crafting techniques by following instructions given as well as by using creativity to express themselves individually.

Students will be given the tools to organize and manage their time and energy effectively. For some, this exposure might ultimately influence their interest to pursue a career in a related field, i.e. candle and soap making.

Course Name: Wildlife 11

Course Code: YWL 11

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

This course has been developed to help students to explore the richness and diversity of their natural environment. Students study the relationships between living things and their world. Binoculars to microscopes are incorporated into a curriculum designed to help students understand and respect both aquatic and terrestrial ecosystems.

Learning is divided between the classroom and the outdoors. Regular field trips to local natural places make reading and written assignments alive, literally. The approach fosters a student’s individual interests while providing a base naturalist knowledge. Students are taught the basic principles of ecology and apply this knowledge to their immediate environment. Finally through involvement with local volunteer naturalist societies and the school’s hatchery project, students are able to understand the importance of contributing to one’s community.

Course Name: Desktop Publishing 11

Course Code: YDTP 11

Category: Business and Applied Business

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

**Course Synopsis:**

This course has been developed to support and encourage students to explore the practicality, creativeness and opportunities in the field of Desktop Publishing. Students learn to use state of the art computer software (InDesign, PhotoShop, Freehand) and hardware (digital cameras, scanners, CDs) as they follow the steps in creating many of the print media that professional companies use in the production of their day-to-day media.

As a culmination of their work, students reflect on their work and are encouraged to take on a larger school (desktop publishing) project, such as the school parent newsletter or the drama production. This introductory course will take students through the whole production process – from thumbnail sketches to initial computer input to data manipulation to self-reflection/evaluation to modification to final output – the students will see and do the whole spectrum of desktop publishing.

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April 20, 2004

Prerequisites:

**Course Synopsis:**

The main goal of this course is to give very inexperienced and inhibited actors the confidence to perform plays on stage in front of audiences. Students will learn that they can perform successfully through purposeful and trained engagement of the imagination coupled with technically competent voice and movement work. They will learn that focused immersion in the work of creating “the world of the play” reduces or eliminates self-consciousness, and thus frees the actor from the inhibitions that cause stilted, artistically untruthful performances.

Students will learn to trust that audiences respect artistic truth and are actually allies in the willing suspension of disbelief that enables theatre to take place. They will learn one of that, paradoxically, the actor includes the audience by excluding the audience. They will learn that the rehearsal and performance of scripted plays are actually very safe public activities providing a high degree of structure in which the emotional, intellectual, and physical safety of the performers is carefully supported so as to free them to take artistic risks.

Course Name: Contemporary Music 11

Course Code: YCTM 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  
   - [ ] 10
   - [X] 11
   - [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

This course is designed to create a learning environment where students who are already able to play their instrument(s) will receive instruction in how to organize and rehearse a contemporary music ensemble. Students will be expected to perform at an intermediate level and will acquire basic knowledge of equipment set up and maintenance.

Instrumentation can include guitar, bass guitar, keyboards, vocals, brass, woodwinds and drums. Students will be able to choose the style of music they wish to perform. Students will also be taught the following: history of early popular music, familiarity with stylistic differences, basics of ear training, operating and maintaining basic equipment, understanding current music technology, basic performance techniques and audience interaction, and basic skills to developing promotional materials. Opportunities to perform will be made available.

Course Name: Creative Wood Design 11

Course Code: YCWD 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

This course has been developed to support and encourage students to explore wood as a creative art medium, as a viable source for future employment and/or enjoying woodworking as a recreational activity. Students will learn how to correctly identify and safely use various hand tools, portable and stationary machines as they build theme-based, self-designed projects.

Students will also learn the richness and diversity of First Nation’s aboriginal art as well as other cultures that use wood as an artistic medium. Learning outcomes are grouped under the curriculum organizers: Health and Safety, Image-Development and Design Strategies, Materials and Processes, Tools and Equipment and Assessments.

It is expected that students will produce two or three projects (one of which will be a major project). These projects will form the basis upon which student learning will be assessed. The comprehensive nature of the project allows the students to experience a sense of accomplishment and to demonstrate skills acquired in relation to a range of learning objectives.

Course Code: YRAS 11

Category: Choose a Category

Grade Level of Course: ☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

This is an introductory course to the world of modern studio recording techniques and offers instruction on all aspects of the recording of sound, both in its technical application and its creative musical side. Some of the content covered will be analog multi-track recorders, digital multi-track recorders, computer "hard disk" recording, mixing and editing techniques, knowledge of acoustics, microphones and outboard gear such as reverb, distortion, flangers and compressor/limiters.

This course will help prepare students for a career in music in which knowledge of these skills and applications are very essential. In addition, it will compliment other musical training that can lead to a profession and/or life-long enjoyment.

Course Name: Vocal Technique 11

Course Code: YVT 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites:

Course Synopsis:

This course is designed specifically for those students wishing to broaden their solo vocal skill level and ability. The in-depth technique of the voice takes years to accomplish; therefore, this course works on the development through specific exercises, repertoire and analysis. By singing specific exercises everyday for five months – one semester – students hear their improvement more quickly than they would singing on their own. More importantly, they will learn the proper vocal technique that they normally would not be exposed to in their everyday listening experiences.

Number of Hours of instruction: 100

Date Approved:  May 11, 2004

Prerequisites:  N/A

Course Synopsis:

Students will learn the concepts, principles, and creativity essential to developing an animated story. They will learn how to use industry standard animation software to produce a basic quality animation project that communicates an idea or concept. The Course will focus on:

- Basic animation concepts and design
- Lightwave: Basic level
- Projects: Simple story

Learning Resources:

- Fully equipped digital media lab
- Animation software applications
- Camtasia videos for software training available online
- Documents available online
- Examples of professional quality designs available online
- Internet

Additional Information:

This course is a Fine Art and/or Applied Skill credit.

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 27, 2004

Prerequisites: n/a

Course Synopsis:

This course has been developed to increase students understanding of video as a medium of communication, demystify this medium, promote critical viewing, assist in using video to their advantage, and create an awareness of career opportunities.

Students learn to use video cameras and editing equipment as they follow the steps in creating a video about a topic of personal interest.

As a culmination, students reflect on their work and plan an event to present their video to their school and community.

Learning outcomes for the course are grouped under the curriculum organizers: Self and Society, Exploration and Analysis, Industry Context, and Technologies/Process.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 13, 2004

Prerequisites:  n/a

Course Synopsis:

This full-year course is offered to students who have recently arrived in Canada and require the requisite skills needed to be successful in Social Studies 10.

The student will gain an understanding of Canadian Culture and Society, past and present, and study the forces that shape Canadian Identity (values, land, people and political processes). The student will become familiar with expectations within the Canadian academic context through co-operative learning experiences within the classroom. The student also will become an active school citizen by participating in school activities such as: Multicultural Week, Diversity Club, school clubs, and teams. The student will learn how to locate, gather and assess information and present it in written, visual and spoken form.

The course is designed to help students understand their role and responsibilities in Canadian Society. Upon successful completion of this course, the student will be prepared for Social Studies 10.

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2004

Prerequisites: n/a

Course Synopsis:

This course focuses on the theoretical and practical applications of leadership. Students will be encouraged to explore the components of leadership in an experiential way.

Time in class will be divided up between classroom instruction and practical workshops with students acquiring and developing their basic knowledge of leadership; developing effective communication and conflict resolution skills; and finally developing the skills to plan, evaluate and implement ideas.

Students will be involved in the promotion and organization of events within the school and community. They will also have the opportunity to learn more about themselves to increase their own self-esteem and ability to deal with adolescent issues.

Course Name: Musical Theatre 10

Course Code: YMUTH 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2004

Prerequisites: n/a

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre. Students learn the value of developing community, to triumph over diversity, and a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting.

In the culmination of all proposed levels of instruction (See Musical Theatre 12) students will produce a professional level Musical for the school, community and the city of West Vancouver.

Learning Outcomes for the course are grouped under the curriculum organisers: Building Community (Opening the Theatre Company), Pre-Production, Production and Post-Production (Reflection and Closing the Theatre Company). Methods in which students are expected to meet instructor expectations including written pieces, personal response and movement, line and song deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units as well.

The approach supports student ownership and pride in performance as well as providing various skill sets and approaches to thinking and learning. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the production and the reflective process during and after its completion.

**Course Synopsis:**

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre.

As the second of three courses in Musical Theatre offered at Sentinel, students continue to develop their skills for performance with higher expectations, performance exposure and leadership requirements. Students learn the value of developing community, to triumph over diversity, and a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting.

In the culmination of all proposed levels of instruction (See Musical Theatre 10) students will produce a professional level Broadway musical for the school, community and the city of West Vancouver.

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 27, 2004

Prerequisites: n/a

Course Synopsis:

This course is an excellent starting point to acquire the basic skills of animation. Students are introduced to animation hardware, storyboarding, character design and the principles of creating the "illusion of life" (movement) in the animation of living and inanimate forms through illustrative film excerpts (classical hand-drawn line tests) and hands-on practice.

Each student will produce hand-drawn samples and a short 3-D claymation video dubbed to their VHS tape which will be a large component in the development of their portfolio.

Learning outcomes for the course are grouped under the curriculum organizers:
• Self and society
• Exploration and analysis
• Industry context
• Technologies/process

Grade Level of Course:  [ ] 10  [ ] 11  [X] 12
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: January 27, 2004
Prerequisites: Grade 12 Textile Studies or Instructor permission

Course Synopsis:
This course has been developed to support and encourage students to explore the creativity and individuality of fashion design concepts. As well students gain skills and knowledge in the technical aspects of pattern making.

Students learn to use computer software to create basic slopers, which are the beginning of flat pattern designs. Students complete a process from the original design ideas to 1/2/full scale pattern to the finished garment.

Learning outcomes for the course are grouped under the units: the original skirt, the original bodice and the original pant.

Students are given the opportunity for self and peer assessment in each of the three units. This approach supports student skill development and encourages meaningful methods of designing, measuring, adapting, constructing and evaluating garments.

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 27, 2004

Prerequisites: Food Studies 12 or Instructor permission

Course Synopsis:

This course has been developed to support and encourage students to explore the various careers in the food and hospitality industry as well as develop advanced culinary skills and techniques.

Students will gain skills and knowledge in the technical aspects of food preparation and service.

While there is an existing IRP for Cafeteria 11/12, the West Vancouver School District does not have the operating facilities and an apprenticeship level chef who would train the students, therefore this course provides an alternate for students wishing to pursue a career in the food and hospitality industry.

Food and Hospitality Training 12 is unique in that it includes units such as Catering and Portfolio development, which are specific to careers in the food and hospitality industry and not a part of Food Studies 12. Learning outcomes are grouped under the following units of study: Safety and Sanitation, Baking, Meal Preparation, Catering and the Portfolio. This approach supports student skill development and encourages meaningful experiences in cooking, baking, catering and their portfolio to prepare students for working in the food service industry.

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 27, 2004

Prerequisites: n/a

Course Synopsis:

This course will provide students with the opportunities to inquire into the tradition of Western Philosophy: the most basic questions about human life and its place in the universe. Topics may include: Who am I? Do humans have free will? Does God exist? Is knowledge possible? What is justice? What is truth?

In Plato's Dialogues, Socrates states that "it is not life, but rather the good life, that is worth living." For Socrates, human life is defined by more than mere survival, by more than merely coping. He defines being human as possessing the powers to think, act, and speak in ways which effectively address the questions of human life and the problems of one's time. Is this our conviction as well? What is our definition of human life? How do we understand ourselves.

This is a course in learning to think. The readings, assignments, tests, and class discussion will all be directed to this end. Students will do best in this class if they are willing to think critically about important issues and are able to come to at least a provisional position on issues. The course will provide an introduction to central works in the history of western philosophy, with a principal goal of fostering the capacity to think logically and critically. To support the discussion of ideas and provide a context for their thought, students will grapple with the thought of such philosophers as Plato, Descartes, Kant and Kierkegaard on issues pertaining to aesthetics, epistemology, ontology, ethics, morality and metaphysics.

The course will engage students in sustained inquiry into the thought of the great minds of our western civilization. Students contemplating university will find this course especially beneficial.

Course Synopsis:

Course Synopsis This course prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will develop social responsibility while acquiring skills in communication, interpersonal relations, coaching, leadership, teamwork and conflict resolution. They will apply these skills in peer tutoring settings. Students will acquire a life long appreciation, value and acceptance of the dignity that should be afforded to all individuals.

Learning Resources:

Training Manual
4. Course Synopsis:
The purposes of this course is to expose First Nations students to their aboriginal heritage, develop a stronger sense of identity, and foster pride in who they are. By doing so, is intended that First Nations students come to the understanding that it is the First Nations way to have First Nations culture, to have a proud history, to have governance, and to hold these things important. All students will be invited to take FNS 10, but it is recognized that it will be of primary interest to students with First Nations heritage.

5. Rationale:
It is important for First Nations students to become successful within modern culture, while at the same time learning and appreciating their own history and culture. To do this, they need the opportunity to study their own aboriginal language, culture, history, and traditional knowledge, within the structure of the B.C. public education system.

6. Organizational Structure:
Learning outcomes are grouped under the following four topic organizers. It is important to note that in the study of First Nations language, history, and culture, various topics of study will be integrated throughout the development of the course. For example, the language and history of various ceremonies will most effectively be taught during the study and presentation of these ceremonies, and not simply as a discreet topic. Learning outcomes will thus be integrated within various field trips, guest presentations, as well as specific instructional methodologies.

Unit/Topic Title Time
Unit 1 Family Genealogy 30
Unit 2 Cultural History 30
Unit 3 B.C. History 30
Unit 4 Language and Traditional Arts 30
Unit 5
Total Hours 120

7. Learning Outcomes organized by Unit/Topic/Module:

Unit 1: Family Genealogy (approx. 30 hrs.)
Students will study their own family and extended family genealogy through a series of interviews with family and friends. They will explore various written materials for evidence to support the oral evidence gathered. They will culminate the unit with a presentation of their own family tree.

[This text continues with more detailed descriptions and learning outcomes, ending with the BCSTA logo and URL.]
Learn the importance of a family research project in keeping family history alive
Learn various types of presentation skills: oral, written, charts, graphs, etc.
Present their family tree to various audiences: classmates, other students, and a gathering of elders

Unit 2: Cultural History (approx. 30 hrs.)
Students will learn how the culture of various aboriginal peoples was influenced by their geography, as well as by local flora and fauna. They will study the culture of aboriginal peoples in various regions of Canada and in other countries.

It is expected that students will:
- Study and demonstrate their learnings about their oral history, their written history, and potlatch history
- Demonstrate cultural understanding through participation in a sweat lodge ceremony, talking circles, and medicine wheel teachings
- Demonstrate leadership skills through inviting and welcoming elder participation in their in-class ceremonies and then running these ceremonies
- Learn about various forms of presentation again as they go through such traditional activities as herb gatherings and potlatches
- Recognize similarities and connections in the cultural development of various aboriginal peoples both in Canada and in other countries

Unit 3: B.C. History (approx. 30 hrs.)
Students will study the history of the First Nations peoples of B.C. They will read and hear presentations about the early oral history of their people and how that changed with the advent of written history books. This will include an understanding of the power of the written word and the loss of oral traditions that often followed.

It is expected that students will:
- Read and learn about such topics as residential schools, BC Land Claims, Aboriginal governance models, early explorer contact, pre-contact history, etc.
- Visit Storyeum and understand the power of drama role-play in reinforcing knowledge
- Research and bring to their class, various resources for learning history, such as: books, video, resource people, etc.
- Demonstrate various history learnings through project work, presentations, and written tests

Unit 4: Language and Traditional Arts (approx. 30 hrs.)
Students will learn the vocabulary of personal introduction, who they are, who their family is, animals, colours, numbers, village names, etc. They will study various carvings and murals, where they once existed and where they currently are. This may include researching through books, web, and visiting worksites of aboriginal carvers and artists.

It is expected that students will:
- Demonstrate their learned vocabulary through daily oral work
- Create various projects from possibilities presented to them (collages, drums, cedar work, regalia, songs, etc.) by local artists; this will also depend on materials available
- Learn about and conduct self-assessments and peer assessments in presentations of projects
- Visit the UBC Museum of Anthropology and write about their experience

8. Instructional Component:
A variety of instructional components will be used throughout the course, ranging from the following:
- Direct instruction
- Experiential learning (sweat lodge, potlatch, herb walk, etc.)
- Cultural visitations (Storyeum, UBC Museum of Anthropology, etc)
- Project work
- Guest presentations (from classmates and visiting resource people)
- Interviews of local elders
- Media presentations (video, music, etc)
- Research work from books and Web based sources
9. Assessment Component:
Various assessments will be used, depending on suitability for the lesson, unit, and learnings. Methods will range among the following:

• Self assessments 10%
• Oral Presentations with Teacher and Peer assessments 30%
• Individual Projects 20%
• Group Projects 20%
• Written tests 10%
• Daily participation 10%
Total: 100%

10. Learning Resources:
Various Learning resources will be used, depending on availability and time:
• First Nations, Inuit and Metis videos
• Visit to UBC Museum of Anthropology and Storyeum
• Books:
  ?B.C. First Nations Studies Text
  ?9000 Years of History in the Land of the River People
  ?First Nations in B.C. Comparing Interior and Coastal Cultures, First Nations Education Division, Greater Victoria School District
  ?Aboriginal Peoples building for the future, Kevin Reed, Oxford University Press
  ?Potlatch Perspectives, First Nations Education Division, Greater Victoria School District
  ?First Nations Young People Becoming Healthy Leaders for Today and Tomorrow, Part 1&2, First Nations Education Division, Greater Victoria School District

Prerequisites: none

Course Synopsis:

Course Synopsis
This course prepares and motivates students to provide leadership and assistance to younger students – Grades 8 -10. The students in the course will be responsive and helpful to students with a variety of needs. Students will develop social responsibility and acquire skills in communication, interpersonal relations, coaching, leadership, and teamwork. These skills will be applied as they assist the classroom teacher. Students will acquire a life long appreciation, value and acceptance of the importance of respecting individuals.

Rationale
This course has been developed to help students use leadership, communication and management skills while assisting the Classroom Teacher and various students. The students practice many employability skills and this experience may foster an interest in the teaching profession. The senior students have a positive effect and become role models for the younger students. The senior students model social responsibility in the classroom and in the total school environment. Interacting with younger students and the Classroom Teacher helps the students in their own understanding of and tolerance for people of different cultures and ability levels. Students gain confidence and the ability to express themselves in a group setting. The younger students benefit from the extra attention and assistance in the classroom.

Organizational Structure

Unit 1  Training Session   3 hours
Unit 2  In the Classroom  102 hours
Unit 3  Touchback Days   12 hours
Unit 4  Reflection/Feedback   3 hours

Unit 1- Training Session   3 hours
Students are given a Student Handbook and Student Assignments Booklet to read and work on under the guidance of the Peer Tutoring Teacher. Students are given readings on “How to make Tutoring a Pleasant and Useful Experience”, “Confidentiality Guidelines”, “Roadblocks to Communication”, etc. They will understand how they can work most effectively with the students they will help in the classroom. Students also discuss the way they will become role models for the younger students. Students are advised to seek assistance from the Peer Tutoring Teacher and/or the Classroom Teacher if they have any additional questions as they work in the classroom.

Curriculum Organizers and Learning Outcomes
It is expected that students will finish three written assignments, receive their classroom placement and be ready to assist the classroom teacher as a Peer Tutor.

Unit 2- In the Classroom102 hours
Students are working in the classroom they have been placed in and directly helping the teacher and students. The Classroom Teacher will direct and supervise the student and assist them in their training to work with the
Curriculum Organizers and Learning Outcomes
It is expected that students will assist in the classroom as deemed appropriate by the Classroom Teacher and will record the activities, concerns and successes on their Weekly Activity Sheets.

Unit 3- Touchback Days 12 hours
Students attend four Touchback Days with the Peer Tutor Teacher and they will discuss any concerns/problems they might be having and reflect also on their successes. They will hand in their Weekly Activity Sheets and will do other assignments on topics such as Social Responsibility.

Curriculum Organizers and Learning Outcomes
It is expected that students will explain and reflect on their successes and concerns in the classroom, learn about the Social Responsibility Code in the school and how they can help the students in their classroom achieve a greater level of social responsibility.

Unit 4- Reflection/Feedback 3 hours
Students will attend a session with the Peer Tutoring Teacher and will write a Final Essay on the learning they have experienced throughout this class. They will reflect on their experiences in the classroom and offer feedback to the Peer Tutoring Teacher.

Curriculum Organizers and Learning Outcomes
It is expected that students will effectively communicate their ideas and reflections both in a written format (Final Essay) and verbally to the Peer Tutoring Teacher. They will reflect on how the experience working with other students has changed their own attitudes, goals and organizational skills.

Instructional Components
The student will be instructed by various methods while they are with the Peer Tutoring Teacher and while they are with the Classroom Teacher they have been assigned to. Several methods may be used such as:
- Direct instruction
- Indirect instruction
- Interactive instruction
- Independent study
- Modeling
- Practical experience
- Brainstorming
- Group work

Assessment components
The students are assessed by both the Peer Tutoring Teacher and the Classroom Teacher through a variety of methods such as:
- Teacher observation
- Student reports
- Teacher evaluation forms (using a rubric)
- Weekly activity sheet assignments given by the Peer Tutoring Teacher
- A final essay
- Group discussions/participation

Assessment Weighting
- Classroom Teacher Evaluation = 60% (three times each semester)
- Peer Tutoring Teacher Assignments and Weekly Activity Sheets/Final Essay = 40%

Learning Resources:

Learning Resources
The Learning Resources are assignments and articles provided by the Peer Tutoring Teacher in the Student Handbook. Articles include- “Learning Disabilities” – National Information Center for Children and Youth with Disabilities, “The Masks Students Wear” by Sally L. Smith.
Additional Information:

This course has been running at Howe Sound Secondary for many years. The Peer Tutoring Teacher and the Classroom Teacher work together to insure a successful match for the student and their classroom placement. The senior students are highly regarded by both the younger students in the class and the teachers involved in the program. This program has played an important role in helping our ESL students to understand the culture and language of the school.

Course Synopsis:

Course Synopsis
This course focuses on the design and production of small business print communications. Students will become proficient in the use of standard graphic and publishing software, and be able to design and produce a variety of types of business oriented publications. Students in this course will be computer literate and acquire basic electronic productivity skills mainly for print-based communication.

Rationale
Print based publications are still one of the most important forms of communication used in society for business, organizations and individuals. Business are expecting more and more that their employees have the knowledge and understanding of the tools used and the ability to produce many types of print communication. The skills taught in this course greatly enhance the student’s ability to be an effective employee in many businesses, and organizations and also helps them to produce much more effective documents. This course is designed to give the student both the practical abilities to use the tools and the artistic design components to produce publications that cover many of the main types of print communication used today. Although today’s students use computers a great deal, few of them have the knowledge and practice needed to design and produce many types of documents that employers need today. The software used in desktop publishing today is becoming more complex and students need to be able to effectively use these tools.

Understanding the concepts of design and being able to produce documents in a timely fashion is a skill that many of our students will need in the future.

Organizational Structure

Unit 1  
Instructional time 15 hours

Unit 2  
Scanner, digital camera, photo editing 25 hours

Unit 3  
Basic Design Principles 10 hours

Unit 4  
Project Design 15 hours

Unit 5  
Project Production 50 hours

Unit 6  
Project Feedback and Updating 5 hours

Unit 1 - Instructional Time 15 hours

The goal of this unit is to introduce basic business etiquette and marketing strategies so students can use these skills in the future.

Curriculum Organizer- Student Store

- The student will work in the student store to gain some skills in business and marketing.
- The student will gain knowledge in inventory and ordering to keep the student store stocked.
- Track of expenses and revenue
Curriculum organizer - Business Etiquette/Behavior

- The student will develop independent, business skills to work in a less structured environment (computer lab) and evaluate their behavior by using a rubric which is set up by the business department.

Unit 2 - Scanner, Digital camera, Photo editing 25 hours

The goal of this unit is to introduce the basic concepts of Digital Imagery so students can understand the bases of graphic software; so students can later create the images they will need for their projects.

Curriculum organizer - Manipulation

- The student will demonstrate an ability to use Gimp or similar software for image manipulation including
  - Layers
  - Channels
  - Image Resolution
  - Brightness/Contrast
  - Hue/Saturation/Opacity
  - Layer masks
  - Photo filters
  - Photo editing
  - Graphic file type

Curriculum organizer - Scanning

- The student will demonstrate the ability to scan an image so that it is at a proper quality and file type for the job it is going to be used for including
  - Image resolution
  - Scaling
  - Original media type
  - Brightness/Contrast
  - Graphic file output type

Curriculum organizer - Digital Photography

- The student will demonstrate the ability to properly photograph an image with a digital camera and transfer it to a computer so it can be used in a project.

Unit 3 - Basic Principles of Design Time: 10 hours

The goal of this unit is to introduce the basic concepts of print design so students can create well thought out and effective documents.

Curriculum organizers Elements of design

The student will demonstrate an understanding of

- Balance
- Unity
- White Space
- Contrast
- Proportion
- Repetition
- Alignment
- Proximity

as it relates to a page or/and overall project design.

- The student will demonstrate an understanding of TYPE and how it is used in design.
- The student will demonstrate the ability to use different page layout techniques depending on what type of message the design is attempting to convey.

Unit 4 - Project Design Time: 15 hours

The goal of this unit is to teach the students the steps of the design process before they actually start to put it together on the computer. Too often students want to go directly to the computer when often times it is better to be away from the computer for some or all of the initial design process.
Curriculum organizer - Understanding the Goal of the Project
• The student will demonstrate an understanding of who the audience will be for this project.
• The student will demonstrate an understanding of the importance of designing the project so that it will connect with the targeted audience.
• The student will demonstrate an understanding of the importance of the type of message that the project conveys as it relates to the overall goal of the project.

Curriculum organizer – Brainstorming ideas
• The student will demonstrate an understanding of the importance of different ideas to choose from at the start of a project.
• The student will demonstrate an ability to accept or reject an idea based on its ability to satisfy the goal of the project.
• The student will demonstrate an ability to modify an idea to better suit the goal of the project.

Curriculum organizer – Research Available Resources
• The student will demonstrate an understanding of where the best places to go get the needed resources for the completion of the project.
• The student will demonstrate an ability to search the internet for graphic and text resources.

Curriculum organizer – Present and Receive Feedback
• The student will demonstrate an ability to accept and incorporate peer feedback on the initial project design.
• The student will demonstrate an ability to look at other designs and give them positive feedback to help them create more effective projects.

Unit 5 – Project Production
Time: 50 hours
The goal of this unit is to take the design and then choose the proper hardware and software tools to complete the project on time, and at the level of quality required.

Curriculum organizer – Hardware and Software
• The student will demonstrate an ability to choose the most effective software tool to use for each part of the project.
• The student will demonstrate an ability to solve problems that come up related to hardware and software.
• The student will demonstrate an ability to budget their time so that all parts of the project are given adequate time to complete.
• The student will demonstrate an understanding of constant ongoing review of the project as it relates to the overall goal.

Unit 6 – Project Feedback and Updating
Time: 5 hours
The goal of this unit is to introduce students to the concept of feedback and updating. Before the students have completed a large project they need to take this to others for feedback and to check that it does properly communicate what it was meant to in an effective manner.

Curriculum organizer - Peer Feedback
• The student will demonstrate an understanding of the importance of positive peer feedback in its ability to improve a project.
• The student will demonstrate the ability to analyze feedback and either accept or reject it on its merits.

Curriculum organizer – Teacher Feedback
The student will demonstrate the ability to take the suggestions from the teacher to go back and update their project before final submission.

Instructional components:
• Direct instruction
• Indirect instruction
• Interactive instruction
• Independent instruction
• Practical creativity
• Modeling
• Brainstorming
• Computer-based projects
Individual Projects 20%
Assignments and Productions 60%
Final Exam and Tests 20%

Learning Resources
Software manuals
Articles and tutorials for design and graphic resources on the World Wide Web
Example publication and handouts

Desktop Publishing Design Basics and Applications - George H.J. Porozony
The Non-Designers Design Book - Robin Williams

Course Synopsis:

This course presents an adaptable and broad-based perspective of leadership which will provide an opportunity to learn and practise leadership skills while developing responsibility, creativity and self-confidence as the student works on projects/activities within the school and community. Students will develop lifelong skills in the areas of self-image, goal-setting, time management, public speaking, school and community service, fundraising, event planning, problem solving/decision making and an understanding of various leadership styles. This course will also allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Rationale

“We must be the change we wish to see in the world.” (M.K. Gandhi) Teaching our students leadership skills is a proactive approach to dealing with the challenging reality of change in our society. And in so doing will improve student/teacher relations and work for the general betterment of the student body consistent with School Board policies.

ORGANIZATIONAL STRUCTURE

Unit | Title | Time
--- | --- | ---
Unit 1 | What is Leadership? | 20 hours
Unit 2 | Personal Leadership | 20 hours
Unit 3 | Event Planning - Communications | 20 hours
Unit 4 | Teambuilding | 20 hours
Unit 5 | Community Relations | 30 hours

The activities that are found throughout the course are not limited to the section in which they are found. The outcomes are developed and applied in a spiral fashion that integrates the theory and practice of leadership, deepening the students’ understanding and skills as the course progresses. Many of the outcomes are evident in several sections and units.
LEARNING OUTCOMES

Unit 1: What is Leadership? 20 hours
Students will become familiar with the overall concept and workings of student leadership through an introduction to general leadership theories and styles. Students will analyze and explore the qualities of a positive and effective leader.

CURRICULUM ORGANIZERS - Self Knowledge, Planning and Time Management, Communication and Conflict Resolution, and Peer Support/Community Awareness
It is expected that students will:
• Demonstrate an understanding of leadership styles
• Demonstrate an understanding of leadership theory
• Demonstrate an understanding of what makes an effective and positive leader

Unit 2: Personal Leadership 20 hours
Students will move from a general knowledge of the concept of leadership to a specific understanding of their individual leadership styles. A wide range of tools will be used to help students to explore their individuality as leaders; a variety of planning and management skills will be presented to help students cope with the practical demands of leadership.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Determine their own style of leadership
• Demonstrate an understanding of their basic needs
• Demonstrate and apply decision making skills

CURRICULUM ORGANIZER - Planning and Time Management
It is expected that students will:
• Demonstrate an understanding of effective planning
• Demonstrate an understanding of time management and organization skills
• Demonstrate and apply goal development skills

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Develop a stronger sense of social responsibility
• Demonstrate and apply decision making skills
• Demonstrate an understanding of various conflict resolution practices and models

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Develop a stronger sense of social responsibility
• Demonstrate an understanding of the needs of various student groups within the school community

Unit 3: Team-building 20 hours
Students will become familiar with the principles of teambuilding. They will work together in a cooperative and collaborative environment developing the basic skills required to build connections and relationships with others.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Develop an understanding of the position of the individual with relation to the group

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Demonstrate an understanding of team/group dynamics through the application of collaboration skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Demonstrate an understanding of the value of interdependence
Unit 4: Event Planning - Communication  
Students will be able to understand and apply effective individual and team communication skills as they actively pursue the other units in this course. Students will explore various formats for conducting meetings and seeking community input.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Demonstrate an understanding of the importance of communication skills for effective leadership and marketing of events
• Identify personal strengths and weaknesses in communication
• Develop enhanced interpersonal skills

CURRICULUM ORGANIZER - Planning and Time Management
It is expected that students will:
• Implement a plan for the successful operation & completion of a school/community event
• Follow the Plan, Run, Evaluate format re: event operation
• Demonstrate enhanced meeting facilitation skills

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Demonstrate an understanding of the importance of communication skills for effective leadership (verbal, non-verbal, written, listening)
• Demonstrate an understanding of various community input models
• Develop and demonstrate enhanced public speaking skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Demonstrate an understanding of conflict resolution skills
• Demonstrate and apply problem solving skills
• Develop and demonstrate enhanced interpersonal skills
• Implement diverse methods for seeking community input

Unit 5: Community Relations  
Fundamental to the success of student leadership is the development of leadership beyond the classroom and into the school and greater community. Students will be able to demonstrate the planning, implementation, evaluation of individual/group projects while incorporating marketing and community relations skills through the mandatory 30 volunteer hours required for course completion.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Demonstrate leadership skills through application and reflection on individual and/or group projects at the school, local or global levels
• Design and implement assessment tools for personal, peer and teacher evaluation with regard to project planning and implementation

CURRICULUM ORGANIZER - Planning and Time Management
It is expected that students will:
• Demonstrate an understanding of effective planning
• Follow the guidelines of Plan, Run, Evaluate re: each event
• Demonstrate an understanding of time management and organization skills
• Demonstrate a variety of marketing strategies in the promotion of project implementation

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Demonstrate a variety of marketing strategies in the promotion of project implementation
• Learn and apply effective public relation skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Increase understanding of techniques used to develop positive school and community climates
• Understanding of the needs of various student groups within the school community

The activities that are found throughout the course are not limited to the section in which they are found. The outcomes are developed and applied in a spiral fashion that integrates the theory and practice of leadership, deepening the students’ understanding and skills as the course progresses. Many of the outcomes are evident in several sections and units.
LEARNING OUTCOMES

Unit 1: What is Leadership? 20 hours
Students will become familiar with the overall concept and workings of student leadership through an introduction to general leadership theories and styles. Students will analyze and explore the qualities of a positive and effective leader.

CURRICULUM ORGANIZERS - Self Knowledge, Planning and Time Management, Communication and Conflict Resolution, and Peer Support/Community Awareness
It is expected that students will:
• Demonstrate an understanding of leadership styles
• Demonstrate an understanding of leadership theory
• Demonstrate an understanding of what makes an effective and positive leader

Unit 2: Personal Leadership 20 hours
Students will move from a general knowledge of the concept of leadership to a specific understanding of their individual leadership styles. A wide range of tools will be used to help students to explore their individuality as leaders; a variety of planning and management skills will be presented to help students cope with the practical demands of leadership.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Determine their own style of leadership
• Demonstrate an understanding of their basic needs
• Demonstrate and apply decision making skills

CURRICULUM ORGANIZER - Planning and Time Management
It is expected that students will:
• Demonstrate an understanding of effective planning
• Demonstrate an understanding of time management and organization skills
• Demonstrate and apply goal development skills

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Develop a stronger sense of social responsibility
• Demonstrate and apply decision making skills
• Demonstrate an understanding of various conflict resolution practices and models

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Develop a stronger sense of social responsibility
• Demonstrate an understanding of the needs of various student groups within the school community

Unit 3: Team-building 20 hours
Students will become familiar with the principles of teambuilding. They will work together in a cooperative and collaborative environment developing the basic skills required to build connections and relationships with others.

CURRICULUM ORGANIZER - Self Knowledge
It is expected that students will:
• Develop an understanding of the position of the individual with relation to the group

CURRICULUM ORGANIZER - Communication and Conflict Resolution
It is expected that students will:
• Demonstrate an understanding of team/group dynamics through the application of collaboration skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness
It is expected that students will:
• Demonstrate an understanding of the value of interdependence
Unit 4: Event Planning - Communication

Students will be able to understand and apply effective individual and team communication skills as they actively pursue the other units in this course. Students will explore various formats for conducting meetings and seeking community input.

CURRICULUM ORGANIZER - Self Knowledge

It is expected that students will:
- Demonstrate an understanding of the importance of communication skills for effective leadership and marketing of events
- Identify personal strengths and weaknesses in communication
- Develop enhanced interpersonal skills

CURRICULUM ORGANIZER - Planning and Time Management

It is expected that students will:
- Implement a plan for the successful operation & completion of a school / community event
- Follow the Plan, Run, Evaluate format re: event operation
- Demonstrate enhanced meeting facilitation skills

CURRICULUM ORGANIZER - Communication and Conflict Resolution

It is expected that students will:
- Demonstrate an understanding of the importance of communication skills for effective leadership (verbal, non-verbal, written, listening)
- Demonstrate an understanding of various community input models
- Develop and demonstrate enhanced public speaking skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness

It is expected that students will:
- Demonstrate an understanding of conflict resolution skills
- Demonstrate and apply problem solving skills
- Develop and demonstrate enhanced interpersonal skills
- Implement diverse methods for seeking community input

Unit 5: Community Relations

Fundamental to the success of student leadership is the development of leadership beyond the classroom and into the school and greater community. Students will be able to demonstrate the planning, implementation, evaluation of individual/group projects while incorporating marketing and community relations skills through the mandatory 30 volunteer hours required for course completion.

CURRICULUM ORGANIZER - Self Knowledge

It is expected that students will:
- Demonstrate leadership skills through application and reflection on individual and/or group projects at the school, local or global levels
- Design and implement assessment tools for personal, peer and teacher evaluation with regard to project planning and implementation

CURRICULUM ORGANIZER - Planning and Time Management

It is expected that students will:
- Demonstrate an understanding of effective planning
- Follow the guidelines of Plan, Run, Evaluate re: each event
- Demonstrate an understanding of time management and organization skills
- Demonstrate a variety of marketing strategies in the promotion of project implementation

CURRICULUM ORGANIZER - Communication and Conflict Resolution

It is expected that students will:
- Demonstrate a variety of marketing strategies in the promotion of project implementation
- Learn and apply effective public relation skills

CURRICULUM ORGANIZER - Peer Support/Community Awareness

It is expected that students will:
- Increase understanding of techniques used to develop positive school and community climates
- Demonstrate an understanding of the needs of various student groups within the school community

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of the music theatre genre. Students learn to sing, act and dance. As a culmination, students reflect on their work and perform an entire musical production to own local community. Learning outcomes for the course are grouped under the curriculum organizers: Social and Cultural Issues, Creation, and Analysis, and students are given the opportunity for self and peer assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of interpreting and presenting a musical theatre production.

Rationale:
Musical theatre incorporates multiple facets of the performing arts: acting, singing and dancing. Students will learn to incorporate all of these skills to a performance level. To accommodate the large student requests for this course, it has been developed outside of the timetable to be as inclusive as possible.

Organizational Structure:

Unit Title Time
Unit 1 Overview of the Music Theatre Genre 10 Hours
Unit 2 Audition Process 22 Hours
Unit 3 Rehearsal Process 50 Hours
Unit 4 Production 28 Hours
Unit 5 Performance 10 Hours
Total Hours 120 hours

Unit Descriptions:

Unit 1: Overview of the Music Theatre Genre Time: 10 Hours

Students will become familiar with the Music Theatre genre and acting for stage. They will be taught stylistic differences of the musical theatre genre within a present day and historical context. Concepts such as How can singing and dancing impact a dramatic performance? And How can librettos and music change the emotional response of each audience? will be explored through critical analysis/interpretation exercises.

Curriculum Organizer – Social and Cultural Issues
be able to identify how music theatre contributes to a dramatic performance.

Curriculum Organizer – Creation
It is expected that students will:
-apply the creative process (i.e. singing, dancing and acting) in a dramatic scene

Curriculum Organizer – Analysis
It is expected that students will:
-be able to identify the features that make each musical style unique
-be able to identify varies sub-genres in the music theatre performance

Unit 2: Audition Process
Time: 22 Hours

Students will be introduced to the process of audition in the context of the musical theatre genre. They will have to make creative decisions about their own personal audition. Concepts such as How the song the actor chooses can enhance their chances of getting onto a call back list. How can the actor best present themselves to the producers during an audition. These types of questions will have to resolved creatively by the students themselves.

Curriculum Organizer – Creation
It is expected that students will:
-demonstrate the ability to make appropriate choices during rehearsal for their audition
-to critique others, analyze their own performance and be fully prepared and confident during the rehearsal process

Curriculum Organizer – Analysis
It is expected that students will:
-analyze their own and others performance
-earn a role and/or a call back performance or become a member of the ensemble

Unit 3: Rehearsal Process
Time: 50 Hours

Students will be ready and prepared to go through dance, singing, blocking and acting rehearsals on a regular basis. They will learn how to combine these talents within a rehearsal for a scene. They will also be prepared to experience technical and dress rehearsals prior to performance.

Curriculum Organizer – Creation
It is expected that students will:
-apply the creative process in their work
-show enthusiasm, readiness and patience throughout the process

Curriculum Organizer – Analysis
It is expected that students will:
-recognize the differences between a well rehearsed scene and an early rehearsal scene
-assess and evaluate their own progress in respect to their performance in all three performing art genres
-assess and evaluate their peers progress in respect to their performance in all three performing art genres

Unit 4: Production
Time: 28 Hours

Students will become familiar with the process of production and all that production entails. They will be introduced to marketing, orchestration of music, costuming, hair and make-up artistry, public relations, building sets and creating props. Teams will develop basic productions plans to achieve introductory goals of production.

Curriculum Organizer – Creation
It is expected that students will:
-think critically and problem solve
-gather relevant information from appropriate sources to achieve these goals
-use effective communication skills when gathering and sharing production information
-apply the creative process (i.e. perceptions, exploration, experimentation, production, and evaluation) in their work

Curriculum Organizer – Analysis
It is expected that students will:
-identify moral and legal consideration associated with producing copy-written material
-discuss the role of copyright and acknowledgements in production
-assess the quality of the production work

Curriculum Organizer – Technology
It is expected that students will:
-demonstrate basic knowledge of the use of lighting technology
-demonstrate basic knowledge of the use of sound equipment
-apply appropriate procedures associated with a specific position in a production team
-use basic vocabulary when discussing light and sound technology and process
-use and maintain equipment and work space in a safe and environmentally sensitive manner

Unit 5: Performance Time: 10 Hours
Students will become familiar with the performance process. Concepts such as how the acting, singing and dancing fit together will be explored. Teams of students will assess their final performance for the overall quality of their work and how well they have addressed the musical theatre genre.

Curriculum Organizer – Social and Cultural Issues
It is expected that students will:
-assess elements that contribute to the regional effects of music theatre in our local community.

Curriculum Organizer – Creation
It is expected that students will:
-apply the creative process (i.e. perceptions, exploration, experimentation, production, and evaluation) in their work

Curriculum Organizer – Analysis:
-explain personal interpretation of and preferences for a selected musical theatre scene
-analyze moral and legal considerations associated with producing music theatre
-analyze the role that music theatre has in reflecting, sustaining and challenging beliefs and traditions
-assess the influence of music theatre on public opinion
-assess the overall quality of the production

Instructional Components:
-direct instruction (Choreography, singing coach, acting coach, music director)
-indirect instruction (observation)
-interactive instruction (feedback)
-independent instruction (when needed)
-modelling
-practical creativity
-brainstorming
-group work
-analysis of commercial theatre productions (if available)
-analysis of own and classmates video work
Assessment Components:
- 60% of the grade will be based on evaluations conducted throughout the course.
- 40% of the grade will be based on a final evaluation of each student's final presentation, reflection and/or another method of evaluation suitable to the course content and administered toward the end of the course. i.e. 30% Rehearsal
  30% Preparation
  30% Performance
  10% Self Evaluation

Course Synopsis:

Course Synopsis
This course prepares and motivates students to provide leadership and assistance to younger students – Grades 8–10. The students in the course will be responsive and helpful to students with a variety of needs. Students will develop social responsibility and acquire skills in communication, interpersonal relations, coaching, leadership, and teamwork. These skills will be applied as they assist the classroom teacher. Students will acquire a life-long appreciation, value and acceptance of the importance of respecting individuals.

Rationale
This course has been developed to help students use leadership, communication and management skills while assisting the Classroom Teacher and various students. The students practice many employability skills and this experience may foster an interest in the teaching profession. The senior students have a positive effect and become role models for the younger students. The senior students model social responsibility in the classroom and in the total school environment. Interacting with younger students and the Classroom Teacher helps the students in their own understanding of and tolerance for people of different cultures and ability levels. Students gain confidence and the ability to express themselves in a group setting. The younger students benefit from the extra attention and assistance in the classroom.

Organizational Structure
Unit 1  Training Session  3 hours
Unit 2  In the Classroom  102 hours
Unit 3  Touchback Days  12 hours
Unit 4  Reflection/Feedback  3 hours

Unit 1- Training Session 3 hours
Students are given a Student Handbook and Student Assignments Booklet to read and work on under the guidance of the Peer Tutoring Teacher. Students are given readings on “How to make Tutoring a Pleasant and Useful Experience”, “Confidentiality Guidelines”, “Roadblocks to Communication”, etc. They will understand how they can work most effectively with the students they will help in the classroom. Students also discuss the way they will become role models for the younger students. Students are advised to seek assistance from the Peer Tutoring Teacher and/or the Classroom Teacher if they have any additional questions as they work in the classroom.

Curriculum Organizers and Learning Outcomes
It is expected that students will finish three written assignments, receive their classroom placement and be ready to assist the classroom teacher as a Peer Tutor.

Unit 2- In the Classroom 102 hours
Students are working in the classroom they have been placed in and directly helping the teacher and students. The Classroom Teacher will direct and supervise the student and assist them in their training to work with the
Curriculum Organizers and Learning Outcomes

It is expected that students will assist in the classroom as deemed appropriate by the Classroom Teacher and will record the activities, concerns and successes on their Weekly Activity Sheets.

Unit 3- Touchback Days 12 hours

Students attend four Touchback Days with the Peer Tutor Teacher and they will discuss any concerns/problems they might be having and reflect also on their successes. They will hand in their Weekly Activity Sheets and will do other assignments on topics such as Social Responsibility.

Curriculum Organizers and Learning Outcomes

It is expected that students will explain and reflect on their successes and concerns in the classroom, learn about the Social Responsibility Code in the school and how they can help the students in their classroom achieve a greater level of social responsibility.

Unit 4- Reflection/Feedback 3 hours

Students will attend a session with the Peer Tutoring Teacher and will write a Final Essay on the learning they have experienced throughout this class. They will reflect on their experiences in the classroom and offer feedback to the Peer Tutoring Teacher.

Curriculum Organizers and Learning Outcomes

It is expected that students will effectively communicate their ideas and reflections both in a written format (Final Essay) and verbally to the Peer Tutoring Teacher. They will reflect on how the experience working with other students has changed their own attitudes, goals and organizational skills.

Instructional Components

The student will be instructed by various methods while they are with the Peer Tutoring Teacher and while they are with the Classroom Teacher they have been assigned to. Several methods may be used such as:

- Direct instruction
- indirect instruction
- interactive instruction
- independent study
- modeling
- practical experience
- brainstorming
- group work

Assessment components

The students are assessed by both the Peer Tutoring Teacher and the Classroom Teacher through a variety of methods such as:

- teacher observation
- student reports
- teacher evaluation forms (using a rubric)
- weekly activity sheets assignments given by the Peer Tutoring Teacher
- a final essay
- group discussions/participation

Assessment Weighting

- Classroom Teacher Evaluation = 60% (three times each semester)
- Peer Tutoring Teacher Assignments and Weekly Activity Sheets/Final Essay = 40%

Learning Resources:

Learning Resources

The Learning Resources are assignments and articles provided by the Peer Tutoring Teacher in the Student Handbook. Articles include- “Learning Disabilities” – National Information Center for Children and Youth with Disabilities, “The Masks Students Wear” by Sally L. Smith.
Additional Information:

This course has been running at Howe Sound Secondary for many years. The Peer Tutoring Teacher and the Classroom Teacher work together to insure a successful match for the student and their classroom placement. The senior students are highly regarded by both the younger students in the class and the teachers involved in the program. This program has played an important role in helping our ESL students to understand the culture and language of the school.

Course Synopsis:

4. Course Synopsis:

?This is an introductory course to Ucwalmicwts the language of the St’at’inc people.
?Students will develop a basic understanding of Ucwalmicwts through a variety of activities. The approach of this course to second language acquisition approximates the pattern of first language acquisition. It begins with listening and responding to commands and then proceeds into speaking.
?Students will gain knowledge and understanding of the culture of the St’at’inc people through story telling, games, crafts and a variety of other activities.

5. Rationale:

It is critical for the preservation of Ucwalmicwts and the St’at’inc culture that the young people of Mt. Currie, Pemberton, Port Douglas, Skatin, Samaqwam, and Darcy are exposed to the language and culture in a meaningful way. In terms of the students’ self esteem and identity, the value of a program such as Native Language 10 cannot be underestimated.

6. Organizational Structure:

ASSIGNMENT APPROXIMATE PORTION OF TIME
Listening 40%
Speaking 30%
Games 15%
Art/Crafts 15%

7. Learning Outcomes:

It is expected that students will be able to demonstrate the following skills and knowledge:
1. Recognize simple commands in Ucwalmicwts
2. Give simple commands in Ucwalmicwts
3. Be able to recognize and use a wide variety of vocabulary including nouns, verbs, adjectives, adverbs, etc.
4. Be familiar with the customs of the St’at’inc people
5. Show culturally appropriate behaviours (support for one another, respect for those in bereavement, etc.)
6. Produce a variety of art/craft items (discipline, patience, etc.)
7. Be able to explain the cultural relevance of the art/craft items

8. Instructional Component:
9. Assessment Component

EVALUATION

Daily Monitoring of language acquisition 75%
Art/Craft completion 15%
Quizzes 10%

ASSIGNMENT Mark (%)
Daily language log 75%
Friendship bracelets 5%
Dream catcher 5%
Bead work 5%
10 Quizzes 1% each (10%)

10. Learning Resources

? Teaching Through Action (teacher guide)
? Videos
? Daily language log
? Adapted Ucwalmicwts sheets from the Scwepmc First Nation
? Thematic approaches to teaching professional development resources
? A Lillooet-English Dictionary
? Materials for arts/crafts

Students will attend a session with the Peer Tutoring Teacher and will write a Final Essay on the learning they have experienced throughout this class. They will reflect on their experiences in the classroom and offer feedback to the Peer Tutoring Teacher.

Curriculum Organizers and Learning Outcomes
It is expected that students will effectively communicate their ideas and reflections both in a written format (Final Essay) and verbally to the Peer Tutoring Teacher. They will reflect on how the experience working with other students has changed their own attitudes, goals and organizational skills.

Instructional Components
The student will be instructed by various methods while they are with the Peer Tutoring Teacher and while they are with the Classroom Teacher they have been assigned to. Several methods may be used such as:
- Direct instruction
- Indirect instruction
- Interactive instruction
- Independent study
- Modeling
- Practical experience
- Brainstorming
- Group work

Assessment components
The students are assessed by both the Peer Tutoring Teacher and the Classroom Teacher through a variety of methods such as:
- Teacher observation
- Student reports
- Teacher evaluation forms (using a rubric)
- Weekly activity sheet assignments given by the Peer Tutoring Teacher
- A final essay
- Group discussions/participation

Assessment Weighting
- Classroom Teacher Evaluation = 60% (three times each semester)
- Peer Tutoring Teacher Assignments and Weekly Activity Sheets/Final Essay = 40%

Learning Resources:
Learning Resources
The Learning Resources are assignments and articles provided by the Peer Tutoring Teacher in the Student Handbook. Articles include: “Learning Disabilities” – National Information Center for Children and Youth with Disabilities, “The Masks Students Wear” by Sally L. Smith.
Additional Information:

This course has been running at Howe Sound Secondary for many years. The Peer Tutoring Teacher and the Classroom Teacher work together to insure a successful match for the student and their classroom placement. The senior students are highly regarded by both the younger students in the class and the teachers involved in the program. This program has played an important role in helping our ESL students to understand the culture and language of the school.

Course Name: Desktop Publishing 12

Course Code: YDTP 12

Category: Business and Applied Business

Grade Level of Course: ☒ 10 ☒ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: June 15, 2005

Prerequisites:

Course Synopsis:

Course Synopsis:

• This is an advanced senior course to graphic design which will enable students to produce creative designs and layouts of graphic media and publications.
• Students will build on skills and knowledge acquired in Desktop Publishing 11.
• There will be heavy emphasis and high expectations for: design principles, layout guidelines, typography, creativity, and software mastery.
• To develop a better understanding of graphic design principles.
• To gain more knowledge and experience in the use of the computer and its software for media and commercial publications.
• To provide a thorough knowledge of current technologies used in industry today.
• To provide practical application software training that will become life-long skills and can be used in the workforce.

5. Rationale:

In today’s world of technology, it is vital for students to have hands-on experience and knowledge of technology. Not only will students be developing life-long skills, but they will be confidently prepared for using technology in today’s marketplace. In addition, this is an artistic and creative course where students are encouraged and challenged to tap into and to develop their artistic potential. Students taking this course are often interested in possibly pursuing a career in the field of graphic design. This course provides them with opportunities to further develop their skills and creativity, along with work experience opportunities.

6. Organizational Structure: (Based on a semester timetable where classes are mostly 1:20 in length)

ASSIGNMENT APPROXIMATE # OF CLASSES TO COMPLETE
Photoshop Project – A Review 10
Titles Assignment 4
Project – Learning QuarkXpress 10
Lifeline Collage 8
Quark & Photoshop - Ads Portfolio 10
Quark/PhotoShop/Illustrator – Logos Portfolio 10
Book Covers Project 8
Stickers Project 4
CD Design Project 10
Personal Project (web design, animation, etc…) 10
Final Project - Choices 10
7. Learning Outcomes:

It is expected that students will utilize various software in depth, in order to complete assignments and projects for this course:

- MS Word (word processor)
- ClipArt (canned graphics)
- Internet (information and graphics searches)
- Typography
- CorelDraw, QuarkXpress (page layouts)
- Adobe PhotoShop (photo/image editor)
- Adobe Illustrator (text/path editor)
- DreamWeaver (web page design)
- Flash (animation and web page design)
- Scanner software (scanned images)

Students will be able to demonstrate the following skills and knowledge in depth:

1. Computer vocabulary
2. Local Area Network set up
3. Internet protocol
4. Search for Internet sites
5. Download graphics off the Internet
6. Word processing skills
7. Edit and compose at the computer
8. Use software to design an advanced page layout
9. Use software to edit photographs thoroughly
10. Use software to draw pictures
11. Use a scanner and its software to scan images
12. Learn and understand the importance of typography
13. Import text and graphics from other programs
14. Maintain files properly
15. Basic computer hardware and software knowledge
16. Produce creative and attractive designs and layouts (logos, ads, collages, posters, book covers, cd’s...)

8. Instructional Component:

- Direct instruction
- Indirect instruction
- Interactive instruction
- Independent instruction
- Students teaching one another
- Self-directed progress and pacing
- Choices and flexibility of projects
- Modelling
- Practical creativity
- Brainstorming
- Partner work
- Analysis of own work
- Analysis of peers’ work
- Analysis of commercial work

9. Assessment Component

**EVALUATION**

Daily Social Responsibility 10%
Assignments and Projects 80%
Final Project 10%

*Students’ work may be given an “I” (Incomplete) if it does not meet assignment requirements. Therefore, no students re-do their assignments.*
At any time during the course, students can improve on their assignments by correcting and re-submitting them for better marks.

? No zeroes will be given to students. There is no "opting out" of any assignment and test.

? Social Responsibility is worth 10% of the final letter grade. A daily mark out of 5 will be given. It is based on the following: Effort and Work Habit, Punctuality, Taking responsibility for work area, Manner and Disposition in the classroom, Willingness and behaviours towards problem solving, Respect for others in the classroom, Leadership and helpfulness in the classroom when applicable.

? There will be a final deadline for course work to be completed and handed in, usually on make-up exam day.

Course Synopsis:

Course Synopsis
This course prepares and motivates students to provide leadership and assistance to younger students – Grades 8 -10. The students in the course will be responsive and helpful to students with a variety of needs. Students will develop social responsibility and acquire skills in communication, interpersonal relations, coaching, leadership, and teamwork. These skills will be applied as they assist the classroom teacher. Students will acquire a life long appreciation, value and acceptance of the importance of respecting individuals.

Rationale
This course has been developed to help students use leadership, communication and management skills while assisting the Classroom Teacher and various students. The students practice many employability skills and this experience may foster an interest in the teaching profession. The senior students have a positive effect and become role models for the younger students. The senior students model social responsibility in the classroom and in the total school environment. Interacting with younger students and the Classroom Teacher helps the students in their own understanding of and tolerance for people of different cultures and ability levels. Students gain confidence and the ability to express themselves in a group setting. The younger students benefit from the extra attention and assistance in the classroom.

Organizational Structure

Unit 1  Training Session				      3 hours
Students are given a Student Handbook and Student Assignments Booklet to read and work on under the guidance of the Peer Tutoring Teacher. Students are given readings on “How to make Tutoring a Pleasant and Useful Experience”, “Confidentiality Guidelines”, “Roadblocks to Communication”, etc. They will understand how they can work most effectively with the students they will help in the classroom. Students also discuss the way they will become role models for the younger students. Students are advised to seek assistance from the Peer Tutoring Teacher and/or the Classroom Teacher if they have any additional questions as they work in the classroom.

Unit 2- In the Classroom					102 hours
Students are working in the classroom they have been placed in and directly helping the teacher and students. The Classroom Teacher will direct and supervise the student and assist them in their training to work with the
Curriculum Organizers and Learning Outcomes
It is expected that students will assist in the classroom as deemed appropriate by the Classroom Teacher and will record the activities, concerns and successes on their Weekly Activity Sheets.

Unit 3 - Touchback Days 12 hours
Students attend four Touchback Days with the Peer Tutor Teacher and they will discuss any concerns/problems they might be having and reflect also on their successes. They will hand in their Weekly Activity Sheets and will do other assignments on topics such as Social Responsibility.

Curriculum Organizers and Learning Outcomes
It is expected that students will explain and reflect on their successes and concerns in the classroom, learn about the Social Responsibility Code in the school and how they can help the students in their classroom achieve a greater level of social responsibility.

Unit 4 - Reflection/Feedback 3 hours
Students will attend a session with the Peer Tutoring Teacher and will write a Final Essay on the learning they have experienced throughout this class. They will reflect on their experiences in the classroom and offer feedback to the Peer Tutoring Teacher.

Curriculum Organizers and Learning Outcomes
It is expected that students will effectively communicate their ideas and reflections both in a written format (Final Essay) and verbally to the Peer Tutoring Teacher. They will reflect on how the experience working with other students has changed their own attitudes, goals and organizational skills.

Course Synopsis:
An introductory course to the scientific field of psychology and the study of human behavior. Psychology education involves students in learning about the science of psychology. The overall aim of the course is to have students seek, analyze, create, understand and discover while gaining a further appreciation of psychological science. As students explore the variety of topics in this course it is the ultimate goal that we, as educators, will help students excel as human beings as they gain a greater understanding of human behavior. The psychology course is organized to foster students' growth, development, and understanding of cultural diversity. At the end of the course, students are expected to have an understanding of psychological concepts, theories, research findings and applications.

Course Name: Link Crew 12

Course Code: YIPS 12A

Category: Health and Human Services

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2005

Prerequisites:

Course Synopsis:

The Link Crew motto is “Students helping students succeed” – in this case, senior students (grades 11 and 12) mentoring grade 8’s into a successful elementary to high school transition. The full, two-year Link Crew program (Link Crew 11 and Link Crew 12) consists of instruction, training and application. The program is a mentorship program which ‘links’ pairs of senior students (grades 11 and 12) with small groups of incoming grade 8’s. A student may act as a Link Leader in grade 11 only, or in both grades 11 and 12.

Specifically, the purpose of the program is to increase the sense of community within the school, to improve the ‘climate’ in the school, and, as stated, to facilitate the successful transition of the grade 8’s into high school. The bond between the Links and the grade 8’s continues throughout the year, through both formal and informal communications and events. In addition, Link Crew also incorporates a systematized method for dealing with specific personal and academic issues that the grade 8’s may have (Link Alert), as well as a recognition program for the celebration of student achievement (Link Applause). All of these aspects help develop a relationship between the Links and their leaders that lasts well into grade 9. Further, the senior students have a strong and positive effect, not only on existing school culture, but also on the development of future culture, through the ability to respond to specific focus areas that correspond to the differing needs of the particular incoming class of grade 8’s in any given year.

At the grade 12 level, Link Leaders are trained, during a two-day retreat, to facilitate the initial day-long assembly with the grade 8’s; they receive a further 60 hours of course instruction and application through 12 units of class work in Peer Counseling, and comprise the remaining hours of course time through monthly meetings with Link Crew teachers and their Link Leader peers, with organized and structured, as well as impromptu, communication and events with their grade 8’s.

The grade 12 Link Leaders may go through the retreat orientation and training in their second year as well, and are also partnered with a 1st year Link Leader. In this way, the second year Link Leaders in LINK CREW 12 are not only mentoring grade 8’s, they are also responsible for mentoring first year Link Leaders. Further, at the grade 12 level, the program is further developed through the addition of the LINK CREW CLASS. The Link Crew Class functions to maximize the benefits of the existing Link Crew program. These structured classes focus specifically on two things: first, on the development and delivery of Academic Follow Up Lessons that the Link Leaders teach to blocks of grade 8’s; second, the class provides opportunities for deeper integration of themes, skills and qualities that Link Leaders were introduced to in Link Crew 12. In this weekly class, the grade 12’s are instructed in seven different units, and develop between 5 and 10 lessons that they then teach (Unit 9) to classes of grade 8’s.

Included below is the Organizational Structure, as well as Unit Overviews, Curriculum Organizers, and Learning Outcomes, followed by Assessment, Resource and Cost information, for LINK CREW 12. In addition, please see Appendix I, entitled The Link Crew Class.
Learning Resources:

The following lists the required handbooks necessary to initiate this program. Teachers may use additional leadership/activities books to help facilitate the program, but none are necessary.

Teacher Resource:
Link Crew Coordinator’s Handbook by Learning for Living (Included in Training)
Teacher Resource:
Link Crew Follow Up Handbook by Learning for Living (Included in Training)
Teacher Resource:
The Link Crew Class by Learning for Living (Included in Training)
Student Resource:

School Name: Southern Okanagan Secondary

Course Name: Sociology 12

Course Code: YSSC 12B

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 31, 2004

Prerequisites: English 11

Course Synopsis:

Sociology is the study of human beings within the context of society. Sociology’s task is to understand how and why we interact with each other the way we do…the extent to which we, as individuals, create our own lives and the extent to which we are created by forces outside our individual control.

One of the main assumptions of sociology is that our lives are shaped by a number of factors including numerous groups and institutions (eg. the family, formal education or media). Understanding the structure, interrelationship, and dynamic of these groups and institutions helps us gain more control over our future. Sociology also puts contemporary life into a historical perspective, which helps us to understand how our present is affected by our past and thus how we might gain more control over our future.

Learning Resources:

TBA- I am currently in the process of reviewing a number of texts to be used as the primary resource. Accessing current information on the Internet for analysis will be a very important throughout the course.

Course Name: Forest Industry Fundamentals 12

Course Code: YFIF12

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 140

Date Approved: May 31, 2005

Prerequisites: None

Course Synopsis:

Forest Industry Fundamentals 12 was developed to prepare students/residents of the school program at Prince George Youth Custody Centre for entry-level positions in silviculture in the British Columbia forest industry.

The learning outcomes of Forest Industry Fundamentals 12 are divided into modules. Module 1 will deal with objective topics such as land tenure, ecology, land use, forestry inventory, harvesting and silviculture. In Module 2, students will learn practical skills directly related to silviculture work and obtain industry-recognized certification in several areas required by employers in silviculture. Both Module 1 and Module 2 form a solid knowledge base as the students begin work experience (EWE 12) through contracts arranged with local industry and Prince George Youth Custody Centre.

School Name: College Heights Secondary

Course Name: Horticulture 11

Course Code: YAAPS1AHOR

Category: Science and Applied Sciences

Grade Level of Course: 10  [X] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 8, 2008

Prerequisites: Science 10

**Course Synopsis:**

Horticulture 11 provides hands on learning experience for students interested in developing job-related skills in the agricultural and horticultural sector. Students will gain knowledge and skills in greenhouse operations, landscaping, garden development and garden maintenance. Students will also learn theory relating to many aspects of horticulture such as: Soil composition and fertility, importance of plants to humans, plant hardiness, botany (plant development, parts and classifications) and plant propagation.

Practical and project work are major components of this course. Students will complete three projects relating to topics covered and will participate daily in development and nurturing of nursery stock.

Course Name: Journalism and Publishing 12

Course Code: YJP 12

Category: Liberal Arts and Humanities

Grade Level of Course:  

10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 100 hours

Date Approved: January 25, 2005

Prerequisites: None

Course Synopsis:

The course is designed to experience and learn aspects of photo journalism involved in the digital production of the school yearbook. The students learn and use the technology of Desktop Publishing which involves word processing, file management, scanning, digital photography, digital layout and graphic production. The course is designed as a workshop course which necessitates students working on modules to learn the software and then cooperating as a group to assign tasks to be completed for the production of the yearbook.

The goals of School District No. 57 is to provide opportunities for all students to develop knowledge, skills, and attitudes which will enable them to enjoy a productive and satisfying life and to be positive participants in our democratic society. This practical course will develop skills with computer technology and build positive, realistic attitudes towards self, school and society. The skills introduced in the class will last a lifetime and give the students an opportunity to develop a greater awareness, confidence and comfort with digital technology. This course is to:

- provide enrichment activities beyond the regular classroom with the yearbook.
- provide opportunities for students to reach their potential.
- assist students to learn positive leadership skills.
- promote school spirit and community spirit through positive, creative activities.
- provide students with skills needed to be successful and happy in both their working and social relationships.

Course Name: Music Appreciation 11
Course Code: YMA 11
Category: Fine Arts, Design, and Media

Grade Level of Course: □ 10  □ 11  □ 12

Number of Course Credits: 4
Number of Hours of instruction: 100 hours
Date Approved: February 22, 2005
Prerequisites: None

Course Synopsis:

Music Appreciation studies the growth and influences of popular music on culture from 1900 to the present day. Popular music is used to give the student an orientation in time as we study the cultural changes which we use to describe us, what we were, and toward what we hope to become. A film, representative of the decade under study, will be used as the "transport device" for the students to become a part of the social, political, economic, and aural milieu of the particular time-period. Having established an understanding of the era a significant musical figure from the period is introduced. This biographical study will be used to enhance the appreciation for his/her music and art. Students will discuss and evaluate his/her individual contribution(s) to music and what his/her possible influences are on modern music.

Course Synopsis:

This course has been developed to help students explore the range of personal and social expression through Fine arts and Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different presentation forms: slide shows, advertising, displays, and movies. Students will use computers extensively to learn new technical skills and develop their voice as an artist. They will learn basis marketing strategies as they apply to image making and how they affect a target audience. They will learn how to make critical and informed responses to art and advertising. They will be expected to develop an appreciation of Fine Arts and Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social and economic condition of our lives.

Grade Level of Course:  

10  11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 120 plus 6

Date Approved: February 22, 2005

Prerequisites: Students must have completed Leadership 11 or have a proven record of leadership ability

Course Synopsis:

The Leadership 12 course contains the following topics: Recognizing and Assessing Leadership Qualities; Chair and organize meetings; Evaluate, Teach and Advise peers on Goal Setting; Teach Patterns of Organization; Organize and Run a Public Relations Campaign; Creating and Implementing Problem Solving and Decision Making Solutions; Assessing Team Strengths and Weaknesses.

The goals of School District No. 57 are to provide opportunities for all students to develop knowledge, skills, and attitudes which enable them to enjoy a productive and satisfying life and to be positive participants in our democratic society.

Leadership 12 will allow the student to experience and demonstrate the skills and knowledge needed to be healthy, productive, and satisfied participants as adults while helping to work with their school and community to improve school and community spirit.

Leadership 12 will provide the following:
• Opportunities to work within their school to foster school spirit and build a sense of community.
• Demonstrate leadership skills through hands on projects.
• Enhance growth of student’s self esteem through working with grade eight classes and individual students as a positive role model.
• Promote positive life choices by providing opportunities for students to run projects such as Community projects.
• Enhance leadership growth in the students to ensure a love of life long learning.
• Students will experience the skills and knowledge needed to be productive healthy and satisfied people.

Rationale:
1. Skills to be an ethical leader can be student led and demonstrated
2. The skills such as problem solving and team building are essential skills needed to be successful in all relationships from jobs to marriage.
3. Skills and knowledge learned through hands on/practical training are retained longer.
4. Using leadership skills to be a role model enhances self esteem.
5. Students helping students promotes growth in school spirit.
6. Students need to learn about ethical leadership.

Our society needs strong honest leaders. Leadership skills can be used in all aspects of life from child rearing to running a multinational corporation. Corporations/Occupations are looking for employees that have the skills demonstrated and practiced in Leadership12. Students who take Leadership classes have a better chance of getting outstanding scholarships. Skills and knowledge used in Leadership 12 open doors to post secondary education and employment, that are not available to those who do not possess and use these skills and knowledge.

Grade Level of Course:  

10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 27, 2008

Prerequisites: None

Course Synopsis:

This course offers sport specific instruction and player development in the sport of basketball. Instruction and demonstration in fundamental skills such as passing/receiving, form shooting, dribbling, individual defense/offense, rebounding, footwork/balance and team principles of defense/offense will be the focus. This course is geared towards developing the technical skills, not so much the tactical skills of the game. Technical skills are defined as, specific procedures to move one’s body to perform a task that needs to be accomplished. Students will be expected to articulate basic offensive and defensive strategies. Students will apply learned skills in small sided games that allow for maximum development.

They will learn the rules of FIBA and apply those rules both on the court in game situations and off the court as minor officials. They will also learn sport specific nutrition and weight training and its implications for sport performance, physical fitness, and wellness. This training will focus on strength, speed, agility and flexibility (at this age it will be geared towards mastering their own body composition).

Students will gain an appreciation and understanding of the importance of respect, collaboration, and team play as it relates to being a player, teammate, coach and spectator. The challenge to be their best without conceit, compromise, comparison, crowds and callousness will be at the forefront of their mental training.

Course Synopsis:

This course offers sport specific instruction and player development in the sport of basketball. Instruction and demonstration in the tactical side of competing and applying skill acquisition will be the focus of this course. This course is geared towards developing advanced technical skills, and being able to apply them tactically in a game situation. Technical skills are defined as, specific procedures to move one’s body to perform a task that needs to be accomplished. Students will be expected to breakdown and articulate offensive and defensive strategies. Students will apply learned skills in small sided games that allow for maximum development.

They will learn the rules of FIBA and become certified referees. They will also learn sport specific nutrition and weight training and its implications for sport performance, physical fitness, and wellness. This training will focus on strength, speed, agility and flexibility. An emphasis will be placed on developing power and explosiveness through plyometrics and specific speed training.

Students will gain an appreciation and understanding of the importance of respect, collaboration, and team play as it relates to being a player, teammate, coach and spectator. The challenge to be their best without conceit, compromise, comparison, crowds and callousness will be at the forefront of their mental training.

Course Synopsis:

The goal of this course is to raise student awareness of genocide in our world, as well as to inspire students to be responsible global citizens. Students will examine what genocide is, where it has happened (or is happening), why it happens, characteristics of genocide, response to genocide and ultimately how genocide can be prevented.

Students will examine in detail specific examples of genocide, including the Holocaust, the Armenian genocide, Cambodia and Rwanda. In doing so, they will look at the historical context in which it occurred, what specifically happened, why it happened, the response of Canada and the world, the experience of victims of the genocide and what we can learn from this historic event in order to prevent future or current atrocities.

Students will then embark on individual projects on examples of genocide that interest them. They will examine what happened, why it happened, how it happened and determine why it is (or is not) an example of genocide. Students will also examine the response of Canada and the world, how it could have been prevented, and what lessons it holds for humanity. Students will also present their research to the class, and it will become part of the course curriculum.

Finally, students will examine the Stephen Lewis “Massey Lectures” to examine the state of affairs in Africa today and what needs to be done to prevent further atrocity.

Throughout the course, students will be challenged to examine some of the darkest pages of human history. They will examine the failure of humanity, which either caused genocide to take place or allowed it to happen. They will also examine the heroics of the victims of genocide. It is hoped that students will see, as Gandhi once pointed out, that there have been many despots in the world, and for a time their power seems insurmountable; but in the end, the power of love triumphs, always. How can we contribute to this great triumph?

Course Synopsis:

This course is an introduction to the game of Canadian football including football theory, techniques and training both in and off-season. Students will learn the rules of the Canadian game as well as both offensive, defensive and special teams strategies. Students will learn how to use personal equipment and be instructed in the safe use of that equipment during technical drills. Students will participate in non-contact drills and scrimmages. In addition to Theory students will learn proper technique for blocking, tackling, throwing, catching and kicking the football. Practice of both individual and team skills will be incorporated into lessons. Students will gather an understanding of the history and evolution of the Canadian game.

An additional focus for the course will be off-season football specific training including weight training for strength and power, speed and agility work and body flexibility. Students will learn how to develop and maintain a healthy, vibrant off-season program that helps them achieve performance improvement on the field.

Students will also learn about how football players learn about and take care of their bodies through preventative maintenance and therapy. Special attention will be paid to the dangers of performance enhancing drugs such as steroids and growth hormone. Training supplements and proper training nutrition will be investigated.

Course Synopsis:

In this course students explore what it will be like to be responsible for their own nutritional needs once they are “on their own.”

Students begin with an introduction to the course and the kitchen. Kitchen and food safety/sanitation will be covered as well as the consequences of unsafe kitchen practices. Students will explore how to set up a kitchen with basic equipment and supplies with emphasis on budgeting. Shopping for equipment and groceries will form an integral component of the course. Cookbook, recipe terms and vocabulary are introduced and practiced throughout the course. The key nutrients and nutritional needs laid out in the Canada Food Guide will be emphasized.

The practical component of the course (lab work) focuses on simple meals that can be prepared quickly, with minimal equipment and inexpensive ingredients that are easily obtained.

Grade Level of Course:  

10  

X 11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120 Hours

Date Approved: February 22, 2005

Prerequisites: None

Course Synopsis:

This course has been developed for students who enjoy woodworking but do not wish to engage in the construction of large functional wood projects. Students will focus on small, well planned, projects that have an artistic rather than functional use. There will be a strong emphasis on exploring elements of design as it relates to the various woodworking disciplines offered in the course. Students will be encouraged to incorporate the carving and wood burning skills they will learn in units two and three to enhance their work for the remainder of the course. Learning outcomes are grouped under the curriculum organizers: Safety-Techniques and Equipment - Instruction and Practice, Design-Elements and Incorporation, Materials - Selection and Assessment, Finishing - Instruction and Practice, Analysis - Reflection and Assessment. The approach is intended to provide students with a skill set necessary to effectively explore each woodworking technique in a meaningful and fulfilling way. Students will be encouraged to display their work within the school and at various locations in the community.

Category: Fitness and Recreation

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 25, 2006

Prerequisites: PE 10

Course Synopsis:

This course is an introduction to personal fitness training techniques and strategies. Students will learn how to create realistic fitness goals, develop their own individualized program and execute a fitness program to successfully attain their goals. Weight training will be the primary activity for all of the class participants with students strength training three times a week. In addition students will be exposed to different forms of cardiovascular activity such as step aerobics, floor aerobics, cardio kickboxing, running, cycling, as well as traditional gym activities such as basketball.

Principles of training will be discussed, including the signs and symptoms of common fitness injuries and treatments recommended.

Nutrition is another important element of the course that will be explored by the students. Students will be required to keep a journal of their own nutritional habits and make appropriate changes to their diets based on nutritional information presented in class.

This class will satisfy graduation portfolio requirements of 80 hours of physical activity.

There may be some costs involved to pay for guest instructors and visits to the local fitness studio.

10 □ 11 12  

Number of Course Credits: 4
Number of Hours of instruction: one semest
Date Approved:  March 30, 2004

Prerequisites:  Students must have an interest in art and design.

Course Synopsis:

A student in Wood Art/Crafts 10 should demonstrate knowledge of, consideration of, appreciation of, and ability to apply:
- the elements and principles of design, especially as they apply to symmetry, and to the basic shapes of native design (the circle, the ovoid, the T-shape, the S-shape, U-shape, and split U-shape)
- the creation of images based on an understanding of historical and contemporary images and issues
- Historical and contemporary developments as they apply to native B.C. art.
- An overview of the wood based culture of British Columbia's native tribes and of the role that an aboriginal artist has in the transmission of the culture across generations.

Course Name: Forest Management 12

Course Code: YFM 12

Category: Science and Applied Sciences

Grade Level of Course:  

10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: March 15, 2005

Prerequisites: Forest Management 11

Course Synopsis:

Forest Management 12 is the second year of the two year Forest Management Program at Mackenzie Secondary School. The primary purpose of Forest Management 12 is to provide students with the skills and information to complete the 120 hour forestry work experience course. Most of the work experience will take place at the school’s Woodlot Licence.

The work experience will vary depending on the situation at the woodlot. The work experience could include such things as:
- block design and layout
- timber cruising
- mountain pine beetle control measures
- flip and skid
- brushing and weeding
- tree planting
- manual tree falling
- fall and burn
- skidder operation
- processor operation
- road design and layout
- road construction
- bridge construction
- wildlife evaluation and monitoring
- timber selling
- woodlot licence long range planning
- visit to various mill processing plants
  - sawmill
  - pulp mill
  - plywood mill
  - paper mill
  - finger joint mill
  - active logging sites

Work experience will not be limited to the Woodlot and could include job shadows with industry and government foresters.

Date Approved: March 15, 2005

Prerequisites: None

Course Synopsis:

Forest Management 11 will introduce students to the basic concepts of Forest Management in British Columbia. Forestry is a major industry in British Columbia and the only industry in Mackenzie. A knowledge of basic forest management principles will help students understand the issues involved in forest management and to develop an interest in forestry as a career. The course will combine classroom instruction with practical hands on experience at the High School’s Woodlot License located 10 km south of Mackenzie. The field work will enhance interest in forestry and develop employment skills.

Number of Course Credits: 4

Number of Hours of instruction: 120 plus 6

Date Approved: February 22, 2005

Prerequisites: Students must have completed Leadership 11 or have a proven record of leadership ability

Course Synopsis:

The Leadership 12 course contains the following topics: Recognizing and Assessing Leadership Qualities; Chair and organize meetings; Evaluate, Teach and Advise peers on Goal Setting; Teach Patterns of Organization; Organize and Run a Public Relations Campaign; Creating and Implementing Problem Solving and Decision Making Solutions; Assessing Team Strengths and Weaknesses.

The goals of School District No. 57 are to provide opportunities for all students to develop knowledge, skills, and attitudes which enable them to enjoy a productive and satisfying life and to be positive participants in our democratic society.

Leadership 12 will allow the student to experience and demonstrate the skills and knowledge needed to be healthy, productive, and satisfied participants as adults while helping to work with their school and community to improve school and community spirit.

Leadership 12 will provide the following:

• Opportunities to work within their school to foster school spirit and build a sense of community.
• Demonstrate leadership skills through hands on projects.
• Enhance growth of student’s self esteem through working with grade eight classes and individual students as a positive role model.
• Promote positive life choices by providing opportunities for students to run projects such as Community projects.
• Enhance leadership growth in the students to ensure a love of life long learning.
• Students will experience the skills and knowledge needed to be productive healthy and satisfied people.

Rationale:

1. Skills to be an ethical leader can be student led and demonstrated
2. The skills such as problem solving and team building are essential skills needed to be successful in all relationships from jobs to marriage.
3. Skills and knowledge learned through hands on/practical training are retained longer.
4. Using leadership skills to be a role model enhances self esteem.
5. Students helping students promotes growth in school spirit.
6. Students need to learn about ethical leadership.

Our society needs strong honest leaders. Leadership skills can be used in all aspects of life from child rearing to running a multinational corporation. Corporations/Occupations are looking for employees that have the skills demonstrated and practiced in Leadership12. Students who take Leadership classes have a better chance of getting outstanding scholarships. Skills and knowledge used in Leadership 12 open doors to post secondary education and employment, that are not available to those who do not possess and use these skills and knowledge.

School Name: Prince George Secondary School

Course Name: Language for Travel 11

Course Code: YLFT11

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: October 24, 2006

Prerequisites: None, but some technological knowledge is desired. This course is available to grades 10, 11, 12

Course Synopsis:

The vision of this course is to give students an introduction to various European languages as well as tourism, and culture. It has been developed to encourage students interest in travelling as well as to introduce students to the languages of the four regions of Europe to be studied. Students will study the geographies, landmarks, histories, and will have an introduction to the native languages of France, Spain, Italy, and Scotland.

The unifying thread of this course is an exploration of languages that exist in the world ranging from the widely-used language, to the lesser-used and dying language. An exploration of why languages of all types are important to human beings and why they should be protected and encouraged will be undertaken at the beginning. Students will also explore their own heritage in order to find out if there is another language in their backgrounds.

The core of the course will be an introduction of four different European languages to the students, French, Spanish, Italian, and Scottish Gaelic. These four languages have been specifically chosen for various reasons. First, they represent four heavily-traveled regions of Europe. Second, they represent three distinct language types. French and Spanish are two widely-spoken (and taught) international languages, Italian is widely-spoken but largely regional, and Scottish Gaelic is a lesser-spoken language. The idea is to show students that there are more than just the major world languages that can be learned. There are thousands of languages, and thousands of possibilities.

The introductions of the languages will focus on the use of the language in everyday situations as a tourist in the region(s) where the language is spoken. In other words, language for traveling will be the focus. Therefore, speaking and reading will be the emphasis rather than intricate grammatical study, writing, and translation. Connected with this will be a study of the country or countries where the language is spoken as well as the history and background of the language.

At the end of the language units, there will be unit projects where students can choose a topic relevant to the unit for further research. Computers, software, and the Internet will be used heavily throughout each unit. Because of the large amount of content in the course, technology is to be used as a tool and is not going to be expressly taught. Therefore, prior knowledge of and experience with computers, software, and the Internet would be an asset.

A final project will be given that will encourage the students to bring together what they have learned about languages, culture, and travel with another language of their choice for detailed exploration. This final project will be presented to the class at the end of the course.

The ultimate goal of this course is to not only encourage students to want to travel, but to encourage them to want to learn languages.

Course Synopsis:

Learning Strategies 11 is a course designed to support identified learning disabled students with their preparation for graduation and life-long learning. The course has been developed to provide students with learning opportunities to gain a clear understanding of this disability and their strengths and weaknesses. As students develop their learning profile, they will have the opportunity to try a repertoire of strategies to identify and develop those learning strategies which empower them to achieve success.

Recognizing the scope of learning differences, strengths and weaknesses, interests and ambitions in career planning, the course must have the flexibility to tailor goals and learning outcomes to meet the needs of individual learners as outlined in their Individual Education Plan (IEP).

Course Synopsis:

Learning Strategies 12 is a course designed to support identified learning disabled students with their preparation for graduation and life-long learning. The course has been developed to provide students with learning opportunities to extend their understanding of their disability so that they are better able to articulate their learning profile. In Learning Strategies 11, students identify and apply specific learning strategies which are effective in meeting their educational needs. In Learning Strategies 12, the students take the learning strategies learned in LS 11 and adapt them for use in a variety of learning situations. The focus of this course is on the problem solving process and application and/or adaptation of specific learning strategies to successfully address the different educational challenges they encounter.

This course promotes development of independence of action by students which will assist them to become their own advocate, achieve their educational and career objectives, as well as develop the flexibility to deal with change. In addition, students will explore different career and/or educational opportunities and advocate on their own behalf to gain the information and support they require specific to their disability. Upon completion of the course, their completed self awareness portfolio, which illustrates their learning profile, can be used when pursuing educational or career opportunities.

Recognizing the scope of learning differences, strengths and weaknesses, interests and ambitions in career planning, the course must have the flexibility to tailor goals and learning outcomes to meet the needs of individual learners as outlined in their Individual Education Plan (IEP).

Course Name: (Nle...kepmxcin (Thompson) Language 11

Course Code: YTHMP 11

Category: Liberal Arts and Humanities

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2005

Prerequisites: None

Course Synopsis:

Nle...kepmxcin 11 has been created to encourage students to explore the richness and complexity of the Nle...kepmxcin language. Students will explore both the traditional and contemporary use of the language. The students will be expected to respond to their understanding and appreciation of the language, cultural values and lifestyle both from a historical and modern approach by creating written pieces and being able to comprehend their works.

Additional Information:

Rationale:
The Nle...kepmxcin course was created to help students understand and gain an appreciation of:
- the history through the language of the Nle...kepmxcin people,
- the traditional to modern lifestyle, cultural values and ceremonial rights of passage,
- land resources and stewardship,
- traditional protocol and politics.
As well, this course will ensure the preservation of the Nle...kepmxcin, one of many traditional languages currently on the endangered list to extinction.
Rationale:
Healthy Life Style - The course has been developed to allow students opportunity to explore some of the vast number of adventure tourism type activities that are available in BC. Students may incorporate some of these activities into their life as part of a life long healthy life style.

Personal Growth - The activities themselves often act as a catalyst for reflection, development of trust, and personal growth. Students are encouraged to challenge themselves and through that challenge grow in confidence in all areas of life.

Employment - The course is also intended to be a stepping stone for students interested in a career in the Adventure Tourism industry in BC. Students may use skills they have gained in the course to find employment or may pursue further training leading to wider employment opportunities.

Course Synopsis:
Adventure Tourism is a semester long course that is available to students in grades 11 and 12. The course allows students to explore a number of activities within the Adventure Tourism industry while developing related skills, knowledge, and attitudes. The course focuses on safety, personal responsibility, and personal growth through challenge.

Additional Information:

Course Name: AVID 10

Course Code: YAVD 10

Category: Other

Grade Level of Course: [X] 10  [ ] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 100

Date Approved: January 16, 2006

Prerequisites: Application, Interview and Acceptance into Program

Course Synopsis:

AVID is designed to increase school wide learning and performance. The mission of AVID is to ensure that students, and most especially the students in the academic middle, are capable of completing a college/university path. AVID students will succeed in rigorous curriculum, enter mainstream activities of the school, increase their enrollment in post-secondary institutions, and become educated and responsible participants and leaders in a democratic society. The purpose of the AVID program is to restructure the teaching methods of the school and to open access to the curricula that will ensure college/university eligibility to almost all students.

Additional Information:

Rationale:

AVID is an educational program dedicated to helping students in the academic middle (approximate GPA 2.0 to 3.5) who are often underachieving, disadvantaged, under-represented at post-secondary institutions, or who will be first generation college students, to become educated and responsible participants and leaders in our democratic society. AVID comes from the Latin root "avidus", meaning "eager for knowledge". AVID will help provide the support systems and the skills required for students to be successful in the rigorous curricula essential for college and university entrance requirements.

Course Synopsis:

The AVID elective encompasses the key elements that promote academic success and ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components - AVID curriculum content, AVID Tutorials, and AVID maintenance and motivational activities.

Additional Information:

Rationale:
The mission of AVID is to ensure that students, and most especially the students in the academic middle, will be adequately prepared to enter post-secondary educational programs when they graduate from high school. Students in the academic middle are often under-achieving. With support, encouragement, and individual determination, they can acquire the skills and knowledge that are necessary for academic success.

School Name: Merritt Secondary

Course Name: Cafeteria 10

Course Code: YCAF10

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

☐ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: January 25, 2004

Prerequisites: Foods 9

Course Synopsis:

By the end of the Cafeteria 10 the student will have acquired their Food Safety Level 1 certification, and have applied the knowledge gained throughout this course.

Students will have developed their personal and professional skills while working with the public. They will understand the need for hygiene in the work place and in themselves.

Students will have gained skills in reading recipes and producing product that is aesthetically pleasing and tasty. Knowledge of portion size and nutritional value will also be acquired.

One of the most important skills learned in Cafeteria 10 is the actual work experience each student must do to successfully complete this course.

Additional Information:

Rationale

Cafeteria 10 is the beginning level of a course designed to help students in quantity food preparation and service. Students will develop the skills needed in commercial food preparation. They will be involved in all aspects of food preparation from the storing of the food to the preparing of the food to the actual serving of the prepared foods. Students will be handling commercial and domestic equipment in a safe and confident manner while learning how to serve the public.

Students will acquire a Food Safety Level 1 Certificate while in training and will use this information throughout the course. Students will be gaining actual work experience when they are serving the student body of Merritt Secondary School.

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 6, 2008

Prerequisites: Enrollment in an Academic Program. 70% average in academic grade 10 courses. French 10 and Principle

Course Synopsis:

This course prepares students to be effective tutors for the AVID program. Students will learn classroom methodologies that promote independent, collaborative, and critical learning. They will be required to prepare lessons using these methodologies, and will practice their tutoring skills in the classroom as well as in two AVID Tutorial classrooms. Students will develop skills in learning styles, communication, interpersonal relations, coaching, teamwork and conflict management.

Additional Information:

Rationale:
This course offers students the opportunity to develop skills in helping others learn. These skills are transferable to community involvement, work, and post-secondary opportunities in the human service sector. In particular, students interested in pursuing a career in education will benefit from the methodologies taught and practiced.

School Name: Merritt Secondary

Course Name: Culinary Arts 11

Course Code: YCUA 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: February 7, 2007

Prerequisites: None, but recommended that students have taken a Food Studies course or have some cooking experience

Course Synopsis:

This is a hands on course where students will learn the elements and principles of design and apply them to food. Students will develop and apply skills in food preparation and emphasis will be placed on developing an appreciation for food presentation and food as an edible art form. Some of the edible works of art students will create include: spice art, cookie dough impressions, yeast breads sculptures, garnishes, decorated cakes and many other projects. This course also focuses on developing both team and independent work skills. Students throughout the course will create a photo portfolio of their food creations, which can be used for future studies, job interviews and help to meet some of the requirements for their grad portfolio.

Additional Information:

Rationale:

Culinary Arts 11 would allow students the opportunity to gain experience and credits in the areas of Fine Arts and Applied Skills within one course. This course gives students an opportunity to explore and be creative, develop an appreciation of food as an art form and to develop skills (both basic and more advanced). Students also have an opportunity to develop teamwork skills and at the same time this course allows for individual creativity and independent work.
Rationale:

One of the reasons this course has been developed is to expose students to various cultures through the medium of publishing. Published works are created for a variety of audiences and cultures with specific intent and throughout the course the students will learn how to reach these audiences. This course has also been developed to introduce students to the field of publishing giving them the opportunity to use a publishing program that is used worldwide in the graphic design industry, namely Quark XPress. Students will learn about the design basics, elements and principles with respect to desktop publishing enabling the students to understand and evaluate document layouts found in the industry as well as their own work. The students will be given the opportunity to create documents that will be published for school use. This opportunity will heighten their awareness of the importance of purpose and audience as well as increasing their self-esteem.

Additional Information:

Course Synopsis:

This course introduces students to the field of publishing giving them the opportunity to use a publishing program that is used worldwide in the graphic design industry. Students will learn all about how to use the Quark XPress program to create publications. They will become acquainted with the design basics, the elements and principles of art and their relation to desktop publishing. They will learn how to create documents that are meant for a variety of audiences and a variety of purposes. The students will create work to be published for school use such as school calendar pages; yearbook advertisements; course planner booklet covers; scholarship/bursary booklet covers and farewell ceremony diplomas, invitations and program.

Prerequisites: Electronic Illustration 11

Course Synopsis:

This course continues to develop students' ability in the field of publishing allowing them to use the publishing programs that are used worldwide in the graphic design industry. Students will review the Quark XPress program. They will gain comprehensive knowledge with respect to the design basics, the elements and principles of art and their relation to desktop publishing. They will examine and evaluate documents that are meant for a variety of audiences and a variety of purposes. They will then create several documents that demonstrate a clear understanding of purpose and audience. The students will create school calendar pages, yearbook advertisements, course planner booklet covers, scholarship/bursary booklet covers and farewell ceremony documents, all of which will be published for school use.

Additional Information:

Rationale:
This course has been developed as an expansion of Electronic Publishing 11, immersing students in the field of publishing: a career area that speaks to various audiences and cultures with specific intent. Throughout the course the students will create documents that will reach this multitude of audiences with the intent that is desired. Students are given the opportunity to use publishing programs that are used worldwide in the graphic design industry, namely Quark XPress and Adobe Photoshop. They will be able to demonstrate a comprehensive understanding of design basics, elements and principles with respect to desktop publishing enabling the students to evaluate document layouts found in the industry as well as their own work. The students will devote their time creating documents that will be published for school use. This opportunity will heighten their awareness of the importance of purpose and audience through the reality of competition.
Rationale:

The First Nations Art course exists:
    - to give students a fundamental understanding of the different Aboriginal art forms.
    - to give students the opportunity to create art that is inspired by Aboriginal artists.
    - to enable students to work with a variety of art medium.

The students will learn theory behind the different art forms, as well as the history of the Aboriginal people who produce the art work. Hands on instruction will be used to take learning to the practical and personal level for each student. Principles and elements of art and design will also be included in each project.
Rationale:
The First Nations Art Course: provides students: with an understanding of the differing Aboriginal art forms, provides students the opportunity to interpret and create art that is inspired by contemporary and traditional Aboriginal art forms, and provides students with the opportunity to work with a variety of both traditional and contemporary art mediums.

The students will evaluate the differing art forms, as well as gain an understanding of the history of the Aboriginal people who produce the artwork. Students will create works of art to make learning both practical and personal for each student. The principles and elements of art and design will be an integral component of each project.

Additional Information:

Course Synopsis:

First Nations Art has been developed to support and encourage students to explore the richness and diversity of Aboriginal Art in North America. Students will explore both Traditional and Contemporary Aboriginal art forms. The students will be expected to respond to art and create a variety of both 2-dimensional and 3-dimensional art forms.

Course Synopsis:

This course enables students to learn the skills and knowledge needed to use information resources effectively for both academic and personal purposes. Students will:
- work under the supervision of the Teacher-Librarian to develop skills needed to assist staff and students in a library;
- become familiar with a wide variety of Library resources and the appropriate uses of these resources in research;
- apply this knowledge in their concurrent subject assignments; and
- coach individual students in the use of library resources.

Additional Information:

Rationale:
Everyone needs to know how to find and organize information efficiently in our information-rich, high technology society. This course has been developed to provide students with the opportunity to:
- learn how school libraries organize information for various media and purposes;
- apply that knowledge to improve their ability to research effectively in the school library;
- apply their research skills in assignments; and
- assist other students in using the library resources.

Course Synopsis:

This course provides students with the unique opportunity of producing the school yearbook. Responsibilities include preparing the design, content, and layout of the yearbook as well as producing a variety of newswriting for local publication. Students may be assigned to work in the areas of digital art and photography, copy writing, page layout, advertising, and/or distribution. The yearbook is produced using a desktop publishing program in cooperation with a Canadian publisher.

Additional Information:

Rationale:

This print media and writing course has been developed with the understanding that students will acquire skills in the areas of journalism, basic photography, reporting, publishing, organization, group participation, co-operation and leadership in producing the school yearbook. Classroom activity duplicates real world challenges of meeting deadlines and commitments; producing a viable product; and selling and delivering that product.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June 15, 2004

Prerequisites: None - Screening Process in place which includes an application form and teacher nomination forms

Course Synopsis:

This course is designed to give students the opportunity to develop their individual and collective sense of social responsibility through the acquisition and application of leadership skills and theory. Students will develop lifelong skills in the areas of self-image, goal setting, time management, public speaking, school and community service, public relations, conflict resolution and will gain an understanding of various leadership styles.

Learning outcomes for the course are grouped under four curriculum organizers: Self Knowledge, Planning and Time Management, Communication and Conflict Resolution and Peer Support/Community Awareness. Students are given the opportunity for self and peer assessment in each of the units. This course will also allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Additional Information:

Rationale:

"Change is a modern reality. The education system is being challenged to adjust and adapt most every day and in every manner" (Hargreaves, 1997). Teaching our students leadership skills is a proactive approach to dealing with the challenging reality of change in our society.

Number of Course Credits: 4
Number of Hours of instruction: 110
Date Approved: April 20, 2005
Prerequisites: Nomination to Leadership 12 (Level 2) resulting from active involvement and successful completion of

Course Synopsis:

This course is designed to extend and deepen the learning gained in the introductory Leadership 10 (Level 1) course. Students will continue to develop their leadership skill set by utilizing their learning from their Level One experiences of how to plan, organize and implement positive and pro-active programs within the school, which will enable and empower them to become independent thinkers and positive leaders while enhancing the school climate for all stakeholders.
The Level 2 students will also have the responsibility of mentoring Level 1 students. The Level 2 students will share their leadership skills and experiences via peer interactions during projects and by direct teaching of the skills they learned during their Level 1 experiences.
This course is aimed to provide the students an opportunity to take their knowledge of leadership skills to the next level by building on their prior experiences and knowledge. As a result they will have high expectations placed on them in terms of both performance and workload.

Additional Information:

When students take leadership responsibilities and ownership of their activities and surroundings, overall participation increases, program quality improves and the school climate is more positive. This program would provide opportunities for:
- building self-esteem
- getting and giving good role modeling
- utilizing a variety of skills/abilities to enhance the functioning of our school
- providing positive autonomy
- developing interpersonal competence
- developing individual and cooperative leadership skills through organized leadership and training sessions
- ownership, building positive connections with the school community
- exploration of various career opportunities.
This course will allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

School Name: Merritt Secondary

Course Name: Outdoor Education 10

Course Code: YOE10

Category: Fitness and Recreation

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: February 11, 2004

Prerequisites:

Course Synopsis:

This course has been developed not only to have the students learn about the outdoors but to do so in a safe and respectful manner. The objectives of Outdoor Education 10 are:

- to teach and familiarize the student in wildlife management and conservation. This includes identification and habitat of wildlife species.

- to take advantage of the outdoor recreation potential which is available to the public.

- to emphasize the students responsibilities to landowners, the public at large, wildlife and the environment

- to teach the student, proper care, safety and handling of all outdoor equipment

- to teach practical skills that will make the student's use of the outdoors more pleasurable and safe.

Additional Information:

Rationale: This course has been developed to encourage students to explore and make better use of the outdoors. Hopefully this will be in a safe and respectful manner. Students will be taught: survival and safety, firearms safety, animal/bird/fish identification, hunting and fishing laws, ethics, wildlife management, knot and fly tying, first-aid and safe boat and machine operation. They will have the knowledge and skill to challenge a number of tests that would allow them to use the outdoors in a safe and legal manner. Tests that could be challenged include:

- B.C. Hunting License
- St. John's Ambulance First-aid Certificate
- Pleasure Craft Operator Cards
- Federal Firearms Acquisition and Possession Certificates
Rationale:
This course has been developed to enable students to enter the arena of visual arts by way of the medium of black and white photography. Using the camera as a tool alleviates the students' concerns regarding their possible lack of previous exposure to more traditional forms of art offered by the Fine Art programs. It is expected that the student will be able to:
- create photographic compositions using the elements and principles of design
- explain the basic parts of the camera, their operation, and their effects on the appearance of the photograph
- reach an understanding of film developing, processing and presentation
- discuss and critique works by major photographers, as well as develop an understanding of the history of photography
- create a personal portfolio of selected images illustrating their understanding of the camera and its uses

Course Synopsis:
This is a beginners course designed to give each student a good foundation in black and white photography using the 35mm camera format. The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques. The objective of this course is to awaken and nurture the students' visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs. Students will be required to do some written assignments related to photography. In order to measure the students' knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam. Equipment will be available to the students, but it is to the student's advantage to own a 35 mm single lens reflex camera.

Prerequisites: None
Rationale:
This course has been developed to enable students to continue the study of visual arts by way of the medium of black and white and digital photography. Using the camera as a tool alleviates the students' concerns regarding their possible lack of previous exposure to more traditional forms of art offered by the Fine Art programs.

School Name: Merritt Secondary
Course Name: Photography 12 (Level 2)
Course Code: YPHOT 12
Category: Fine Arts, Design, and Media
Grade Level of Course: 10 11 12
Number of Course Credits: 4
Number of Hours of instruction: 110
Date Approved: February 8, 2006
Prerequisites: Photography 11

Course Synopsis:
This course is offered to students who have completed Photography 11. It is expected that the student has achieved a high level of expertise and has established good work habits in the class and dark room. This course is intended to be an advanced course in photography for students to continue working in black and white with higher expectations and individually directed explorations in the craft of photography and digital photography. Instruction will concentrate on various ways of seeing, image manipulation and quality workmanship. Students will be introduced to a variety of film types, printing techniques and manipulation. Assignment themes will depend on a variety of situations such as an Art Gallery exhibition or special events in the community. This course will have a certain amount of flexibility to accommodate the ability and ambition of each student. The course will provide a number of themes and techniques to the student who will then be required to do a project or photographic work to show his/her understanding of the techniques or methods discussed and presented.

Additional Information:
Rationale:
This course has been developed to enable students to continue the study of visual arts by way of the medium of black and white and digital photography. Using the camera as a tool alleviates the students' concerns regarding their possible lack of previous exposure to more traditional forms of art offered by the Fine Art programs.
Rationale:

1. Personal and Social Rationale: This course is intended to help adolescent learners to understand themselves and others. Students gain insights into how and why people think and behave as they do. Psychology 12 students learn to describe, predict, understand, and influence behaviour and mental processes.

2. Academic Rationale: This course is one of two courses intended to prepare students for success in writing the Advance Placement Psychology Examination for post-secondary credit. Furthermore, since students learn more systematic strategies for reading, studying, remembering, and test-taking, this course may enhance students’ performance in other academic studies.

Course Name: Psychology 12

Course Code: YPSY12

Category: Liberal Arts and Humanities

Grade Level of Course:  
10  11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: February 11, 2004

Prerequisites: English 10

Course Synopsis:

This course is modeled after Simon Fraser University's Psychology 102, and is one of two courses intended to prepare learners for success in writing the Advance Placement Psychology Examination for post-secondary credit. Seven individual units are covered:
1. States of Consciousness
2. Memory
3. Cognition, Language, and Intelligence
4. Motivation and Emotion
5. Abnormal Behaviour (Psychopathology)
6. Psychotherapies
7. Social Psychology

Additional Information:

Rationales:
1. Personal and Social Rationale: This course is intended to help adolescent learners to understand themselves and others. Students gain insights into how and why people think and behave as they do. Psychology 12 students learn to describe, predict, understand, and influence behaviour and mental processes.

2. Academic Rationale: This course is one of two courses intended to prepare students for success in writing the Advance Placement Psychology Examination for post-secondary credit. Furthermore, since students learn more systematic strategies for reading, studying, remembering, and test-taking, this course may enhance students’ performance in other academic studies.
Course Synopsis:

Nle?kepmzcin 10 (Thompson 10) is available to all students who wish to learn the Scwexmxcin (The Language of The People of The Creeks), which is a dialect of the Nle?kepmxcin (Thompson Language). The emphasis is on understanding basic grammatical structure of oral and written Nle?kepmxcin. Students are expected to gain an understanding and appreciation of the culture, history and ancestry through short stories, art, use of plant material and interaction with Elders in the Nicola Valley. At the end of this course the students are expected to be able to respond to sight and sound association, carry on basic conversation, respond to questions and be comfortable with a minimum of 600 terms and phrases.

Prerequisites:
None - Students, however, would benefit from elementary level studies.

Additional Information:

This course has been developed to support and encourage the preservation and promotion of the Nle?kepmx Language so that students have the opportunity to explore various aspects of the history, culture, and arts of the Nle?kepmx people through language acquisition. The students learn about history through the stories, be they Sptel'l (Creation) or splexm (life experience) stories, how to apply terms to land features, people, daily activity and celestial bodies together with an understanding of a culture that was flung quickly from a hunter-gather era into the age of technology and is surviving. The students learn to think abstractly in Nle?kepmxcin about any object to promote understanding and appreciation of the diversity of the language. The approach provides the student with a gradual skills development, a generous base of information to help future courses through written and verbal presentation, and also encourages them to use the language amongst themselves and be included in conversations with fluent speakers.
Rationale:

The introductory course in video production exists:
- to give students a fundamental understanding about how television messages are prepared and presented to them,
- to show students how they can use the equipment involved in video production to assemble video presentations, and
- to enable students to use video as a medium of self expression and as a vehicle for betterment of the school community.

Instruction on the medium will seek to show students the conventions of composition which have been developed to make video an effective communication medium. It will also seek to alert students to the tricks used to persuade and manipulate the naïve television viewer. Hands on instruction will be used to take learning to the practical and personal level for each student. Finally, using the theory from the professionals and personal practice, the student will use the medium in the third stage to express his/her own messages and artistic visions.

Course Code: YVP10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: January 25, 2004

Prerequisites: none

Course Synopsis:

Video Production 10 Level 1 is a course designed to introduce students to creating and analysing video presentations. Learning outcomes in the course are grouped into three organizers: technical competence, expression and analysis.

The course develops in cycles each centered on a video project. Each project will increase in complexity and will be introduced and accompanied by lessons on relevant theory. Successive projects will use this format to guide in the creation of an interview, a commercial, and a public service announcement.

The final unit will present an introduction to television broadcasting technique centred on a schoolwide live-to-tape news broadcast.

Additional Information:

Grade Level of Course:  
  □ 10  □ 11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: January 25, 2004

Prerequisites: Introductory Video Production

Course Synopsis:

Video Production 12A (or Video Production 10 Level 2) is a course designed to extend and deepen the learning gained in the introductory video production course taught at Merritt Secondary School. The course includes a three month component on broadcasting and a term-long project on competitive video production. Students will learn more about editing and will spend time on community-based and Shaw Cable 10 projects.

Learning outcomes in the course are grouped into three organizers: technical competence, expression and analysis. The units titled linear below will run in a developmental order, while the news, event and festival videos will run concurrently and over periods of several weeks. Crews will often be working on two projects simultaneously, for example an upcoming news broadcast and an individual skills exercise.

Additional Information:

Rationale:

Video Production Level 2 exists:
  -to give students a deeper understanding of the skills and principles which inform film and television production,
  -to enable students to participate in the community as communication facilitators,
  -to prepare students who possess video production career aspirations for entrance to post secondary learning institutions.

School Name: Princeton Secondary

Course Name: Computer Applications 10

Course Code: YCMAP 10

Category: Business and Applied Business

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: March 30, 2004

Prerequisites: None

Course Synopsis:

This course is available to students in grades 9-12. It is an introductory course that encourages students to explore and focus on a wide range of computer applications.

Students will be taught different aspects of an integrated software applications package based on a personal interest or theme. Students will also learn how to create simple web pages using a text editor. Students will also create graphic images through the use of digital camera equipment and produce a simple video for presentation.

Additional Information:

Rationale:
This computer application course has been developed with the understanding that students will acquire a number of different hands on computer skills that can be used as a prerequisite for higher end computer application courses. Students participating in this course will encounter concepts, ideas, and activities that will help them in intermediate and advanced computer application courses.
Rationale:

This multi-dimensional electronic media course has been developed with the understanding that students will acquire skills in the areas of communication, animation, digital imaging, web page design, video editing and leadership to produce a multi-media presentation.

Classroom activity is closely related to the real world challenges of meeting commitments, producing a viable product, and presenting the product for evaluation.

Students participating in this course will encounter concepts, ideas, and activities that will help them in all their future endeavors.
Rationale:
This introductory course has been developed with the understanding that students talk with their peers first when problems arise in their lives. Students will explore and be guided through a problem solving process that examines the skills of active listening, non-verbal communication, empathy, tolerance, acceptance and respect. Through this problem solving process students develop abilities independently, interdependently, and cooperatively. Furthermore, students will explore the richness and diversity of the adolescent development. This course enables students to explore the multitude of challenges that young people and their families face in an ever-changing society. Community agencies provide a resource for peer counsellors to become aware of and understand how to access support in our community.

Course Synopsis:

Peer Counselling is designed to provide training to students in communication, interpersonal and specific intervention skills. These skills enable students to help their peers with the problem-solving process, and take an active role in helping to create and deliver prevention programs in a Secondary School. Students will learn to identify a problem, help others understand the essence of a problem and help others with a solution process by seeking information and strategies.
Rationale:
This follow-up to Peer Counselling 10 has been developed with the understanding that students talk with their peers first when problems arise in their lives. It is recommended that students interested in Peer Counselling 11, first complete Peer Counselling 10. Students will continue to explore and be guided through a problem solving process that examines the skills of active listening, non-verbal communication, empathy, tolerance, acceptance and respect. Through this problem solving process students will enhance their abilities independently, interdependently, and cooperatively. Furthermore, students will continue to explore the richness and diversity of adolescent development. This course enables students to explore the multitude of challenges that young people and their families face in an ever-changing society. Community agencies provide a resource for peer counsellors to become aware of and understand how to access support in our community.

- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 13, 2005

Prerequisites:  Transition to Work 11A

Course Synopsis:

The industry skill certification component of the Transition to Work program will provide students with an opportunity to complete a minimum of five industry-recognized certificates for worksite-specific skills and safety procedures. Completion of the certificates will ensure that students are prepared to participate effectively and safely in the work experience placement and provide the students with a competitive advantage on future job applications.

The work experience component of the program will consist of two, three-week work placements providing students with an opportunity for progressive experience in selected workplace situations. Students will gain a clearer understanding of their personal preferences for career options and be able to practice and improve upon their mastery of the concepts and skills learned in the classroom. In addition, the work experience will allow the student to make contacts in the work force and establish a basis for their work history.

Learning Resources:

Unit 1: Industry Skill Certificates

Training manuals, audio-visual materials and participant workbooks are provided for industry certificates courses.

Conflict Resolution, Hazard Perception & Control and Retail Sales & Customer Service are locally developed courses for which the instructional materials are developed by the individual instructor.

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

Communication is part of our daily life. A tremendous part of each day is spent reading, writing and viewing what is going on around us. Everyday events and running of a school could be lost, year-by-year, if not recorded in a school annual. In order to convey the school year as a desirable commodity, it must be presented in an attractive, concise and factual manner.

This course has been developed to support and encourage students to explore the richness and diversity of events in their school environment. Students learn to plan, market, and execute the means to produce a saleable print media product about this environment and its events. Students learn to use a digital camera and the photographic skills required to record these events. They learn to create page layouts to present the event in an attractive manner. The learning outcomes of this course are grouped using the curriculum organizers: Social and Cultural Issues, Creation, Analysis, Technology and Marketing.

Students are given the opportunity for self, peer and advisor assessment in each of the five units. The approach supports student skill development and encourages meaningful methods of collecting, interpreting and presenting print medium products to their peers.

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Students should have completed English 10 and Annual Production 11

Course Synopsis:

Students develop further the technical and critical skills to publish the Annual of their High School. Principles of fair and equitable reporting, copyright and privacy law, and all required computer skills are reviewed. Having worked through the process of producing the annual once before, returning students should mentor the development of junior students and take on a leadership role. Students review what constitutes good design and practice the application of the latter through the design and production of annual pages, as well as Multi-Media content issued as an adjunct to the Yearbook.

This course is a continuation of Annual Production 10 and 11 which should all be taught concurrently, building on the team dynamic of students with a variety of skill levels and experience.

Learning Resources:

- Manuals and Guides issued by publisher for specific software applications
- Visits from and training sessions held by representative of Publishing Company
- Resource library of comparative Publications
- “Ideas File” of various publications
- “Legacy Report” created as a guide by previous Annual Production classes.
- Internet sites dedicated to showcasing Yearbooks and awarding prizes to outstanding product

Category: Science and Applied Sciences

Grade Level of Course:  ☑️ 10  ☑️ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

Forestry 11 is an introduction to the study of the forest industry, programs and the skills necessary to proceed to become a forest worker or to enter a “Forest Technician Program” or a degree program in Forestry. There are two paths in this program: a student may use the skills in this program to enter the industry or may wish to proceed into a post-secondary forestry program. Students with learning difficulties can take the former path, which will lead to employable skills.

This program recognizes that many students will elect to participate in short courses in the community at the College or at the aboriginal community level which addresses forest guardianship and forest work preparation programs. Students may apply to have credit directed from these courses for application to Forestry 11, 12 and WE in Forestry by presentation of a completed certificate.

Learning Resources:

>sum<2; Units are prepared using handouts, videos and produced material from the BC Forest Service.
>sum<2; PITS and WCB material is printed and presented.
>sum<2; Field Trip guidance is readily available.

School Name: Chetwynd Secondary

Course Name: New Ventures 11

Course Code: YNV 11

Category: Business and Applied Business

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

Career Preparation in New Venture 11 is the first of three courses which will train students to prepare for retail and service business operation or to start an independent business. Students will at the end of this course:

- receive personal and practical instruction on the needs of a small retail business;
- be able to have the hygiene, grooming and personal manners necessary in a small retail business;
- meet and greet customers as a sales person;
- become familiar with the daily ledger and record keeping in a retail operation;
- develop a marketing plan for a small business; and,
- identify strategies for improving sales.

Entrepreneurship 11 prepares the student for retail service work by permitting the student the use of a cash register, daily records and the routine of a business. Practical skills at the Thrift Shop permit students to compete for jobs in the local laundry, cleaning, motels and retail businesses.

The Community Thrift Shop serves as the model for New Ventures 11, 12 and WE 12 in New Ventures. Other business models available to students are in the area of window painting, mural painting and mending services where a student may work alongside an entrepreneur to develop enterprise skills and study daily progress.

Students may receive credit by completing modified assignments due to special needs or difficulty with reading and writing levels. This course is designed for a wide range of academic talents and abilities and a support staff person may assist in record keeping and coaching.

Learning Resources:

- Manuals for Excel are in place.
- Daily coaching is the key in the success of the student.
- Reading Resources of the Young Entrepreneurs Association of Canada.
- Chapters from Business 10, New Ventures 12 and Marketing Guides.
- Local Chamber of Commerce publications and business persons.

Course Synopsis:

New Ventures 12 is the second of three courses that will train students to prepare for retail and service business operation & to start an independent business. At the end of New Ventures 11, the student will have a business plan with recorded sales of a former month and plans to increase sales by a chosen target. In New Ventures 12, students will implement their business and marketing plan and attempt to meet or exceed their goal. They will record daily sales and increased costs and will have report on their findings. Their report after one month of operations will be report on strategies used to improve sales and an evaluation on their tactics, methods and business practices. If the target sum is not met, students will reflect on the reasons for not meeting the planned goal.

New Ventures 12 is an active course where the student participates in the daily routine of a business. The Community Thrift Shop will be used as one of the primary businesses to use as a model. Daily ledger sales and costs are available for the student and the computer is available for student use.

As in New Ventures 11, students may receive credit by completing modified assignments due to special needs or difficulty with reading and writing levels. This course is designed for a wide range of academic talents and abilities.

Category: Business and Applied Business

Grade Level of Course:  

☐ 10  ☑ 11  ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites:

- Manuals for Excel are in place.
- Daily coaching is the key in the success of the student.
- Reading Resources of the Young Entrepreneurs Association of Canada.
- Chapters from Business 10, New Ventures 12 and Marketing Guides.
- Local Chamber of Commerce publications and business persons.

Course Synopsis:

New Ventures Applied 12 is an additional four (4) credits preparing students to become involved in applying for employment in a retail business or to start their own business.

As in New Ventures 11 and 12, students may receive credit by completing modified assignments due to special needs or difficulty with reading and writing levels. This course is designed for a wide range of academic talents and abilities.

Learning Resources:

- Manuals for Excel are in place.
- Daily coaching is the key in the success of the student.
- Reading Resources of the Young Entrepreneurs Association of Canada.
- Chapters from Business 10, New Ventures 12 and Marketing Guides.
- Local Chamber of Commerce publications and business persons.

Course Name: Radio Broadcasting 11

Course Code: YRB 11

Category: Trades and Technology

Grade Level of Course:  

10  

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  

April 13, 2005

Prerequisites:  

None

Course Synopsis:

Radio Broadcasting 11 is an introduction to careers in radio broadcasting and trains students to be announcers, operators and basic production radio staff members. Students may chose to proceed into a career in radio broadcasting or related fields in broadcasting.

Learning Resources:

- The volunteer manual assists the student in daily operations.
- Software guides are used and the student will be coached during the use of software.
- Daily coaching is the key in the success of the student.

Course Name: Radio Broadcasting 12

Course Code: YRB 12

Category: Trades and Technology

Grade Level of Course: 10 11 X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Radio Broadcasting 11

Course Synopsis:

Radio Broadcasting 12 is an extension of Radio Broadcasting 11. This course guides the student to work independently and professionally. The student will be critiqued by the teacher, radio broadcasters and listeners. Radio Broadcasting 12 differs from Radio Broadcasting 11 because the student is expected to prepare and to deliver routine daily shows and a specialty show on his or her own after coaching and in collaboration with the teacher.

Radio Broadcasting 11 prepares the student for this extension since the student will be putting into practice the theory and the skills attained at the first level. The student will be expected to do all of the legal record keeping for each show: music log and default records as a regular staff member.

Music and sound clips advertising the show will be prepared by the student. The student is expected to maintain a portfolio of examples of planning, sound clips and critiques. After Radio Broadcasting 12 - Applied, the student will be prepared to start a resume outlining skills, talents and prepare for samples of show work. Students seriously contemplating the radio field are encouraged to develop demo tracks of their work and to compare and contrast the programs available at different Colleges. Radio Broadcasting 12 - Applied will lead to employable levels of performance.

Learning Resources:

- The volunteer manual assists the student in daily operations.
- Software guides are used and the student will be coached during the use of software.
- Daily coaching is the key in the success of the student.
- Taped lesson guides from key broadcast speakers are used at the Grade 12 level.

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: It is recommended that students have a strong background in computer use. Courses such as Information...

Course Synopsis:

This is an advanced course in animation with an emphasis on character animation. This course is designed to encourage the study of natural movement and how that movement must be enhanced to fit the requirements of game and video production. The course will be project-driven in design, with an emphasis on using the principles of animation.

Learning Resources:

As a rapidly evolving field, it is expected that the learning resources will change over time. Examples of some recommended resources as of 2004 are:

>sum<2; Software capable of 3-D modelling and animation (ie: Softimage XSI, Cinema 4D, 3DS Max, Blender, Maya etc.)

>sum<2; Software capable of editing and compiling video and sound files (ie. Adobe Premiere, Final Cut Pro 4, Video Studio, Audacity (freeware, sound only)

>sum<2; Software capable of capturing and compiling single images to produce an animation (ie Promotion, Animation Shop, Flash, etc.)

School Name: South Peace Secondary

Course Name: Musical Theatre 10

Course Code: YMUTH 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☐ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of musical theatre. As the first of three courses in Music Theatre offered at South Peace Secondary School, students begin to develop their performance skills for high expectations, performance exposure and leadership building requirements. Students learn the value of developing community, to overcome diversity, and a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting. In the culmination of all Musical Theatre courses students will produce a professional level Broadway-style musical for the school, community and the city of Dawson Creek. Learning Outcomes for the course are grouped under the curriculum organizers: Building Community (Opening the theatre company), Pre-production, Production and Post-Production (Reflection and Closing the Theatre Company). Students are expected to meet instructor expectations including character analysis, dance tape and song recordings for analysis and further direction. These examples of student work act as motivating tools for movement, line and song deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units. The approach supports student ownership and pride in performance as well as providing various skill sets and new approaches to thinking and learning. At the grade 10 level, students are exposed to introductory level acting methods but are still granted opportunities for leadership and solo performance within the framework of a Musical. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the production and the reflective process after its completion.

Learning Resources:

>sum<2; Various excerpts from Broadway Musicals (songs, scenes and monologues)
Full script, lyrics and score of an established Musical for performance (to change every year)

Dance, makeup, and acting videos:
 o Videos of past performances in Musical Theatre
 o Theatrical Design and Production, various Internet resources

Grade Level of Course: □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: None

Course Synopsis:

This is an introductory course to psychology. Topics include history, research methodology, brain physiology and function, developmental psychology, sleep and dreaming, abnormal psychology, learning, memory and intelligence, creativity, personality theory, and other broad issues within the discipline.

The study of psychology is extremely useful for career preparation in many fields, as well as personal self-awareness. There are many career choices within the discipline of Psychology itself. Exposure, through intended learning outcomes, to some of these choices will provide students with a basic understanding of the discipline. This in turn may encourage them to pursue further study at the post-secondary level.

Course Name: Teacher Assistant 12

Course Code: YTA 12

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 13, 2005

Prerequisites: Students must have the course sponsor teacher’s recommendation.

Course Synopsis:

This is a participatory course that prepares and motivates students to provide leadership and assistance to individuals with a variety of needs. Students will work under the supervision of a classroom teacher to provide assistance to individuals and/or small groups in a variety of learning activities. They will develop social responsibility while acquiring and developing skills in communication, responsibility, decision-making, learning styles, interpersonal relations, leadership and teamwork. They will apply these skills in roles such as tutoring and mentoring. Student Teacher Assistants will learn the value and complexity of social diversity while acquiring an appreciation of the importance of life-long learning and helping others.

Course Synopsis:

Career-related classroom instruction for secondary students, age 15 and older who are currently enrolled as full-time students in the regular school program but may be at risk of dropping out of school. This program is specifically aimed at helping at-risk students to become refocused on the purpose for an education and motivated to complete a program of study, by allowing them to explore career options through academic intervention in a non-traditional classroom setting designed to facilitate individual and small group instruction and development.

Grade Level of Course:  

X 11

10  12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 13, 2005

Prerequisites: Transition to Work 11A

Course Synopsis:

The industry skill certification component of the Transition to Work program will provide students with an opportunity to complete a minimum of five industry-recognized certificates for worksite-specific skills and safety procedures. Completion of the certificates will ensure that students are prepared to participate effectively and safely in the work experience placement and provide the students with a competitive advantage on future job applications.

The work experience component of the program will consist of two, three-week work placements providing students with an opportunity for progressive experience in selected workplace situations. Students will gain a clearer understanding of their personal preferences for career options and be able to practice and improve upon their mastery of the concepts and skills learned in the classroom. In addition, the work experience will allow the student to make contacts in the work force and establish a basis for their work history.

Learning Resources:

Unit 1: Industry Skill Certificates

Training manuals, audio-visual materials and participant workbooks are provided for industry certificates courses.

Conflict Resolution, Hazard Perception & Control and Retail Sales & Customer Service are locally developed courses for which the instructional materials are developed by the individual instructor.

Course Code: YFSS 10

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4 over 4 y

Number of Hours of instruction: 30 hours e

Date Approved: March, 2005

Prerequisites: Flexible Studies Service 9

Course Synopsis:

This course is designed to give students the opportunity to develop positive character attributes through participating in organized Service Projects and Volunteer work within the school and surrounding community, as well as through a continual character curriculum thread through each year from grades 9-12. Students will develop language for and an understanding of Character Education concepts as well as adopt appreciation and skill towards Service related activities; they will develop a sense of community and contributing to community. This Character Education/Service thread will occur as an extension to the Flexible Studies~Leadership in Learning Program core subject curriculum as outlined in the Reynolds Secondary Course handbook and on the school website website: (http://www.sd61.bc.ca/school/reynolds/flex.html).

Reynolds Flexible Studies Program

Flexible Studies: Leadership in Learning
A district program for Secondary Students who are interested in a program that emphasizes:
- Academic Excellence
- Character development through Leadership/Service.
- Enrichment and Challenge through Experiential learning
- Support through individual and flexible programs
As indicated earlier this program is offered as an extension to the Flexible Studies ~ Leadership in Learning Program following the Ministry Curriculum for Math, English, Science and Social Studies. Students’ contributed time each year to a Character Education curriculum, including Service and Volunteer activities amounts to one credit per year, totally 4 credit for the duration of the 4 year program.

This course has been developed to offer unique opportunities to students so that they may experience the wide variety of recreational activities available on Vancouver Island. In addition, this course will enhance students’ awareness of their social responsibility for the care and respect of their environment. Students will be introduced to resource people in the community who are knowledgeable and skilled in a particular outdoor activity.

During this course, students will become aware of and appreciate some of the local outdoor recreational areas and facilities. They will also be able to identify safe and unsafe conditions in certain activities and be able to create a safe learning environment.

The students will also be presented with current environmental issues and the effect such issues have on our present day and future life. They will be able to identify different employment opportunities which are related to the topics which they will be studying.

Course Synopsis:

This course enables students to experience a variety of recreational activities thereby enhancing their quality of life through active living. Therefore this course focuses on a number of different activities such as: learning about Vancouver Island and its many different recreational areas, compass basics and orienteering, kayaking, scuba diving, rock climbing, archery, hiking and outdoor etiquette and safety.

Numerous field trips provide students with opportunities to practice and develop skills in the above activities.

Students will be expected to keep a journal recording their personal observations regarding each field trip.

There is a culminating activity for those students who achieve a B/G or higher as they are invited on an overnight camping trip to Horne Lake where they will also have the opportunity to go caving, canoeing and rappelling.

Learning Resources:

• guest instructors with expertise in relevant areas
• videos on different activities and issues
• articles and information relating to outdoor recreation
• Fish and Wildlife - A recreational resource published by B.C. government

Additional Information:

This course has been developed to offer unique opportunities to students so that they may experience the wide variety of recreational activities available on Vancouver Island. Course Name: Brass Ensemble 10

Course Code: YBREN 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2004

Prerequisites: Brass Ensemble 9

Course Synopsis:

Brass Ensemble 10 is a course designed to be the continuation of the acquisition of the performance skills on wind instruments (trumpet, horn, trombone and tuba) and music knowledge started in grades six, seven and eight in the middle school band program and the development and continued sophistication of those skills acquired in Brass Ensemble 9. It is also a continuation of music knowledge acquired by playing various styles of music from a wide variety of eras. In addition to performance, students learn much about the general nature of music by actually playing a wide variety of music. As opposed to the large concert band ensemble format, small ensembles give students the opportunity to work in a more intimate and intense form of musical expression.

Learning Resources:

The Music Department has an extensive library of music from the Renaissance, Baroque, Classical, 20th Century eras and contemporary resources for combinations of solo, duet, trio, quartet, quintet and sextet. Students are invited and encouraged to compose and/or arrange works of their own for ensemble performance. There are also the additional possibilities of computer generated music through various computer programs.

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Prerequisites:

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Prerequisites:

Course Synopsis:

This course is designed for the student who:

â€¢ has expanding English skills (approximately level 4).
â€¢ has some competency with academic language.
â€¢ has a more thorough understanding of the structure of language than an ELD 10/11 student.
â€¢ can remediate writing errors with assistance.
â€¢ is able to read independently and respond to more complex material than an ELD 10/11 student.
â€¢ has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.

School Name: Esquimalt Community School
Course Name: First Nations Leadership 11
Course Code: YFNL 11
Category: Health and Human Services

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4
Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: Non

Course Synopsis:

The First Nations Leadership course has been developed to support students in developing a sense of personal identity, empowerment and self-esteem through an awareness of family, community, cultural histories and traditions.

Students will be encouraged to take responsibility and to make informed decisions based on their class and community work. The students are viewed as individuals with various talents, responsibilities, needs and knowledge. They will have a variety of learning experiences that will reflect the traditional teaching of “learning by doing”.

The course philosophy is that everyone is capable of being a leader. The qualities of leadership are both external and internal. Displaying leadership is ‘outward’ and expressed from ‘within’. Understanding First Nations values and beliefs is vital to the understanding of self and others as a leader.
The Learning Outcomes of the course are grouped under the curriculum organizers: Leadership, Study Track, Healthy Emotion, Healthy Mind, Healthy Body, and Healthy Spirit.

Students will be expected to participate in daily/weekly activities and lessons. These activities and lessons culminate in two class projects. The first is to organize a potlatch, to which the students invite guests. The work of the potlatch is for the students to publicly acknowledge someone who is a leader in their life. The second project is to present research findings on improving health and wellness in the First Nations community. The students’ medium is the digital camera and computer.

Upon completion it is intended that students value learning as a life-long experience, and gain insight into personal and/or academic goals.

Rationale:
The overall intent of the course is to assist in the development and enhancement of holistic qualities (mental, physical, emotional, and spiritual). Through the integration of First Nations traditional teachings, and the reinforcement of positive and healthy attitudes and values, students develop the skills to achieve their personal, educational, and career goals.

The First Nations Leadership course content, presentation and approaches integrate the diverse cultural practices of the Coast Salish, the medicine wheel, and the circle. They will provide the foundation upon which identity and a sense of place and belonging are created to build a positive culture in the class. Fostering self-esteem will enhance the socialization process for the youth and will create bridges for the future. The course will provide a foundation for students to establish personal, educational, and career goals. In addition, students will develop skills that will see them as contributing to their family, school, community and living with others in an interdependent world.

Prerequisites:

Open Learning Institute (2001). Study Manuals for the BC Trade of Cook, Level 1

Squirrel Training and Point of Sale System

Course Synopsis:

The province of British Columbia, and more precisely the city of Victoria is in need of entry-level employees with employable skills within the Hotel/Restaurant/ Tourism Industry. Students’ willingness to work part time hours during the off-season (September to May) and full time hours during the peak-summer season, along with their interest in obtaining full-time employment after graduation make them ideal employees for local restaurants and hotels. Due to a young person’s obvious lack of experience, there is a disparity between what skills teenagers have developed and those that prospective employers are looking for. The Food Service Training Course is designed to provide students with the opportunity to develop entry-level employable skills, with a particular focus on food service.

Food Service Training 11, leads students to develop an understanding of how to effectively serve customers and provide them with superior customer service. The course also leads students to develop an understanding of the process and procedures utilized in hiring employees as well as the methods for obtaining work in the food service industry. Students perform a number of customer service activities that include acting as a cashier, busser, expeditor, and sandwich maker, as well as other less “defined” customer service roles. Students develop the skills of keeping their work place clean and engage in all of the activities necessary for successful service of food to customers in an appealing fashion. Students are also led to develop an understanding of how to construct a professional curriculum vitae, effectively apply for a job, prepare for an interview and follow up after an interview. Students are also led to understand how to identify “preferred” places of employment. Focus is also placed on attaining training in the areas of Superhost and Squirrel (point of sale) operation and utilize the learned training in real situations through being a cashier. Evaluation is based on food production, safety and sanitation, personal management, customer communication, and teamwork and team communication. Evaluation is partly based on participation and students are marked on their class and independent work as well as their CV and on a constructed “job-search” binder. Students are also marked on homework assignments, and independent research activities. The course will also accord the students the opportunity to acquire evidence and documentation to add to their graduation portfolios. This course is taken as part of the Food Service Training Program in conjunction with Cook Training 11A, Cafeteria Training 11 and Foods 11.

Course Synopsis:

This course is designed to prepare students for further education and employment as visual communicators. As a component of M.E.D.I.A – Multimedia Explorations in Design, Illustration and Animation, the course will offer students the opportunity to develop knowledge and skilled use of materials, tools and equipment and processes and techniques in printmaking and graphic design. Students will develop knowledge and skills through a series of projects that will deepen their understanding of the importance of graphic design as a communication tool. The projects themselves will be student centred and community based and students will be encouraged to share their skills with the larger school community. Students will be given the opportunity for self and peer assessment throughout the course.

Learning Resources:

Textbook:

• The Step-by-Step Guide to Photography, Michael Langford

References:

• Peach Berserk’s Silkscreen Workshop and Biz Tips for Misfits (DVD)
• Learning to Operate the A.B. Dick 350/360 Offset Press by Garry Briddle (Video)

Course Synopsis:

Students should be at a high intermediate level of English proficiency, prior to taking this course.

Special Training, Facilities or Equipment Required:
The ESL teacher must be knowledgeable of Canadian culture and encourage students to share the experiences of their native country.

Course Synopsis:

This course has been developed to support and encourage ESL students to compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada embraces multiculturalism. Based on the use of authentic documents and resources, with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.

School Name: Esquimalt Community School

Course Name: Interdisciplinary Studies 11

Course Code: YIDS 11

Category: Liberal Arts and Humanities

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:

This course would offer an introduction to philosophy, followed by a unit on comparative religion. This unit would be followed by a sampling of various disciplines, most of these within the humanities. The final unit would involve independent research exploring connections among selected disciplines and noting the philosophical underpinnings pertinent within these fields of study.

Learning Resources:

• Ideas of the Great Philosophers by William Sanakrian and Mabel Sanakrian (Barnes and Noble, 1966)
• The World's Religions by Huston Smith (1992 edition)
• The Big Questions: a Short Introduction to Philosophy by Robert Solomon (Wadsworth, 2002)*
• Philosophy: a Text with Readings by Manuel Velasquez (Wadsworth, 2005)*
• University of Victoria Speakers Bureau
• *Texts used in Ontario Grades 11 and 12 philosophy classes
The course instructor, D.E. St. Claire, has conducted an active and comprehensive archaeology and ethnography research program for the past 35 years. He has, and continues to, publish numerous books, professional articles, and research papers for First Nations groups.

Course Synopsis:

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional's role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

Resource books
Guest Speakers
Videos
Agency handouts
Internet, magazine and newspaper articles
Field trips
Conference materials
Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.

Course Synopsis:

This philosophy course has been developed to provide students with an opportunity to explore, learn, and orient themselves to the complexity and dynamism of contemporary society. The four pillars of this course, political, environmental, ethical, and post modern philosophy have been selected specifically in light of the challenges of the current global condition. For example, given the current environmental crises, the advantages of possessing of an informed environmental ethic are beneficial to the individual and society. Likewise, the benefits of an informed view in the turbulent contemporary political arena are equally obvious. A unit in political philosophy is an opportunity for the student to develop a sound understanding of significant ideologies, obligations of the government and the citizen in a democratic society. The study of ethics presents students with an opportunity to explore issues of duty, responsibility, and right action. And finally, the unit on postmodernism exposes the learner to the significant philosophical themes and thinkers who are shaping not only our current state, but also our collective futures.

In the duration of course, students will read and respond to powerful essays such as Civil Disobedience by Thoreau and Nature by Emerson. Exposure to great thinkers and ideas are, in my view, a powerful stimulus to ignite the ambitions of the eager student. Essays and other texts will be the students’ springboard to research, both in text and electronically, contemporary events and issues where they can apply the concepts learnt. Findings will be shared in a co-operative manner classroom setting through class discussion with the goal of arriving at a clearer and more knowledgeable position.

It is not a goal of this course for the student to arrive at any entrenched position on any given topic. Indeed, the real goal is for the students to have in their possessions the knowledge base and prior consideration of a number of different positions, which over time, will develop into attentively constructed positions that are based on reason and evidence. The discipline of philosophy transcends exercises of the mind and leads to refined thought and action. Finally, it is my sincere view that this course, when coupled with the 4C Introduction to Philosophy course, will provide the students of Esquimalt High School with an education in Philosophy that is second to none in the district.

Learning Resources:

The Problems of Philosophy
Western Philosophy from Plato to Derrida
Living with the Earth: An Introduction to Environmental Philosophy
Introducing Ethics
Global Values 101

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

COURSE SYNOPSIS/RATIONALE

The purpose of this course is to give advanced music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. The symphony course is differentiated from band and strings courses in its unique repertoire, performance techniques, history and composition. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

School Name: Esquimalt Community School

Course Name: Woodwind Ensemble 10

Course Code: YWWEN 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- [x] 10  
- [ ] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  March , 2005

Prerequisites:  Woodwind Ensemble 9

Course Synopsis:

Woodwind Ensemble 10 is a course designed to be the continuation of the acquisition of the performance skills on wind instruments (flute, oboe, bassoon, clarinet and saxophone) and music knowledge started in grades six, seven and eight in the middle school band program and the development and continued sophistication of those skills acquired in Woodwind Ensemble 9. It is also a continuation of music knowledge acquired by playing various styles of music from a wide variety of eras. In addition to performance, students learn much about the general nature of music by actually playing a wide variety of music. As opposed to the large concert band ensemble format, small ensembles give students the opportunity to work in a more intimate and intense form of musical expression. Woodwind Ensemble can be made up of like instruments (i.e. all flutes, all clarinets, etc.) or a mixture of woodwind instruments.

Learning Resources:

The Music Department has an extensive library of ensemble music from the Renaissance, Baroque, Classical, 20th Century eras and contemporary resources for combinations of solo, duet, trio, quartet, quintet and sextet. Students are invited and encouraged to compose and/or arrange works of their own for ensemble performance. There is also the additional possibility of computer generated music through various computer programs.

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Prerequisites:

Course Synopsis:

This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.

School Name: Lambrick Park Secondary

Course Name: Library Sciences 11

Course Code: YLSCI11

Category: Choose a Category

Grade Level of Course:  
- [ ] 10
- [x] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: February , 2008

Prerequisites: None

Course Synopsis:

The purpose of Library Science 11 is to give students hands-on experience in the services and management of a library while providing a broader set of skills and competencies applicable in high school, business, and other professional environments.

More specifically, the organizational structure and learning outcomes are founded upon three major goals:

1) to provide students with a specific skill set unique to library services and management - skills that the student can apply to enhance the school library for staff and students of the school and also apply to an entry-level job in the public library.

2) to provide students with a strong general skill set of research, marketing, organizational and communication skills. Although not designated as a career-preparation offering, this course will provide students with skills of lifelong value suited to many jobs.

3) to provide students with an appreciation of the vital roles of a library within a school and in the broader community.
Learning Resources:

- Canadian Library Handbook (Kogon/Lighthall)
- Standard Cataloging for School and Public Libraries (Intner, Weihs)
- Research Skills for Students (Valenza)
- The Big6 in Secondary Schools (Eisenberg/Berkowitz)
- InfoTasks for Successful Learning (Koechlin/Zwaan)
- Research Success @ Your Library (Toronto District School Board)
- Developing Independent Learners “The Role of the School Library Resource Center (Ministry of Education)
- The Oxford Guide to Library Research (Thomas Mann)
- The Research Virtuoso (Toronto Public Library)
- The Differentiated Classroom “Responding to the Needs of All Learners (Carol Ann Tomlinson)
- Problems are the Solution “Keys to Lifelong Learning (Steph Capra)
- Light ‘n Lively Reads for ESL, Adult, and Teen Readers (La Verne Rosow)
- Secondary School Librarian’s Almanac (Jane E. Streiff)
- Leverage Your Library Program to Raise Test Scores (Audrey P. Church)
- Teacher-Librarian magazine, various issues

Electronic

- A range of databases and e-books accessible from the school library web page
- Inspiration note-taking software
- L4U library software

School Name: Lambrick Park Secondary
Course Name: Peer Counselling 11
Course Code: YPCOU 11
Category: Health and Human Services

Grade Level of Course:  
- [ ] 10
- [x] 11
- [ ] 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April, 2004
Prerequisites: None

Course Synopsis:

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

- Resource books
- Guest Speakers
- Videos
- Agency handouts
- Internet, magazine and newspaper articles
- Field trips
- Conference materials
- Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.

School Name: Lambrick Park Secondary

Course Name: Science of Sport and Training 10

Course Code: YSST 10

Category: Fitness and Recreation

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: Physical Education 9 & Science of Sport and Training 9

### Course Synopsis:

This course has been developed to run concurrently with the instruction and activities in the Physical Education 10 course of the Diamond for Excellence Academy. It has been designed to enhance student athletes’ knowledge and understanding about the science of sport and training.

Learning outcomes for the course are grouped into five specific areas: anatomy and physiology; nutrition and human performance; biomechanics; motor learning and skill development; and history, psychology and sociology of sport.

Students will be given opportunities to apply their knowledge of exercise science and human performance to sport-specific activities and improve their own skill development through active learning. In addition, students will explore the world of sport from a historical, social, cultural, and ethical point of view. Practical and lab activities, the use of digital cameras and video cameras for skill analysis, guest speakers, and community field trips are among the strategies that will provide the opportunity for student development of many basic concepts and skills.

### Learning Resources:

- Articles & information about specific topic relating to unit topics
- Videos on various unit topics
- Guest speakers with expertise in kinesiology, human performance, coaching, and various other subjects.
- Articles and information about exercise science on Internet

### Additional Information:

This is a new course developed for the Diamond for Excellence Baseball/Softball Academy.

Grade Level of Course:  

   10 [x]  11  12 

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

Date Approved: April 16, 2007
Prerequisites: Biology 11; two of Chemistry 11, Physics 11 or Math 11; student application

Course Synopsis:
The High School Outreach Program (HSOP) was developed to bring the science research to the schools. The program consists of short lectures addressing topics such as cancer biology, treatment and prevention, as well as a hands-on Restriction Enzyme Digest Lab. The program has allowed students to get a glimpse into the world of research and to learn about molecular and cell biology and how these techniques are applied to cancer research as well as other areas of science. Schools have been very supportive as this allows the students to have a hands-on experience with these techniques rather than only discussing them from a theoretical point of view. The final evaluation will be done by the classroom teacher with input and support from the Research Centre staff and HS Program Manager.

This program is made possible by funding provided by NSERC Promo Science Award.

Course Synopsis:

This course provides students with a successful transition from secondary school to post-secondary training and/or to the world of work. This program is intended for students who want to gain meaningful work experience in a place of work in which they are interested in pursuing as a career or hope to gain employment. Work placements are diverse and suited to the students’ interests.

Students will complete either 110 or 180 classroom hours of Classroom Instruction in Career Exploration, Career Preparation, Pre-employment Skills, Information Technology and Personal Development and then will perform either 110 or 150 hours of meaningful on-the-job Work Experience that will allow them to develop an insight into their chosen fields of work. Students are encouraged to pursue multiple placements.

Learning Resources:

• Heartbeats, Horizons 2000+, Expanding Your Horizons, Success in the Workplace, WCB Work Safe, Health Canada Food and Exercise Guide, VISA Choice and Decisions, Junior Achievement Investment Strategies, Third Option Rocks, Job Futures
• Career Choices, Type Focus, Willocks Portfolio System
• Food Safe, First Aid, Super Host, Micros
• Microsoft Office Suite (Word, Excel, Publisher, Power Point), internet access
• Feature Films: Remember the Titans, Norma Rae, Door to Door, Teen Files: Stress, Depression, Sexual Responsibility, STDs, Truth About Drinking, Truth About Drugs, Eating Disorders.

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Prerequisites:

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February, 2008

Prerequisites:

Course Synopsis:

This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.

Course Synopsis:

Human Performance is a four-credit introduction to kinesiology. The Course surveys a wide variety of topics dealing with analysis and instruction of human motion (kinetics). Students use their personal experiences to further understand how the human body performs in a variety of athletic situations. Students also explore the physical and mental challenges of athletics.

Human performance was developed in 1999 with the input of both the school of Human Kinetics at The University of British Columbia and the Kinesiology department of The University of Victoria. The survey nature of the course is designed to give students a sampling of the four-year Bachelor programs offered by both universities in this area of study.

Learning Resources:

Videos
Resource Books
Conference Material
National Coaching Certification Program Material
Olympic Qualified coaches
Internet
Authentic Documents (magazines, newspapers, etc.)
Journals and Periodicals

Additional Information:

Human Performance has run successfully since 1999. It was the first course of its type in the District (there are several similar course now).

Graduating students have cited the course a key factor in their choice to study kinesology at both Simon Fraser University and The University of Victoria.

The course is offered with in the timetable.

Traditionally the course is filled with 60% female giving many young women an opportunity to study senior athletics without being in the heavily male dominated P.E. 11 & 12 programs.

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February, 2008

Prerequisites:

Course Synopsis:

Students should be at a high intermediate level of English proficiency, prior to taking this course.

Special Training, Facilities or Equipment Required:
The ESL teacher must be knowledgeable of Canadian culture and encourage students to share the experiences of their native country.

Course Synopsis:

This course has been developed to support and encourage ESL students to compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada embraces multiculturalism. Based on the use of authentic documents and resources, with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.

10  
11  
X12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: Musical 11/Theatre Performance 11 (Acting) or by Instructor permission

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre. As the second of two courses in Musical Theatre offered, students continue to develop their skills for performance with higher expectations, performance exposure and leadership requirements. Students learn the value of developing community, to triumph over diversity, and build a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting. In the culmination of all proposed levels of instruction (See Musical Theatre 11) students will produce a professional level Broadway musical for the school, community and the city of Victoria. Learning Outcomes for the course are grouped under the curriculum organizers: Building Community (Opening the Theatre Company), Pre-Production, Production and Post- Production (Reflection and Closing the Theatre Company). Students are expected to meet instructor expectations including written, audio and video recordings of student work; such as character analysis, dance tape and song recordings for analysis and further direction. These examples of student work act as motivating tools for movement, line and song deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units as well as. The approach supports student ownership and pride in performance as well as providing various skill sets and new approaches to thinking and learning. At the grade 12 level, students are exposed to higher level acting method and are granted opportunities for leadership and solo performance within the framework of a Musical. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the production and the reflective process after its completion.

Learning Resources:

• Various excerpts from Broadway Musicals (songs, scenes and monologues)
• Full script, lyrics and score of an established Musical for performance (TBA, to change every year.).
• More TBA ...
Musical Theatre 12 is the last in the progression of courses for students taking the proposed Musical Theatre 11 course. While many points in the Musical Theatre 12 curriculum is similar to the Grade 11 course, please note beyond the basic foundational expectations that are required in all Acting and Musical Theatre courses, that higher level expectations, specific responsibilities and greater opportunity for lead/principal roles has been placed into the Musical Theatre 12 Curriculum. While the suggestion is that both classes will work together and unite for a single musical, the level of learning in the Musical Theatre 12 class will be far greater and much more challenging than that of the Musical Theatre 11 course. With lead roles comes the responsibility of up to double the rehearsal time, memorization of not only songs and dances, but in many cases 50-100 pages of text as well. Further, it will be expected that these students inject higher level acting techniques and psychology into their roles, requiring more time, maturity and a greater understanding as well.

While students may audition for the Musical Theatre 12 course without having been enrolled in Musical Theatre 11, the basic knowledge of Musical Theatre and the onstage experience one gains through the Musical Theatre 11 course will make it very difficult for newcomers to gain acceptance into the course.

School Name: Mount Douglas Secondary

Course Name: Outdoor Leadership 11

Course Code: YOL 11

Category: Fitness and Recreation

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: A or B and G in previous Physical Education class, letter of reference, fitness evaluation, and inte

Course Synopsis:

This course has been developed to provide opportunities for students to gain knowledge and skills in the areas of outdoor recreational activities, outdoor leadership and recreation management. The program will examine the career opportunities in education, recreation, and the expanding eco-adventure industry. Also, students will be provided an opportunity to explore the many aspects of: first aid training and certification with a focus on athletic injuries, tournament organization and management, refereeing, volunteering for various athletic events in and around the community, introduction to various lifetime activities. Students achieving at least seventy percent will receive their first aid certification through St. John Ambulance and will be given instruction on treating athletic injuries. Students will be required to volunteer at least one hundred hours during many events provided, such as; a teaching practicum at Camp Thunderbird, school tournaments, school intramural leagues, local elementary intramural leagues, and community events. The program will include many activities outside of school, such as; rock climbing, sailing White Sail II, introduction to canoeing, kayaking, disc golfing, golfing, mountain biking, strength and conditioning training, leadership training, orienteering, scuba diving, hiking, backpacking, skating, and skiing or snowboarding. Students will discuss and practice leadership skills and learn to work as a team with a focus on helping the local community. This is reflected in the learning outcomes which involve Social and Community Issues and Kinesthetic learning as well as developing Interpersonal skills. The course will provide students the opportunity to develop their Social skills as well as help advance the athletic skills of students in the community and their own with the opportunity to volunteer their time and knowledge.

Learning Resources:

• St. John Ambulance Emergency First Aid Manual – First on the Scene
• St. John Ambulance Video Series
• First Aid Supplies- Reusable and Disposable
• AR/CPR mannequins
• Anatomy flip charts and related worksheets
• Scorers and Timers Manual
• Athletic Injuries Manual
• Outdoor Survival Booklet and worksheets
• Ascent Challenge Program

www.bcsta.org
This course has evolved from its inception in 1974 at Mount Douglas Secondary School. It is double blocked for a larger block of time which enables the class to take various field trips away from the school. It has been run at Spectrum as part of its Career Preparation Outdoor Recreation Program since 1998. The course relies on bus transportation as the transport of students to and from various locations is necessary. Much of the resources have taken years to accumulate and all are integral to the running of the course.

It is acknowledged that any program based on experiential learning in the outdoors takes on risks which are unlike those in other programs. Each trip planned for this program will have all potential hazards assessed and communicated to students, parents and Administrative Officers. Special attention will be given to risk management in both theory and in practice as it relates to each activity and its specific potential hazards.

School Name: Mount Douglas Secondary

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: None

Course Synopsis:

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional's role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor's Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

Resource books
Guest Speakers
Videos
Agency handouts
Internet, magazine and newspaper articles
Field trips
Conference materials
Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.
**Course Synopsis:**

Peer Tutoring 10 is designed to give committed, motivated students the opportunity to help others learn and develop their potential. Through this service to the school community, the tutors will acquire skills and knowledge in the areas of learning styles, teaching strategies, motivational techniques, communication skills, study habits, record keeping and marketing/promotion of the program. Not only will this reinforce their own learning but also will allow them the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Tutors may work in several settings:
(1) In the classroom in a particular subject area
(2) One-on-one individual tutoring
(3) Outreach programs at local elementary schools

**Learning Resources:**

* Peer Power (Book One) - Judith A. Tindall, PhD
* Caring & Sharing…Becoming a Peer Facilitator - Robert Myrick and Tom Erney
* Kids Helping Kids - Trevor Cole
* A Guide for Student Tutors - Patricia Koskenen/Robert Wilson
* F.A.T. City …Video (Frustration, Anxiety & Tension)
* Principles of Learning & Tips for Tutoring -Joseph A. Parsons PhD, Counselling Services, UVIC
* Dr. Seuss…Hooray for Diffendoofer Day!

**Additional Information:**

Unit 1: Communication Skills
Unit 2: Learning Styles/Study Habits
Unit 3: Learning Strategies/Tips for Tutoring
Unit 4: Group Tutoring
Unit 5: Client Interaction/Individual Tutoring

Category: Choose a Category

Grade Level of Course:  

- [ ] 10  
- [x] 11  
- [x] 12

Number of Course Credits: 4

Number of Hours of Instruction: 100

Date Approved: February, 2008

Prerequisites: Grade 12 Standing

Course Synopsis:

Scholarship Preparation 12 is designed to familiarize grade 12 students with post-secondary opportunities and to prepare them to make the most of these opportunities. Students will research post-secondary institutions and available scholarship and bursaries, and will be coached to select and then apply for the post-secondary opportunities and scholarships/bursaries most suited to their interests and talents. Students will be assisted to create a professional application package.

Learning Resources:

1. Computer lab and software
2. Websites and print material from post-secondary institutions
3. Guest speakers (e.g., admission officers from universities, scholarship representatives, current university students)

Course Name: Symphony Orchestra 10

Course Code: YSYMO 10

Category: Fine Arts, Design, and Media

Grade Level of Course:   

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

School Name: Oak Bay Secondary

Course Name: Advanced Dance

Course Code: YADD 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: Intermediate Dance 10/11/12 or by permission of the instructor

Course Synopsis:

This course has been developed to support, encourage and create a lifelong appreciation for the richness and diversity of dance. It is an advanced level course and is available to any grade 10/11/12 student, provided he/she meets the prerequisite. As the third of three levels offered in Dance, students continue to develop their skills for performance with higher expectations, performance exposure and leadership requirements. Students in this course are expected to strive to develop their skills to the level of the professional. Students observe, create, and perform dance in a variety of styles including Tap, Ballet, Modern and Jazz. Learning outcomes for the course are grouped under the curriculum organizers: Elements of Movement, Creation and Composition, Presentation and Performance, and Dance and Society. Each section will be divided into categories: orientation, history, technique, creative, vocabulary and performance. The course focuses on the “whole dancer”, including: self-image, posture, alignment, breathing, centering, balance, anatomy, basic warm-up theory, and introduction to vocabulary. It is expected that teachers will adapt, modify, combine, and organize instructional strategies to meet the needs of students and to respond to local requirements. In addition to summative and formative evaluation by the teacher, students are also given the opportunity for self and peer assessment in each of the four units. A culminating project of this course will be an Evening of Dance where students perform for the school and the community.

School Name: Oak Bay Secondary

Course Name: Chamber Choir 11

Course Code: YCCH11

Category: Choose a Category

Grade Level of Course: [ ] 10 [X] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: Sight reading skills, good vocal technique and/or permission of the instructor.

Course Synopsis:

Chamber choir focuses on pieces more suited to the small ensemble. It is an upper level course for students who already meet the outcomes for Choir 11 and demonstrate advanced vocal skills. There is a focus on music that is not accompanied (a cappella) and students learn to sing independently and with confidence in English, French, German, Italian, Spanish and Latin. With each piece there is an in-depth exploration of the composer and time period in which he/she lived and wrote. Vocal technique, sight-reading and ear training are developed to a high level. Students listen to and perform vocal music from a variety of time periods, including Renaissance, Baroque, Classical, Romantic Contemporary and World music. This course is performance based and there will be a number of performances outside of regular school hours.

Learning outcomes for the course are grouped under the same curriculum organizers as Choir 11: Structure; Thoughts, Images, and Feelings; Context; and Musicianship. However, within this curriculum focus will be given to Technical Competence, Performance Applications, Music Literacy and History. There is not necessarily a one-to-one relationship between learning outcomes and instructional strategies, nor is this organization intended to prescribe a linear means of course delivery. It is expected that teachers will adapt, modify, combine, and organize instructional strategies to meet the needs of students and to respond to local requirements. In addition to summative and formative evaluation by the teacher, students are also given the opportunity for self and peer assessment in each of the six units.

Learning Resources:

Sight Singing Resources (ex. Successful Sight Singing, Book I Nancy Telfer, Niel Kjos, 1992)
The New Harvard Dictionary of Music
The Structure of Singing
Teaching Choral Music
The Complete Choral Warm-up Book, Russell Robinson, Alfred, 1995
CD-ROM – Vocal Ear Training
Various choral octavios representing different musical styles and historical periods
Various CD’s for listening

Course Synopsis:

This is a hands-on, workshop-based course for students who are interested in and might benefit from being exposed to creative writing. This course helps prepare students to learn the basics in several writing genres. Students will work on a variety of creative projects and are given instruction on writing skills including how voice, dialogue, style, and theme can give text depth and make writing more effective. Moreover, they will discern between pieces written to entertain versus those which explore man’s place in the universe and man’s relationship to man.

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Prerequisites:

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February, 2008

Prerequisites:

Course Synopsis:

This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.

Prerequisites:

Course Synopsis:

Students should be at a high intermediate level of English proficiency, prior to taking this course.  

Special Training, Facilities or Equipment Required:
The ESL teacher must be knowledgeable of Canadian culture and encourage students to share the experiences of their native country.

Course Synopsis:
This course has been developed to support and encourage ESL students to compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada embraces multiculturalism. Based on the use of authentic documents and resources, with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.

School: Oak Bay Secondary
Course: Intermediate Dance 10

Course Code: YITMD 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4 each

Number of Hours of Instruction: 120 each

Date Approved: March, 2005

Prerequisites: Beginning Dance 10/11/12 or by permission of the Instructor

Course Synopsis:

This course has been developed to support, encourage and create a lifelong appreciation for the richness and diversity of dance. It is an intermediate level course and is available to any grade 10/11/12 student, provided he/she meets the prerequisite. As the second of three levels offered in Dance, students continue to develop their skills for performance with higher expectations, performance exposure and leadership requirements. Students observe, create, and perform dance in a variety of styles including Tap, Ballet, Modern and Jazz. Learning outcomes for the course are grouped under the curriculum organizers: Elements of Movement, Creation and Composition, Presentation and Performance, and Dance and Society. Each section will be divided into categories: orientation, history, technique, creative, vocabulary and performance. The course focuses on the “whole dancer”, including: self-image, posture, alignment, breathing, centering, balance, anatomy, basic warm-up theory, and introduction to vocabulary. It is expected that teachers will adapt, modify, combine, and organize instructional strategies to meet the needs of students and to respond to local requirements. In addition to summative and formative evaluation by the teacher, students are also given the opportunity for self and peer assessment in each of the four units. A culminating project of this course will be an Evening of Dance where students perform for the school and the community.

School Name: Oak Bay Secondary
Course Name: Peer Counselling 11
Course Code: YPCOU 11
Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: April, 2004
Prerequisites: None

Course Synopsis:

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

Resource books
Guest Speakers
Videos
Agency handouts
Internet, magazine and newspaper articles
Field trips
Conference materials
Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.
Students are guided at each step to know their limits and make appropriate referrals.

Additional Information:
Students are guided at each step to know their limits and make appropriate referrals.
Darkroom photography has maintained its importance as an expressive art form. Digital photography has become the equally relevant partner course based on the same principles and elements of design and recognition of artistic expression. Yet, darkroom photography remains the more hands-on expressive medium that photographers revere.

Course Synopsis:

This course moves the student from “snapshot” into photography as art, using the elements and principles of design to create effective photography. The student will learn about camera controls, film and developing, enlarging and printing photographs. Students will learn pinhole photography and photograms. And will cover the history of photography. This course primarily concerns the black and white darkroom photography process. Exploration into forms of expression and professional development in post secondary venue will be examined. Enjoyment and expressions is acknowledged and journalism through photography explored.

☐ 10  ☒ 11  ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: March, 2005

Prerequisites: Photography 11

Course Synopsis:

This is an extensive photography course. We start with a review of the basics and advance at a steady pace so that one has a clear understanding of the language of photography and is able to produce a series of images with impact. There will be hands-on experience with the camera, the darkroom and the computer. Regular quizzes on the language, practice and theory of photography, a project on a famous photographer and a final portfolio (possibly a final exhibition of final work in a show). Creative exploration and professionalism is a focus of this course. Moral issues concerning photography will be explored. Portfolio will be required.

Learning Resources:

Video, print, internet, gallery as seen appropriate by instructor to fit the focus of student’s interests.
Scholarship Preparation 12 is designed to familiarize grade 12 students with post-secondary opportunities and to prepare them to make the most of these opportunities. Students will research post-secondary institutions and available scholarship and bursaries, and will be coached to select and then apply for the post-secondary opportunities and scholarships/bursaries most suited to their interests and talents. Students will be assisted to create a professional application package.

Learning Resources:

1. Computer lab and software
2. Websites and print material from post-secondary institutions
3. Guest speakers â€“ Eg: admission officers from universities, scholarship representatives, current university students

**Course Code:** YSOCD11

**Category:** Choose a Category

**Grade Level of Course:**
- [ ] 10
- [x] 11
- [ ] 12

**Number of Course Credits:** 4

**Number of Hours of Instruction:** 100

**Date Approved:** February, 2008

**Prerequisites:** Referral by Learning Resource Teacher, School Based Team and application and permission from the teacher

### Course Synopsis:

This course focuses on:
- The continuum of social skills development including social psychology and ethics. Topics covered will be prioritized upon initial assessment of participants' present skills set in social dynamics.
- The core units are:
  - Self-Awareness and Understanding
  - Interpersonal Skills
  - Social Relations
  - Rights, Responsibilities and Ethical Dilemmas
- The applied focus of this course will include lectures, seminars, labs and field trips. Some meetings (i.e. special events) may require flexible scheduling.

### Learning Resources:

- Buron, K. D. (year) A '5' is Against the Law! Social Boundaries Straight Up: An Honest Guide for Teens and Young Adults

- Films, DVDs and videos
- Games
- Guest speakers

School Name: Oak Bay Secondary

Course Name: Strength Training and Conditioning 11B

Course Code: YSTCD 11B

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April, 2004

Prerequisites: None

Course Synopsis:

Strength Training and Conditioning will provide an opportunity for instruction/learning about a healthy active lifestyle and to provide information regarding a popular leisure pursuit. Strength Training is an extremely effective component of fitness for young people. The learners will, through a variety of teaching strategies and opportunities, develop a level of understanding and a positive attitude towards resistance training.

Learning Resources:

• Fitness Equipment
• Posters
• Video
• Print Material – Books, magazines
• Guest Speakers

Additional Information:

11A - Basic Strength Training
11B - Advanced Strength Training

Rationale:

This course has been developed to support and encourage students to follow a healthy lifestyle path. Individual student programs are developed and monitored and as such the course is of interest to a wide variety of students. They will explore current trends and research in fitness – including resistance training, core strength, plyometrics, and sports specific training.

Basic anatomy and physiology will be covered. Emphasis is placed on proper exercise techniques with safety being a priority.

Course Name: String, Fretted Instruments - Ukulele 12

Course Code: YSFIU12

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: None

Course Synopsis:

This course is designed to give students the opportunity to continue to develop individual technique on the ukulele and with the voice, as well as to further develop ensemble playing skills. Performance repertoire is used to study all aspects of the curriculum, including music theory and history. This is a performing ensemble that performs at numerous public concerts, festivals and community events. These performances may occur in the evenings and often take place away from the school. Includes frequent large ensemble performances with the 6 different “Island Ukuleles” ensembles. Regular home practice is required. The class meets on Monday evenings at Oak Bay Secondary School (west). Senior students will be expected to assume leadership positions. Students will develop lifelong skills in the areas of self-image, goal setting, time management, public speaking, school and community service, and conflict resolution.

Learning Resources:

“Classroom Ukulele Method” by J.Chalmers Doane; Waterloo
“Ukulele Encore” by J. Chalmers Doane, Waterloo
“A Music Reading Program for Ukulele” by J. Marven Shields, Waterloo
“Essential Musicianship, A Comprehensive Choral Method Level 3” by Hal Leonard
“Vocal Improvisation” by Michele Weir
“Potpourri for the Choral Director” by W. Jay Hoel
Resources from the “British Columbia Music Educators Association” conference
Resources from the “BC Ukulele Workshop”
Arrangements created specifically for the ensemble
“Fleabag Blues” Video
CDs such as:
“Songs of the Island” by Island Ukuleles
“Classical Ukuleles” by the Langley Ukulele Ensemble
“Musical Ride” by Halifax Adult Ukulele Ensemble
“A Flying Leap” by James Hill
“Jumpin’ Jim’s Ukulele Masters” by Herb Ohta

Course Code: YSYMO 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  
- [x] 10
- [ ] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

School Name: Oak Bay Secondary

Course Name: Vocal Music 10

Course Code: YVM 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support, encourage and create a lifelong appreciation for the richness and diversity of vocal music. Students listen to, create, and perform vocal music from a variety of styles including pop, Broadway, jazz, folk, classical and world music. Students explore the technical demands of how the voice is used in a number of contexts, including solo and ensemble singing. Students explore why vocal music is important and how it is constructed. Learning outcomes for the course are grouped under the curriculum organizers: Personal, Social, Cultural, and Historical Contexts; Elements and Principles, and Expressing our Humanity. Within each of these curriculum organizers the following will be addressed: Creating, Performing, Communicating; Perceiving, Responding, Reflecting. There is not necessarily a one-to-one relationship between learning outcomes and instructional strategies, nor is this organization intended to prescribe a linear means of course delivery. It is expected that teachers will adapt, modify, combine, and organize instructional strategies to meet the needs of students and to respond to local requirements. In addition to summative and formative evaluation by the teacher, students are also given the opportunity for self and peer assessment in each of the four units.

Learning Resources:

Sight Singing Resources (ex. Successful Sight Singing, Book I Nancy Telfer, Niel Kjos, 1992)
The Complete Choral Warm-up Book, Russell Robinson, Alfred, 1995
Song Writing: A Classroom Approach, Fred Maybe, BCTF, 2003
Musical Bingo, Cheryl Lavender, Hal Leonard, 1992
Various choral octavios representing different musical styles and historical periods
Various CD’s for listening

This program is offered as a class outside the main timetable one morning before school and one lunch hour throughout the school year, as well as individual time spent volunteering, planning, organizing and executing activities and events. As mentioned this program is built upon the core units (themes of study) with increased and different expectations at each grade of the program from 10 – 12.

Course Synopsis:
This course is designed to give students the opportunity to develop their individual and collective sense of social responsibility through the acquisition and application of leadership skills and theory. Students will develop lifelong skills in the areas of self-image, goal-setting, time management, public speaking, school and community service, public relations, decision making, team building and an understanding of various leadership styles. This will allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Course Synopsis:

"With every activity of our daily lives, we connect with the interdependent web of life on Earth. The health of our environment is a reflection of the choices we make." ~http://eartheasy.com

The overall goal of this course is to educate students about the environment and their place in it. The course aims to show how actions can have a positive or a negative effect on our environment (both locally and globally) and thus empower youth to take responsibility and leadership in creating and maintaining a more environmentally sustainable way of life into adulthood. The course aims to ‘get at’ both the aesthetic and practical components of environmental education.

The hope is that this course will allow students to achieve an understanding of the concept of sustainability and a sense of stewardship for our planet through developing an appreciation for the biodiversity on Earth. As stated by the Canadian Biodiversity Network (http://www.cbin.ec.gc.ca/education/event.cfm?lang=e ); Biodiversity can be defined as "the variety of life on earth and the natural patterns that it forms" While measures to promote the conservation and sustainable use of biodiversity will be beneficial for the environment, they can also have a positive effect in advancing our health and economic well-being. When people come to understand the importance of biodiversity, they are likely to encourage or even participate in activities which support conservation and the sustainable use of resources. Unfortunately, however, many people are not entirely familiar with the full range of benefits related to biodiversity. This lack of knowledge highlights the need to provide more information to the public about ecosystems, species and genetic diversity. With increased awareness, Canadians will be better prepared to make decisions that take into account the importance of biodiversity.

Students will be given the opportunity to interact experientially with nature in order to build an appreciation of the "bigger picture".

Once this attitude is developed it is intended that students will gain awareness and understanding of the many areas of environmental sustainability in a high school as a local model of our global environment, primarily through ecological indicators (water, materials, air, energy and land). Students will calculate personal and community based ecological footprints, with a view for planned reduction and achieving carbon neutrality. They will learn how to collect data, analyse, evaluate, discern and implement courses of action to improve sustainability and reduce ecological footprints.

In short students will develop both the desire and the practical tools necessary for creating and maintaining a more environmentally sustainable way of life into adulthood

Learning Resources:

Complexity ~Life on earth depends on, and is part of complex systems.
Aesthetics ~ Environmental awareness enables students to develop and aesthetic appreciation.
Responsibility ~ Human decisions and actions have environmental consequences.
Ethics ~ The study of the environment enables students to develop an environmental ethic.

School Name: Reynolds Secondary
Course Name: ESL Composition 11
Course Code: YESCM11

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February, 2008

Prerequisites:

Course Synopsis:

This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.
Learning Resources:

- (workbook) (ISBN 0139586873)
- Imprints 11 (ISBN 0771509405)
- Focus on Grammar Book 4
- Arco: Everything You Need to Score High, TOEFL Grammar Workbook (ISBN 0028624645)
- Writing Academic English, 3rd Ed. (ISBN 0201340542)
- Focus on Editing: A Grammar Workbook for Advanced Writers (ISBN 0801306817)
- Improving Composition Through a Sentence Study of Grammar and Usage (ISBN 0838815960)
- Preparing to Write the Language Proficiency Index (LPI) (ISBN 0888651902)
- The Article Book: Practice Toward Mastering a, an, and the (ISBN 0133113906)
- Essay Essentials, 2nd Ed. (ISBN 0774732806)

School Name: Reynolds Secondary

Course Name: Film Studies 12

Course Code: YFIS 12

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students to explore the richness and diversity of various genres of film. Students learn the language of film making, the process of visual storytelling, and the ability to think critically, to analyze, compare and critique different presentations. The course will also help students to improve their writing and presentation skills. The approach supports student skill development and encourages meaningful methods of interpreting and presenting a variety of perspectives on significant issues.

School Name: Reynolds Secondary

Course Name: Flexible Studies Service 10

Course Code: YFSS 10

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4 over 4 y

Number of Hours of instruction: 30 hours e

Date Approved: March , 2005

Prerequisites: Flexible Studies Service 9

Course Synopsis:

This course is designed to give students the opportunity to develop positive character attributes through participating in organized Service Projects and Volunteer work within the school and surrounding community, as well as through a continual character curriculum thread through each year from grades 9-12. Students will develop language for and an understanding of Character Education concepts as well as adopt appreciation and skill towards Service related activities; they will develop a sense of community and contributing to community. This Character Education/Service thread will occur as an extension to the Flexible Studies~Leadership in Learning Program core subject curriculum as outlined in the Reynolds Secondary Course handbook and on the school website (http://www.sd61.bc.ca/school/reynolds/flex.html).

Reynolds Flexible Studies Program
Flexible Studies: Leadership in Learning
A district program for Secondary Students who are interested in a program that emphasizes:
- Academic Excellence
- Character development through Leadership/Service.
- Enrichment and Challenge through Experiential learning
- Support through individual and flexible programs

School Name: Reynolds Secondary
Course Name: Intercultural Studies 11
Course Code: YICS11

Category: Choose a Category
Grade Level of Course: 10 11 12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February, 2008

Prerequisites:

Course Synopsis:

Students should be at a high intermediate level of English proficiency, prior to taking this course.

Special Training, Facilities or Equipment Required:
The ESL teacher must be knowledgeable of Canadian culture and encourage students to share the experiences of their native country.

Course Synopsis:
This course has been developed to support and encourage ESL students to compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada embraces multiculturalism. Based on the use of authentic documents and resources, with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.

School Name: Reynolds Secondary

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course: 10  [X] 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: None

**Course Synopsis:**

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

**Learning Resources:**

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

- Resource books
- Guest Speakers
- Videos
- Agency handouts
- Internet, magazine and newspaper articles
- Field trips
- Conference materials
- Journals and Newsletters

**Additional Information:**

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  
10  
[ 11 ]  
[ 12 ]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  March , 2005

Prerequisites:  Science 10

Course Synopsis:
The study of Psychology 11 begins with what defines us as human and compares us to other existing primates and now extinct human prototypes such as Neanderthal and other hominids that existed concurrent with the beginning of modern humans. The issues of evolutionary psychology and comparative anatomy in relation to the evolving brain and its behaviors are discussed. Inherent are the factors defining other primates and hominids from us. There is latitude here to allow for discussion of the opposing view of the Genesis theory if the situation arises. The focus, though, is on Evolutionary Theory and Darwinism as neuroanatomy points to evolving bodies and brains reflecting biological determinism. Scientific journals and the internet provide numerous examples from anthropology and Evolutionary psychology of parallel evolutionary development of human species.

Neuroanatomy, physiology and the central nervous system are an essential component in examining the biological foundation of human behavior. As such neurons, neural networks, neurotransmitters, the role of enzymes in brain function are central features. Inherent is a detailed assessment of the roles of specific structures such as the hypothalamus, amygdale et al. and the existence of fundamental rhythms and drives and the process of homeostasis. It is within this part of the course structure where the interplay of biology and the environment appears as evidence is presented where stimulation is shown to produce physical changes in the synapses and dendritic spikes of neural tissue.

Following the establishment of the biological role of the brain, in behavior, the elements of cognition, consciousness, memory and awareness are introduced and lead to examination of issues such as identity and cultural influences on behavior.

Directly related to brain function is the discussion of pathology of behaviour as a consequences of genetic, structure or chemical alterations in brain behaviour. Genetic and Chemical variances such as Schizophrenic, Bi Polar Disorder, ADD, ADHD, ACC, OCD, ODD, epilepsy and Alzheimer’s Disease will be studied. In the same light, drug mediation through phenathiazines, tricyclic anti depressants, Seretonin, reuptake inhibitors, Lithium will be examined along with other behavior modification techniques such as E.C.T (Electro Convulsive Therapy).

In comparison to biological aspects of behavior, the theories of environmental influences on human performance, Pavlov, Skinner, Watson and Bandura will be studied, as will then collective impacts on the view of environmental determinism. Social learning theory, single event conditioning and various reinforcers of behaviour will be examined as well the creation of superstition through the establishment of false contingencies.

The validity of Freudian theory will be examined through its comparison to behaviorism and biological psychology. Concepts such as ages and stages of development will be compared to those of Eriksen and others. Psychogenesis of behaviour will be discussed as well Defence Mechanisms and the flaws apparent in Freudian psychoanalytic theory.

A separate unit on Aggression will be detailed and will include biological, behavioural and psychogenesis viewpoints. The pathology of aggression and sociopathological and psychopathological behaviors will be a central focus.

Students will also have the opportunity to peruse personality disorders such as neurosis, anxiety disorders, obsessive behaviour, hedonism, Schizoid behavior, etc; disorders of isolation and manipulative disorders in order to set the stage for defining Normal human behavior.

Intelligence and creativity and the use of measuring devices to determine and define both concepts will be assessed. Behaviours such as savantism will be compared to intelligence and creative factors. As well, the concept of autistic savants will be examined.

The final brief unit in the course will peruse the remaining personality theories such as Humanism, Interpersonal psychology, Existential psychology and eclecticism. This unit will be compared to biological, behavioristic and psychogenesis models as a form of review and to redefine the differences in approaches to assessing human behaviour.

School Name: Reynolds Secondary

Course Name: Symphony Orchestra 10

Course Code: YSYMO 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

Category: Health and Human Services

Grade Level of Course:  

\[ \square 10 \quad \square 11 \quad \square 12 \]

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:

Students learn to understand human development, understand self and emotions, develop good listening and communication skill, understand brain biology as it relates to learning, understand how the brain makes meaning and how the process impacts learning, understand how memory works, use strategies and cognitive learning sequences to promote learning and enjoyment, the role of nutrition and sleep, effects of stress and substance abuse.

Learning Resources:

Teaching with the Brain in Mind by Eric Jensen is our basic resource. We also use the Internet, speakers, video, etc.
School District 61

Status: locked

School Name: Spectrum Community

Course Name: Aspects of Learning 12

Course Code: YALN 12

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:

This course continues the development of awarenesses and skills in Aspects 11 and adds the further elements of culture, gender, literacy and groups. Both courses have a personal “walkabout” to teach as a demonstration of learning at the end.

Learning Resources:

Learn Smarter, not Harder, plus Brain-based Learning by Paquin and Politano, plus speakers, videos, internet, etc.
School District 61

Status: approved

School Name: Spectrum Community
Course Name: Athletic Leadership 10
Course Code: YALE 10
Category: Fitness and Recreation

Grade Level of Course: ✓10  □11  □12

Number of Course Credits: 2
Number of Hours of Instruction: 60
Date Approved: April, 2004

Prerequisites: A or B and G in previous Physical Education class

Course Synopsis:

This course has been developed to allow students with an interest in Athletics an opportunity to explore the many aspects of athletics, from: first aid training and certification with a focus on athletic injuries, tournament organization and management, refereeing, volunteering for various athletic events in and around the community, introduction to various lifetime activities and physical education.

Students achieving at least 70 per cent will receive their first aid certification through St. John Ambulance and will be given instruction on treating athletic injuries. Students will be required to volunteer at least 20 hours during many athletic events provided, such as: school tournaments, school intramural leagues, local elementary intramural leagues, and community events. They will be provided the opportunity for refereeing certification in various sports.

The course will run in conjunction with Physical Education and will include many activities outside of school, such as; sailing, kayaking, disc golfing, golfing, bowling, skating, and skiing or snowboarding.

Students will discuss and practice leadership skills and learn to work as a team with a focus on helping the local community. This is reflected in the learning outcomes which involve Social and Community Issues and Kinesthetic learning as well as developing Interpersonal skills. The course will provide students the opportunity to develop their Social skills as well as help advance the athletic skills of students in the community and their own with the opportunity to volunteer their time and knowledge.

Rationale:

This course provides an opportunity for like minded students to explore their interest in the various aspects of athletics together. Students will receive their St. John Ambulance Certification, learn proper care and treatment of athletic injuries, learn to organize and run intramural leagues, and be allowed the opportunity to help referee and give instruction to elementary and middle school students. The course will run together with Physical Education and students will be given the opportunity to learn and demonstrate leadership skills in many different forums, from; the classroom setting for first aid instruction in small groups, to the playing fields and gymnasium setting for Physical Education, to organizing and managing tournaments from score keeping to refereeing, and many different lifetime activities offered away from the school setting, such as; sailing, kayaking, disc golfing, golfing, bowling, skating, and skiing or snowboarding, all of which will emphasize working together as a team to achieve goals.

This course has been designed to meet the needs of those students that have a strong interest in Physical Education and Athletics.
Learning Resources:

- St. John Ambulance Emergency First Aid Manual - First On The Scene
- St. John Ambulance Video Series
- First Aid Supplies - Reusable and Disposable
- AR/CPR mannequins
- Anatomy Flip Charts and related worksheets
- Scorers and Timers Manual
- Athletic Injuries Manual
- Outdoor Survival Booklet and worksheets

Additional Information:

This course has evolved from its inception in 1991 at Colquitz Junior Secondary School. It has been combined with Physical Education due to its related nature and also allows for a larger block of time which enables the class to take various field trips away from the school. The course is quite busy dependent as the transport of students to and from various locations is necessary. Much of the resources have taken years to accumulate and all are integral to the running of the course.
**Course Synopsis:**

The AVID elective encompasses the key elements that promote academic success and ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components – AVID curriculum content, Avid Tutorials and AVID motivational activities. The curriculum component of the AVID elective focuses on:

- WICR-R strategies (Writing, Inquiry, Collaboration and Reading),
- Developing skills that support Academic Success (eg. Organizational skills, Note-taking and Study skills, Test-taking skills, Collaborative learning and study skills, Communication and Presentation skills, Research skills)
- Acquiring information about post-secondary opportunities

**Learning Resources:**

AVID Library, AVID Publications, Videos
Implementing and Managing the AVID Program
College and Careers
Strategies for Success
Site Teams
Tutorials

Prerequisites: Application and Interview

Course Synopsis:

The AVID elective encompasses the key elements that promote academic success and ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components: AVID curriculum content, AVID Tutorials, and AVID maintenance and motivational activities.

The curriculum component of the AVID elective focuses on:

- Acquiring information about post-secondary opportunities
- Development of a personal education and career plan
- Development of a personal post-secondary education (PSE) financial plan
- Understanding the interaction of career trends and the global economy
- Development of a personal portfolio to support application for PSE

Learning Resources:

The school or district must identify resources for program costs; agree to implement AVID Program Implementation Essentials; and work toward participation in annual AVID certification. Commitment to on-going participation in AVID staff development is also required.

School Name: Spectrum Community

Course Name: Baked Products and Decoration 11

Course Code: YBPD11

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: April 18, 2006

Prerequisites:

Course Synopsis:

This is a demonstration and hands-on course covering baked products and their decoration. This course will provide students with the opportunity to explore a culinary discipline and to work with food as a visual art. The historical, traditional and contemporary significance of special occasion cakes will be introduced, but the emphasis of this course is on decorating with icings such as butter cream, royal and rolled fondant. Throughout the course, students will create a portfolio of their food creations, which can be used for future studies, job interviews and help to meet some of the requirements for their grad portfolio. Presentation is of utmost importance and students will be encouraged to use their creative and artistic skill to display their baking masterpieces.

Students will have the opportunity to practice their skills and express their learning through laboratory experiences, written work, portfolio development, multi-media presentations, and demonstrations. By being exposed to both peer and self-evaluations, students will develop the confidence to critique culinary works of art. Students will take monitored steps towards learning some components of the decorating profession and thus have a basis on which to make future employment or even career decisions.

Learning Resources:

Text: The use of current textbooks Management and Foods, and Foods for Life and Guide to Modern Meals are recommended along with support material developed by the teacher.

**Course Synopsis:**

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Prerequisites:

Course Synopsis:

• Has a first language other than English
• Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
• Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practice of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Course Name: ESL Composition 11

Course Code: YESCM11

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February, 2008

Prerequisites:

Course Synopsis:

This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:

It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:

This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.
Learning Resources:

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: June, 2004

Prerequisites: Students should have completed at least two years of ESL Support or be at an advanced level of Eng.

Course Synopsis:

This course has been developed to support and encourage ESL students to explore and compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada is called a multicultural country.

Based on the use of authentic documents and resources with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.

Grade Level of Course:  □ 10  □ 11  □ 12

Number of Course Credits: 4

Number of Hours of instruction: 100-120

Date Approved: February, 2008

Prerequisites: None

Course Synopsis:

The purpose of Library Science 11 is to give students hands-on experience in the services and management of a library while providing a broader set of skills and competencies applicable in high school, business, and other professional environments.

More specifically, the organizational structure and learning outcomes are founded upon three major goals:

1) to provide students with a specific skill set unique to library services and management skills that the student can apply to enhance the school library for staff and students of the school and also apply to an entry-level job in the public library.

2) to provide students with a strong general skill set of research, marketing, organizational and communication skills. Although not designated as a career-preparation offering, this course will provide students with skills of lifelong value suited to many jobs.

3) to provide students with an appreciation of the vital roles of a library within a school and in the broader community.
Learning Resources:

- Canadian Library Handbook (Kogon/Lighthall)
- Standard Cataloging for School and Public Libraries (Intner, Weihs)
- Research Skills for Students (Valenza)
- The Big6 in Secondary Schools (Eisenberg/Berkowitz)
- InfoTasks for Successful Learning (Koechlin/Zwaan)

School Name: Spectrum Community

Course Name: Musical Theatre 12

Course Code: YMUTH 12

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: Musical 11/Theatre Performance 11 (Acting) or by Instructor permission

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre. As the second of two courses in Musical Theatre offered, students continue to develop their skills for performance with higher expectations, performance exposure and leadership requirements. Students learn the value of developing community, to triumph over diversity, and build a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting. In the culmination of all proposed levels of instruction (See Musical Theatre 11) students will produce a professional level Broadway musical for the school, community and the city of Victoria. Learning Outcomes for the course are grouped under the curriculum organizers: Building Community (Opening the Theatre Company), Pre-Production, Production and Post-Production (Reflection and Closing the Theatre Company). Students are expected to meet instructor expectations including written, audio and video recordings of student work; such as character analysis, dance tape and song recordings for analysis and further direction. These examples of student work act as motivating tools for movement, line and song deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units as well as. The approach supports student ownership and pride in performance as well as providing various skill sets and new approaches to thinking and learning. At the grade 12 level, students are exposed to higher level acting method and are granted opportunities for leadership and solo performance within the framework of a Musical. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the production and the reflective process after its completion.

Learning Resources:

• Various excerpts from Broadway Musicals (songs, scenes and monologues)
• Full script, lyrics and score of an established Musical for performance (TBA, to change every year.).
• More TBA ...
Musical Theatre 12 is the last in the progression of courses for students taking the proposed Musical Theatre 11 course. While many points in the Musical Theatre 12 curriculum is similar to the Grade 11 course, please note beyond the basic foundational expectations that are required in all Acting and Musical Theatre courses, that higher level expectations, specific responsibilities and greater opportunity for lead/principal roles has been placed into the Musical Theatre 12 Curriculum. While the suggestion is that both classes will work together and unite for a single musical, the level of learning in the Musical Theatre 12 class will be far greater and much more challenging than that of the Musical Theatre 11 course. With lead roles comes the responsibility of up to double the rehearsal time, memorization of not only songs and dances, but in many cases 50-100 pages of text as well. Further, it will be expected that these students inject higher level acting techniques and psychology into their roles, requiring more time, maturity and a greater understanding as well.

While students may audition for the Musical Theatre 12 course without having been enrolled in Musical Theatre 11, the basic knowledge of Musical Theatre and the onstage experience one gains through the Musical Theatre 11 course will make it very difficult for newcomers to gain acceptance into the course.

School Name: Spectrum Community

Course Name: Outdoor Education 10

Course Code: YOE 10

Category: Fitness and Recreation

Grade Level of Course:  
- [x] 10
- [ ] 11
- [ ] 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April, 2004

Prerequisites: Physical Education 9

Course Synopsis:

This course has been developed to enable students to enhance their quality of life through active living and to that end it was designed to educate students about and expose them to outdoor safety and survival.

This course focuses mainly on land-based survival techniques. It prepares and motivates students to safely and confidently pursue an active lifestyle in the outdoors.

Students will develop skills and/or knowledge in:
- selecting outdoor clothing, footwear and equipment; hyperthermia; hypothermia;
- survival in cold water;
- basic first aid;
- what to do if you're lost or stranded (including shelter construction, fire building, distress signals, locating drinkable water, wild edible and poisonous foods, finding direction without a compass, camp craft and bear and cougar safety);
- search and rescue procedures and techniques;
- preparation for a trip;
- wilderness travel techniques;
- selecting safe travel routes;
- bipedal transportation methods including hiking, snowshoeing, cross country skiing, downhill skiing and snowboarding; map and compass basics and orienteering.

Fieldtrips provide the opportunity to safely practice and develop many of these skills.
Additional Information:

This course has been developed to enable students to enhance their quality of life through active living and to that end it was designed to educate students about and expose them to outdoor safety and survival.

Students will investigate the varied characteristics, proper care and use of outdoor clothing, footwear and equipment. They will study the causes, symptoms, treatments and prevention of hyperthermia and hypothermia and will apply this knowledge to survival in the wilderness and cold water. In conjunction with wilderness survival the students will learn a proper sequence of steps to follow if lost or stranded including: addressing psychological factors, shelter construction; fire building; distress signals; locating drinkable water; edible and poisonous wild plants/foods; finding direction with and without a compass; making cordage; lashing techniques; and bear and cougar safety. Search and Rescue procedures and techniques will be examined so students gain a better understanding of the importance of the “whats and whys” of lost or stranded procedures. Students will learn and practice the proper preparations for a trip. They will investigate various wilderness travel techniques and identification of safe routes. Students will learn and practice map and compass basics and orienteering. The approach exposes students to the theory of outdoor safety and survival, and fieldtrips provide the opportunity to safely practice and develop many of these skills.

School Name: Spectrum Community

Course Name: Outdoor Leadership 11

Course Code: YOL 11

Category: Fitness and Recreation

Grade Level of Course: [ ] 10  [x] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: A or B and G in previous Physical Education class, letter of reference, fitness evaluation, and inte

Course Synopsis:

This course has been developed to provide opportunities for students to gain knowledge and skills in the areas of outdoor recreational activities, outdoor leadership and recreation management. The program will examine the career opportunities in education, recreation, and the expanding eco-adventure industry. Also, students will be provided an opportunity to explore the many aspects of: first aid training and certification with a focus on athletic injuries, tournament organization and management, refereeing, volunteering for various athletic events in and around the community, introduction to various lifetime activities. Students achieving at least seventy percent will receive their first aid certification through St. John Ambulance and will be given instruction on treating athletic injuries. Students will be required to volunteer at least one hundred hours during many events provided, such as; a teaching practicum at Camp Thunderbird, school tournaments, school intramural leagues, local elementary intramural leagues, and community events. The program will include many activities outside of school, such as: rock climbing, sailing White Sail II, introduction to canoeing, kayaking, disc golfing, golfing, mountain biking, strength and conditioning training, leadership training, orienteering, scuba diving, hiking, backpacking, skating, and skiing or snowboarding. Students will discuss and practice leadership skills and learn to work as a team with a focus on helping the local community. This is reflected in the learning outcomes which involve Social and Community Issues and Kinesthetic learning as well as developing Interpersonal skills. The course will provide students the opportunity to develop their Social skills as well as help advance the athletic skills of students in the community and their own with the opportunity to volunteer their time and knowledge.

Learning Resources:

• St. John Ambulance Emergency First Aid Manual – First on the Scene
• St. John Ambulance Video Series
• First Aid Supplies- Reusable and Disposable
• AR/CPR mannequins
• Anatomy flip charts and related worksheets
• Scorers and Timers Manual
• Athletic Injuries Manual
• Outdoor Survival Booklet and worksheets
• Ascent Challenge Program

www.bcsta.org
Additional Information:

This course has evolved from its inception in 1974 at Mount Douglas Secondary School. It is double blocked for a larger block of time which enables the class to take various field trips away from the school. It has been run at Spectrum as part of its Career Preparation Outdoor Recreation Program since 1998. The course relies on bus transportation as the transport of students to and from various locations is necessary. Much of the resources have taken years to accumulate and all are integral to the running of the course.

It is acknowledged that any program based on experiential learning in the outdoors takes on risks which are unlike those in other programs. Each trip planned for this program will have all potential hazards assessed and communicated to students, parents and Administrative Officers. Special attention will be given to risk management in both theory and in practice as it relates to each activity and its specific potential hazards.

School Name: Spectrum Community

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course: ☑ 10 ☑ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: None

Course Synopsis:

Course Synopsis: Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

Resource books
Guest Speakers
Videos
Agency handouts
Internet, magazine and newspaper articles
Field trips
Conference materials
Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.

School Name: Spectrum Community

Course Name: Reconnecting Youth (RY) 11

Course Code: YRY11

Category: Choose a Category

Grade Level of Course:  X 10  X 11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: February 28, 2008

Prerequisites: Students selected are those at risk of dropping out of school

Course Synopsis:

The RY prevention program is for high school students who are “disconnected” from school and are at risk of dropping out of school. The program integrates small group work and life skills training explicitly designed to:

- Reduce known risk factors linked with school dropout, adolescent drug involvement, depression, and youth suicide risk behaviours and to
- Enhance personal and social protective factors

Reconnecting Youth (RY) was developed and its effectiveness researched under the following conditions:

- Delivered for credit in daily class sessions typically 55 minutes per class during regular school hours
- Taught by specially selected and trained teachers in a small group context with a teacher-student ratio of 1 to 10-12

Note: RY program goals can be realized when the program is implemented as designed.

Learning Resources:

Additional Information:

Special Teacher Training is involved.

- [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 108

Date Approved: April 16, 2007

Prerequisites: Strength Training & Conditioning 11

**Course Synopsis:**

This course builds on the themes established in Strength and Conditioning 11, developed by Murray Allen and Keith Butler at Oak Bay High School. Strength and Conditioning will provide an opportunity for instruction/learning about a healthy active lifestyle and to provide information regarding a popular leisure pursuit. Strength Training is an extremely effective component of fitness for young people. The learners will, through a variety of teaching strategies, develop a level of understanding and a positive attitude toward resistance training. Throughout the course, learners will analyze, evaluate, create and test, various training principles and programs aimed at achieving personal fitness goals.

Course Name: Symphony Orchestra 10

Course Code: YSYMO 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites:  3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite:  enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

School Name: Spectrum Community
Course Name: The Human Body 12
Course Code: YTHB 12
Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 98
Date Approved: April, 2004
Prerequisites: None

Course Synopsis:

Human Biology 11 is intended to provide a foundation for the understanding of both the structure and the function of the human body. The foundation will serve as the basis for healthy lifestyle decisions. It may also serve as stimulus to further study, or to encourage students to seek careers in related fields.

Students will consider not only the internal environment of the body, but also the impact that each one has, individually and collectively, on the local and worldwide environment. The students will need to think critically about issues, which range in perspective from a personal focus to global awareness. Practical applications designed to illustrate the impact of lifestyle and technology on the maintenance of a healthy body will be presented. The concept of the “whole” person like each unit (module). Activities contained in the course will provide an avenue for students for the continuing development of skills essential to informed decision-making: observation, organization and analysis of information, communication, and critical thinking. With a foundation of knowledge about themselves, and with the use of these skills, students will be better equipped for healthful living.

Learning Resources:

The textbook necessary for this course is the same one(s) presently used for Biology 11 and 12. The school presently has an ample supply of both books. There are enough books to support the present levels of Biology 11 and 12, as well as the anticipated demands for The Human Body 12. These books are:

Biology (Nelson), 1996 British Columbia Edition
Inquiry Into Life, 7th edition

Since this is a science course it is recommended that it be taught out of a science classroom (biology) since lab activities are an inherent portion necessary to deliver the curriculum.

Videos or the human system are readily available and are presently part of the resources available within the school.

Occasional class access to computers connected to the internet may be necessary to complete research on present health issues. The school and science department have labs already available for such work.
Spectrum presently has a successful Career Preparation Health Science program. Yearly feedback attained from the students about the program is they would like more health related courses specifically on the human body. This course would fill that void. Additionally, it is not restricted to only Career Preparation students and is open to the entire student body including grade tens.

Proposed Course Outline

Course Outline and Time Allotments

I Introductory Module-Cell Structure and the Skin - 6 hours  
IIDigestion - 6 hours  
III Diet and Nutrition - 6 hours  
IV The Circulatory System - 7 hours  
VThe Respiratory System - 5 hours  
VIThe Excretory System - 4 hours  
VII The Musculo-Skeletal System - 11 hours  
VIII The Nervous System - 8 hours  
IXSense Organs - 9 hours  
X Reproduction - 5 hours  
XI Genetics - 4 hours  
XIIDiseases - 15 hours  
XIIIManaging Human Waste (Choose either XIII or XIV) - 8 hours  
XIVOur Environment - 6 hours  
XV Career Opportunities - 4 hours

TOTAL - 96-98 HOURS

School Name: Victoria High School

Course Name: Autobody 11A

Course Code: YAB 11A

Category: Trades and Technology

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2004

Prerequisites: Technology Education 10: Mechanics recommended

Course Synopsis:

This course has been developed to support employment opportunities in the automotive industry. Students will learn current techniques in repairing body panels to the primer stage. Learning Outcomes for the course are grouped into nine major topics:

1) Safety
2) Hand Tools
3) Oxyacetylene Spot Welding
4) MIG Welding
5) Abrasives
6) Plastic Fillers
7) Basic Damage Analysis
8) Metal Straightening
9) Refinishing Materials

The auto body industry is a growth industry. Many students gain employment from this course or attend workplace training at Vancouver Community College or other Post Secondary Institutions.

Learning Resources:

Many resources have been acquired as this course has been previously offered as a Career Preparation course. We also have a complete Autobody Tool Room and Paint booth. Vic High is the only school on Vancouver Island that has the equipment to run this course.

• Mitchell Autobody Repair Video System.
• Large resource of handouts made up for course.
• Good selection of welding equipment and sheet metal repair tools.
Additional Information:

Auto body should stand the test of time. As cars change to alternate fuels, this will have very little impact on the auto body industry. The modern car is getting too technical for most high school students. Auto body gives students the real hands on experience in which they can get employment from high school. Many students get after school jobs working in body shops. The automobile will still rust and be in accidents. Cars will need to be painted, customised, and restored in the future. Auto body provides students with an outstanding amount of pride. Students are extremely happy to see a shiny car at the end of a long project. Many students gain employment and workplace training from this course, and through the programs strong relationship with many body shops. Students often end up taking Autobody at Vancouver Community College or other Post Secondary Institutions.

Victoria High School acknowledges that this course outline was developed by Mr. Alister Rodin, at Burnaby North Secondary in the Burnaby School District, and reviewed by Mr. Kevin Blecic, the Autobody teacher at Victoria High School.

Number of Hours of Instruction: 100
Date Approved: April 16, 2007

Prerequisites: ITA recommendation - Grade 10 or equivalent including English 10, Math 10 and Science 10. An equivalent

Course Synopsis:
The course is one of two parts of the in-school ITA CORE Certification Program. The ITA Construction Orientation and Retention for Employment Foundation Program is based equal time of in-school and field experience. This program offers the in-school portion of the program. The field experience portion would be covered through the work experience courses already in existence.

This course is the in-school portion of the ITA CORE Program designed to train students who have an interest for employment as entry level skilled trade workers, helpers, and labourers in the construction industry. The program trains foundation skills required to successfully learn on the job and allows for opportunities for bridging into a building trades apprenticeship. The emphasis is in developing safety and work skills and habits based on WCB Regulations and job site construction projects and experiences. The course covers industry orientation, construction hand and power tools, safety orientation for construction, rigging and material handling, practical construction projects, careers opportunities, and employment skills. It provides industry certification for specific construction applications – WHMIS, Level 1 First Aid, Hilti Fastening (powder actuated), Forklift Safety and Operation, Fall Protection, Flag Person and Construction Safety Training System (CSTS) training.

School Name: Victoria High School

Course Name: Electrical Trades Apprenticeship 11

Course Code: YELTA 11

Category: Trades and Technology

Grade Level of Course:   10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: Mathematics Applications 10 or Mathematics Principles 10

Course Synopsis:

This course is designed to enable students to enter an electrical apprenticeship in a partnership between the Greater Victoria School District, Camosun College, and industry partners. Students must complete all levels/modules offered at the secondary and/or post-secondary level and write and pass an administered exam through Camosun College’s Electrical Trades Department to gain Year 1 Electrical Apprenticeship credit. Students need to complete both the theory and practical applications of the modules covered. The hands-on practical component of the course provides the opportunity to apply and develop the theoretical components, as well as develop job site and employment skills.

This course is based on the following modules of Year 1 Electrical Apprenticeship:

Module 1 – Fundamentals
Module 7 – Electrical Code and Wiring

Learning Resources:

Electrical Apprenticeship Year 1
•Module 1 – Fundamentals
•Module 7 – Electrical Code and Wiring

Direct Current Fundamentals (text) Orla E. Loper and Edgar Tedsen

WCB Occupational Health and Safety Regulations (BC/Regulation 296/97)
Workplace Hazardous Materials Information System (WHMIS) Regulation

Canadian Electrical Code, Part 1, Safety Standards for Electrical Installations, Current Edition

Electrical Safety Branch Bulletins., Directives and BC Amendments, Current Issues

Additional Information:

Electrical Trades Apprenticeship 11 is one of four courses (Electrical Trades Apprenticeship 11, 12A, 12B and Electronics 12: Analog) that students are required to complete before writing the Electrical Trades Apprenticeship Examination for Year 1 at Camosun College in order to attain credit for the First Year Electrical Trades Apprenticeship requirements at Camosun College.

Number of Hours of instruction: 120

Date Approved: February 28, 2007

Prerequisites: This course is designed for the student who:

Course Synopsis:

The course is designed to introduce ESL students to the four main English language skills of reading, writing, listening and speaking. It also encourages the viewing and representation of materials. The course focuses on developing strategies needed to read, write and extract information successfully in English, and addresses specific needs of students regarding language and culture. Throughout the course students participate in authentic real-life situations. Students demonstrate English language proficiency in oral, visual, and simple written forms using Simple Present, Past, and Future Tenses. Students identify and compare their own customs to Canadian culture and customs.

Prerequisites:

Course Synopsis:

- Has a first language other than English
- Has basic English skills and needs further practice in English speaking, listening, reading, and writing in order to successfully integrate into academic classes
- Would benefit from additional Canadian cultural learning opportunities

The course is designed to extend the exploration of ESL students into the four main English language skills of reading, writing, listening, and speaking. Students are able to interact with greater confidence in familiar situations and are able to apply their growing range of strategies. The course continues the practices of reading and viewing materials. The students practise strategies they have acquired to read, write, and extract information successfully in English and addresses specific needs regarding language and culture. Students continue to describe and analyze Canadian culture and customs using more complex vocabulary and sentence forms.

Grade Level of Course:  
10  
11  
12

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved:  February, 2008

Prerequisites:

Course Synopsis:
This course is designed for the student who:

- has expanding English skills (approximately level 4).
- has some competency with academic language.
- has a more thorough understanding of the structure of language than an ELD 10/11 student.
- can remediate writing errors with assistance.
- is able to read independently and respond to more complex material than an ELD 10/11 student.
- has prior knowledge of writing fundamentals in a first language which can be used to improve writing skills in English.

Specialized Training Required:
It is strongly recommended that teachers have the training/experience relevant to the teaching of ESL in a secondary school setting and familiarity with the requirements of English 10 and senior English. Relevant training would include courses in ESL methodology, language acquisition and English coursework.

Course Synopsis:
This course in composition focuses on the development of writing skills as well as the skills of composing and presenting needed in subsequent academic courses at the secondary level.

  Audiocassette
  Student Workbook
- Focus on Grammar: Intermediate Course for Reference and Practice
  Audiocassette
  Student Workbook
- Azar: Basic English Grammar
  Fundamentals of English Grammar
  Fun with Grammar

c) Vocabulary
- The New Oxford Picture Dictionary
- Oxford Canadian Dictionary
- A Picture’s Worth a Thousand Words-A Vocabulary Book
- Longman Photo Dictionary
- Renyi Picture Dictionary

Additional Information:

All students, regardless of their language and cultural background, will have the opportunity to develop their potential to the fullest. While ESL students have much in common with other students, they have specific needs in two areas: language and culture. These needs must be met in such a way that they achieve a level of fluency in English commensurate with their age and ability.

The ESL program, and the courses offered within the program, enables the ESL student to:
- adapt to those aspects of methodology and curriculum that differ from those of the student's previous experiences
- develop and maintain a sense of self-worth, develop and preserve a pride of heritage
- develop communicative competence at a level commensurate with the student's potential in the areas of listening, speaking, reading and writing.
- develop an understanding and appreciation of cultural differences and similarities
- gradually integrate into regular courses according to the student's interests and strengths.

Additional Information:

This course is designed for the student who:
?still shows an imbalance between oral and written skills
?understands and engages in nearly all social conversation
?needs more time to complete assignments in academic classes
?understands and uses complex language structures (although not yet? mastered)
?is able to integrate more fully into more academic classes but needs individual attention to be successful
?is expanding vocabulary base to include more academic vocabulary
?is generally able to succeed in elective classes to the same extent as non-ESL student
?understands classroom instructions and most subject material
?is gaining confidence and is able to participate in group situations
?needs assistance with difficult vocabulary and sentence structures in academic classes

Teachers should have experience relevant to the teaching of E.S.L. in a secondary setting. Training must include at least one course in E.S.L. or second language methodology and one course in linguistics.

All students, regardless of their language and cultural background, will have the opportunity to develop their potential to the fullest. While E.S.L. students have much in common with other students, they have specific needs in two areas: language and culture. These needs must be met in such a way that they achieve a level of fluency in English commensurate with their age and ability.

The E.S.L. program, and the courses offered within the program, enables the E.S.L. student to
?develop and maintain a sense of self-worth
?develop and preserve a pride of heritage
?develop communicative competence at a level commensurate with the student's potential, in the areas of listening, speaking, reading and writing.
?adapt to those aspects of methodology and curriculum that differ from those of the student's previous experiences
?develop an understanding and appreciation of cultural differences and similarities
?gradually integrate into regular courses according to the student's interests and strengths

- [x] 11  
- [ ] 12
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: March, 2005
Prerequisites: None

Course Synopsis:

This course has been developed to explore the art of First Nations cultures. Although the primary focus is on the Pacific Northwest Coast, artistic styles of other aboriginal groups are examined as well.

Students will become familiar with the basic characteristics of Native art by studying the work of a variety of artists, and by creating their own art projects, using traditional and non-traditional media including painting, drawing, printmaking and sculpting.

Students will be exposed to a variety of image development techniques to encourage the production of their own original artwork.

Students will develop critical thinking skills through the analysis of works of art, and through self and peer-assessments of their own projects.

Learning Outcomes for the course are organized under the broad categories of the Visual Arts 10 – 12 Prescribed Learning Outcomes: Perceiving & Responding, and Creating & Communicating.

Where and when possible, practicing First Nations artists are invited to the class for demonstrations and discussions.

Learning Resources:

- Books – wide variety of school and teacher’s own resources
- Images – posters, slides, etc
- Videos – various artists
- Guest speakers
- Internet
- Art materials and tools

Special Training, Facilities or Equipment Required:
The ESL teacher must be knowledgeable of Canadian culture and encourage students to share the experiences of their native country.

Course Synopsis:
This course has been developed to support and encourage ESL students to compare their native country to the richness and diversity of Canada. This will allow students to become more aware of Canadian culture and to better understand why Canada embraces multiculturalism. Based on the use of authentic documents and resources, with the use of media, students will be able to compare the historical, geographical, political, and cultural norms of their native country to that of Canada and its society. Through this comparative analysis, ESL students will focus on building an advanced level of reading comprehension, and compositional skills.
Learning Resources:

"Canada Eh-Zed" by David DeRocco & John F. Chabot
Various World Atlas Books and World Maps
"Canada's Capital Cities" by S & S Learning Materials (Revised)
"The Government of Canada" Response activities created by Alice Anderson
"What a World 1- Amazing Stories from Around the Globe" (with CD Rom) by Milada Broukal
Social Studies 9 Resources

Videos-"The History of Canada" series made by Image Media Inc.
Newspaper Archives from the Internet and Current newspapers- Times Colonist, Globe & Mail, The Province
Canadian Magazines- Mcleans, Flare, Canadian Living (to name a few)
Field Trip to the Royal B.C. Museum to look at archives, and the Empress Hotel- view framed pictures on the walls, BC Legislation, BC Law Court, Ross Bay cemetery tour
"Speaking Of Language... Using the newspaper in ESL studies" by Anne West
"The Totem Forests -Emily Carr and Contemporaries. Interpret Coastal Villages" by Stewart Macnair Inc. website: http://www.emilycarr.net/ and internet sources on other famous Canadian poets such as, Pauleen Johnson, Susan Musgrave, Leonard Cowen (to name a few)
"Basic Poetry Skills Workbook" by Mary Ellen Snodgrass
Biographies from Internet sources on famous Canadian artists and writers: Norval Morrisseau, James Wilson Morrice, Tom Thomson, and the Group of Seven (to name a few)
"Vocabulary Connections- A Content Area Approach" by Steck -Vaughn Series
"World of Vocabulary" Book B by Sidney J. Rauch & Alfred B. Weinstein
"Writer's Workshop-Applying the Writing Process" series by Elaine Walling
"Individual Corrective English" by Edith H. Price, Flora B. Miller & Mabel Ketterman
"Mott Basic Language Skills Program" Classroom Series by Byron E. Chapman, Louis Schulz, Kent L. Copeman, & Catherine Schulz
"Reading: Tools for Everyone (Grades 8-12)" strategies by Kathy Puharich Hodgins, School Dist. #36, Surrey
"Reading, Re-Reading, and Responding" unit by Ross Powell, School Dist. #36, Surrey

Course Synopsis:

Interpersonal Communication 11 looks at the complex nature of human communication. Theoretical background and practical skill development through experiential exercises encourages students to build skill in the areas of one to one communication, conflict resolution, mediation, self awareness, relationships, emotional intelligence, group processes and recognition of how human diversity impacts our ability to communicate with others.

This course has been guided by the principles of learning:
• Learning requires the active participation of the student
• People learn in a variety of ways and at different rates
• Learning is both an individual and group process

Learning Resources:
This is a new course based on the curriculum designed by Morrison in 1978. The teacher/resource person will need to continually update the information as new theories and strategies evolve.

**Bennett, B. (1999).** Education on the edge of chaos: instructional strategies to deal with classroom diversity. Workshop materials.

School Name: Victoria High School

Course Name: Journalism 11

Course Code: YJOU 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February, 2005

Prerequisites: None

Course Synopsis:

Journalism 11 introduces students to print and broadcast journalism. Students will learn reporting skills, including interviewing and writing for specific purposes such as feature, sports and opinion pieces. Journalism 11 students will be preparing for contributing to the school’s newspaper, yearbook and video reporting. Students will cover digital picture taking and editing, page layout and graphic design. Students will also be involved in aspects of marketing and advertising.

Learning Resources:

- Video and editing equipment manuals
- Visit to local print news media, and local TV station
- Articles about print and broadcast journalism on the internet
- Books
  - Journalism Today, Ferguson, Patton and Wilson, NTC, 2001
  - Scholastic Journalism, Tom E. Rolnicki, Iowa State Press, 2001
  - High School Journalism, Homer Hall, Rosen Press, 2003

Additional Information:

This course has changed from its predecessor, as there is no Career Prep component to the course. As a result, the computers and software are present, although funds will be needed to purchase video equipment.
This course has changed from its predecessor, as there is no Career Prep component to the course. As a result, the computers and software are present, although funds will be needed to purchase video equipment and establish an area for recording.

Course Synopsis:

Journalism 11 extends the theoretical background introduced in Journalism 11 and brings it into practical production. Students will learn the editing and management skills involved in the production of print and broadcast news for a school. Students will be involved in story assignments, budgeting, promotion, deadlines, and mentoring. Students will also interact with community media to contribute and study the applied side of journalism as a career.

School Name: Victoria High School

Course Name: Keyboarding 11

Course Code: YKB 11

Category: Business and Applied Business

Grade Level of Course:  
☐ 10  ❑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  March, 2005

Prerequisites:  None

Course Synopsis:

This course will develop keyboarding proficiency on the alpha-numeric keyboard and reinforce keyboarding techniques. Emphasis is placed on learning the skill of touch typing. Students will be instructed in personal use and industry standard communications applications. Students will further develop thinking, decision-making, and composition skills. Students' work habits will be reinforced as they will have to proofread, edit and format their work to meet standard criteria. Students will learn the applications of production work in the context of a word processing program.

Learning Resources:

Learning Resources:

Books

Software
All the Right Type
Microsoft Word
Students will have a practical and useful skill to add to a resume which they will be able to employ in other curricular areas, in job application and in transferable skills to other computer software. Keyboarding 11 meets 80% of the Applied Skills 11 learning outcomes and therefore satisfies the applied skill graduation requirement. These are:

Applied problem solving: Students will develop a portfolio of production work assignments based on personal use and business use applications. After learning the theory applicable to production work, students will problem-solve and create documents of professional quality throughout the year. Touch typing is taking a systems approach to solve a communications problem. The system of applying an organized technique to the alpha-numeric keyboard produces a clearly readable product in an efficient and timely manner.

Communications: Students will compose numerous original production work documents. The context of the document will be based on production work theory. The content of the document will be individual and unique to the student. Students will use the communications aspect of the internet by linking web sites with production work. Communications is enhanced by a group assignment implemented near year end. Students will electronically transmit an assignment to the teacher.

Technology: Students will use computer technology on a daily basis and will understand and appreciate the inherent advantages of this powerful tool. They will understand its ability to store work, easily correct errors and manipulate the presentation/appearance of a work in progress. This will encourage experimentation, creativity, and conscientiousness on the part of the user.

Self in Society: Acquiring computer skills allows one to function more fully in a computer-oriented society. The computer will be regarded positively rather than as an unknown and confusing entity to be avoided if possible. Students will realize that the computer will function as an aide and coping tool to the challenges that school and work inevitably present.

Prerequisites: Learning student as identified by the school/Student Support Services and/or Psycho-educational test

Course Synopsis:

This course has been developed to provide an opportunity for students in the Learning Disabled population to:

- receive instruction in strategies to assist general learning in the regular classroom
- receive assistance utilizing these strategies while doing subject work from regular classrooms
- receive instruction in organizational/time management strategies
- receive assistance utilizing these organizational strategies while completing subject work from regular classrooms
- receive instruction in study skills strategies
- receive assistance in utilizing these study skills strategies as they apply to everyday work from the regular classroom
- receive instruction in strategies from remediation of academic areas of concern of the LD student
- receive assistance utilizing these remediation strategies while doing subject work from regular classrooms
- receive the extra time required to finish tests from regular classrooms
- prepare for the writing of provincial examinations
- orally take tests from regular classrooms
- work both independently and cooperatively with all staff, peer tutors, and students
- recognize their unique learning style and how to “tap” into it
- develop social relationships with “regular population” students
- be tested periodically to determine academic gains from learning strategies instruction in the areas of spelling, mathematics, and reading comprehension
- have their Individual Education Plan administered effectively and completely

The course is divided into the following components:
- Organizational Skills
- Participation
- Assignment/Testing Support
- Study Skills/Strategies

School Name: Victoria High School

Course Name: Media Literacy 12

Course Code: YML 12

Category: Fine Arts, Design, and Media

Grade Level of Course: [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March, 2005

Prerequisites: None

Course Synopsis:
Media Literacy 12 is a course designed to prepare and inform the naive or inexperienced mind for rhetoric, namely media persuasion. Being media literate instills within the individual a ‘media-receptive’ mindset, which encourages the person to actively question both purpose and persuasion.

Students will be expected to use their knowledge, experience, insight and imagination to understand the images – both visual and non-visual – created by the media. They will learn that being media literate requires more than being an active, questioning audience; it also requires applying knowledge and curriculum insight to a media template to facilitate an understanding of the intended ‘message’.

A media literate individual will be empowered to make a positive contribution to the world in which he or she lives. Imagination, curiosity, wisdom and sound judgment will enable the student as the audience, to better understand his or her own world and not be led into following or creating a false or incorrect image: an image created for and ‘published’ by agencies external to the self, family and community.

A media literate individual will examine and challenge their belief systems. Using critical thinking skills, they will come to understand that to believe without questioning is to stop thinking.

In this course, becoming ‘media literate’ refers to (1) deconstruction: the knowledge involved in receiving, analyzing, and interpreting media; (2) construction: the skills required to generate, synthesize and create/deliver media; (3) critical thinking: developing the skills necessary to analyze problems and think independently. The student will become competent at identifying and ‘reading’ the message and the persuasion linked to this message. Furthermore, students will be able to evaluate the effectiveness of the message and its appropriateness in a specifically defined audience or a broader, public audience.

Students will be expected to enhance their ability to communicate and argue in writing and in voice. To reinforce and facilitate these learning processes, the writing process and the nature of argument are the learning strategies to be employed throughout the course.

This course is contemporary and relevant. Hence, topical events and contemporary issues will be utilized to further fuel student and audience interest. Students will be encouraged to submit articles to various local and national publications.

Course work will be expected to be factual, informative and objective. However, due to the nature of this course, students will also be expected to exercise persuasive language as a tool in the defense of argument. Once students experience and comprehend the power and influence of persuasive language, they will be required to exercise their newfound ‘power’ with integrity and taste.

Students will be introduced to basic strategies in the various media, learning how the intended audience or publication will affect the style, format and the content of the ‘the message’. Students will learn that advertisements, film, song, stories, and photographs can be presented from several points of view, depending on the intent of the producer or editorial policy. Producers, station managers and editors, combined with the demographics of the intended audience, will dictate the style and format of ‘the message’. Finally, students will become aware of the journalists’ responsibility to accurately and objectively inform the public versus the media mandate to ‘sell information’ through sensationalism, exploitation and media capitalism.

School Name: Victoria High School

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: None

Course Synopsis:

Peer Counselling 11 introduces students to some of the skills and functions of the helping professional. The variables of empathy, positive regard and genuineness, which are key to the role of the helper are presented to the students. The students are at the same time taught to recognize the limitations of a helping relationship. Students are also introduced to a number of topics in areas of specific interest to counsellors to increase their knowledge and awareness of the scope of the helping professional’s role.

Students are given the opportunity to practice their skills through interactions with each other and role plays. They are also given the opportunity to observe a professional counsellor and to meet with individuals who work at various aspects of the profession.

Learning Resources:

The major reference for the outline of the course is the Peer Counselling Starter Kit by Rey Carr and Greg Saunders, University of Victoria, Victoria, B.C. 1980.

The BC School Counsellor’s Handbook, which is constantly updated, is also a useful tool.

Other references and tools might include:

Resource books
Guest Speakers
Videos
Agency handouts
Internet, magazine and newspaper articles
Field trips
Conference materials
Journals and Newsletters

Additional Information:

Protocols and materials on topics in counselling are constantly being changed or revised. School counsellors and agency personnel create and share new materials regularly.

Course Name: Symphony Orchestra 10

Course Code: YSYMO 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☒ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 16, 2007

Prerequisites: 3 or more years of experience playing an orchestral instrument

Course Synopsis:

Co-requisite: enrolled in a band or strings class

The purpose of this course is to give music students the opportunity to play in a full symphony orchestra, performing symphonic repertoire composed by master composers (Mozart, Beethoven, Puccini, Mendelssohn, etc.) as it was originally intended to be played rather than as arrangements. Students will learn and build on their knowledge of blending tone, balancing volume (dynamic), using articulation techniques and related skills used in an instrumental group combining wind, string and percussion instruments. For example, a violinist will learn how to dynamically balance with a horn player, a trumpet player will try to blend tone with that of a cellist or a clarinetist will learn to articulate in order to complement a viola’s pizzicato. Students will learn repertoire, performance techniques, history and composition unique to the full symphonic orchestra. Students will continue to be enrolled in either a band or strings class but will be enrolled in the symphony course for additional, complementary music training and experience. Students are provided with the opportunity to play in a full symphony orchestra, a career path for many who will continue with post-secondary music studies.

School Name: Victoria High School

Course Name: Women's Studies 11

Course Code: YWS 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved:  April, 2004

Prerequisites:  none

Course Synopsis:

Women’s Studies has been developed to focus on the place of women in a variety of roles throughout history. Traditional history was written from a male perspective about the activities and achievements of men.

In this course students learn about the place of women in the past, present and future, and in a variety of cultural settings. The course addresses the discrepancies in Social Studies and History courses by emphasizing women’s activities and achievements. Through a variety of activities which stress critical thinking skills students explore women in such areas as health, education, politics, art, history, and work. This is a real life perspective on how women are valued across cultures.

Women’s Studies is divided into nine units of study:
1. Recent History, Changing Roles, Feminism, Women’s Movement
2. Health, Safety and Media
3. Understanding Relationships
4. Women in the Work World
5. The Role of Parenting in Women’s Lives
6. Women’s Place in History
7. The Significance of Women in the Arts
8. Lives of Women in Other Cultures
9. The Future – What Does it Hold for Women?

The individual units may be taught in any order with the exceptions of the first (introductory) unit and the last (concluding) unit. The length of time devoted to a particular unit will also vary depending on the depth of study desired and on the interests of the students.

Learning Resources:

- Videos
- A selection of library resources to support each unit
- A variety of women’s magazines, music videos, music CDs, and newspapers
- Guest speakers
- Copies of: “Bust”, “Ms”, “Focus on Women” magazines
Additional Information:

Women’s Studies requires strong library support to ensure a wide variety of print and video resources, as the course is designed for students to research topics of individual interest. Students are encouraged to take responsibility for securing guest speakers from the community – particularly those whom they consider to be good role models for women. This course is designed to be both interesting and relevant for both male and female students.
This course is unique in that students work collectively to produce a product that must be finished at a given time. As there will be students with varying degrees of experience mentoring is a major aspect of this course. The entire school population counts on the final product and deadlines are set by an outside company, so Yearbook Production is also a rare experience, as students have to deal with absolute deadlines throughout the year. This course may lead to Yearbook Production 12 or Yearbook Design 12. These could build on the team dynamic of students with a variety of skill levels and experience.

Learning Resources:
- Manuals and Guides issued by publisher for specific software applications
- Visits from and training sessions held by representative of Publishing Company
- Resource library of comparative Publications
- “Ideas File” of various publications
- “Legacy Report” created as a guide by previous Yearbook Production classes.
- Internet sites dedicated to showcasing Yearbooks and awarding prizes to outstanding product

Additional Information:
This course is unique in that students work collectively to produce a product that must be finished at a given time. As there will be students with varying degrees of experience mentoring is a major aspect of this course. The entire school population counts on the final product and deadlines are set by an outside company, so Yearbook Production is also a rare experience, as students have to deal with absolute deadlines throughout the year. In schools where the Yearbook has to be sold to students (or financed through advertising), the course can also contain a component of marketing. In some schools this component of Yearbook Production is taken over by a senior Marketing class, in others it is part of the process in this course. In either case budget planning is a component handled either by the teacher / advisor or by student editors taking the senior level course (Yearbook Design 12).

Victoria High School acknowledges that this course outline was developed by Mr. Rainer Mehl, at Kitsilano Secondary in the Vancouver School District, and reviewed and submitted by Miss Roxanne Taggart, teacher at Victoria High School.

Course Name: Yearbook 12

Course Code: YYB 12

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 18, 2006

Prerequisites:

Course Synopsis:

Students take on leadership roles as Editors or Section Heads. They ensure principles of fair and equitable reporting, copyright and privacy law, and all required computer skills passed on to junior members. Students review what constitutes good design and develop both theme and content guides for the production of annual pages, as well as Multi-Media content issued as an adjunct to the Yearbook. The student designers and develop the Ladder, Cover Design, Folios, Font choices and all other elements of the Yearbook. Budget planning and modification of the Yearbook specifications to meet budget plans are done in cooperation with the teacher/advisor.

This course is a continuation of BA Yearbook 11, which should all be taught concurrently, building on the team dynamic of students with a variety of skill levels and experience.

Learning Resources:

- Manuals and Guides issued by publisher for specific software applications

Grade Level of Course: ☐ 10 ☒ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: ,

Prerequisites: Application and Interview

Course Synopsis:

The AVID elective encompasses the key elements that promote academic success and help to ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components – AVID curriculum content, Avid Tutorials and AVID motivational activities. The curriculum component of the AVID elective focuses on:
- WICR-R strategies (Writing, Inquiry, Collaboration and Reading), - developing skills that support Academic Success (i.e. Organizational skills, Note-taking and Study skills, Test-taking skills, Collaborative learning and study skills, Communication and Presentation skills, Research skills
- Acquiring information about post-secondary opportunities

Learning Resources:

AVID Library, AVID Publications, Videos
—Implementing and Managing the AVID Program
—College and Careers
—Strategies for Success
—Site Teams
—Tutorials
Additional Information:

AVID Program Implementation Essentials are the principles that define and guide the implementation of the AVID Program. All 11 Essentials must be addressed.

1. SELECTION
AVID student selection must focus on students in the middle who have untapped academic potential and would benefit from AVID support to improve their achievement and begin post-secondary preparation.

2. PARTICIPATION
AVID program participants, both students and staff, must choose to participate.

3. SCHEDULING
The school must be committed to full implementation of the AVID Program, with the AVID elective class available within the regular academic school day.

4. RIGOR
AVID students must be enrolled in a rigorous course of study that will enable them to meet requirements for post-secondary enrollment.

5. WRITING
A strong, relevant writing curriculum must provide the basis for instruction in the AVID elective class.

6. INQUIRY
Inquiry must be used as a basis for instruction in the AVID class.

7. COLLABORATION
Collaboration must be used as a basis for instruction in the AVID classroom.

8. TUTORIALS
A sufficient number of trained tutors must be available in the AVID class to facilitate student access to rigorous curricula.

9. DATA
AVID school/districts must provide program implementation and student progress data. These will be monitored through the AVID Data System, with results analyzed to inform the AVID certification process.

10. RESOURCES
The school or district must identify resources for program costs; agree to implement AVID Program Implementation Essentials; and work toward participation in annual AVID certification. Commitment to ongoing participation in AVID staff development is also required.

11. SCHOOL SITE TEAM
An active, interdisciplinary site team must collaborate on issues of student access to, and success in, rigorous post-secondary preparatory courses.
• The following pages document what will be covered in Planning 10-A and Planning 10-B.

• The relationship and overlap between the outcomes of AVID and Planning 10 and Portfolio are noted for each set of outcomes.

School Name: Belmont Secondary

Course Name: Interior Design 11

Course Code: YIDN 11

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 □ 11 ✗ 12 □

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: ,

Prerequisites:

Course Synopsis:

The visual elements texture, colour and shape as they relate to wall, window and floor coverings will be covered with a variety of media and materials. Through a series of related exercises, students develop strong presentation skills relative to specific interior design projects. Drawing assignments are linked to interior design assignments Introducing marker and other media, e.g. watercolour, through a series of exercises designed to show material surface, reflection, textures, colour, etc., relative to interiors and related products. The principles of light and its effect on colour and surfaces within the interior space (in general) are also explored. More specific perspective drawing is developed - linked to interior design assignments. Students will be introduced to manual architectural drafting as it pertains to interior design, beginning with equipment awareness, technical vocabulary and lettering skills. Student will produce multi-view drawings orthographically of objects and furniture using accurate scale, dimensions, notes and layout information. Students will also be introduced to the production of presentation-style floor plans, elevations and sections of the built environment. Freehand sketching of the above will also be covered. This course will introduce students to CADD software that is specific to Interior Design drawings. Students will create 2D and 3D drawings.

Additional Information:

This is a new course designed to prepare students for entry into an interior design program offered at post secondary institutions. Students will be able to use their portfolio for future studies or job interviews.

Course Name: Introduction to Piano 10

Course Code: YINPO 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: April 25, 2006

Prerequisites: none

Course Synopsis:

Most music educators agree that the piano is indispensable for all musicians. Piano study helps students gain a better understanding of music theory as theoretical concepts are applied to the keyboard. Introduction to Piano is a step-by-step method geared towards the absolute beginner. Through playing, theory, composition, listening and ear training, student will learn the basic structure of music; elements of rhythm, melody, expression and form & design. We will explore how music evokes thoughts, images and feelings and the relationships between music and oneself and the community.

Learning Resources:

Theory and method books, electronic keyboards with cases and adaptors, headphones and ¼” adaptors, lab setting with sufficient work surfaces and electrical outlets.

Course Name: Modern History Through Film

Course Code: YMHTF 12

Category: Liberal Arts and Humanities

Grade Level of Course:  

10  11  X12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  February 26, 2007

Prerequisites:  Social Studies 11, Civics 11, or First Nations 12

Course Synopsis:

Modern History Through Film uses documentaries and feature length movies to examine international conflicts and issues of the 20th and 21st centuries. The course is divided into four main units: Multilateral Conflict (World War 2), War of Ideologies (The Cold War) The Struggle for Civil Rights, and A Modern Global Issue. A key component of this course will be drawing connections between historical events and current international situations, and will try to help students appreciate the value of looking at the past in order to better understand the present. Each week, one movie will be studied in depth, and a relevant theme explored. In most cases, a couple of hours each week will be devoted to developing background understanding of the characters, events, and themes of the movie, two more hours will be taken up by viewing the film, and the final two hours will involve follow-up activities that require personal reflection and making connections to the present. All students will be expected to maintain a response journal that will be submitted each week. The culminating activity will be an independent research project, whereby students (alone or in small groups) select a particular topic of interest, find a full-length film that relates to their topic, and then design their own teaching unit. Components will include a Power Point presentation that explains background information, an identification of the most powerful themes of the movie, and activities that illustrate connections to present global issues. One of the projects will be selected as the subject material for the final week of the course.

Course Name: Textiles Arts & Crafts 11

Course Code: YTAC 11

Category: Fine Arts, Design, and Media

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: 

Prerequisites: nine

Course Synopsis:

This course introduces students to a variety of techniques that relate to textiles – from fibre to yarn to fabric. It is intended to encourage students to explore the diversity of textile crafts and to develop their own creativity and skills. The course content will explore some or all of the following techniques: appliqué, beading embroidery, crocheting, felting, knitting, and quilting. For most of the techniques covered students will produce a small project. Both hand and machine sewing (regular machine, embroidery machine and sergers) will be used.

Learning Resources:

• Fabrics
• Threads – embroidery, machine, ribbon and yarn
• Needles – machine and hand
• Crochet hooks, knitting needles, rug hooks and embroidery hoops
• Fabric dyes and paints and brushes
• Beads and buttons
• Glue, paper, pencils and watercolour pencils.

Date Approved: April 25, 2005

Prerequisites: Drama 9 or 10, (DRG 9; DRG 10) or Musical Theatre 10 (DRR10)

Course Synopsis:

Musical Theatre 12 is a course that provides students with an in-depth study of the Musical Theatre concept, the history of Musical Theatre, advanced Musical Theatre performance and/or technical techniques, and offers students the opportunity to participate in a Musical Theatre production. The course curriculum shall include the following: utilization of advanced characterization, exploration of classical and contemporary musical theatre production styles, exploration of specialized musical theatre styles, attendance of live theatrical experiences, and analysis and evaluation of theatrical experiences, Musical Theatre 12 further develops and refines those acting and theatre concepts and skills outlined in the Musical Theatre 11 curriculum. This advanced course is designed for the highly-motivated theatre student who wishes to pursue the study of contemporary dramatic theory through individual study, group discussion, focused research, and performance.

At the Grade 12 level, students are exposed to higher-level acting method and are granted opportunities for leadership and solo performances within the framework of a Musical. This course is offered two days per week “after hours” on a regular basis, primarily in the First Semester. Up to four rehearsals per week and a week of performances are mandatory parts of this course.

School Name: Pacific Secondary School

Course Name: Aboriginal Hospitality 12

Course Code: YABH 12

Category: Tourism, Hospitality, and Foods

Grade Level of Course: ☒ 10 ☐ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of Instruction: 100

Date Approved: April 25, 2006

Prerequisites: Prerequisite(s): Adult students who are non-graduates and school-aged youth can apply to take this course.

Course Synopsis:

Course Synopsis: This course is a part of the newly developed Aboriginal Hospitality Co-op Program to provide training opportunities for Aboriginal youth and adults to gain career skills. At this time, the emphasis is on careers working with Elders and people living with disabilities in a setting that reflects Aboriginal culture and First Nations ethics. In the process of completing this course, students will develop mentoring relationships with Elders and other leaders in the community. Students would also complete work experience and gain certifications such as FOODSAFE, SuperHost, WHMIS, First Aid and CPR. The course could also be adapted to prepare Aboriginal students to work in the trades areas.

Course Synopsis:

Literacy 10 has been developed for students who are significantly below grade level in reading and writing and students who have been recommended through the School Based Team and/or Counsellor. The course is designed to run concurrently with the students’ regular English class. It will enhance reading, writing, and organizational/study skills/test taking skills. The course is divided into the following components: Reading Strategies and Skills; Writing Strategies and Skills; Study, Test Taking and Note Taking Strategies and Skills; and Organizational and Time Management Strategies and Skills. The course will provide:

• Explicit reading instruction with emphasis on vocabulary development, fluency, and reading comprehension; a variety of comprehension strategies that will increase understanding of content in the various academic subjects; opportunity for recreational reading; direct instruction on the reading process which will help students become strategic readers.

• Explicit writing instruction designed to help remediate weaknesses in writing skills. Emphasis will be on developing knowledge of the writing process, grammar, spelling and editing skills, sentence, paragraph and essay composition, and writing for various purposes and audiences.

• Explicit instruction in study skills, test taking, and note taking strategies. Emphasis will be on developing a repertoire of skills in these key areas.

• Explicit instruction in organizational and time management strategies. Emphasis will be on developing student mastery of skills in these key areas.

The course is divided into five units but the delivery of the course will see these units woven together. The organizational chart indicates the time that will be spent on each key area.
This course is designed to meet the needs of a growing number of students in the school population that have reached grade ten possessing below grade level literacy skills. With this course students should hope to see important gains in their literacy and academic skills and be better able to meet the demands of the new graduation program. Without such a course the likelihood of their passing their courses, in particular course requiring effective reading and writing skills, will be greatly diminished.

Learning Resources:

The course will draw on a variety of teacher and students resources that will include:
• Reading 44
• 50 Literacy Strategies that Work
• Language Arts: Content and teaching Strategies
• The Writer’s Workshop
• Helping Struggling Readers and Writers to be Successful
• I Read It But I Don’t Get It (Cris Tovani)
• The work of Dawn Reithaug
• Smart Reading and other work of Susan Close
• The work of Faye Brownlie
• Reading for Understanding
• Grammarwork 1 and 2
• Sentence Combining
• The New Superteaching
• Phonetic Dictionaries
• The Awful Speller’s Handbook
• Success Maker
• Other educational software
• A variety of video, books on tape, fiction, non-fiction books, high interest/low vocabulary materials, and other software and assistive technology; adapted and modified novels, plays and related materials

Additional Information:

This course is designed to meet the needs of a growing number of students in the school population that have reached grade ten possessing below grade level literacy skills. With this course students should hope to see important gains in their literacy and academic skills and be better able to meet the demands of the new graduation program. Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:

Prerequisites: none

Course Synopsis:

This course caters to a wide variety of students. There is something for those who wish to earn more about cooking in general and those who are interested in pursuing the food and hospitality industry as a career. Emphasis is on the practical as students get an appreciation for what it is like to work in an industrial kitchen and appreciate the business side of cooking. Students are required to rotate through the different areas of the kitchen, working their way from simple cold foods to baking and creating more complex main dishes. Students will all operate the different machines in the kitchen, learn to practice safe food handling and proper personal hygiene. Students take away an understanding of different measuring systems and the general attitude expected of a qualified worker in the food-service industry.

Course Name: First Nations Art 10

Course Code: YFNA 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to explore the art of First Nations cultures. Although the primary focus is on the Pacific Northwest Coast, artistic styles of other aboriginal groups are examined as well.

Students will become familiar with the basic characteristics of Native art by studying the work of various artists, and by creating their own art projects, using traditional and non-traditional media including painting, drawing, printmaking and sculpting.

Students will be exposed to a variety of image development techniques to encourage the production of their own original artwork. Students will develop critical thinking skills through the analysis of works of art, and through self and peer-assessments of their own projects.

Learning Outcomes for the course are organized under the broad category of the Visual Arts 8-10 Prescribed Learning Outcomes: Perceiving and Responding, and Creating and Communicating.

Where and when possible, practicing First Nations artists are invited to the class for demonstration and discussion.

Learning Resources:

Books - wide variety of school and teacher's own resources
Images - posters, slides, etc.
Videos - various artists
Guest speakers
Internet
Computers, printers, Adobe Photoshop
Art materials and tools

Additional Information:

This course was initiated by Judith Powell in September 1995 as a Locally Developed course. A minimum of two classes have run each year since then. It has given many First Nations students a class where their culture is at the forefront and where they comprise the majority of students in the class.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 8, 2006

Prerequisites: Planning 10A

Course Synopsis:

This course has been developed to provide support to students in their transition from school to life after high school. Students will continue their career development education; learn the skills of compiling and presenting portfolios for multiple uses, focusing specifically on the Graduation Portfolio requirements; and complete the preparation and post-placement requirements of the Work Experience 12 courses.
Animation has been taught at Penticton Secondary School since 1999 and has inspired a number of students to seek employment in this fast growing field. Recently several of our graduates returned to talk to the current students in the program about their jobs. A number of our graduates are working in the field and have been part of the teams that produced major films. Several are working for large animation firms in Vancouver.

Course Synopsis:

Computer Certificates will be a practical, hands-on computer course that will allow students to become more efficient in all components of their life - at work, at university, and at home. The course will be informative, educational, and result in certificates that will be the foundation of a strong resume. In today's computer reliant society, knowing the basics of word processing, spreadsheets, data base, powerpoint, web page design, and desktop publishing is a real advantage for any student leaving secondary school. This course will not only provide this advantage it will also allow students to take a mastery quiz at the end of each unit and if mastery of the application is demonstrated, the student will achieve a Penticton Secondary School Certificate of Completion. Computer Certificates is a course that is a practical way to build your resume, it allows you to become more computer efficient in preparation for all the computer routines and tasks required in the real world, and it gives you a head start on the competition in the job market.

Film and TV 11/12 has been taught at Penticton Secondary since 1999 and has inspired a number of students to seek employment in this fast growing field.

**Course Synopsis:**
This course is designed to introduce the basics of film and television through an exploration of still and moving video. Students will use original concepts to develop short films, public service announcements, and documentaries using a variety of techniques. In addition to using digital cameras and video cameras, students will create their own sound effects, and music and will edit their projects on IMovie. Classes will focus on experiential learning through practical demonstrations and labs. Evaluation will be based on performance in both group and individual settings.

**Learning Resources:**
Handouts created by instructor, a variety of film and tv manuals and magazines, internet.

**Additional Information:**
Film and TV 11/12 has been taught at Penticton Secondary since 1999 and has inspired a number of students to seek employment in this fast growing field.

Course Synopsis:

First Nations Futures 12 is a self-directed learning experience modeled on the Navigator Program, coming out of Simon Fraser University in the middle 1990's. One of the central goals of the program is the “creation of greater curricular coherence and student engagement”. The ‘Navigator Tutorial’ which is the position that First Nations Futures has in the Navigator model, is the glue that binds the students grade 11 and 12 program together and enhances meaning and relevance.

School Name: Penticton Secondary

Course Name: Foreign Foods 11

Course Code: YFF 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  
☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: April 20, 2004

Prerequisites: none

Course Synopsis:
This course is designed to complement provincial food studies courses currently being offered at Penticton Secondary School. Foreign Foods 11 will augment students' knowledge of food safety, nutrition, and cooking techniques through the presentation and practice of international cuisine and food styles. Students will study food customs and cooking techniques inherent to a variety of cultures. In addition to this practical exploration students will be exposed to basic rules of food safety and sanitation through food safe level one. Classes will focus on experiential learning through practical demonstrations and labs. Evaluation will be based on performance in both group and individual settings. This course is intended to interface with Career and Personal Planning 10 and 11; offering students an opportunity to explore food studies through a 2 credit option.

Learning Resources:

Food Safe Level 1 Instructors kit
Variety of cookbooks and Internet sites

Additional Information:

Foreign Foods 11 has been taught at Penticton Secondary School since 2001 and has enjoyed great popularity and success with the students. It has grown from an enrolment of 50 to over 125 students in 2003-2004.

Grade Level of Course:  

Number of Course Credits: 2 or 4

Number of Hours of instruction: 60 or 120

Date Approved: June 13, 2005

Prerequisites:

Video and audio tapes related to subject curriculum; daily planner; Inspirations, Successmaker, Kurzweil, and other software; adapted and modified novels, plays and related materials; Ministry website.

Course Synopsis:

This course is for students with learning difficulties or identified learning disabilities, students having difficulty learning course content, students who need adaptations or modifications to their course work and students who have been recommended through the School Based Team, Learning Centre and/or Counsellor. This course has been designed to help meet the academic and emotional needs of students with learning difficulties, chronic health issues, physical disabilities, and identified learning disabilities. It provides direct instruction in the effective learning skills and strategies that are needed to become independent, successful learners. It has been developed to provide an opportunity for students to:

- Receive instruction in strategies to assist general learning in the regular classroom;
- Receive assistance utilizing these strategies while doing subject work from regular classrooms;
- Receive instruction in organizational/time management strategies;
- Receive instruction in study skills strategies;
- Receive instruction for remediation of academic areas of concern (eg reading, writing, math);
- Receive the extra time required to finish tests from regular classrooms;
- Prepare for the writing of provincial examinations;
- Receive counselling in developing skills that enable them to deal effectively with staff and peers;
- Receive counselling on how to effectively solve problems or conflicts;
- Develop the skills needed to be effective self-advocates.

The primary focus for students taking this course at the grade 10 level will be on more intense instruction in various organizational and study skill techniques. They will be more closely monitored for binder organization, planner use, and homework completion. Grade 11 and 12 students will be expected to show more independence in their use of these skills, as well as starting to focus more on personal goal setting. They will be expected to show more effective self-advocacy skills and more independence in accessing any adaptations that they may qualify for on government exams.

Grade Level of Course:  
10  
11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  December 2, 2004

Prerequisites: none

Course Synopsis:

Yearbook 11 is intended for students with an interest in the design and publication of printed materials, and is open to students in grades 10, 11, and 12. The focus of the course is on a student-planned and student-designed school yearbook. Students will develop an appreciation for the vast and interdisciplinary nature of publishing, which includes: research, interviewing, surveys, copywriting, editing, typography, photography, photographic manipulation, design, layout, computer skills, advertising, and distribution. Communication skills and creative problem-solving skills are also emphasized within the course. Students will each take on the responsibility of creating numerous pages for the publication; and will have opportunities to work independently, in partnerships, in small teams, and as part of the class publishing group.

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 2, 2004

Prerequisites: Recommendation by two staff members, an administrator or counsellor. Mature, responsible students

Course Synopsis:

The peer counsellors are given education and training so that they may empathize with their peers and listen without making judgments. Peer counsellors are trained in effective communication skills and are supervised, directed, and evaluated by the counsellor. Students will develop social responsibility while acquiring skills in communication, interpersonal relations, leadership, mediation, and teamwork. Students will acquire a life long appreciation, value and acceptance of all cultures represented in our school community. The helpers are not encouraged to give solutions or advice. They are trained to listen and make appropriate referrals. Students will gain a new understanding of themselves throughout the course of this program. Students who opt to take this course in all two or three grades will continue to build on skills learned, and will be expected to take more of a leadership role both with project work and individual growth.

Learning Resources:

Peer Counsellor Workbook;
Youth Helping Youth - a Handbook for Training Peer Facilitators;
Peer Power - Books 1 and 2

Course Code: YAN 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  
11  
×12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 20, 2004

Prerequisites: Animation 11

Course Synopsis:

This course has been developed to support and encourage the growing interest in animation by our student body. Students will learn advanced computer animation skills, and will build on skills developed in Animation 11. Areas of interest focus on components related to character rigging and MEL (Maya Embedded Language) scripting language. The learning material format for this course will be a combination of demonstration lectures and tutorials. Students will have a chance to demonstrate the skills they have learned through one large final project. Students will also produce a portfolio of their work to supplement the Student Graduation Portfolio. This animation portfolio will also be beneficial for students continuing on to a post secondary animation institute. Learning outcomes for this course are grouped under the curriculum organizers: Personal Management, Computer Literacy, Animation Process, and Ethics.

Learning Resources:

?Computer Based tutorials
?DVD based tutorials
?Maya online help
?Field trip to CATO (post secondary animation institute)
?Books
oLearning Maya 5 Foundation, Alias, Maya Press, 2003
oThe art of Maya, Alias, Maya Press, 2002

Course Name: Braille Technology 12

Course Code: YBRT 12

Category: Trades and Technology

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 2

Number of Hours of Instruction: 60

Date Approved: April 20, 2004

Prerequisites: Functional use of contracted Braille. Good listening skills, an understanding of how files are saved

Course Synopsis:

This course has been developed to support and encourage Braille using students to explore various modes of technology that allow them to successfully access the curriculum and allow them to achieve the same learning outcomes in academic classes as their sighted peers. The student will learn to use refreshable Braille for purposes such as; e-mail, internet access, advanced word processing (reading, writing, editing, formatting), and as a study tool. Learning outcomes for the course are based on SET-BC’s Vision Technologies: Access to Literacy (2003) and the BrailleNote User’s manual.

Learning Resources:

• Student workshops by SET-BC
• Articles and information about BrailleNote applications on the Internet
• Books
  o BrailleNote User’s manual and Help Files
  o ActiveSync Manual

Course Name: Creative Writing 11

Course Code: YCWR 11

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: May 8, 2006

Prerequisites: English 9

Course Synopsis:

This introductory course offers students the opportunity to explore various forms, genres and approaches to creative writing. Topics include plot, character, prose techniques, poetry techniques, dialogue and appropriate levels of style, as well as how to outline a piece of writing, logical development, balance and pacing, and the various forms available to writers. Students will compile a portfolio of their writing and also present selected pieces at a "coffee house".

Learning Resources:

Variety of writing texts (individual copies, not class sets); subscriptions to a number of creative writing journals; class set of dictionaries and thesauri; guaranteed access to computers

Course Synopsis:

This course is designed for students interested in careers within the Fashion and Design Industry. The course builds on previous textile knowledge by adding computer assisted fashion design, fashion illustration, pattern drafting from measurements and ready made garments. The course will also look at clothes and fashion, the apparel industry, textiles fibers and the “art” of apparel.

Learning Resources:

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 8, 2006

Prerequisites: Math 10 & Science 10

Course Synopsis:

This course covers a wide range of topics in Technology Education. Areas of study include: CAD design software, electronics, robotics, microcontrollers and aeronautics. Students will design and build two major projects: a solid fuel rocket and a remote controlled mini-sumo robot. Rocket simulation software is used to design and build a stable rocket, and a wireless altimeter is used to calculate the rocket’s maximum altitude. PIC microcontrollers are used in the mini-sumo robots, and the programming language used is PICbasic. This course will challenge students to become technologically competent.

Learning Resources:

• Computer
• Inventor software
• RocketSim software
• T-Pic programming board and software
• PICBasic programming language
• Internet Access
• Electronic test equipment

Course Code: YMTLT 11

Category: Trades and Technology

Grade Level of Course:  

10  

X 11  

12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved:  May 8, 2006

Prerequisites:  a previous metal course recommended

Course Synopsis:

This course is designed for students to learn foundational theory and basic practical skills related to machining, welding, fabrication, metallurgy, sheet metal, and art metal. Students will be required to complete a mandatory project that will develop their skills in the areas of metal work. These will include reading project blue prints to the manipulation of materials through metal shop practices and processes. As a culmination, students will choose (from existing projects) or develop a project of their choice following the prescribed design process. Learning outcomes for the course are grouped under the curriculum organizer: health and safety, personal and project management, tools and equipment, mathematical applications, materials, cutting processes and forming and joining processes. The approach supports student skill development and encourages technological literacy in the use of tools, materials, systems, and processes in an informed, ethical and responsible way.
This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.

Additional Information:

This is a new course based on the Framework for Independent Travel. The course applies to a small number of students who are blind or visually impaired. These students need this specialized instruction in order to travel independently and safely to more fully participate in the life of the school and the community. The knowledge and application of these skills will improve their quality of life and success during school years and later life. Students who need to learn O & M skills should receive credit for the hours of work involved and have their efforts documented on their graduation transcript.
This course has been developed to support and encourage the student who is blind or visually impaired to achieve the highest level of independent travel that is individually possible. The development of these skills allows the student to more fully participate in the life of the school and the community. The ability to use these skills affects access to educational opportunities and improves quality of life.

The learning outcomes for this course are grouped under four strands from the Framework for Independent Travel. Students are expected to learn specific skills up to and including Level Three.

Learning Resources:

• Books

• Internet sites
  o Texas School for the Blind and Visually Impaired
  o Hadley School for the Blind
  o Dog Guide Schools

Course Name: Outdoor Education 11

Course Code: YOE 11

Category: Choose a Category

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 1, 2004

Prerequisites: None

Course Synopsis:

The course focuses on land and water based survival techniques and prepares and motivates students to safely and confidently pursue an active lifestyle in the British Columbia outdoors.

Students will engage in self-discovery activities while learning about outdoor survival and safety. Students will acquire skills and knowledge in personal preparedness, clothing and footwear, equipment, trip preparation, methods of transport, route planning and safety, basic first aid, hyperthermia and hypothermia, cold water survival, what to do when lost (e.g. shelter and signals) orienteering, compass direction and bearings, map reading (route, topographical) tree/shrub identification, animal identification, habitat, predator/prey relationships, water fowl, oceans, tidal and inter-tidal zones, currents, careers and career opportunities, tourism potential, guiding and exploration of entrepreneurial opportunities.

Field trips will provide the opportunity for students to safely practice and develop many of these skills. Students are expected to maintain a learning log of their experiences.

Learning Resources:

Books
- Outdoor Safety and Survival, Province of British Columbia
- Conservation and Outdoor Recreation/Education (CORE) Province of British Columbia
- Project Wild
- First on the Scene, St. John's Ambulance Society
- Environmental Education (Guidelines and activities for teachers)
- Articles and information about specific topics related to outdoor safety and survival and eco-tourism

Videos
- General videos on survival skills and techniques, tourism and specific outdoor activities
- Avalanche Awareness: A question of Balance
- Trailside: Rock climbing in California
- Full Cycle: Recycling in industry and society

Guest Instructors with expertise in relevant areas

The teacher or resource person must be experienced in wilderness survival, cold water survival, search and rescue techniques, first aid, and related outdoor activities. Access to various outdoor/wilderness sites including a park, inter-tidal zone and ski area are necessary. Access to an indoor pool is also required. Essential equipment includes PFD's, canoes, first aid supplies, maps, compasses, and related outdoor items.
Additional Information:

This course has previously been offered as a Locally Developed Course in SD 68.

It is difficult to find a single textbook that will meet the needs of this course. Therefore a large amount of information will come from articles from the Internet, government agencies, magazines, non-government organisations, etc. There is an extensive field trip component, therefore students will be involved in fundraising activities.
This is a new course based on the expanding realm of animation in today's society. The new IRP's for ICT 11 and 12 (Starting Sept 2004) significantly cover the Digital Media Development Pathway, and this Animation 10 course will segue perfectly into the over ICT curriculums. On Page 8 of the ICT 11 & 12 curriculum (found on the web at http://www.bced.gov.bc.ca/irp/drafts/ictdraft.pdf) it refers to the existence of specialized Grade 10 courses that would assist students on transitioning from Grade 10 ICT to Grade 11 ICT.

Course Synopsis:
This course has been developed to support and encourage students to explore the diversity and possibilities of the new electronic artistic medium of computer animation. Computer animation offers a unique opportunity for students to utilize their graphic, written and technology skills – all requirements for the future workforce. The course will be divided into several sections:

1) Web Animations (GIF format),
2) 2D Animation – (Flash format),
3) 3D Animation – (3D Studio Max Format), and
4) Video Editing (Adding sounds and Post Production to DVD and Video).

Students will synthesize information from a variety of electronic sources for their presentations. We will also investigate and scrutinize the billion dollar industry of computer animation.

Learning Resources:
- Animation software Help Files
- DVD Movies and the making of these movies
- Articles and information about animation production on the Internet
- School website for tutorials
- Special software tutorials

- [ ] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  April 28, 2004

Prerequisites: None

Course Synopsis:

This course challenges grade ten students to assess their study skills and learning profiles and motivates them to apply the knowledge gained to their own learning situations. This course also prepares and offers the tutors the opportunity to help others improve their study skills and use their learning profile strengths to their advantage.

After three general orientation/training sessions with the peer tutoring teacher and the Peer Tutoring 11 students, the Peer Tutoring 10 students are placed in appropriate settings, assigned to sponsor teachers. Thereafter, one class a week the peer tutors will meet as a group with the peer tutoring teacher to participate in a peer tutoring lesson. Four days a week, the peer tutors will be involved in applying their peer tutoring lessons in their sponsor teacher’s class, by tutoring individuals or small groups or assisting the teacher in other ways. Placements are available to the Peer Tutor 10 students in junior elective or academic classrooms. The structure of the course is:

Knowledge and Skills       20 hours
Experience                  80 hours
Reflection and Connection    20 hours

Learning Resources:

- Personality profile and student learning websites

11  

12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  

April 1, 2004

Prerequisites:  

None

Course Synopsis:

This course motivates and prepares students to help fellow students and to develop their own interpersonal skills. After orientation/training sessions with the peer tutoring teacher, students will be placed in an appropriate setting to assist a teacher. Peer tutors will be involved in tutoring individuals or small groups or assisting the teacher in other ways. On a regularly scheduled basis, peer tutors will meet as a group with the peer tutoring teacher to participate in peer tutoring lessons.

Diverse placements are available to the peer tutor, ranging from electives, to academics, to special settings such as the Skills For Life program or the Learning Assistance Centre. Students will develop skills and knowledge of factors affecting school success, communication, conflict management, interpersonal relationships, leadership, and work experience. These skills will be applied to their peer tutoring situations.

Additional Information:

This course has been offered as a Locally Developed course for five years in SD 68.
Textiles Arts and Crafts 10 has been a locally developed course and has been offered in the district as a textile/art credit course. Textiles Arts and Crafts differs from Textile Studies in that it is not clothing based but rather fabric manipulation and decoration for textile objects such as quilts, crafts and home decorating items.

Additional Information:

Course Name: Performance & Leadership 10

Course Code: YPLEA 10

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:   April 28, 2004

Prerequisites:  None

Course Synopsis:

Performance and Leadership is a course that will prepare students physically and mentally to be at their best as athletes and as leaders. As an athlete, they will participate in a performance training regime that includes free-weight Olympic lifts, flexibility training, speed training and agility training. This training will be broken into 4-week Base, Development and Peak performance cycles across the school year. Testing will occur every four weeks to monitor the development of each student’s explosive capacity, change of direction, acceleration and flat-out speed. In addition, students will be using a software program to determine their relative speed and strength as compared to others of their age and fitness level across North America. Students will be familiarized with the theory behind their performance training as the year unfolds.

The Leadership portion of this course will be training that prepares students to coach/lead as a part of their school and greater community. In addition, students will be laying the groundwork for careers in teaching, performance training, coaching and recreational leadership. At some point during the school year, students will go out on a leadership practicum where they will coach, referee, train or manage for a local school/sporting organization/event. Students will culminate the Performance and Leadership course with a web-project that demonstrates that they know how to access and assemble a group of sport-specific performance and leadership materials on the internet. In addition, students will assemble a portfolio that will be the core of a life-long tool for gaining entry into post-secondary performance programs, coaching opportunities and job opportunities.

Lastly, there will be the opportunity through this course to obtain a number of external credits for coaching, refereeing and first-aid training.
Learning Resources:

World Wide Web
http://www.huskerpower.com
http://www.vanislehighschoolfootball.com
Huskerpower Make the Play Football, University of Nebraska Performance Program
Huskerpower Make the Play Basketball, University of Nebraska Performance Program
Huskerpower Make the Play Volleyball, University of Nebraska Performance Program
Huskerpower Make the Play Soccer, University of Nebraska Performance Program
Power 5.0 Software
Laser Timing Device
6 Partner Harnesses
8 Trapezoid Step-Over Bags
20 Agility Cones
Plyometric Box Set
Olympic Weight Room
Gymnasium with drill and testing lines, dots, etc painted in.
Television, Video Player, Overhead Projector
In terms of the learning outcomes described above, the minimal level of performance expected of the students at the completion of this course is:

- Required typing speed for a Level 2 keyboarding course.
- Basic computer literacy and production in word processing and desktop publishing.

11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2004

Prerequisites: None

Course Synopsis:

This course is designed to enable students to reduce the tensions and hostilities associated with conflict. At the same time, they will learn how to acknowledge one another, and how to come to an understanding based on the real needs of both people involved in the dispute. In short, this course is about developing new life skills that students can use to deal effectively with everyday conflict and improve the quality of their own lives. This skill building is especially important for young people because they often feel powerless. The ability to express issues and resolve differences voluntarily is empowering and can have a positive impact on self-esteem.

From a larger social perspective, the direct expression and resolution of conflict creates unique opportunities to learn more about ourselves and the increasing cultural, ethnic, and racial diversity within Canadian schools and society. Through the conflict resolution model presented in this course, students are encouraged to use these differences as an opening to learn more about one another, and to appreciate the multi-dimensionality of personal interactions and relations.

However, the ability to express and resolve one’s conflicts is not simply a matter of personal power or increased understanding and appreciation of differences. It can also be seen as a responsibility inherent in citizenship in a democratic society. This course will allow students the opportunity to develop individual social responsibility. When students are involved in prevention and early intervention in conflicts, they not only help eliminate violence from their schools, they also promote the values and viability of democracy.

School Name: Nanaimo District Secondary

Course Name: Desktop Publishing

Course Code: YDTP 11

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 1, 2004

Prerequisites: None

Course Synopsis:

Desktop Publishing's main objective is to have students producing and publishing a school's yearbook and/or similarly challenging published materials. This course provides students with hands on, real world, experience within a classroom environment. Students learn elements of design that are used in the publishing field and gain an understanding of what it means to work under real time constraints. Works that students can publish could include programs for school functions, posters for promoting school events and initiatives, and other publications that are needed at the school.

Within this course, students integrate a variety of skills into the production of published materials. Students further develop writing skills, learn/develop photography skills, organizational skills, design skills, and leadership skills. This class also fosters teamwork.

At the start of the course students will review the basic principles of design and understand the groundwork for development of published materials. Once the basics are learnt, students transfer these skills on to computers and begin using programs that are standard in the publishing industry.

Learning Resources:

· Representative from school's yearbook company or alternate publishing company (differs depending on the school and year)

· Advisor Guides available through the school's yearbook company

· Yearbook workshops sponsored by school's yearbook company

· http://www.lspa.net/yearbook_resources.htm

· http://desktoppub.miningco.com/cs/graphicdesign/

· http://www.journalism.indiana.edu/resources/scholastic/yearbook.html

Additional Information:

This course has previously been offered as a Locally Developed Course in SD 68.

Students who have taken the course have in surveys said that they like the learning opportunities provided in the course. Through this course, the school receives a high calibre remembrance of the year and students have a concrete visual of their work to show as a part of a resume or interview.

Course Synopsis:

This course is designed to introduce students to the teachings, customs, and practices associated with some of the world’s major religions. It is intended to provide insight and opportunity for reflective thought not religious training. It is a course of religious education about what people of various religions believe, and how these beliefs are demonstrated in the day-to-day lives, festivals, customs, and practices of the followers of these faiths. Some of the faiths that will be explored are: First Nations customs and cultures; Hinduism; Sikhism; Buddhism; Judaism; Christianity; Islam; and other Eastern philosophies like Taoism, Shintoism, and Confucianism.

Learning Resources:

Will include, but not be limited to:
- Various religious books and sacred writings such as the Bible, Koran, the Bhagavad-Gita, the Tripitaka, the Garanth, and the Talmud/Torah
- Canadian Charter of Rights and Freedoms
- The Religions of Man – video
- The Christians – video
- Testament – video
- Religions of our Neighbours by S. Bently
- Newspaper and magazine articles
- Professional collection of Instructor

School Name: Wellington Secondary

Course Name: Photography 10

Course Code: YPHOT 10

Category: Choose a Category

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2004

Prerequisites: None

Course Synopsis:

Photography 10 introduces students to the basics of both the technical and the aesthetic aspects of picture taking, film processing and printing a picture.

Part one of the curriculum is focussed on the fundamentals of operating a camera; how to control the settings, the various different design types, and the history of the camera as an invention. Principles of light, as an art media, will be examined and articulated in critiques of master works and examples of student’s own work. This study into the camera as an invention of the modern age serves to give students a first hand look at the rapid advances of technology, innovation and human creativity and ingenuity.

Part two of the curriculum is focused on the process of developing film to make negatives and then printing these negatives into pictures using the enlargers and dark room facilities.

Part three of the curriculum involves getting students to analyze their photographs, both as works of art and as powerful forms of communication. Self-assessment strategies that include critique will give students an opportunity to compare and contrast their own images and those of the masters to gain a better understanding of the components of a successful and effective image. The formal introduction of the elements and principles of design will give students the vocabulary to discuss their work and the ability to identify and construct better photographs.

Part four of the curriculum requires that students prepare and exhibit their work. A variety of options are offered to give students the opportunity to showcase their achievements. These include: portfolio plates, to be included in their grade 12 graduation portfolio and/or an art portfolio to be included with other work done in visual arts and/or framed for exhibit at the school or outside the school at student art exhibition venues. Student work can also be submitted to magazines; contests and competitions and/or go into a photo album to be shared with family and friends. Student photographs can be showcased on the school’s web page. A more ambitious student can create a web photo gallery as a link to the school web site.

Learning Resources:

Number of Hours of instruction: 120

Date Approved: April 28, 2004

Prerequisites: None

Course Synopsis:

Photography 11 introduces students to an intermediate study of both the technical and the aesthetic aspects of picture taking, film processing and printing a picture.

Part one of the curriculum is focussed on operating a camera; how to control the settings, the various different design types, and the history of the camera. Principles of light, as an art media, will be examined and articulated in critiques of master works and examples of student’s own work. This study into the camera as an invention of the modern age serves to give students a first hand look at the rapid advances of technology, innovation and human creativity and ingenuity. Further study allows students to identify the impact of traditional and modern technologies on image development and design.

Part two of the curriculum is focused on the process of developing film to make negatives and then printing these negatives into pictures using the enlargers and dark room facilities. The darkroom will be emphasized as a venue for creativity, special effects, special processes and other variations will allow students endless possibilities in their personal expression.

Part three of the curriculum involves getting students to analyze their photographs, both as works of art and as powerful forms of communication. Self-assessment strategies that include critique will give students an opportunity to compare and contrast their own images and those of master photographers to gain a better understanding of the components of a successful and effective image. The formal introduction of the elements and principles of design will give students the vocabulary to discuss their work and the ability to identify and construct better photographs. Slide critiques of master photographers will provide a discussion platform to further explore the process of critique.

Part four of the curriculum is to develop visual literacy. A study into historical and contemporary issues that reflect the characteristic of other artist movements and periods will help define student’s own values and traditions. A further look at photography as a viable commercial art form will help to shape students study into photography as a career. The ethical, moral and legal considerations associated with the medium of photography; photography technology used for image development, documentary, and privacy issues will be examined.

Part five of the curriculum requires that students prepare and exhibit their work. A variety of options are offered to give students the opportunity to showcase their achievements. These include: portfolio plates to be included in their grade 12 graduation portfolio and/or an art portfolio to be included with other work done in visual arts and/or framed for exhibit at the school or outside the school at student art exhibition venues. Student work can also be submitted to magazines; contests and competitions and/or go into a photo album to be shared with family and friends. Student photographs can be showcased on the school’s web page. A more ambitious student can create a web photo gallery as a link to the school web site.

School Name: Wellington Secondary

Course Name: Photography 12

Course Code: YPHOT 12

Category: Choose a Category

Grade Level of Course:   [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 28, 2004

Prerequisites: Photography 11

Course Synopsis:

Photography 12 continues as an advanced study of both the technical and the aesthetic aspects of picture taking, film processing and printing.

Part one of the curriculum reviews camera use and how to control the settings. Principles of light, as an art media, will be examined and articulated in critiques of master works and examples of student’s own work. Technical aspects of lighting, the studio, equipment and lighting design will be studied. A variety of still life and portraiture compositions will be set up and photographed by students.

Part two of the curriculum is advanced darkroom procedures. Students will learn to tone, dodge and burn, and enlarge negatives to create pictures on standard format and non-standard format papers. The darkroom will be emphasized as a venue for creativity, special effects, special processes and other variations will allow students endless possibilities in their personal expression.

Part three of the curriculum further develops the student’s ability to analyze their photographs both as works of art and as powerful forms of communication. Self assessment strategies that include critique gives students an opportunity to compare and contrast their own images and those of the masters to illustrate their understanding of the components of a successful and effective image. Peer critique and discussion about their images will give students the ability to articulate what they are expressing visually in their work. Slide critiques of master photographers will provide a discussion platform to further explore the process of critique.

Part four of the curriculum is to advance visual literacy; a continued study into historical and contemporary issues that reflect the characteristic of other artists’ movements and periods; and their impact and influence on the student. A further look at photography as a viable commercial art form will help to shape students study into photography as a career. A look into photojournalism will deal with historical and contemporary issues and the ethical, moral and legal considerations associated with the medium of photography. The attributes and requirements as well as the physical and emotional demands of the photographer will be discussed.

Part five of the curriculum requires that students exhibit their work at a public venue. A variety of additional options are offered to give students more opportunities to showcase their achievements. These include: portfolio plates to be submitted with their grade 12 graduation portfolio and/or an art portfolio ready for submission to a post secondary institution. Student’s photographs may be included with other work they may have done in visual arts and/or framed for exhibit at the school or outside the school at student art exhibition venues. Student work can also be submitted to magazines; contests and competitions. A photo album may be designed to include a selection of student work.

Course Name: Creative Writing 10

Course Code: YCWR 10

Category: Liberal Arts and Humanities

Grade Level of Course:  

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: May 25, 2004

Prerequisites: none

Course Synopsis:

Creative Writing is a course for those who wish to venture into new spaces and places to explore, discover and create. It is a course for all of us who have stories to tell: in prose or poetry. Creative Writing 10 provides the opportunity for the student, writer to develop creative writing skills and abilities beyond what is offered in required English courses.

This course will encourage students to see creative writing as a unique way of thinking, and will help to explore and develop new ideas. Students will examine and experiment with different ways of conveying meaning through writing. Through guided experiences, students will see the connections between individual writing, the writing of others and writing in the broader world.

This course focuses on writing as an art form. It encourages students to develop creative ideas and express them through writing in a variety of forms and genres.

The four major genres of creative writing featured in this curriculum are: poetry, short fiction, short stories, play writing, and nonfiction. However, the teacher can and should include additional forms if students are interested. Independent Projects are encouraged and offer the opportunity for students to explore other forms independently if they choose. This course also allows students to participate in such varied experiences as studying with an author, joining a writing group, or obtaining experiences with a publishing company. Many students in this course, work with the Writers in Electronic Residence Program (WIER).

The content of Creative Writing 10 can be summarized in the following way:
- The course will focus on the language processes of reading and writing, although students will also be engaged in speaking and listening as they discuss their own writing, their peers' writing, and reading selections.
- The course includes: poetry, short fiction, plays, and nonfiction. How the teacher organizes the course is optional. (Two possible options are explained)

Course Synopsis:

This course will require students to assess and maximize their personal fitness levels. Students will also be given the opportunity to choose from a list of team sports to be covered in class. These team sports will be presented in a fashion that challenges the student's skill level and strategic knowledge in a more advanced way that standard physical education units. Unit one involves the area of Personal Fitness in which students cover major muscles groups and their functions, fitness principles, components of fitness and specific training methods. Unit two involves Team Games in which a number of games are covered with a focus on advanced skill progressions, complex offensive and defensive strategies and continued, strenuous participation. Finally, unit three involves demonstrating and developing the concept of Athletic Leadership in which students will take an active role in leading the class through a warm-up activity, stretching session, presentation of a challenging skill and explanation of an advanced game strategy.

Course Name: Art Metal 10

Course Code: YARM 10

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 1, 2004

Prerequisites:

Course Synopsis:

This course has been developed to support and encourage students to explore the wide array of metal working techniques used in Art Metal.

Students learn to use various metalworking equipment as they follow the steps in creating Art Metal projects of personal interest.

Learning Outcomes for the course are grouped under the curriculum organizers: Health and Safety, Personal and Project Management, Mathematical Applications, Tools and Equipment, Materials, Cutting Processes, and Forming and Joining Processes.

The approach supports safe working practices, student skill development and encourages meaningful methods of ideation, design, planning, production and evaluation of various Art Metal techniques and projects.

Additional Information:

Fully equipped metal shop including foundry with accessories and safety suits, centrifugal caster, wax burn-out oven, and welding equipment (oxy-acetylene, stick, and wire feed).

Lapidary and stained glass equipment recommended to further enhance the course and opportunities for students.

Teacher will need to possess qualifications from training institute for technology training.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 1, 2004

Prerequisites:

Course Synopsis:

This course has been developed to equip learners with a realistic understanding of what Canada's military organizations do, how they have evolved, and what future issues they must confront. It is intended to be both practical and theoretical in nature, replete with guest speakers, videos, and sand table discussions.

Opportunities for students to explore individual areas of interest and express their learning will be designed to appeal especially to young people whose interest in school may be wavering.

Category: Business and Applied Business

Grade Level of Course: [ ] 10 [ ] 11 [X] 12

Number of Course Credits: 4

Number of Hours of instruction: 110

Date Approved: May 1, 2004

Prerequisites:

Course Synopsis:

This course introduces students to basic concepts of computer networking through a detailed examination of the OSI model (Open System Interconnection).

Students learn and apply networking skills to network planning, documentation, implementation, and set-up by planning the complete networking (including wiring, hardware, network addressing) of a small elementary school. Students learn some “hands-on” cabling skills and procedures.

Additional Information:

Special Training, Facilities or Equipment Required:
• 3 workstations which can be configured by students
• 1 hub
• Network cables
• Cat 5e cable, rj45 connectors
• Fluke 620 (or equivalent) cable tester
• Cable building tools – rj 45 crimper, cable stripper

Date Approved: May 1, 2004

Prerequisites:

Course Synopsis:

This course is an overview of the world of the western theatre. Theatre history, acting and directing theory, theatrical design, and playwriting are the main units of study.

The course assignments focus on a core set of classic plays. Assignments will allow students to learn some basic theatre theory as well as some practical theatre skills. Students will gain an appreciation for the culture of the theatre as well as the skills needed to produce a professional theatrical production.

Core Plays:
• Oedipus Rex
• Everyman
• Othello
• She Stoops to Conquer
• A Doll's House
• Our Town
• The Birthday Party
• The Ecstasy of Rita Joe

School Name: Valleyview Secondary

Course Name: Extended Studies 10

Course Code: YEXST 10

Category: Other

Grade Level of Course:  

☐ 10  ☐ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  May 1, 2004

Prerequisites:

Course Synopsis:

The Extended Studies Program will endeavour to challenge students to explore in depth their understanding of themselves and their peers, and some of the problems facing teenagers in these years of change and world crises. It also allows students exposure to other students in different grades, where friendships across grade levels are developed, along with an understanding of problems facing teenagers at all grade levels.

One part of the course will deal with “serious issues” that face teenagers in their lives (problem solving through social issues and current events). Another project will be the creation of a calendar for the upcoming year outlining major and minor events of significance. Later on in the course students will have the opportunity to do a self-directed independent study of an issue or topic of interest to them. As well, students will read two novels and work towards a field trip to Vancouver in the spring.

A major goal of the Extended Studies Course is the group working together towards a common goal. Students need to make a commitment at the start of the course to maintain the confidentiality of the other students, to go on the field trip, and to contribute to fund raising efforts in order to reduce the cost of the field trip. Students will also need to talk to the class about things they feel strongly about.

Some areas of study may include: The Space Program, overpopulation, censorship, being adopted, the history of AIDS, bullying, racism, advertising, and being a teenage parent.

School Name: Hatzic Secondary School

Course Name: Art Metal 10

Course Code: YARM 10

Category: Trades and Technology

Grade Level of Course:  
[ ] 10  [ ] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 14, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support and encourage students to explore the wide array of metalworking techniques used in Art Metal. Students will learn to use various metalworking equipment as they learn procedures and skills while creating Art Metal projects of personal interest. Learning outcomes for the course are grouped under the curriculum organizers: Health and Safety, Personal and Project Management, Mathematical Applications, Tools and Equipment, Materials, Cutting Processes, and Forming and Joining Processes. The approach of the course supports safe workplace practices, student skill development and encourages meaningful methods of ideation, design, planning, production and evaluation of various Art Metal projects.

Learning Resources:

• Teacher handouts
• Guest speakers from the community in related fields
• Visit/interview local trades people in related fields
• Articles and information about Art Metal careers on internet
• Books

Additional Information:

This is a new course based on the old locally developed Art Metal course. Schools will need adequate equipment to make the course run smoothly. The course will evolve as shops obtain more equipment. Other possible units that may be incorporated into the course are lapidary and stained glass. Delivery of the course will be altered to reflect each school's equipment and resources.

Course Name: Art Metal 11

Course Code: YARM 11

Category: Trades and Technology

Grade Level of Course: [ ] 10  [x] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 14, 2004

Prerequisites: None

Course Synopsis:

Students will gain an understanding and an appreciation of the various forms of artistic and aesthetic expressions while using metals through hands on applied learning. Students will learn to apply problem-solving practices to produce artistic artefacts in the metal shop. Work procedures and shop routines will be taught and demonstrated as needed to ensure a safe work environment. Shop skills will be taught with an emphasis on safe procedures. The course material is presented in six units, the last four being divided into three sections each:

- Research and Experiment
- Personal Development
- Documenting and Communicating about the final product

Each unit is based on different materials, skills, and procedures.

Learning Resources:

- Videos
- Art Metal Project Binder
- Books
- General Metals, John L. Feirer
- Machinery’s Handbook, Industrial Press
- Basic Metalwork Procedures, D.D. Casperson
- The Complete Metalsmith, Tim McCreight

Course Code: YCTSB 10

Category: Fitness and Recreation

Grade Level of Course: ☑ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: January 15, 2004

Prerequisites:

Course Synopsis:

This course is designed to provide an opportunity for our students to achieve a Level 1 technical, practical and theoretical certification in basketball technical in the National Coaching Certification Program (NCCP). Students will complete the requirements for Pre-Level 1 and Level 1 Certification during this course.

The Basketball Canada Coaching Certification Program bases its technical elements on the Basketball Development Model (BDM). The BDM is a guide to the relationship between age of the athlete and basketball activities which are most appropriate at that age, permitting an athlete-centered approach to player development.

The coaching certification program is designed to allow coaches to develop competencies by progressing through specified levels. It is comprised of three elements: technical, theory and practical components. In our class at Heritage Park, we will fulfill all three elements. The technical and theoretical portions will be handled in class and seminars while the practical will be accomplished through coaching a community team (elementary or club).

We will be emphasizing teaching individual skills required for coaching basketball:

- Socialization
- Teaching
- Analysis of skill
- Footwork and dribbling
- Individual offense
- Team offense
- Rebounding
- Defense
- Physical fitness
- Care and prevention of injuries
- Planning

By providing our students with this opportunity, we will be encouraging our students to understand the skills required to coach in the community and prepare them to coach in the community (possibly at an elementary school) if the opportunity arises. The student would also benefit from the exposure to the mental training and fitness aspects of the course. The expectation is the students would apply these concepts to their own sport training, thus improving themselves as athletes.
Learning Resources:

Books:
- Canada Basketball NCCP Technical Basketball Coaching Manual
- Basketball BC Steve Nash Youth Coaching Manual (Pre-Level 1)
- Coaching Basketball Successfully Morgan Wootten
- They Call Me Coach John Wooden
- Training Soccer Champions Anson Dorrance

Grade Level of Course: [ ] 10  [ ] 11  [X] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: December 14, 2004

Prerequisites:

Course Synopsis:

The course was originally developed as a locally developed course in 1994. The over-riding goal was to educate students about the environment and how their actions can have a negative or positive effect on the environment. This course was developed in the belief that students should be aware and understand how and why the environment has an impact on their daily lives and what kind of an impact their daily lives have on the environment. It is hoped that students will come to understand how their actions/behaviour affect both local and global environments (Global Village). Students should eventually begin to realize how they can take personal responsibility and leadership in creating and maintaining a more environmentally sustainable way of life.

Education about the environment provides students with opportunities to learn about the functioning of natural systems, to identify their beliefs and opinions, consider a range of views, and ultimately make informed, educated, responsible choices. Environmental education integrates concepts and principles of the sciences and social sciences such as politics, economics, environmental law, sociology, ecology, biogeography and environmental psychology. The ultimate goal is to develop a sense of respect and appreciation for the natural world resulting from study and other experiences in nature.

Course Name: Marine Biology 11

Course Code: YMBI 11

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: January 15, 2004

Prerequisites: Science 10

Course Synopsis:

Oceans cover approximately 70% of the Earth's surface, and contain about 97% of the water on the Earth. While scientists are finding out more about the oceans and the marine environment, our knowledge is limited. Life on the Earth is dependent on the oceans. We depend on the oceans for our weather, oxygen, food and transportation.

In Marine Biology 11, we will study ocean life, physical oceanography, technology as it relates to the marine environment, careers in marine biology, and issues that relate to the exploitation of resources from the oceans. Optional activities that will be offered through this course will be a field trip to the Bamfield Marine Station (in conjunction with Biology 11), and SCUBA lessons. Marine Biology 11 will be a 4 credit course available to grade 11 or 12 students. Prerequisite: Science 10.

Learning Resources:
Textbooks:
- Principles of Oceanography, Seventh Edition
- The Blue Planet, Second Edition
- Heath Earth Science
- Physical Geology: Exploring the Earth, Third Edition

Lab supplies:
- Biological specimens for dissection.

Videos:
- Understanding Oceans, TLC
- The Unknown World: The Odyssey of Life series
- Incredible Suckers
- The Nature Connection
- The World Between the Tides

Date Approved: January 18, 2005

Prerequisites:

· Coach and Athletic Director Magazine
· Sport specific periodicals
· Sport specific websites for BC and Canada
· NCCP Coaching Football Technical Manual  Level I

Learning Resources:

Course Synopsis:

The purpose of this course focuses on the developing coaches by providing basic technical knowledge of football skills and strategies. After completing Coaching Football 10 students will be prepared to take inexperienced athletes and provide them with a safe and educated football sessions. It will provide opportunity to develop leadership and officiating skills. Students will explore knowledge and skill sets relating to football. They will incorporate their learning through strategies as demonstrated in game play.

Rationale:

This course has been developed to teach how to introduce skills, to organize training lessons and to design a safe, fun and challenging environment for young athletes to begin playing football. The course will emphasis learning by doing. This is intended to be a practical approach to learning skills and strategies to teach others.

Prerequisites:

Course Synopsis:

This course is designed for Grade 9 or 10 students to develop their individual and team skills as a soccer player and lay the foundation for an advanced level of play in subsequent years. This course will include units on skills development, fitness, nutrition, theory and leadership.
School District 75

Status: approved

School Name: Hatzic Secondary School

Course Name: Volleyball Leadership

Course Code: YVL 11

Category: Fitness and Recreation

Grade Level of Course:  

10 ✔️ 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June 17, 2008

Prerequisites: PE 10

Course Synopsis:

This course is designed for Grade 11/12 students who have a desire to further their knowledge and skill level in volleyball and express a keen interest in coaching. Given the foundation from Volleyball Skills and Officiating 10, more advanced levels of play, drills and strategies will be examined. This course will continue to include units on Skill Development and Fitness with a greater emphasis on drill development, skill analysis, breakdown, delivery and self evaluation. There will be a leadership and coaching focus that will introduce the following topics: Practice Management, Tournament Coordinator Duties and Formats, Mental Training, Goal Setting, Team Dynamics and Prevention and Care of Injuries (taping).

Learning Resources:

3M Coaching Certification Program

Volleyball Canada: Coaches Manual Level 1&2, by J.Pierre Baudin

Volleyball: Game Theory and Drills, by Bernthold Frohner

Getting Stronger: Weight Training for Sport, by Bill Pearle

This is a beginning course, which will help the student develop an understanding of the various types of animation, and the various jobs associated within the industry. It is a must to have an adequate number of computers available. Computer editing programs make stop motion smoother but it can be created with linear equipment as well. The end product can be used in a portfolio for future studies.

**Course Synopsis:**
This course has been developed to introduce the student to both classical and computer animation techniques. Students will explore various methods of animation including flipbooks, cell animation, stop motion animation and computer animation. The students will be expected to think creatively, designing their own characters, stories and animations.

**Learning Resources:**
- On-line tutorials for various animation software
- Video and editing equipment manuals
- Books: Hanson’s Animation Basics, Story Boarding for Film

**Additional Information:**
This is a beginning course, which will help the student develop an understanding of the various types of animation, and the various jobs associated within the industry. School Name: Heritage Park Secondary

Course Name: Coaching Territorial Sports: Basketball 11

Course Code: YCTSB 11

Category: Fitness and Recreation

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 14, 2004

Prerequisites: None

Course Synopsis:
This course is designed to provide an opportunity for our students to achieve a Level 2 technical and theoretical certification in basketball technical in the National Coaching Certification Program (NCCP). To complete the NCCP Level 2 program, students will need to complete the practical portion of the Level 2 in Coaching Territorial Sports 12. The technical and theoretical component needs to be completed before the practical portion can be attempted.

Completing the course will include BCBOA certification as an official for basketball. This provides an understanding and a different perspective of the game. Students may use this as an opportunity to continue giving back to the basketball community after playing and to explore a possible job opportunity.

The Basketball Canada Coaching Certification Program bases its technical elements on the Basketball Development Model (BDM). The BDM is a guide to the relationship between age of the athlete and basketball activities which are most appropriate at that age, permitting an athlete-centered approach to player development.

The coaching certification program is designed to allow coaches to develop competencies by progressing through specified levels. It is comprised of three elements: technical, theory and practical components. In our class at Heritage Park, we will fulfill two elements – technical and theoretical.

We will be emphasizing teaching individual skills required for coaching basketball:

- Socialization
- Game and Minor Officiating
- Footwork and dribbling
- Individual offense
- Team offense
- Rebounding
- Defense
- Mental training
- Physical fitness
- Planning

By providing our students with this opportunity, we will be encouraging our students to understand the skills required to coach in the community and prepare them to coach in the community (possibly at an elementary school) if the opportunity arises. The student would also benefit from the exposure to the mental training and fitness aspects of the course. The expectation is the students would apply these concepts to their own sport training, thus improving themselves as athletes.
Learning Resources:

- Books:
  - Canada Basketball NCCP Technical Basketball Coaching Manual
  - Basketball BC Steve Nash Youth Coaching Manual (Pre-Level 1)
  - Coaching Basketball Successfully – Morgan Wootten
  - They Call Me Coach – John Wooden
  - Training Soccer Champions – Anson Dorrance
- Visit to a practice run by a university/college coach
- Articles and information about coaching on Internet
- Possible guest speakers:
  - Bruce Langford (head coach – Simon Fraser University)
  - Pat Lee (asst. coach – UCFV)
  - Allison McNeill (head coach – Canada Women’s National basketball team)
  - Jim Cervo (head official of the British Columbia Basketball Officials Association)
  - Mike McNeill (asst. coach – Canada Women’s National basketball team)
  - Teresa Kleindienst (Canada National basketball team player)
  - Kim Smith (Canada National basketball team player)
- DVD and videos:
  - Individual Improvement Drills – Tom Crean
  - The Shot – Shooting Drills and Techniques – Steve Alford
  - Heart of the Game – documentary Miramax Studios

Grade Level of Course:  

Grade 10  ✔ Grade 11  Grade 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 14, 2004

Prerequisites: Coaching Territorial Sports 11

Course Synopsis:

This course is designed to provide an opportunity for our students to achieve a Level 2 practical certification in basketball technical in the National Coaching Certification Program (NCCP). Completing the practical certification (along with our Coaching 11 course) will give the student complete Level 2 certification in basketball. Coaching Territorial Sports 12 requires NCCP Level 2 Theory and Technical components to be completed (completed in Coaching Territorial Sports 11). Coaching 12 requires students to demonstrate the skills and understanding of coaching strategies and techniques learned in Coaching 11 in a practical and real situation (basketball season of a team).

The coaching certification program is designed to allow coaches to develop competencies by progressing through specified levels. It is comprised of three elements: technical, theory and practical components. This class will allow the students to complete the practical portion of certification. The practical portion requires the observation of the student coaching a team for an entire basketball season. This portion cannot be completed until the theory and technical portions have been finished.

These concepts are taught in the Coaching Territorial Sports 11, our class will review the following concepts and the students will be required to demonstrate these concepts during their practicum:

?Socialization
?Teaching
?Analysis of skill
?Footwork and dribbling
?Individual offense
?Team offense
?Rebounding
?Defense
?Mental training
?Physical fitness
?Care and prevention of injuries
?Planning

By providing our students with this opportunity, we will be encouraging our students to understand the skills required to coach in the community and prepare them to coach in the community (possibly at an elementary school) if the opportunity arises. The student would also benefit from the exposure to the mental training and fitness aspects of the course. This is a beginning course which will help the student develop an understanding of the basics of computer animation and the various jobs associated within the industry. It is a must to have an adequate number of computers available. Computer animation programs are expensive and therefore can limit the time the student has on the computer. Groups may be used in some instances where there are limited facilities. The end product can be used in a portfolio for future studies.

**Course Synopsis:**
This course has been developed to introduce the student to computer animation techniques. Students will explore various computer animation programs. Students will be expected to think creatively, designing their own characters, stories and animations.

Course Synopsis:

Computer Programming Levels A, B: This set of four 2 credit courses is an introduction to the concepts, techniques and tools of computer programming. The courses are designed in 4 levels A = beginner, B = intermediate, C = advanced, D = Programmer. Each level is worth 2 credits in which there may be students from any grade ranging from grade 10 to grade 12.

The course is designed for those students who are intending to major in computer science or with interests in business, advanced science, web programming or game development. The course emphasizes a fundamental approach to problem analysis, algorithm development and top-down design.

Learning Resources:

All resources can be found on the web using http://www.google.com or http://www.howstuffworks.com/web-page.htm or http://www.devguru.com

JavaScript Quick Reference, Rick Darnell, Que, 1996.

Prerequisites: Co requisite(s): Textiles 12

Course Synopsis:

This course has been developed to support and encourage students to express themselves creatively through the medium of textiles, in the realm of fashion design. The course will cover everything from concept to finished product. This means that the student will explore factors that have influenced fashion in the past and in the present, identify sources of inspiration, study and apply the principles and elements of design, draw, draft and construct original garments. Self and peer assessment play a major role throughout the process.

Students will have the opportunity to showcase their garments in the Annual Fashion Show. Students will have the opportunity to participate in the annual Skills Canada Competition. Upon completion of this course, students will have a portfolio, which is essential for admission into any fashion design/merchandising post-secondary institution.

Learning Resources:
- Visitation to post-secondary Fashion Design and Merchandising Institutions
- Tour of Fashion Design and Production Centre(s)
- Attendance at the Kwantlen College-University's Fashion Design and Technology Program’s Year-End Fashion Show (and viewing of graduates' portfolios) and/or University College of the Fraser Valley’s Fashion Design and Technology Program’s Year-End Fashion Show.

Course Name: History of Rock & Roll: Cultural 12

Course Code: YHRR 12

Category: Other

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 15, 2004

Prerequisites: SS 10

Course Synopsis:

This course has been developed to help music and non-music students to discover the cultural, social and political roots of today’s music. They will be encouraged to explore the synthesis of African-Caribbean musical styles brought to North America by the slave trade which were gradually incorporated into the white culture and out of which Rock and Roll was born. They will be further encouraged to look to the future of pop-culture as Canadian and North American culture is infused with a widening range of world cultures.

Students will combine musical experiences in both a listening and performing environment with explorations of the global happenings that occurred as the music developed. The units of music will be placed in a time frame. Issues surrounding events often find their way into the music of the time. The music and the history specialists will work together to tie the events and issues to the music of the time in each unit using listening, analysis, discussion, writing, drama and performance.

Learning outcomes for the course are grouped under the curriculum organisers: Skills and Processes; Social Issues; Cultural Issues; Political Issues; Legal Issues; Economic Issues; and Environmental Issues. This course integrates skills and processes from the social sciences with those from the performing and fine arts. Students are given the instruction, support and opportunity to develop skills in collecting, interpreting and presenting a variety of perspectives on the significant issues of the day. Students are given the opportunity for self and peer assessment in each of the fourteen, nine to twelve hour units.

Learning Resources:

- Music Room audio and video/DVD system

School Name: Heritage Park Secondary

Course Name: Musical Theatre 10

Course Code: YMUTH 10

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites: Audition or Permission of Stage Director, Musical Director and Choreographer

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre. Students learn the value of developing community, to triumph over diversity, and a lifelong confidence in performance skills as they gain knowledge of the four strands of musical theatre: vocal, instrumental, movement / dance and acting. In the culmination of all proposed levels of instruction (See Musical Theatre 11, 12) students will produce a professional level musical for the school, community and the District of Mission. Learning Outcomes for the course are grouped under the curriculum organizers: Building Community (Opening the Theatre Company), Pre-Production, Production and Post-Production (Reflection and Closing the Theatre Company). Methods in which students are expected to meet instructor expectations include: written reflections, personal verbal responses, practice logs, movement / dance proficiency by set deadlines, line and song comprehension by set deadlines for differing stages of the rehearsal process.

Students are also given the opportunity for self and peer assessment in each of the four units. The approach supports student ownership and pride in performance as well as providing various skill sets and approaches to thinking and learning. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the productions and other reflective process during and after its completion. Musical Theatre 10 students will be starting at the entry level of chorus for the specific show, which will be different from year to year. They will learn both vocal and dance demands of chorus work, which by comparison is simpler than the 11 and 12 strands. Their rehearsal demands less time of the chorus, than of its leads and principles.

Learning Resources:

- Various excerpts from Broadway Musicals (songs, scenes and monologues)
- Full script, lyrics and score of an established Musical for performance (TBA, to change every year.)
- Local community members

Additional Information:

This class is the natural segue to the lead roles found in the proposed Musical Theatre 11 and 12 courses. As students gain basic knowledge and practical experience in Musical Theatre and progress through these courses, it is expected that students will proceed from chorus to lead/principal as they grow as performers and have demonstrated excellence as they progress.
This class is the natural segue to the lead roles found in the proposed Musical Theatre 12 course. As students gain basic knowledge and practical experience in Musical Theatre and progress through these courses, it is expected that students will proceed from chorus to lead/principal as they grow as performers and to demonstrated excellence as they progress.

Additional Information:

Methods in which students are expected to meet instructor expectations including written reflections, personal verbal response, practice logs movement/dance proficiency by set deadlines, line and song proficiencies by set deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units as well. The approach supports student ownership and pride in performance as well as providing various skill sets and approaches to thinking and learning. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the productions and other reflective process during and after its completion. At this level, students will take on lead roles which will require a more complex approach to acting, singing and dancing, as well as extended rehearsal time. By this level, students will have participated in several completely different productions. The level of skill development will have sequentially increased as the repertoire has been expanded and introduced.

Learning Resources:

- Various excerpts from Broadway Musicals (songs, scenes and monologues)
- Full script, lyrics and score of an established Musical for performance (TBA, to change every year.)
- Local community members

Additional Information:

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Other

Grade Level of Course: 10 X 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 16, 2004

Prerequisites: Successful referral and interview process

Course Synopsis:

This course is designed to introduce students to the basic skills necessary to establish and maintain successful helping relationship with peers. Skills learnt will also promote and support successful relationships with family members and other members of society. Students will develop skills in the areas of interpersonal communication, empathic listening, questioning techniques, ethics, referrals, decision-making and problem solving, peer mediation, mentoring, suicide prevention awareness, assertiveness training, anger management, lesson plan development and self-assessment.

During the assigned Peer Counselling block students are linked to a junior class and act as mentors and classroom helpers. The peer counsellors are responsible for creating a new, educational-issues bulletin board monthly. Aside from these activities peer counsellors are also available to all students in the school for listening and/or mediation. Peer counsellors also meet every Wednesday after school for an hour and 18 minutes to have a lesson on specific content areas.

Through the course of the year, students will have the opportunity to learn, practice and evaluate their skills. There will also be ongoing opportunity to debrief experiences. Closure to the course involves a series of self-evaluation and reflective activities completed by the students.

Learning Resources:

Course Synopsis:

This course is designed to further students’ basic skills learned in Peer Counselling 11, necessary to establish and maintain successful helping relationship with peers. Skills learnt also promote and support successful relationships with family members and other members of society. Students will develop skills in the areas of interpersonal communication, empathic listening, questioning techniques, ethics, referrals, decision-making and problem solving, peer mediation, mentoring, suicide prevention awareness, assertiveness training, anger management, lesson plan development and self-assessment.

During the assigned Peer Counselling block students are linked to a junior class and act as mentors and classroom helpers. In Peer Counselling 12, students are responsible for teaching one class, and for creating a new, educational-issues bulletin board monthly. Aside from these activities peer counsellors are also available to all students in the school for listening and/or mediation. Grade 12 Peer counsellors will also carry a mentoring caseload. Peer Counsellors meet every Wednesday after school for an hour and 18 minutes to have a lesson on specific content areas.

Through the course of the year, students will have the opportunity to learn, practice and evaluate their skills. Peer counselling 12 students will have the opportunity to teach skills to Peer Counselling 11 students. There will also be ongoing opportunity to debrief experiences. Closure to the course involves a series of self-evaluation and reflective activities completed by the students.

This is a course that serves both the tutor and the tutee. It is a continuation of Peer Tutoring 11 and is designed to further improve and enhance student’s tutoring skills and knowledge. It is ideal for students interested in the field of education. The course also offers development in skill areas that may be applied to many other fields of endeavour. The course provides students with the opportunity to develop independence, inter and intra personal skills and self-confidence. The peer tutors become excellent role models in the school community and frequently are able to gain employment as tutors in the local community or at local elementary schools. The course provides students with the opportunity to become life long learners and contributors to their future communities.

Course Code: YPTU 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites: B average or special permission

Course Synopsis:

The course is designed to provide students with the opportunity to develop individual skills and knowledge whilst supporting and encouraging their peers within the school community. Students learn to develop an understanding of individual academic, social and cultural differences. Students learn to use a variety of approaches, techniques and skills to assist other students’ learning process. Activities include the teaching of lessons to peers, analysis of learning styles, development of appropriate learning materials and an understanding of cultural variances. Learning outcomes are grouped under curriculum organizers: Social and Cultural Issues, Analysis and Application. Students are given the opportunity to self assess and present to their peer group. Students develop skills in communication, interpersonal relationships, leadership, and conflict management, while acquiring an appreciation of the importance of contributing to their communities and helping others. The Grade 12 course reflects many of the topic areas included at the grade 11 level. The students broaden their theoretical knowledge at the grade 12 level and increase the opportunities for the practical application of skills learned.

Course Name: Psychology 12

Course Code: YPSY 12

Category: Liberal Arts and Humanities

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites: Psychology 11 preferred but not required.

Course Synopsis:

This course has been developed to help students to recognize the key role that psychology is playing in the contemporary affairs of humankind. Students will communicate the basics of psychology in a concise and straightforward manner that will make the material easy to understand. At the same time, a foundation will be laid for the more advanced study of behaviour for those students wishing to continue in Advanced Psychology. The course will produce an interesting and intelligent introduction to psychology while maintaining the integrity of the underlying scientific principles. The program will encourage the students to acquire a greater awareness of the complexities of behaviour, a desire to understand behaviour more fully, and an ability to think more objectively about the many behavioural problems that confront us today.

Course Name: Rugby Coaching

Course Code: YRC 10

Category: Fitness and Recreation

Grade Level of Course:  

10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: March 13, 2007

Prerequisites:

1. Rugby Technical Manuals (Rugby Canada.)
2. Mini-Rugby Manuals (BC Rugby Union)
4. Selected Course Readings package
5. NZRFU / England RFU Videos
6. Internet (World Wide Web)
8. IRB Referee's Handbook (International Rugby Board)

Course Synopsis:

This course will be designed for students to develop their initial coaching skills, while laying the foundation for future more advanced accreditation through Rugby Canada. The material taught in those course correspond to the Level 1 coaching accreditation through BC Rugby and Rugby Canada, which will allow student to comfortably work with young participants up to the U-14 age-level. Thus, the focus of this course will be on how to effectively teach the sport of rugby and the subsequent skills to beginners, using strategies and best practices that promote athlete enjoyment and continued participation.

Learning Resources:

1. Rugby Technical Manuals (Rugby Canada.)
2. Mini-Rugby Manuals (BC Rugby Union)
4. Selected Course Readings package
5. NZRFU / England RFU Videos

Grade Level of Course: 10 11 X 12
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: March 13, 2007
Prerequisites: Rugby Coaching 11

Course Synopsis:
This course will allow student to obtain their CBET training through Rugby Canada, the most advanced and current training offered to coaches in B.C., allowing those students who successfully complete the course to coach up to the U18 age level. The emphasis of Rugby Coaching 12 is to “begin to identify more precisely the players, their physiological demands and physical characteristics, and their technical and tactical awareness…” (Rugby Canada, 1996) during competition. Advanced styles of play, such as the off-load, quick ball attacks, and arranged mismatches will be discussed and analyzed on how they can maximize offensive opportunities. Further, students will learn how to officiate matches, as described by the International Rugby Board.

Learning Resources:

Prerequisites: Physical Education 10

Course Synopsis:

This course has been developed to help students to discover training methods that efficiently help athletes achieve high levels of sport specific fitness. Students will be introduced to different physical training methods and will actively participate in them. Students will also be encouraged to explore the effect training has on the body and the adaptations which occur during physical training. Students will also collect data as a result of various physical testing and will learn to interpret and compare testing results. Students will be encouraged to create an individualized training program based on their sport specific needs and actively carry out their program. Students will study nutritional issues as the base for human performance.

School Name: Heritage Park Secondary

Course Name: Video & Film Post-Production 12

Course Code: YVFPP 12

Category: Fine Arts, Design, and Media

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 10, 2004

Prerequisites: None, but successful completion of Video Production 11 is strongly recommended

Course Synopsis:

Post-Production for film and video is comprised of several interrelated processes that take the raw materials of sound and image generated during the shooting of a film and creatively combines them to produce the finished product. This course covers the following subject matter which form the instructional units for the course:

- Film history, aesthetics and editing theory
- Introduction to non-linear, linear and film editing technology and techniques
- Picture and dialogue editing
- Sound effects creation and editing
- Foley
- Music editing
- Recording and preparation of the final film soundtrack

Using a variety of prepared materials as well as material generated by the students themselves, a series of projects will be assigned which illustrate and refine these various elements as they apply to film and video projects. Initially, projects will be limited in scope illustrating basic concepts. Each successive project will add to the complexity and challenge of handling all of these elements in successfully completing each program.

Course Name: Community Support Worker 11A

Course Code: YCSW 11A

Category: Health and Human Services

Grade Level of Course: 11

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites:

- Previous paid or volunteer work experience with a social services population including peer counsellors

**Course Synopsis:**

This course contains a number of introductory elements for work in the social services sector. Modules deal with typical job descriptions for community support workers, life skills workers and classroom assistants; CPR and First Aid for Adult Care Workers; Word Processing Skills; and introductory psychology. The concept of “professionalism” is defined and emphasized.

This course is a pre-requisite for work experience CSW courses.

**Learning Resources:**

1) Gardner & Chapman - Developing Staff Competencies for Supporting People with Developmental Disabilities (Introduction and Chapters 1,2,3 & 4), 2) Module Handout for modules 101, 102, 104, 107A & 107B. 3) Red Cross - First Aid, The Vital Link, 4), Developmental Psych A and Developmental Psych B readings (excerpted from a number of texts), computer course readings from Microsoft Manual, 5) Video – “The Mighty” 6) Phone list of professionals for interviews, 7) Various modular readings provided by instructor including excerpts from psychology texts and excerpts from employer manuals.

Course Code: YCSW 12B

Category: Health and Human Services

Grade Level of Course:  

10  
11  
12  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites:  - Previous paid or volunteer work experience with a social services population including peer counse

Course Synopsis:

This course addresses a variety of skills and ethics which can be applied in a number of specific practical cases. Skills learned here allow students to manage stress, crisis, medications, personal care and challenging one-to-one communications. These modules must be completed before the student can progress to the second practicum. These are work-ready skills, allowing the student to perform at or above the level of most entry-level Community Support Workers.

This course is a pre-requisite for second-level work experience CSW courses.

Learning Resources:

1) Gardner & Chapman - Developing Staff Competencies for Supporting People with Developmental Disabilities (Chapters 14, 16, 17); 2) CPS Reference Book; 3) DSM-IV TR Reference Book and DWM-IV Made Easy readings; 4) Module Handout for modules 205, 207, 209, 211, 212; 5) Ethics of Touch Workbook and video program 6) Various readings distributed by teacher excerpted from employer procedure manuals.

Course Code: YCSW 12C

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: January 18, 2005

Prerequisites: Previous paid or volunteer work experience with a social services population including peer counse

Course Synopsis:

This course addresses a variety of advanced skills and ethics which can be applied in a number of specific practical cases. It calls upon students to apply information from prior modules and to think in creative and expansive ways. It is the only classroom-based course during which a student CANNOT begin the CSW Program; at least one other course must have been begun previously. Skills learned here allow students to support clients with high physical care needs and/or particularly challenging behaviour. Students learn how to detect and deal with abuse and neglect as well as develop an advanced understanding of ethics. Service planning and food safety round out the course. These units must be completed before the student can progress to the second practicum. These are work-ready skills, allowing the student to perform at or above the level of most entry-level Community Support Workers. The course is also designed to prepare students for their work search, including preliminary Class 4 license training. Student-organized seminars on subjects such as Death and Grieving, Working with Families and Autism are also a part of this course, as is a student debate and an employer forum.

This course is a pre-requisite for second-level work experience CSW courses.

Learning Resources:

1) Gardner & Chapman - Developing Staff Competencies for Supporting People with Developmental Disabilities (Chapters 10, 11, 12, 13, 15, 18, 19); 2) Commercial Driving Textbook; 3) Module Handout for modules 213, 215, 217, 219, 221; 223; 301; 309, 4) Guest speakers and instructors, 5) Field Trip to group home, 6) Sample Interviews
Much of the lessons, especially in Unit 7, is conveyed orally and imparts the instructor’s experiences, suggestions and recommendations.
This course must be followed by practical applications of the material to prepare the student for a job in the Cosmetology Industry. Hair styling and haircutting services need to be performed on mannequins and clients to properly prepare students in technical skills and customer service abilities.

Course Synopsis:
This course will emphasize the proper hand, shear and other tool positions needed to perform the services accurately.

Learning Resources:
Textbook: Pivot Point International – Salon Fundamentals
Instructional Videos – various sources
Instructor generated teaching tools – assignments, word lists, handouts

Additional Information:
This course must be followed by practical applications of the material to prepare the student for a job in the Cosmetology Industry. Hair styling and haircutting services need to be performed on mannequins and clients to properly prepare students in technical skills and customer service abilities.

Course Code: YPLB 11A

Category: Trades and Technology

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites: The student should demonstrate an interest in the Plumbing trade and complete a successful referral

Course Synopsis:

This course is designed to introduce students to plumbing related building trade terminology. Additionally, it will familiarize them to safety regulations in accordance with Workers Compensation Board and Occupational Health and Safety regulations. The student will complete and pass both Working with Hazardous Materials and an Emergency First Aid program. Correct procedures for moving and lifting materials will be demonstrated along with assembling/disassembling scaffolding and correct use of ladders. Students will also learn to identify the safe use of trade related hand and power tools and will receive certification of powder actuated fastening tools.

Learning Resources:

- Instructor designed material
- OHS regulations & WCB publications
- Qualified WHMIS instructor
- Qualified First Aid instructor
- OHS regulations & WCB publications
- Trades Common Core, Line H, Lift Loads, Queen’s Printer
- Trades Common Core, Line A, Use Safe Work Practices, Queen’s Printer
- Trades Common Core, Line I, Erect Ladders and Scaffolds, Queen’s Printer
- TRAC Piping Occupational Core, Line F, Use Specialized Power Tools, Province of British Columbia Ministry of Post-Secondary Education, Queen’s Printer, 1986
- Current B.C. Plumbing Code, BC Building and Standards Branch, Queen’s Printer
- Videos: Ergonomics in the Workplace, The Hearing Video, Portable Fire Extinguishers, The Safety Monitor System, A Bright Arc, Fall Protection, Chemical Hazards, Confined Spaces Deadly Spaces

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  December 14, 2004

Prerequisites:  None, but preference will go to students who have successfully completed First Nations Studies 12 wi

Course Synopsis:

The Aboriginal Leadership Course has been designed to give students a practical experience with respect to being leaders, and therefore will take them into field studies of work placements. For students at Mission Secondary their work placement has been at Mission Central Elementary. In addition, this course will also require students to do academic work; within their scope of academic work they will conduct research on both historical and contemporary Aboriginal Leaders. They will also be given "in class assignments" designed to invite students to critically analyze what being a leader means. Therefore in term one, as in term two, the learning outcomes is a synthesis of both the practical experience and the theoretical understanding of leadership, it is hoped that this will encourage students to act as leaders within our school community, their home communities and in their day to day living as Canadian citizens.

- Journals and Periodicals

Course Synopsis:

This course is designed to give students the opportunity to develop their individual and collective sense of social responsibility through the acquisition and application of leadership skills and theory. Students will develop lifelong skills in the areas of self-image, goal setting, decision-making, time management, communication skills, public speaking, school and community service, public relations, conflict resolution and an understanding of various leadership styles. This course will allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

School Name: Mission Secondary
Course Name: Computer Studies 10
Course Code: YCS 10
Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 15, 2004

Prerequisites: None, but students must have Internet Access Permission form filled out, and it is recommended that

Windows Computers (preferably networked)
All The Right Type software (or equivalent)
Microsoft Word, Excel, Access, and Powerpoint (or equivalent), 2000 level or better
Internet (research and tutorials)
Microsoft Help Files
CFS Video on recycling machines

Course Synopsis:
This course has been developed to give students a thorough understanding of the use of computers in society. The emphasis will be on introducing them to a variety of computer functions rather than specializing in certain areas as is the case with the other computer courses. While many students are familiar with “surfing” the Internet, this course will take them one step further into using the Internet for research, business applications, etc., including proper search techniques to filter unwanted material. The course will also increase keyboarding speed, and more importantly accuracy, as well as the use of word processors, spreadsheets, databases, and presentations.

It is not a continuation of CST 9, rather very similar in content and should only be taken by those not completing CST 9. It is an opportunity for those grade 10’s unable to take CST 9 to still get the same skills, plus more, and do so at their grade level. CST 10 will cover the same topics, but go more in-depth because it is assumed that with the students being older and having more experience with computers, they will cover the material more quickly.

Learning Resources:
- Windows Computers (preferably networked)
- All The Right Type software (or equivalent)
- Microsoft Word, Excel, Access, and Powerpoint (or equivalent), 2000 level or better
- Internet (research and tutorials)
- Microsoft Help Files
- CFS Video on recycling machines
The material covered in CST 9 and 10 is not only valuable for school work and ultimately use in future careers, it is essential background for the more specialized computer courses in the higher grades. While the instructor can always give consent to enroll in the later courses based upon proof of the student’s basic computer knowledge, completion of either CST 9 or 10 will provide proof of the basic skills necessary for further study in the field.

There is no textbook for this course per se. With the rapid pace at which computers are changing, it is futile to use print materials. With a networked lab, which also has access to the Internet, there are more up-to-date materials accessible. Furthermore, the help and tutorial files contained within the programs are detailed in modern software and are for the exact versions being used, therefore will cover specific, relevant commands and issues; unlike in the past where texts for previous versions would be used to try to teach later versions because of cost issues, and either lacked certain information or gave directions that no longer worked. The Internet also contains a wealth of resources for specific versions. The proper software and hardware, the instructor’s knowledge, a projector to illustrate examples, and the vast resources of the Internet should be more than adequate materials.

Additional Information:

School Name: Mission Secondary

Course Name: Criminology 12

Course Code: YCRIM 12

Category: Health and Human Services

Grade Level of Course: ☑️ 10  ☑️ 11  ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 15, 2004

Prerequisites: Social Studies 10

Course Synopsis:

Criminology 12 has been developed, with the cooperation of the Criminology Department of The University College of the Fraser Valley, to prepare students for college criminology courses. Students will improve skills in public speaking, essay writing, debating, and critical thinking while exploring the Canadian criminal justice system. This course is intended to examine elements of, and contemporary issues arising from, criminal law and its application. It connects current issues reflected in the media with details of the law, theories of criminology and the operation of the system.

Learning Resources:
Textbooks:
- All About Law, Exploring the Canadian Legal System Third, Fourth and Fifth Editions

References:
- Pocket Criminal Code, Carswell
- Criminal Behavior A Psychosocial Approach, Curt R. Bartol
- Criminal Justice in Canada, Second Edition, Goff
- Criminology A Canadian Perspective, Fourth Edition, R. Linden
- Canadian Criminal Justice Today An Introductory Text for the Twenty-First Century
- Canadian Corrections, Griffiths and Cunningham

Videos:
- Through A Blue Lens
- Trial at Fortitude Bay
- Anywhere But Here
- In Search of Democracy - The Rule of Law
- Circles
- The Last Dance

Guest Speakers may include:
- Daryl Pecas - UCFV Criminology Department
- GlenFlett - LINK
- Jim Broom - Forensic Psychiatric Institution
- Representatives of the RCMP and Canadian Corrections

Field Trips may include:
- Vancouver Provincial Courts
- Forensic Psychiatric Institution

Additional Resources:
- Newspapers
- Magazines
- Internet
There is no textbook for this course per se. There are numerous tutorials on both the principles and the software which cover the material every bit as effectively as any of the textbooks without the difficulty of becoming out of date. Furthermore, the help and tutorial files contained within the programs are detailed in modem software and are for the exact versions being used, therefore will cover specific, relevant commands and issues; unlike in the past where texts for previous versions would be used to try to teach later versions because of cost issues, and either lacked certain information or gave directions that no longer worked. The Internet also contains a wealth of resources for specific versions. The proper software and hardware, the instructor's knowledge, a projector to illustrate examples, and the vast resources of the Internet should be more than adequate materials.

Course Synopsis:

This course will integrate basic general design principles with the software that can be utilized to achieve the designs. Students will learn to design for a variety of reasons from personal, to promotional and do so effectively and efficiently.

Learning Resources:

- Computer Lab
- Desktop Publishing Software (preferably CorelDraw or PageMaker)
- The Internet (research and tutorials)
- Help files within the program
- DTP samples

Additional Information:

There is no textbook for this course per se. Course Code: YFRT 11

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

- [ ] 10  
- [x] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 15, 2004

Prerequisites: Food Studies 9

Course Synopsis:

This course is designed to provide an opportunity for students to explore and apply principles of art and design to various food projects. Students will become competent in maintaining an orderly and safe environment through Food Safe Certification Level 1.

Throughout the course social, cultural and historical content will be integrated and developed within projects. Students will gain an appreciation for developing and maintaining traditions within families and communities. Problem solving and communication skills will be developed while students participate independently and interdependently in a productive environment.

- Create a work of art that reflects an understanding of social/cultural/historical contents.
- Critique their own works of art relating its content to the content in which it was created.
- Create works of art expressing the students own ideas, thoughts or feelings.
- Develop practical and creative abilities related to foods.
- Develop critical thinking and problem solving skills.
- Develop skills to improve the quality of students' present and future family lives.
Learning Resources:

1. Food Safe Program - Level 1
15. Video: The Gingerbread House - 1997 Patricia L. Hudson
17. Video: How To Garnish (Phone 732-886-1444; Email: chefharvey@aol.com)
This course is not an easy course, but the students who complete it will gain immensely valuable experience that will serve them well throughout life and give them a competitive edge for post-secondary entrance as well as in many businesses. In speaking with a college department chair, it became obvious that this type of background was very desirable, and sadly rare. In fact, the department chair was extremely pleased at the web background and expressed great surprise that Novell was being taught at a grade 11 levels. However, as long as the tasks being taught are basic administrative tasks rather than advance, and it is done in a way that is simple, fun and interesting, the students are easily able to understand the concepts and perform the tasks.

There is no textbook for this course per se. With the rapid pace at which computers are changing, it is futile to use print materials. With a networked lab, which also has access to the Internet, there are more up-to-date materials accessible. The Internet also contains a wealth of resources for specific versions. The proper software and hardware, a learning server with a NOS, the instructor's knowledge, a projector to illustrate examples, and the vast resources of the Internet should be more than adequate materials.

**Course Synopsis:**

This course has been developed to give students a basic understanding of how networks work. It covers the Internet, how it functions, and how to utilize it, and specific operating systems with an in-depth study of Novell networks and how to create users and give them access to the various parts of the network.

**Learning Resources:**

- Windows Computers (preferably networked)
- A NOS (at present Novell) on a learning server dedicated to that task and separate from the school server with separate passwords, etc to ensure security
- A web design program (presently Front Page)
- Internet (research and tutorials)
- Online support documentation for the NOS

**Additional Information:**

This course is not an easy course, but the students who complete it will gain immensely valuable experience that will serve them well throughout life and give them a competitive edge for post-secondary entrance as well as in many businesses. In speaking with a college department chair, it became obvious that this type of background was very desirable, and sadly rare. In fact, the department chair was extremely pleased at the web background and expressed great surprise that Novell was being taught at a grade 11 levels. However, as long as the tasks being taught are basic administrative tasks rather than advance, and it is done in a way that is simple, fun and interesting, the students are easily able to understand the concepts and perform the tasks.

There is no textbook for this course per se. With the rapid pace at which computers are changing, it is futile to use print materials. The proper software and hardware, a learning server with a NOS, the instructor's knowledge, a projector to illustrate examples, and the vast resources of the Internet should be more than adequate materials.
Presumably, the students taking this senior course will have a genuine interest in working in-depth with computers and/or the Internet and/or networks. It is an extremely challenging course, but for those with the interest in these fields, the skills will prove invaluable.

There is no textbook for this course per se. With the rapid pace at which computers are changing, it is futile to use print materials. Course Name: Restorative Justice 10

Course Code: YRJ 10

Category: Liberal Arts and Humanities

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 18, 2005

Prerequisites:

- Summer Training Institute
- Restorative Justice: A Vision for Healing and Change: Susan Sharpe
- The Little Book of Restorative Justice : Howard Zehr
- Touching Spirit Bear: Ben Mikaelson
- “A Healing River” DVD
- Internet
- Authentic Documents (Newspapers, Magazines)
- Other videos
- Conferences/Presentations

Course Synopsis:

This introductory course of Restorative Justice is designed to give students the opportunity to learn the philosophical principles of Restorative Justice. Through the theoretical component of this course, students will engage in studying ideology which provides an alternative means of dealing with harm within our school community and the community at large. In addition, following the summer training students will be given the opportunity to put into practice the principles of restorative justice within their school community, as co-facilitators within the Restorative Justice process.

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: January 18, 2005
Prerequisites: None, but consideration will be given to students who have completed grade 10 Restorative Justice

Course Synopsis:
This second level course of Restorative Justice is designed to further the student’s understanding of the philosophical principles of Restorative Justice. Students enrolled in this intermediate course will be expected to engage in a comprehensive study that will lead to a deeper understanding of how Restorative Justice can and is being implemented within Canadian Society— one that goes beyond the grade 10 level. In addition, it is important to note, that students who are enrolled in the Grade 11 level of the Restorative Justice will be expected to do additional assignments within the core units which are highlighted in bold. This expectation is extended to those students who have taken the grade 10 level of Restorative Justice and to those who are placed in Restorative Justice 11 because of grade appropriateness. Finally, following the summer training students will once again be given the opportunity to put into practice the principles of restorative justice within their school community, as co-facilitators within the “Restorative Justice” process.

Category: Fitness and Recreation

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: January 15, 2004

Prerequisites: Physical Education 8

Course Synopsis:

This course will be offered Mondays, Wednesdays, and Fridays throughout the year for students in grades 9-12. It will allow students to improve their strength by lifting weights, performing plyometric drills, and running drills. This course will also focus on sports physiology and sports psychology. This course is intended for high-level athletes wishing to improve their athletic abilities and prevent injuries.

Learning Resources:

- University of Nebraska - Huskerpower website: http://www.huskerpower.com/main.html
- "Coach and Athletic Director Magazine."
- Getting Stronger: Sports Training, General Conditioning, and Bodybuilding. Bill Pearl and Gary T. Morgan, Ph.D.

Additional Information:

Benefits of strength training:
- Enhances bone modeling to increase bone strength and reduce the risk of osteoporosis.
- Strengthens connective tissues to increase joint stability and help prevent injury.
- Increases functional strength for sports and daily activity.
- Increases lean body mass and decreases nonfunctional body fat.
- Raises metabolic rate because of an increase in muscle and a decrease in fat.
- Improves self-esteem and confidence.

Prerequisites: Education for Peace 11

Course Synopsis:

This unique course has been developed to continue with students' in-depth exploration of more of the concepts that will help to develop them to create a culture of peace, a culture of healing, and a culture of excellence. These concepts build on the concepts introduced in the Education for Peace 11 course and include the Nature of Power, Authority and Leadership for Peace, Conflict-Free Conflict Resolution, the Nature and Dynamics of Violence, and Creating a Culture of Healing. Once students are equipped with the knowledge and skills presented, students will consult with school and/or community leaders to create a plan for applying them within the school and/or community.

Prerequisites:

Rosetta Stone Level 1 & 2
Side-by-Side 3rd Edition Levels 1 & 2
Azar Grammar Series Basics & Fundamentals
Content-based Instruction
Web-based and library resources
Bilingual picture dictionaries

Course Synopsis:

This course is designed for students whose first language is other than English, English language skill is at the beginner level in speaking, listening, reading, and writing, and knowledge of Canadian culture is at a rudimentary level.

The course is designed to move students from a beginner level of functioning to a low intermediate level of reading, writing, listening, and speaking so they can interact with greater confidence in common academic and social settings. Students will be able to apply an increasing variety of communications strategies in English. Students will be able to read, write, speak about and listen to information in English such that they can communicate about their basic needs in relation to the English language, Canadian culture, and their academic and daily living requirements. Additionally, learning assistance will be provided through sheltered content-based instruction during each unit of study.

**Course Synopsis:**

Psychology 11 is a semester-long course that is available to students in Grades 11 and 12. It is modelled after Simon Fraser University's Psychology 100, and is one of two courses intended to prepare learners for success in writing the Advance Placement Psychology Examination for post-secondary credit. Seven individual units are covered:

1. What is Psychology?
2. Research Methods (students will design and conduct 2 research projects)
3. Biological Basis of Behaviour
4. Sensation and Perception
5. Basic Principles of Learning
6. Developmental Psychology
7. Theories of Personality

**Learning Resources:**

- Understanding Psychology (by Kasschau)
- Additional readings
- Instructor's guides
- Videotaped lessons
- CD-Rom exercises and demonstrations
- Guest speakers, who are professionals in mental health, law enforcement, and social work.

Course Code: YELDV 10
Category: Health and Human Services

Grade Level of Course:  ✔ 10  ☐ 11  ☐ 12
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: October 14, 2008

Prerequisites:

Rosetta Stone Level 1 & 2
Side-by-Side 3rd Edition  Levels 1 & 2
Azar Grammar Series  Basics & Fundamentals
Content-based Instruction
Web-based and library resources
Bilingual picture dictionaries

Course Synopsis:

This course is designed for students whose first language is other than English, English language skill is at the beginner level in speaking, listening, reading, and writing, and knowledge of Canadian culture is at a rudimentary level.

The course is designed to move students from a beginner level of functioning to a low intermediate level of reading, writing, listening, and speaking so they can interact with greater confidence in common academic and social settings. Students will be able to apply an increasing variety of communications strategies in English. Students will be able to read, write, speak about and listen to information in English such that they can communicate about their basic needs in relation to the English language, Canadian culture, and their academic and daily living requirements. Additionally, learning assistance will be provided through sheltered content-based instruction during each unit of study.

Course Synopsis:

This course is designed to introduce students to the overall principles and practices of Education for Peace through a written dialogue on peace entitled: "Peace Moves". Students will be guided through each of the 4 parts of Peace Moves while exploring the concepts and principles discussed throughout the book.

Unit 1: Part I: Is Peace Possible?
Unit 2: Part II: A Search for Peace
Unit 3: Part III: How to Create Peace
Unit 4: Part IV: Action for Peace
Course Synopsis:

This unique course has been developed to provide students with an in-depth exploration of some of the concepts that will help to develop them to create a culture of peace. These concepts include unity and diversity, worldview, human nature, the development of human civilization and humanity's transition to a civilization of peace. Once students are equipped with the knowledge and skills presented, students will consult with school and/or community leaders to create a plan for applying them within the school and/or community.

Additional Information:
Sport is an important part of Canadian society. In 1998, 34%, or 8.3 million people aged 15 and over participated in at least 1 sport. Sport continues to be a focus for universities and colleges throughout British Columbia. Sport organized at the provincial, club, and community level will continue to flourish. The role of the sport professional (coaches, athletic trainers, sport psychologists) will be an area of growth in our society.

Number of Hours of instruction: 120

Date Approved: December 12, 2006

Prerequisites: Basic Backcountry Experiences 10. Students are required to submit an application form prior to enter

Course Synopsis:

This course is intended to introduce students to the fundamentals of leading backcountry experiences and to prepare for a career in the outdoor recreation and adventure education industry. Students will have the opportunity to learn basic skills necessary to conduct a safe and successful wilderness experience for others. The basics of navigation, pre-trip planning, safety, group dynamics, personalities, motivational strategies, and problem solving will be explored. Students will then have the opportunity to practice their developing skills on a multi-day backcountry experience.
Leadership at Hope Secondary is intended to be a four year program where students can build on leadership skills learned each year. Students will be encouraged to complete all four years of the program however individual requests to start at different grade levels will be considered.

Leadership classes will be held outside of the regular school timetable. The class will normally take place at 7:30 a.m. three or four mornings per week. Students will also receive both class credits and work experience credit for the extra service hours they complete outside of their regular class schedule. The early morning class allows all students to consider the Leadership Program option as there is no possibility of a conflict with another course.

Students will complete an application process for each year of the Leadership Program. The process will include a series of steps including (but not exclusive to) an application form, an interview and references from teachers. Preference will be given to previous Leadership students, however students will need to re-apply each year.

Course Synopsis:

This course is designed to give students the opportunity to develop their individual and collective sense of social responsibility through the acquisition and application of leadership skills and theory. Students will develop lifelong skills in the areas of self-image, goal-setting, time management, public speaking, school and community service, public relations, conflict resolution and an understanding of various leadership styles. This will allow students the opportunity to acquire evidence and documentation to add to their graduation portfolios.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 10, 2007

Prerequisites: None

**Course Synopsis:**

Our Life Cycle 11 course has been developed in order to add relevance and meaning for First Nation/Aboriginal learners. Students will explore cultural teachings and learning through concentration on seasonal activities and ceremony. With understanding of seasonal activities, students will plan and take part in events that apply their developing skills and knowledge and transmit their cultural identity to the broader community. The School District recognizes that school curriculum has to be consciously addressed in order to create culturally inclusive learning environments for Aboriginal children. The development of this course addresses, in part, the need for more culturally relevant and meaningful credit opportunities for students.

**Learning Resources:**

- Community resources
- Developed curriculum (Seabird and Chehalis)
- Local curriculum project - Powerpoints (cedar/identity)

Outdoor Pursuits is intended as an introductory course for students in grade 10. The design of the course was largely based on the schools locations. Hope is situated close to so many marvelous examples of ecosystems with unique opportunities for learning and recreation. This includes forested areas that can be accessed within the time frame of a single 75 minute block. It is a distinct advantage to be able to spend so much time observing plants and collecting samples and thus the extra time spent on ethnobotany.

The wilderness excursions include a late September hike to a high elevation lake and a January winter camp. Both require significant planning. Students get an opportunity to experience the rewards of planning well and immediate feedback when things go poorly. In any event, it always ends up with new cooperative solutions to keep the outings as enjoyable as possible.
Outdoor Pursuits is intended as an introductory course for students in grades 10 – 12. The design of the course was largely based on the school’s locations. Hope is situated close to so many marvelous examples of ecosystems with unique opportunities for learning and recreation. This includes forested areas that can be accessed within the time frame of a single 75 minute block. It is a distinct advantage to be able to spend so much time observing plants and collecting samples and thus the extra time spent on ethnobotany.

The wilderness excursions include a late September hike to a high elevation lake and a January winter camp. Both require significant planning. Students get an opportunity to experience the rewards of planning well and immediate feedback when things go poorly. In any event, it always ends up with new cooperative solutions to keep the outings as enjoyable as possible.

Course Synopsis:
Outdoor Pursuits 11 builds upon the foundation set out in Outdoor Pursuits 10. Like courses in First-aid and Mathematics, skills and knowledge are better instilled in the participants when they are revisited. This ensures that students will function with a higher level of compliance, when dealing with safety and survival issues in wilderness areas. For that reason, students who are serious about venturing into the outdoors, are encouraged to take both OP 10 and OP 11. Students taking this course, after successfully completing OP 10, are expected to take a leadership role.

Learning Resources:
Printed Materials (locally developed)
Videos
Plant Identification Books
Animal Identification Books
Internet
Authentic Documents
Assorted Science Texts

Additional Information:

Students get an opportunity to experience the rewards of planning well and immediate feedback when things go poorly. In any event, it always ends up with new cooperative solutions to keep the outings as enjoyable as possible.
In order to effectively carry out the program, it is important that classes be assigned classroom, activity/fitness room and gym times consistent with regular physical education classes. The course is quite flexible and should meld nicely with existing programs, as long as the equipment and facilities are not over booked.

Course Name: Psychology 11

Course Code: YPSY 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: April 26, 2005

Prerequisites: English 10

Course Synopsis:

Psychology 11 is a semester-long course that is available to students in Grades 11 and 12. It is modelled after Simon Fraser University's Psychology 100, and is one of two courses intended to prepare learners for success in writing the Advance Placement Psychology Examination for post-secondary credit. Seven individual units are covered:

1. What is Psychology?
2. Research Methods (students will design and conduct 2 research projects)
3. Biological Basis of Behaviour
4. Sensation and Perception
5. Basic Principles of Learning
6. Developmental Psychology
7. Theories of Personality

Learning Resources:

- Understanding Psychology (by Kasschau)
- Additional readings
- Instructor’s guides
- Videotaped lessons
- CD-Rom exercises and demonstrations
- Guest speakers, who are professionals in mental health, law enforcement, and social work.

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: August 28, 2007

Prerequisites: None

Course Synopsis:

Trades Discovery A is designed as an introduction to multiple trades through a project-based course at the grade 10 level. Disciplines of exploration will include Carpentry/Framing, Residential Electrical Wiring, Residential Plumbing, Residential HVAC/Sheet Metal, Cabinetry/Joinery, Finish Carpentry, Drywall/Interior Finishing, Roofing/Exterior Finishing. Through a partnership with Britco Manufacturing in Agassiz, B.C., students at Hope Secondary School will get the opportunity to manufacture a Britco structure at HSS. Guidance and mentorship will be provided by Britco trades people and facilitated by Hope Secondary School staff. Relevant field trips and plant visits will be scheduled throughout the year to reinforce learning outcomes.

Additional Information:

This course is the first of a 3 part series: Trades Discovery A,B,C will be introduced over three years and each level will become the prerequisite for the next course in sequence.

Rosetta Stone Level 1 & 2
Side-by-Side 3rd Edition  Levels 1 & 2
Azar Grammar Series  Basics & Fundamentals
Content-based Instruction
Web-based and library resources
Bilingual picture dictionaries

Course Synopsis:

This course is designed for students whose first language is other than English, English language skill is at the beginner level in speaking, listening, reading, and writing, and knowledge of Canadian culture is at a rudimentary level.

The course is designed to move students from a beginner level of functioning to a low intermediate level of reading, writing, listening, and speaking so they can interact with greater confidence in common academic and social settings. Students will be able to apply an increasing variety of communications strategies in English. Students will be able to read, write, speak about and listen to information in English such that they can communicate about their basic needs in relation to the English language, Canadian culture, and their academic and daily living requirements. Additionally, learning assistance will be provided through sheltered content-based instruction during each unit of study.

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

Learning Resources:

Will include, but not be limited to:

Books

· Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
· Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
· Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:

· Visit to local kayak operator, with an introductory kayak workshop
· Field trips to local areas representative of each ecosystem studied
· Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

Course Synopsis:

This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

Learning Resources:

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites

- [ ] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:

1. Image development and design strategies
2. Context
3. Visual elements and principles and design as applied to textiles
4. Materials, technologies and processes

The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Number of Course Credits: 1

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: NONE

Course Synopsis:

This introductory course will focus primarily on digital photography and multi –media for communication and art. Although this course incorporates many of the compositional and technical aspects of traditional photography it makes extensive use of computers and digital technology. This course has been developed to help students explore the range of personal and social expression through digital photography and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic photographic and compositional skills and learn how to apply them to different output or presentation forms: internet, slide shows, home videos, advertising, historical documentation, publishing, galley exhibitions, and more. Students will make digital photographs and multi-media presentations. They will be expected to develop an appreciation of photography and multi-media works and respond to them critically in an informed and responsible manner.

Learning Resources:

Will include but not limited to:

- cameras, computers, video editing equipment and materials
- visits to photographic studios and visits from professional photographers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 4, 2004
Prerequisites: None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

Grade Level of Course: [ ] 10 [ ] 11 [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own.

Learning Resources:

Will include, but not be limited to:

Books:
- Learning by Designing – Volume 1 and 2 – Jim Gilbert
- Karin Clark
- Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library

Additional Information:

Visitation to the following is recommended:

Course Name: Ground Search and Rescue 11

Course Code: YGSAR 11

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 3, 2004

Prerequisites: None

Course Synopsis:

This Ground Search and Rescue (GSAR) course has been designed as the entry level standard for ground and inland water search and rescue within the Province of British Columbia. Students completing training cannot receive full membership status until they reach the age of 19.

Topics in this course range from basic survival skills to team oriented searches. Students will gain practical experience in compass use, map reading, basic tracking and other relevant skills that allow them to help in an emergency backwoods situation. They will be given the opportunity to meet and work with a team of practicing GSAR members in a mock search overnight activity. Students will develop insight into the typical responses of lost persons and the resulting trauma of family and friends.

Finally, this course emphasizes team building skills and teamwork in order to maintain a clear, calm perspective in physically and emotionally demanding situations. Students are expected to achieve a mastery level (70%) on all written and practical assessments. All students are expected to pay a course fee of $30.00 and must provide their own footwear and appropriate outdoor clothing. Fieldwork will occur in the forests near the school, on school fields and on field trips. ALL STUDENTS must complete the overnight activity to receive full credit for this course.
Learning Resources:

May include but not limited to -
- GSAR Manual
- GSAR Instructor Guide and Manual
- Take a practical course on wilderness survival like the following: Basic Wilderness Survival (Mors Kochanski, Prof, Uof A)

The following books have proved valuable in this course:
4. 98.6 Degrees: The Art of Keeping Your Ass Alive, Cody Lundin, Gibbs Smith Publishing
7. The SAS Handbook of Living Off the Land, Chris McNab, Amber Books LTD
8. Outdoor Safety and Survival, Judi Lees, Greystone Books
12. Our Favourite Hikes in the Lake Cowichan Area, John and Georgie Clark, Rick Nott, Community Economic Adjustment Committee

Videos:
- Bearsafe (BC Min of Env)
- Northern Wilderness Survival (Kochanski)
- Lost in the Wilderness

Grade Level of Course:  
- 10
- 11
- 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: Home Economics 9 recommended

Course Synopsis:

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

Learning Resources:

Will include but not limited to:
- A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
- Video series called Avventura available at www.avventuratv.ca
- Food Safe videos

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered as a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

Leadership 11 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands-on, minds-on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered as a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. This course continues with core units or themes of study, which increase in depth and have higher expectations at each grade of leadership from grade 10 – 12. In the grade 11 level of leadership, students will be expected to demonstrate skills by managing school and community events. The focus areas of development for grade 11 students during school and community events will be effective leadership skills, planning personal growth, problem solving and conflict resolution skills.

Learning Resources:

May include but not limited to:

- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay
- All Together Now. Ukens, Lorraine
- Working Together. Ukens, Lorraine
- Activities that Teach. Jackson, Tom
- More Activities that Teach. Jackson, Tom
- Team Building through Physical Challenges. D.R. Glover and D.W. Midura
- The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
- Catch them Being Good. DiCicco, Tony
- The Leadership Challenge. Kouzes and Posner

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 12 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. Participation in class activities and volunteering time in the school/community is essential to achieving the course goals. This course is offered as a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. This course continues and summarizes the core units or themes of study, which increase in depth and have higher expectations at each grade of leadership from grade 10 – 12. In the grade 12 level of leadership, students will be expected to organize school or community events. The focus areas of development for grade 12 students during school and community events will be effective leadership skills, time management principles, planning for success and conflict resolution styles.

Grade Level of Course:  
☐ 10  ☑ 11  ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: none

Course Synopsis:

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students’ knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

Learning Resources:

Will include, but not be limited to-

· Dark room equipment
· SLR cameras
· Articles and information journals concerning photography.
· Film and print paper.
· Samples of previous successfully completed assignments.

Prerequisites:  Yearbook Journalism 11 suggested

Course Synopsis:

Yearbook Journalism 12 provides the opportunity for students to build on the skills that they developed in Yearbook Journalism 11 and to take a leadership role in the production of a school yearbook.
Course Synopsis:

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

Learning Resources:

Will include, but not be limited to:

Books
- Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
- Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
- Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:
- Visit to local kayak operator, with an introductory kayak workshop
- Field trips to local areas representative of each ecosystem studied
- Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

• 11 [X]
• 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to allow students to explore the issue of climate change. Students will gain awareness and understanding of global weather and climate patterns, causes of climate change, regional and global impacts and responses to climate change.

The purpose of the course is to provide an overview of climate change/global warming issue, from its discovery to its potential effects on Canada and other countries. Social and scientific methods will be applied throughout the units and students will develop a basis of understanding essential to future environmental studies (geography, geology, meteorology, biology, etc.).

Learning Resources:

Will include but not be limited to:
• Articles, resources and data available on the internet
• Fact sheets and information available from Pembina Climate Change Awareness and Education Action Kit

Videos:
• Turning Down the Heat, Pembina Institute.

Books
• Climate Change Poster Series. Government of Canada.

Additional Information:

This is a new course based in part on the numerous climate change resource kits produced in recent years. The subject matter of this course is evolving and more resources are becoming available. The course will require some fine tuning as it evolves.

The essence of the course is to provide students the opportunity to examine a topic which will have impacts on their personal and future professional lives.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: None

Course Synopsis:
This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

Learning Resources:

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

- [ ] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:
1. Image development and design strategies
2. Context
3. Visual elements and principles and design as applied to textiles
4. Materials, technologies and processes

The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Number of Course Credits: 1

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: NONE

Course Synopsis:

This introductory course will focus primarily on digital photography and multi-media for communication and art. Although this course incorporates many of the compositional and technical aspects of traditional photography it makes extensive use of computers and digital technology. This course has been developed to help students explore the range of personal and social expression through digital photography and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic photographic and compositional skills and learn how to apply them to different output or presentation forms: internet, slide shows, home videos, advertising, historical documentation, publishing, galley exhibitions, and more. Students will make digital photographs and multi-media presentations. They will be expected to develop an appreciation of photography and multi-media works and respond to them critically in an informed and responsible manner.

Learning Resources:

Will include but not limited to:

- cameras, computers, video editing equipment and materials
- visits to photographic studios and visits from professional photographers and personnel in related fields
- professional seminars and workshops

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

Date Approved: February 4, 2004

Prerequisites: None

**Course Synopsis:**

This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own

**Learning Resources:**

Will include, but not be limited to:

Books:
- *Learning by Designing – Volume 1 and 2 – Jim Gilbert*
- *Karin Clark*
- *Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library*

Course Name: FORENSIC SCIENCE 11

Course Code: YFSC 11

Category: Science and Applied Sciences

Grade Level of Course: [ ] 10  [X] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 6, 2006

Prerequisites: SCIENCE 10 & PRINCIPLES OF MATH 10 RECOMMENDED

Course Synopsis:

Forensic Science or Crime Scene Reconstruction is the use of scientific method, physical evidence, deductive reasoning and their interrelationships to gain knowledge of the events leading to the commission of a crime. Forensic Science 11 is a course that focuses on giving students a chance to gain and apply knowledge from the areas of history, math, biology, chemistry, physics, earth science, archeology, anthropology, law, medicine, and professional/technical writing. This course will expose students to current forensic science methods as well as discussing past practices and reasons for advancements in technology. This course will include a series of inquiry labs, discussion of case studies, field trips and guest speakers, internet research and practical labs that will allow students to strengthen skills of observation, interpretation, reasoning, and formal presentation. The students in this course will be required to design and carry out scientific investigations.

Course Name: INTRO TO SCREEN & STAGE WRITING 10

Course Code: YISSW 10

Category: Liberal Arts and Humanities

Grade Level of Course: ☑ 10 ☐ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 15, 2004

Prerequisites: NONE

Course Synopsis:

The Introduction to Writing for the Stage and Screen 10 course has been developed to allow students to explore the range of personal and social expression offered by the medium of writing for the screen and/or writing for the stage. Students will develop individual skills in the key writing production elements of: effective narrative (both formalistic and realistic), character and plot development, genre and tone, original and adaptive script and screen writing techniques. Students will learn, through their participation in the production of course-focused scripts for the screen and/or the stage (a) how to format a variety of useable scripts, including from original material and from adapted material, (b) how to adapt the script through the stages of development needed for the writing to function in a motion picture. The students will develop scripts for use in various stage and screen genres. The students will (a) learn professional work habits (b) compile a portfolio of work, and (c) gain invaluable hands-on experience and contacts that will be essential for them in their future careers.

Course Name: Italian Foods 10

Course Code: YITFD 10

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  
- [x] 10  
- [ ] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 4, 2004

Prerequisites: Home Economics 9 recommended

**Course Synopsis:**

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

**Learning Resources:**

Will include but not limited to:
- A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
- Video series called Avventura available at www.avventuratv.ca
- Food Safe videos

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

Learning Resources:

May include but not limited to the following:
-The Seven Habits of Highly Effective Teens. Covey, Sean
-Growing the Distance. Clemmer, Jim
-Life Strategies for Teens. McGraw, Jay
-All Together Now. Ukens, Lorraine
-Working Together. Ukens, Lorraine
-Activities that Teach. Jackson, Tom
-More Activities that Teach. Jackson, Tom
-Team Building through Physical Challenges. D.R. Glover and D.W. Midura
-The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
-Catch them Being Good. DiCicco, Tony
-The Leadership Challenge. Kouzes and Posner
-Videos (eg ‘Pay It Forward’)

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: none

Course Synopsis:

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students' knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

Learning Resources:

Will include, but not be limited to-
- Dark room equipment
- SLR cameras
- Articles and information journals concerning photography.
- Film and print paper.
- Samples of previous successfully completed assignments.

School Name: Cowichan Secondary

Course Name: Adventure Tourism & Coastal Ecosystems 11

Course Code: YATCE 11

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

Learning Resources:

Will include, but not be limited to:

Books
- Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
- Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
- Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:
- Visit to local kayak operator, with an introductory kayak workshop
- Field trips to local areas representative of each ecosystem studied
- Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to allow students to explore the issue of climate change. Students will gain awareness and understanding of global weather and climate patterns, causes of climate change, regional and global impacts and responses to climate change.

The purpose of the course is to provide an overview of climate change/global warming issue, from its discovery to its potential effects on Canada and other countries. Social and scientific methods will be applied throughout the units and students will develop a basis of understanding essential to future environmental studies (geography, geology, meteorology, biology, etc.).

Learning Resources:

Will include but not be limited to:

• Articles, resources and data available on the internet
• Fact sheets and information available from Pembina Climate Change Awareness and Education Action Kit

Videos:

• Turning Down the Heat, Pembina Institute.

Books

• Climate Change Poster Series. Government of Canada.

Additional Information:

**Course Synopsis:**

This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

**Learning Resources:**

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:
1. Image development and design strategies
2. Context
3. Visual elements and principles and design as applied to textiles
4. Materials, technologies and processes

The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Grade Level of Course: □ 10 □ 11 □ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

This is a new course that will inevitably require some fine-tuning as it evolves. The essence of it is to provide a hands-on experiential opportunity for the students to work with experienced staff and industry professionals to create real movies and to develop their own sense of cinematic style.

**Course Synopsis:**
This course has been developed to allow students to explore the range of personal and social expression offered by the medium of film. Students will develop individual skills in the key film production elements of sound, lights, camera, film editing and post-production, screen writing and acting, and will, through their participation in the production of a course focussed film, learn the various functions of a motion picture crew and the work habits essential to future success in the film industry.

**Learning Resources:**
Will include but not be limited to:
- Camera, sound, video editing equipment manuals,
- Visits to professional production houses, film and television sets,
- Professional seminars and workshops
- Articles, resources regarding filmmaking available on the internet

Books:
- The Movies – A Short History, Mast and Kawin, ISBN 0-205-19670-5, Allyn and Bacon
- Reel West Digest

**Additional Information:**
This is a new course that will inevitably require some fine-tuning as it evolves. The essence of it is to provide a hands-on experiential opportunity for the students to work with experienced staff and industry professionals to create real movies and to develop their own sense of cinematic style.

Course Name: First Nations Art 10
Course Code: YFNA 10
Category: Fine Arts, Design, and Media
Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 4, 2004
Prerequisites: None

Course Synopsis:

This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own

Learning Resources:

Will include, but not be limited to:

Books:
- Learning by Designing – Volume 1 and 2 – Jim Gilbert
- Karin Clark
- Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library

Additional Information:

Visitation to the following is recommended:
- The Simon Charlie Society
- Cowichan Band’s Heritage Centre
- Provincial Museum
- The Internet and Libraries

Use Internet and Library resources to explore First Nations art and culture

Grade Level of Course: ☑ 10 ☑ 11 ☑ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June 2, 2004

Prerequisites: NONE

Course Synopsis:

This course has been developed to allow students an opportunity to explore and develop their personal leadership skills while enhancing critical literacy skills. This course looks at five key areas of leadership: personal leadership, group leadership, traditional leadership, modern leadership and future leadership. Students will actively participate in a variety of projects allowing them to be leaders and positively influence younger students as well as their peers. Students will develop skills in goal setting, teamwork, leadership, reading, writing, speaking and listening. First Nations students possess experiential cultural knowledge that needs to be fostered, enriched and shared.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 6, 2006

Prerequisites: SCIENCE 10 & PRINCIPLES OF MATH 10 RECOMMENDED

Course Synopsis:

Forensic Science or Crime Scene Reconstruction is the use of scientific method, physical evidence, deductive reasoning and their interrelationships to gain knowledge of the events leading to the commission of a crime. Forensic Science 11 is a course that focuses on giving students a chance to gain and apply knowledge from the areas of history, math, biology, chemistry, physics, earth science, archeology, anthropology, law, medicine, and professional/technical writing.

This course will expose students to current forensic science methods as well as discussing past practices and reasons for advancements in technology. This course will include a series of inquiry labs, discussion of case studies, field trips and guest speakers, internet research and practical labs that will allow students to strengthen skills of observation, interpretation, reasoning, and formal presentation. The students in this course will be required to design and carry out scientific investigations.

Course Code: YGSAR 11

Category: Other

Grade Level of Course: 10  X 11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 3, 2004

Prerequisites: None

Course Synopsis:

This Ground Search and Rescue (GSAR) course has been designed as the entry level standard for ground and inland water search and rescue within the Province of British Columbia. Students completing training cannot receive full membership status until they reach the age of 19.

Topics in this course range from basic survival skills to team oriented searches. Students will gain practical experience in compass use, map reading, basic tracking and other relevant skills that allow them to help in an emergency backwoods situation. They will be given the opportunity to meet and work with a team of practicing GSAR members in a mock search overnight activity. Students will develop insight into the typical responses of lost persons and the resulting trauma of family and friends.

Finally, this course emphasizes team building skills and teamwork in order to maintain a clear, calm perspective in physically and emotionally demanding situations. Students are expected to achieve a mastery level (70%) on all written and practical assessments. All students are expected to pay a course fee of $30.00 and must provide their own footwear and appropriate outdoor clothing. Fieldwork will occur in the forests near the school, on school fields and on field trips. ALL STUDENTS must complete the overnight activity to receive full credit for this course.
May include but not limited to -
- GSAR Manual
- GSAR Instructor Guide and Manual
- Take a practical course on wilderness survival like the following: Basic Wilderness Survival (Mors Kochanski, Prof, Uof A)

The following books have proved valuable in this course:
4. 98.6 Degrees: The Art of Keeping Your Ass Alive, Cody Lundin, Gibbs Smith Publishing
7. The SAS Handbook of Living Off the Land, Chris McNab, Amber Books LTD
8. Outdoor Safety and Survival, Judi Lees, Greystone Books
12. Our Favourite Hikes in the Lake Cowichan Area, John and Georgie Clark, Rick Nott, Community Economic Adjustment Committee

Videos:
- Bearsafe (BC Min of Env)
- Northern Wilderness Survival (Kochanski)
- Lost in the Wilderness

Course Code: YITFD 10

Category: Tourism, Hospitality, and Foods

Grade Level of Course:

- [ ] 10
- [X] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 4, 2004

Prerequisites:

- Home Economics 9 recommended

Course Synopsis:

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

Learning Resources:

Will include but not limited to:

- A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
- Video series called Avventura available at www.avventuratv.ca
- Food Safe videos

**Course Synopsis:**

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

**Learning Resources:**

May include but not limited to the following:
- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay
- All Together Now. Ukens, Lorraine
- Working Together. Ukens, Lorraine
- Activities that Teach. Jackson, Tom
- More Activities that Teach. Jackson, Tom
- Team Building through Physical Challenges. D.R. Glover and D.W. Midura
- The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
- Catch them Being Good. DiCicco, Tony
- The Leadership Challenge. Kouzes and Posner

Course Synopsis:

Peer Counselling is designed to provide training to students in communication, interpersonal and specific intervention skills. These skills enable students to help their peers with the problem-solving process, and take an active role in helping to create and deliver prevention programs in a Secondary School.

Students will learn to identify a problem, help others understand the essence of a problem and help others with the solution process by seeking information and strategies.

Learning Resources:

Will include, but not be limited to:
- Peer Counselling Journal - prepared by Janice Rose
- The Peer Counselling Starter Kit - by Rey A. Carr & Greg Saunders
- Cool Solutions - by Deb Hale and Marion McCristal
- Student Workbook To Accompany The Peer Counselling Start Kit Workbook - by Gail Roberts
- Let’s Live - BC Council For Families
- Kids Helping Kids - Trevor Cole
- Young Women, Young Men Changing - by Jean Fraser, Mary Kirchner, Laurel Whatley
- Choices - by Vancouver Crisis Center
- The Skilled Helper: A Systematic - Approach by Gerard Egan
- 100 Ways to Enhance Self-concept - by Jack Canfield and Harold C. Wells
- Connecting Kids: Exploring Diversity - by Linda Hill
School District 79

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: none

**Course Synopsis:**

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students’ knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

**Learning Resources:**

Will include, but not be limited to-

- Dark room equipment
- SLR cameras
- Articles and information journals concerning photography.
- Film and print paper.
- Samples of previous successfully completed assignments.

**Books**

11  
12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

**Course Synopsis:**

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

**Learning Resources:**

Will include, but not be limited to:

Books
- Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
- Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
- Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:
- Visit to local kayak operator, with an introductory kayak workshop
- Field trips to local areas representative of each ecosystem studied
- Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

Category: Science and Applied Sciences

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to allow students to explore the issue of climate change. Students will gain awareness and understanding of global weather and climate patterns, causes of climate change, regional and global impacts and responses to climate change.

The purpose of the course is to provide an overview of climate change/global warming issue, from its discovery to its potential effects on Canada and other countries. Social and scientific methods will be applied throughout the units and students will develop a basis of understanding essential to future environmental studies (geography, geology, meteorology, biology, etc.).

Learning Resources:

Will include but not be limited to:
•Articles, resources and data available on the internet
•Fact sheets and information available from Pembina Climate Change Awareness and Education Action Kit

Videos:
•Turning Down the Heat, Pembina Institute.

Books
•Climate Change Poster Series. Government of Canada.

Additional Information:

This is a new course based in part on the numerous climate change resource kits produced in recent years. The subject matter of this course is evolving and more resources are becoming available. The course will require some fine tuning as it evolves.

The essence of the course is to provide students the opportunity to examine a topic which will have impacts on their personal and future professional lives.

Grade Level of Course: [ ] 10  [X] 11  [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

Learning Resources:

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:
1. Image development and design strategies
2. Context
3. Visual elements and principles and design as applied to textiles
4. Materials, technologies and processes
The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Grade Level of Course:  10  X 11  12

Number of Course Credits: 1

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: NONE

Course Synopsis:

This introductory course will focus primarily on digital photography and multi-media for communication and art. Although this course incorporates many of the compositional and technical aspects of traditional photography it makes extensive use of computers and digital technology. This course has been developed to help students explore the range of personal and social expression through digital photography and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic photographic and compositional skills and learn how to apply them to different output or presentation forms: internet, slide shows, home videos, advertising, historical documentation, publishing, galley exhibitions, and more. Students will make digital photographs and multi-media presentations. They will be expected to develop an appreciation of photography and multi-media works and respond to them critically in an informed and responsible manner.

Learning Resources:

Will include but not limited to:

- cameras, computers, video editing equipment and materials
- visits to photographic studios and visits from professional photographers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

Grade Level of Course:  
0  10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to allow students to explore the range of personal and social expression offered by the medium of film. Students will develop individual skills in the key film production elements of sound, lights, camera, film editing and post-production, screen writing and acting, and will, through their participation in the production of a course focussed film, learn the various functions of a motion picture crew and the work habits essential to future success in the film industry.

Learning Resources:

Will include but not be limited to:
- Camera, sound, video editing equipment manuals,
- Visits to professional production houses, film and television sets,
- Professional seminars and workshops
- Articles, resources regarding filmmaking available on the internet

Books:
- The Movies – A Short History, Mast and Kawin, ISBN 0-205-19670-5, Allyn and Bacon
- Reel West Digest

Additional Information:

This is a new course that will inevitably require some fine-tuning as it evolves. The essence of it is to provide a hands-on experiential opportunity for the students to work with experienced staff and industry professionals to create real movies and to develop their own sense of cinematic style.

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

**Course Synopsis:**

This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own.

**Learning Resources:**

Will include, but not be limited to:

Books:
- Learning by Designing – Volume 1 and 2 – Jim Gilbert
- Karin Clark
- Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library

**Additional Information:**

Visitation to the following is recommended:
- The Simon Charlie Society
- Cowichan Band’s Heritage Centre
- Provincial Museum
- The Internet and Libraries

- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: Home Economics 9 recommended

Course Synopsis:

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

Learning Resources:

Will include but not limited to:
- A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
- Video series called Avventura available at www.avventuratv.ca
- Food Safe videos

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means.

This course may be offered as a class outside the main timetables, as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

Learning Resources:

May include but not limited to the following:
- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay
- All Together Now. Ukens, Lorraine
- Working Together. Ukens, Lorraine
- Activities that Teach. Jackson, Tom
- More Activities that Teach. Jackson, Tom
- Team Building through Physical Challenges. D.R. Glover and D.W. Midura
- The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
- Catch them Being Good. DiCicco, Tony
- The Leadership Challenge. Kouzes and Posner
- Videos (eg ‘Pay It Forward’)

Course Code: YLEAD 12

Category: Other

Grade Level of Course: [ ] 10 [ ] 11 [x] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: none

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 12 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means.

Participation in class activities and volunteering time in the school/community is essential to achieving the course goals. This course is offered as a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. This course continues and summarizes the core units or themes of study, which increase in depth and have higher expectations at each grade of leadership from grade 10 – 12. In the grade 12 level of leadership, students will be expected to organize school or community events. The focus areas of development for grade 12 students during school and community events will be effective leadership skills, time management principles, planning for success and conflict resolution styles.

Learning Resources:

My include but not limited to the following:

- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay

10  
11  
12  

Number of Course Credits: 4
Number of Hours of Instruction: 120
Date Approved: February 4, 2004
Prerequisites: none

Course Synopsis:

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students’ knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

Learning Resources:

Will include, but not be limited to-
- Dark room equipment
- SLR cameras
- Articles and information journals concerning photography.
- Film and print paper.
- Samples of previous successfully completed assignments.

- [x] 11  
- [ ] 12

Number of Course Credits: 4

Number of Hours of Instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

Learning Resources:

Will include, but not be limited to:

Books
- Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
- Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
- Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:
- Visit to local kayak operator, with an introductory kayak workshop
- Field trips to local areas representative of each ecosystem studied
- Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

Date Approved: February 2, 2005

Prerequisites: None

Course Synopsis:

This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

Learning Resources:

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Grade Level of Course:  

			

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 4, 2004
Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:
1. Image development and design strategies
2. Context
3. Visual elements and principles and design as applied to textiles
4. Materials, technologies and processes

The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Course Synopsis:

This introductory course will focus primarily on digital photography and multi-media for communication and art. Although this course incorporates many of the compositional and technical aspects of traditional photography it makes extensive use of computers and digital technology. This course has been developed to help students explore the range of personal and social expression through digital photography and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic photographic and compositional skills and learn how to apply them to different output or presentation forms: internet, slide shows, home videos, advertising, historical documentation, publishing, galley exhibitions, and more. Students will make digital photographs and multi-media presentations. They will be expected to develop an appreciation of photography and multi-media works and respond to them critically in an informed and responsible manner.

Learning Resources:

Will include but not limited to:

- cameras, computers, video editing equipment and materials
- visits to photographic studios and visits from professional photographers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations

Course Code: YDRS 10

Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:  February 4, 2004

Prerequisites:  None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

This course has been developed to allow students to explore the range of personal and social expression offered by the medium of film. Students will develop individual skills in the key film production elements of sound, lights, camera, film editing and post-production, screen writing and acting, and will, through their participation in the production of a course focused film, learn the various functions of a motion picture crew and the work habits essential to future success in the film industry.

Learning Resources:

Will include but not be limited to:
• Camera, sound, video editing equipment manuals,
• Visits to professional production houses, film and television sets,
• Professional seminars and workshops
• Articles, resources regarding filmmaking available on the internet

Books:
• The Movies – A Short History, Mast and Kawin, ISBN 0-205-19670-5, Allyn and Bacon
• Reel West Digest

Additional Information:

This is a new course that will inevitably require some fine-tuning as it evolves. The essence of it is to provide a hands-on experiential opportunity for the students to work with experienced staff and industry professionals to create real movies and to develop their own sense of cinematic style.

Course Code: YFNA 10

Category: Fine Arts, Design, and Media

Grade Level of Course: ☑ 10 ☐ 11 ☒ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own.

Learning Resources:

Will include, but not be limited to:

Books:
- Learning by Designing – Volume 1 and 2 – Jim Gilbert
- Karin Clark
- Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library

Additional Information:

Visitation to the following is recommended:

Course Name: INTRO TO SCREEN & STAGE WRITING 10

Course Code: YISSW 10

Category: Liberal Arts and Humanities

Grade Level of Course:  
- [X] 10
- [ ] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 15, 2004

Prerequisites: NONE

Course Synopsis:

The Introduction to Writing for the Stage and Screen 10 course has been developed to allow students to explore the range of personal and social expression offered by the medium of writing for the screen and/or writing for the stage. Students will develop individual skills in the key writing production elements of: effective narrative (both formalistic and realistic), character and plot development, genre and tone, original and adaptive script and screen writing techniques. Students will learn, through their participation in the production of course-focused scripts for the screen and/or the stage (a) how to format a variety of useable scripts, including from original material and from adapted material, (b) how to adapt the script through the stages of development needed for the writing to function in a motion picture. The students will develop scripts for use in various stage and screen genres. The students will (a) learn professional work habits (b) compile a portfolio of work, and (c) gain invaluable hands-on experience and contacts that will be essential for them in their future careers.

Course Name: Italian Foods 10
Course Code: YITFD 10
Category: Tourism, Hospitality, and Foods

Grade Level of Course:  

Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 4, 2004
Prerequisites: Home Economics 9 recommended

Course Synopsis:

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

Learning Resources:

Will include but not limited to:
· A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
· Video series called Avventura available at www.avventuratv.ca
· Food Safe videos

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

Learning Resources:

May include but not limited to the following:

- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay
- All Together Now. Ukens, Lorraine
- Working Together. Ukens, Lorraine
- Activities that Teach. Jackson, Tom
- More Activities that Teach. Jackson, Tom
- Team Building through Physical Challenges. D.R. Glover and D.W. Midura
- The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
- Catch them Being Good. DiCicco, Tony
- The Leadership Challenge. Kouzes and Posner
- Videos (eg ‘Pay It Forward’)

Grade Level of Course:  
- [ ] 10
- [x] 11
- [ ] 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: none

Course Synopsis:

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students’ knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

Learning Resources:

Will include, but not be limited to:
- Dark room equipment
- SLR cameras
- Articles and information journals concerning photography.
- Film and print paper.
- Samples of previous successfully completed assignments.

Course Synopsis:

The Script and Screen Writing 11 course has been developed to further allow students to explore the range of personal and social expression offered by the medium of writing for the screen and/or writing for the stage. Students will develop individual skills in the key writing production elements of: effective narrative (both formalistic and realistic), character and plot development, genre and tone, original and adaptive script and screen writing techniques. Students will learn, through their participation in the production of course-focused scripts for the screen and/or the stage (a) how to format a variety of useable scripts, including from original material and from adapted material, (b) how to adapt the script through the stages of development needed for the writing to function in a motion picture. The students will produce scripts will be produced in various genres, including but not limited to drama, animation, and stage. The students will (a) learn work habits (b) compile a portfolio of work, and (c) gain invaluable hands-on experience that will be essential for them in their future success in the film industry.

Course Name: Adventure Tourism & Coastal Ecosystems 11

Course Code: YATCE 11

Category: Science and Applied Sciences

Grade Level of Course: ☑️ 10 ☑️ 11 ☑️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This exciting new course, open to students in grades 11 and 12, is for anyone interested in the environment and outdoor recreation/tourism. Students will study three different ecosystems: Coastal Forest, Intertidal, and Freshwater. They will learn principles of ecology, and natural history of plant and animal species found within each ecosystem.

Students will explore local and global environmental issues, and suggest solutions for these problems. Finally, students will be introduced to the principles of adventure tourism, and will develop key skills necessary to get a job in this field. Students will also be given the opportunity to learn sea kayaking and will be introduced to a local kayak outfitter.

This course combines academic science, field exploration and technical skills necessary to succeed in environmental studies or to gain employment in the adventure tourism industry.

Students will be required to pay a course fee to cover field trip expenses, and must be available one weekend for an introduction to sea kayaking.

Learning Resources:

Will include, but not be limited to:

Books
- Understanding Basic Ecological Concepts, Audrey Tomera, Weston Walch Publisher
- Environmental Science Activities Kit, Michael Roa, Wiley Canada, 2002
- Protected Areas: Preserving Our Future, BC Parks, 2002

Other Resources:
- Visit to local kayak operator, with an introductory kayak workshop
- Field trips to local areas representative of each ecosystem studied
- Navigation charts and topographic maps, compasses, tide and current tables, parallel rulers, dividers

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to allow students to explore the issue of climate change. Students will gain awareness and understanding of global weather and climate patterns, causes of climate change, regional and global impacts and responses to climate change.

The purpose of the course is to provide an overview of climate change/global warming issue, from its discovery to its potential effects on Canada and other countries. Social and scientific methods will be applied throughout the units and students will develop a basis of understanding essential to future environmental studies (geography, geology, meteorology, biology, etc.).

Learning Resources:

Will include but not be limited to:

• Articles, resources and data available on the internet
• Fact sheets and information available from Pembina Climate Change Awareness and Education Action Kit

Videos:

• Turning Down the Heat, Pembina Institute.

Books

• Climate Change Poster Series. Government of Canada.

Additional Information:

This is a new course based in part on the numerous climate change resource kits produced in recent years. The subject matter of this course is evolving and more resources are becoming available. The course will require some fine tuning as it evolves.

The essence of the course is to provide students the opportunity to examine a topic which will have impacts on their personal and future professional lives.

Course Synopsis:

This course has been developed to help students explore the range of personal and social expression through Graphic Design using computers and multi-media as a communication tool and art form. They will be able to investigate the diverse opportunities and possibilities for related careers and interests. Students will learn basic Graphic Design, composition and visual communication skills and how to apply them to different output or presentation forms: internet, slide shows, advertising, historical documentation, publishing, exhibitions, and more. Students will use computers extensively to create graphic illustrations, photographs, typography, and symbolism for publishing, multi-media presentations, and other methods of communication. They learn some basic marketing techniques, be aware of marketing strategies and how they affect a target audience and make critical, informed responses to them. They will be expected to develop an appreciation of Graphic Design and how it is used to communicate ideas, information, and opinions. They will recognize that it is an extensive and dominant force influencing and shaping the social economic condition of our lives.

Learning Resources:

Will include but not limited to:

- computers, graphic design software, video editing equipment and materials
- visits to print shops and graphic design studios and visits from professional designers and personnel in related fields
- professional seminars and workshops
- Internet sources, related articles and sites
- videos and multi-media related presentations
- books and magazines

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites:

Course Synopsis:

Students are introduced to Textile Arts and Design, production processes, and principles and elements of design. Through exploration of various techniques studied, students gain knowledge and inspiration through completion of individual projects.

This course has been developed to support and encourage students to explore traditional and contemporary art and craft techniques using fiber. Students will explore areas of textile arts: including but not limited to macramé, weaving, crochet and stitchery, batik, applique, quilting, dyeing and embellishment of fabric.

Learning outcomes are grouped under the following curriculum organizers:
1.Image development and design strategies
2.Context
3.Visual elements and principles and design as applied to textiles
4.Materials, technologies and processes

The approach supports skill development and encourages pride in creating well crafted work.

Individual creativity is fostered and students will apply aesthetics and art criticism when creating their projects. Students will refine and extend their understanding and appreciation of the crafts as expressive arts.

Length of time on each unit is recommended only, however, if a group of students shows a deeper interest in a specific unit, then time allotments could be adjusted but the total hours for the course should remain the same. The time devoted to each learning outcome is determined by the teacher; however several outcomes can be addressed simultaneously.

Prerequisites: None

Course Synopsis:

This is a beginner’s course designed to give an introduction to dining room and customer service. Included in this course is the history and evolution of food service with a special emphasis on the cultural and social place in society that service holds.

The objective of this course is to provide students with useable, practical skills that will prepare them to be a part of the work force. There will be some written work but the majority of the course is based on their practical performance and hand to eye skills, as well as timing. A dress code is also stressed to adhere to professional standards. A measurement that a student has met the learning outcomes is evident by their ability to provide accurate and attentive service to the customer.

Will include but not be limited to:
· Camera, sound, video editing equipment manuals,
· Visits to professional production houses, film and television sets,
· Professional seminars and workshops
· Articles, resources regarding filmmaking available on the internet

Books:
· The Movies – A Short History, Mast and Kawin, ISBN 0-205-19670-5, Allyn and Bacon
· Reel West Digest

Additional Information:

This is a new course that will inevitably require some fine-tuning as it evolves. The essence of it is to provide a hands-on experiential opportunity for the students to work with experienced staff and industry professionals to create real movies and to develop their own sense of cinematic style.

Course Name: First Nations Art 10
Course Code: YFNA 10
Category: Fine Arts, Design, and Media
Grade Level of Course: 10
Number of Course Credits: 4
Number of Hours of instruction: 120
Date Approved: February 4, 2004
Prerequisites: None

Course Synopsis:
This course has been developed to reflect the integrated view of the world held by traditional First Nations cultures. This balance of physical, emotional, mental and spiritual values exists in the material world of stories, crests, house posts, photographs, baskets, blankets, ceremonial objects and paintings.

Using wood as a primary medium, students are encouraged to explore and create carvings reflecting the enduring values and beliefs of First Nations cultures.

Students will be guided and encouraged in skill development and tool use toward mastery of three-dimensional wood sculpture. With each progressive year, students are expected to evolve and transform their skill and knowledge of West Coast Native Art forms, all with the goal of tolerance and understanding of cultures different from their own

Learning Resources:
Will include, but not be limited to:

Books:
- Learning by Designing – Volume 1 and 2 – Jim Gilbert
- Karin Clark
- Books by: Bill Reid, Robert Davidson, and other compilations of West Coast Native Art, in the classroom library

Additional Information:
Visitation to the following is recommended:
- The Simon Charlie Society
- Cowichan Band’s Heritage Centre
- Provincial Museum
- The Internet and Libraries

Use Internet and Library resources to explore First Nations art and culture

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 6, 2006

Prerequisites: SCIENCE 10 & PRINCIPLES OF MATH 10 RECOMMENDED

Course Synopsis:

Forensic Science or Crime Scene Reconstruction is the use of scientific method, physical evidence, deductive reasoning and their interrelationships to gain knowledge of the events leading to the commission of a crime. Forensic Science 11 is a course that focuses on giving students a chance to gain and apply knowledge from the areas of history, math, biology, chemistry, physics, earth science, archeology, anthropology, law, medicine, and professional/technical writing.

This course will expose students to current forensic science methods as well as discussing past practices and reasons for advancements in technology. This course will include a series of inquiry labs, discussion of case studies, field trips and guest speakers, internet research and practical labs that will allow students to strengthen skills of observation, interpretation, reasoning, and formal presentation. The students in this course will be required to design and carry out scientific investigations.

Course Name: Ground Search and Rescue 11

Course Code: YGSAR 11

Category: Other

Grade Level of Course: □ 10  □ 11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: November 3, 2004

Prerequisites: None

Course Synopsis:

This Ground Search and Rescue (GSAR) course has been designed as the entry level standard for ground and inland water search and rescue within the Province of British Columbia. Students completing training cannot receive full membership status until they reach the age of 19.

Topics in this course range from basic survival skills to team oriented searches. Students will gain practical experience in compass use, map reading, basic tracking and other relevant skills that allow them to help in an emergency backwoods situation. They will be given the opportunity to meet and work with a team of practicing GSAR members in a mock search overnight activity. Students will develop insight into the typical responses of lost persons and the resulting trauma of family and friends.

Finally, this course emphasizes team building skills and teamwork in order to maintain a clear, calm perspective in physically and emotionally demanding situations. Students are expected to achieve a mastery level (70%) on all written and practical assessments. All students are expected to pay a course fee of $30.00 and must provide their own footwear and appropriate outdoor clothing. Fieldwork will occur in the forests near the school, on school fields and on field trips. ALL STUDENTS must complete the overnight activity to receive full credit for this course.
Learning Resources:

May include but not limited to -
- GSAR Manual
- GSAR Instructor Guide and Manual
- Take a practical course on wilderness survival like the following: Basic Wilderness Survival (Mors Kochanski, Prof, Uof A)

The following books have proved valuable in this course:
4. 98.6 Degrees: The Art of Keeping Your Ass Alive, Cody Lundin, Gibbs Smith Publishing
7. The SAS Handbook of Living Off the Land, Chris McNab, Amber Books LTD
8. Outdoor Safety and Survival, Judi Lees, Greystone Books
12. Our Favourite Hikes in the Lake Cowichan Area, John and Georgie Clark, Rick Nott, Community Economic Adjustment Committee

Videos:
- Bearsafe (BC Min of Env)
- Northern Wilderness Survival (Kochanski)
- Lost in the Wilderness

Course Name: Italian Foods 10

Course Code: YITFD 10

Category: Tourism, Hospitality, and Foods

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: Home Economics 9 recommended

Course Synopsis:

This is a course designed for students who may or may not have had previous foods courses.

This course will include both theory and practical components. After completing a required safety unit, students will be introduced to classic ingredients used in Italian cooking.

In addition, students will explore the geography of Italy and how this has historically affected regional cooking. Modern and locally available substitutions for classic ingredients are also investigated.

Students will be completing labs on each of the elements of a traditional Italian meal: antipasti, pasta, gnocchi, risotto, polenta, soups, meat, poultry, vegetables, salads, breads, pizzas, focaccia, desserts and holiday foods.

The objective of this course is to inspire students to develop an appreciation for cooking and an interest in other cultures, while developing basic cooking skills within the context of a nutritionally sound diet.

Learning Resources:

Will include but not limited to:
- A variety of cookbooks highlighting Italian cuisine, available at most public and secondary school libraries.
- Video series called Avventura available at www.avventuratv.ca
- Food Safe videos

Course Code: YLEAD 10

Category: Other

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 2, 2005

Prerequisites: none

Course Synopsis:

The purpose of this course is to provide students with the opportunity to understand and appreciate the nature of leadership and being a group member, as well as the values and benefits of being of service to others. Leadership 10 is designed to give students an awareness of social and civic responsibility and an understanding of effective leadership styles and methods. It is based on the concept that leadership can be developed through a variety of service opportunities. An essential part of this class is active hands on, minds on experiential learning. Students will develop lifelong skills in the areas of organizing, self-image, goal-setting, time management, public speaking, school and community service, public relations, communication skills, conflict resolution and mediation skills by using basic psychology, decision making, team building and an understanding of various leadership styles. Students will develop these skills in and outside of the classroom through theoretical and practical means. This course may be offered a class outside the main timetable as well as individual time spent volunteering, planning, organizing and executing activities and events. In the Grade 10 level of leadership students will be expected to operate events in the school and in the community. The focus areas for grade 10 students during school and community events will be communication skills, positive self-esteem and self-image, investigating personal strengths and weaknesses and developing as an effective group member.

Learning Resources:

May include but not limited to the following:
- The Seven Habits of Highly Effective Teens. Covey, Sean
- Growing the Distance. Clemmer, Jim
- Life Strategies for Teens. McGraw, Jay
- All Together Now. Ukens, Lorraine
- Working Together. Ukens, Lorraine
- Activities that Teach. Jackson, Tom
- More Activities that Teach. Jackson, Tom
- Team Building through Physical Challenges. D.R. Glover and D.W. Midura
- The Speaker’s Handbook. Sprague, Jo and Douglas Stuart
- Catch them Being Good. DiCicco, Tony
- The Leadership Challenge. Kouzes and Posner
- Videos (eg ‘Pay It Forward’)

Course Name: Peer Counselling 10

Course Code: YPCOU 10

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: None

Course Synopsis:

Peer Counselling is designed to provide training to students in communication, interpersonal and specific intervention skills. These skills enable students to help their peers with the problem-solving process, and take an active role in helping to create and deliver prevention programs in a Secondary School.

Students will learn to identify a problem, help others understand the essence of a problem and help others with the solution process by seeking information and strategies.

Learning Resources:

Will include, but not be limited to -
- Peer Counselling Journal - prepared by Janice Rose
- The Peer Counselling Starter Kit - by Rey A. Carr & Greg Saunders
- Cool Solutions - by Deb Hale and Marion McCristal

Course Name: Peer Counselling 11

Course Code: YPCOU 11

Category: Health and Human Services

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: December 15, 2004

Prerequisites: None

Course Synopsis:

Peer Counselling is designed to provide training to students in communication, interpersonal and specific intervention skills. These skills enable students to help their peers with the problem-solving process, and take an active role in helping to create and deliver prevention programs in a Secondary School. Students will learn to identify a problem, help others understand the essence of a problem and help others with the solution process by seeking information and strategies.

Learning Resources:

Peer Counselling Journal - prepared by Janice Rose
The Peer Counselling Starter Kit - by Rey A. Carr & Greg Saunders
Cool Solutions - by Deb Hale and Marion McCristal

Course Name: PERSONAL FITNESS & LIFESTYLES 11

Course Code: YPFTL 11

Category: Fitness and Recreation

Grade Level of Course:  ☑️ 10  ☑️ 11  ☐️ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved:   February 15, 2006

Prerequisites:   PE 10 RECOMMENDED

Course Synopsis:

This Physical Education course is primarily targeted to those students who wish to understand the components of fitness and how those can be integrated into a healthy and active lifestyle. Through regular training sessions at a local fitness facility, students will gain a practical understanding of the benefits of a balanced fitness plan. This course will also provide an opportunity for students to develop leadership skills as well as experience a variety of activities that they could integrate into their current and future lifestyle. The goal of this course is to give students the knowledge and practical understanding of how to live a healthy lifestyle.

Course Name: Photography 11

Course Code: YPHOT 11

Category: Fine Arts, Design, and Media

Grade Level of Course: ☒ 10 ☒ 11 ☐ 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: February 4, 2004

Prerequisites: none

Course Synopsis:

This is a beginners’ course designed to give each student a good foundation into black and white photography using the 35 mm camera format.

The course will include an introduction to the history of the development of photography, as well as the evolution of the camera. Students will be operating cameras and enlargers, composing photographs, developing negatives, printing photographs, and learning display techniques.

The objective of this course is to awaken and nurture the students’ visual communication skills by a variety of photographic techniques culminating in a portfolio of fine photographs.

Students will be required to do some written assignments related to photography. In order to measure the students' knowledge and understanding of photography, quizzes and tests will have to be written culminating in a final exam.

Equipment will be available to the students, but it is to the student’s advantage to own a 35 mm single lens reflex camera.

Learning Resources:

Will include, but not be limited to-
· Dark room equipment
· SLR cameras
· Articles and information journals concerning photography.
· Film and print paper.
· Samples of previous successfully completed assignments.

Course Name: Musical Theatre 11

Course Code: YMUTH 11

Category: Fine Arts, Design, and Media

Grade Level of Course:  

10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2004

Prerequisites: None

Course Synopsis:

This course has been developed to support, encourage and create a lifelong passion for the performing arts through the medium of Musical Theatre. As the first of two courses in Musical Theatre offered at Mount Elizabeth Secondary School (M.E.S.S.), students begin to develop their skills for performance with high expectations, performance exposure and leadership building requirements. Students learn the value of developing community, to triumph over diversity, and a lifelong confidence in performance skills as they gain knowledge of the three strands of musical theatre: vocals, movement and acting.

In the culmination of all Musical Theatre courses students will produce a professional level Broadway-style musical for the school, community and the city of Kitimat. Learning Outcomes for the course are grouped under the curriculum organizers: Building Community (Opening the Theatre Company), Pre-Production, Production and Post- Production (Reflection and Closing the Theatre Company).

Students are expected to meet instructor expectations including written, audio and video recordings of student work such as character analysis, dance tape and song recordings for analysis and further direction. These examples of student work act as motivating tools for movement, line and song deadlines for differing stages of the rehearsal process. Students are also given the opportunity for self and peer assessment in each of the four units. The approach supports student ownership and pride in performance as well as providing various skill sets and new approaches to thinking and learning.

At the grade 11 level, students are exposed to introductory level acting method but are still granted opportunities for leadership and solo performance within the framework of a Musical. This also encourages meaningful methods of collecting, interpreting and presenting a variety of perspectives on significant issues pertaining to the journey towards the production and the reflective process after its completion.

Course Name: Peer Counselling & Leadership 10

Course Code: YPCLD 10

Category: Fine Arts, Design, and Media

Grade Level of Course: 10

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: May 5, 2004

Prerequisites: none

Course Synopsis:

Prepare students to become effective leaders within their school community; to learn and utilize the basics in counselling and communication, to assist peers and to develop a more acute understanding of themselves and others. Through topics and intervention strategies discussed, students will be better prepared for crisis intervention; through mentorship the peer counsellors become role models for the younger student population. The skills and knowledge the students will acquire will begin the process by which they may become better citizens in the future.

Learning Resources:

TERM I
Peer Counselling: Empowering Youth - Capilano Community Services Society
Peer Helping: A Training Manual - Greg Brigman and Barbara Earley
The Peer Counselling Starter Kit: Student Workbook - Gail Roberts U.Vic.
100 Ways to Enhance Self-concept in the Classroom
Energizers and Icebreakers - Elizabeth Sabrinsky Foster Ed. D.
More Energizers and Icebreakers - Elizabeth S. Foster-Harrison
Energize - Carol Apacki
Warm Ups & Wind Downs: 101 Activities for Moving and Motivating Groups - Sandra Peyser Hazouri and Miriam Smith McLaughlin

TERM II
Let's Live - A School Based Suicide Awareness and Intervention Program
Conflict Resolution and Mediation for Peer Helpers - Don L. Sorenson Ph.D.
Peer Mediation Conflict Resolution in Schools - Fred Schrumpf, Donna Crawford, H. Chu
Ice Beyond Cool - CBC Production
Patrick's Story - National Film Board
Working it out at Madison - J. Weston Walch

50% of term based on instructor/peer counselling skills video evaluations
20% of term based on student participation
Course Synopsis:
This is an exciting and innovative program for students wishing to pursue a career in medicine, health and wellness or sports related occupations. The course will focus on how your body is structured and functions. It covers nutrition and healthy diets, exercise management, injury prevention and rehabilitation. First Aid and CPR certificates will be obtainable. Students will probably be able to obtain preferential enrollment into university and college programs after completing this course. This course will provide the opportunity to gather portfolio evidence in Health and Human Services and Science and Applied Science.

Learning Resources:
- Textbook: Structure and Function of the Body by Thibodeau & Patton,
- Videos, Internet, Guest speakers.

Additional Information:
Students have opportunities to attend various health related spotlight sessions, and field trips to colleges, medical labs and health centres.
The 100 hours of work experience is most valuable to gain knowledge of the workplace and make contacts in the community for an additional 4 credits.
Articulation agreements with local colleges have recognized the value of this course.

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 12, 2005

Prerequisites: PE 10

**Course Synopsis:**

Athletic Leadership 11 is a course designed to provide highly motivated students with an opportunity to enhance their leadership and organizational skills while working within the Salmon Arm Secondary Athletic Program. Students will be part of a Student Athletic Department that will work closely with coaches and student/athletes to provide positive athletic opportunities for SAS students. They will be responsible for developing programs to support coaches and teams and to promote student/athlete recognition. All Athletic Leadership students will undertake minor officials tasks to support athletic competition in several sports. The course will be offered outside of the regular timetable on a yearlong basis. Students will be required to have a high degree of self-motivation as a great deal of the course work will be in self-directed activities. Because successful applicants to the course will be required to participate in activities outside of the regular school day they may need to make alternate arrangements for transportation home.
**Athletic Leadership 12** has added a certification requirement that will further enhance the students’ ability to take on leadership roles in athletics and to work towards career goals in sports.

Category: Liberal Arts and Humanities

Grade Level of Course: 

Number of Course Credits: 2

Number of Hours of instruction: 100 Hours

Date Approved: April 11, 2006

Prerequisites: Application and interview

Course Synopsis:

The AVID elective encompasses the key elements that promote academic success and ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components – AVID curriculum content, Avid Tutorials and AVID motivational activities. The curriculum component of the AVID elective focuses on:

- WICR-R strategies (Writing, Inquiry, Collaboration and Reading),
- Developing skills that support Academic Success (eg. Organizational skills, Note-taking and Study skills, Test-taking skills, Collaborative learning and study skills, Communication and Presentation skills, Research skills),
- Acquiring information about post-secondary opportunities

www.bcsta.org
AVID Program Implementation Essentials are the principles that define and guide the implementation of the AVID Program. All 11 Essentials must be addressed.

1. SELECTION
AVID student selection must focus on students in the middle who have untapped academic potential and would benefit from AVID support to improve their achievement and begin post-secondary preparation.

2. PARTICIPATION
AVID program participants, both students and staff, must choose to participate.

3. SCHEDULING
The school must be committed to full implementation of the AVID Program, with the AVID elective class available within the regular academic school day.

4. RIGOR
AVID students must be enrolled in a rigorous course of study that will enable them to meet requirements for post-secondary enrollment.

5. WRITING
A strong, relevant writing curriculum must provide the basis for instruction in the AVID elective class.

6. INQUIRY
Inquiry must be used as a basis for instruction in the AVID class.

7. COLLABORATION
Collaboration must be used as a basis for instruction in the AVID classroom.

8. TUTORIALS
A sufficient number of trained tutors must be available in the AVID class to facilitate student access to rigorous curricula.

9. DATA
AVID school/districts must provide program implementation and student progress data. These will be monitored through the AVID Data System, with results analyzed to inform the AVID certification process.

10. RESOURCES
The school or district must identify resources for program costs; agree to implement AVID Program Implementation Essentials; and work toward participation in annual AVID certification. Commitment to ongoing participation in AVID staff development is also required.

11. SCHOOL SITE TEAM
An active, interdisciplinary site team must collaborate on issues of student access to, and success in, rigorous post-secondary preparatory courses.

School Name: Salmon Arm Senior Secondary

Course Name: AVID 11B/Planning 10

Course Code: YAVID11B

Category: Liberal Arts and Humanities

Grade Level of Course:  ☐ 10  ☒ 11  ☐ 12

Number of Course Credits: 4 Credits

Number of Hours of instruction: 100 Hours

Date Approved: April 11, 2006

Prerequisites: AVID 11A/Planning 10

Course Synopsis:

The AVID elective encompasses the key elements that promote academic success and ensure successful preparation for post-secondary opportunities. A typical week in the AVID elective is split into three main components – AVID curriculum content, Avid Tutorials and AVID motivational activities. The curriculum component of the AVID elective focuses on:
- WICR-R strategies (Writing, Inquiry, Collaboration and Reading),
- Developing skills that support Academic Success (eg. Organizational skills, Note-taking and Study skills, Test-taking skills, Collaborative learning and study skills, Communication and Presentation skills, Research skills)
- Acquiring information about post-secondary opportunities

Additional Information:
AVID Program Implementation Essentials are the principles that define and guide the implementation of the AVID Program. All 11 Essentials must be addressed.

1. SELECTION
AVID student selection must focus on students in the middle who have untapped academic potential and would benefit from AVID support to improve their achievement and begin post-secondary preparation.

2. PARTICIPATION
AVID program participants, both students and staff, must choose to participate.

3. SCHEDULING
The school must be committed to full implementation of the AVID Program, with the AVID elective class available within the regular academic school day.

4. RIGOR
AVID students must be enrolled in a rigorous course of study that will enable them to meet requirements for post-secondary enrollment.

5. WRITING
A strong, relevant writing curriculum must provide the basis for instruction in the AVID elective class.

6. INQUIRY
Inquiry must be used as a basis for instruction in the AVID class.

7. COLLABORATION
Collaboration must be used as a basis for instruction in the AVID classroom.

8. TUTORIALS
A sufficient number of trained tutors must be available in the AVID class to facilitate student access to rigorous curricula.

9. DATA
AVID school/districts must provide program implementation and student progress data. These will be monitored through the AVID Data System, with results analyzed to inform the AVID certification process.

10. RESOURCES
The school or district must identify resources for program costs; agree to implement AVID Program Implementation Essentials; and work toward participation in annual AVID certification. Commitment to on-going participation in AVID staff development is also required.

11. SCHOOL SITE TEAM
An active, interdisciplinary site team must collaborate on issues of student access to, and success in, rigorous post-secondary preparatory courses.
The mission of AVID is to ensure that students, and most especially the students in the academic middle, will be adequately prepared to enter post-secondary educational programs when they graduate from high school. Students in the academic middle are often under-achieving. With support, encouragement, and individual determination, they can acquire the skills and knowledge that are necessary for academic success.

This course has been offered at Salmon Arm Senior Secondary as a locally developed course for the past seven years. During that time, we have also been able to offer the course to groups of students with similar fitness goals (such as athletes) and at a variety of time periods during the day (AM – before the regular school timetable begins, PM – after the regular school timetable is completed and during the regular school timetable). The course provides an alternative to the regular Physical Education 11/12 courses for students who no longer desire a skill-related activity course, but wish to be involved in a stronger concentration of health-related activities.

Course Code: YHORT 12

Category: Science and Applied Sciences

Grade Level of Course: 10  11  12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April 12, 2005

Prerequisites: Horticulture 11

Course Synopsis:

Horticulture 11. Students taking Horticulture 12 will continue with and expand their knowledge about horticulture. As with Horticulture 11, the focus of the program will be a ‘hands on’ approach to learn about plants. Students will grow an expanded and more challenging selection of plants, first in the classroom and moving into the greenhouse as weather permits. Students will be required to identify between forty and fifty additional plants, along with those learned in Horticulture 11. Students in Horticulture 12 are responsible for pruning the trees and shrubs located on the SASS grounds.

Course Synopsis:

This course is a teacher directed program in which students participate in a support program designed to teach and reinforce skills necessary to be a successful student. The course is spiral in nature and is often dependent on the blending of subject area material with the strategies being reinforced and taught. The student will be expected to engage in individual/small/group whole class activities and discussions and complete assignments which pertain directly to the content covered in the Learning Strategies course as defined in the learning outcomes section.
Course Synopsis:

Learning Strategies 12 is intended to develop mastery in the usage of learning strategies for students who are experiencing difficulties in subject areas and who require ongoing reinforcement and support in their learning behaviours. Grade 12 students will be expected to show a degree of mastery with binder organization, planner use and homework completion as well as starting to focus more on personal goal setting. It is expected that a learning journal will be kept.

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June, 2006

Prerequisites: none

Course Synopsis:

This course is designed to expose students to the wonders of travel while emphasizing the interaction with and respect for indigenous cultures. Students will be expected to demonstrate mature and appropriate attitudes and behaviors during all phases of the course. Students will be involved in activities outside of the timetable planning and fund raising for the trip, as well as learning about the language, culture and history of the countries to be visited. Some of the fund raising activities in which the students participate will contribute to the school and community. Port Hardy Secondary teaching staff will be accompanying the students to the countries visited, ensuring a connection between the sites visited and subjects studied in the classroom. Along with the teachers, there will be an experienced, professional multi-lingual Tour Escort who will accompany the travelers throughout their tour, providing full-time guidance and assistance.

**Course Synopsis:**

First Nations Leadership 10 is an introductory course to the development of leadership skills.

First Nations Leadership is a program for First Nations Students who need to improve their communication skills in the areas of speaking, listening, reading and writing. They will have the opportunity to enrich the development of oral language skills, to build self confidence, and to improve reading and writing skills.

The students will work on these skills by working of a variety of projects. These include: reading to elementary school students, reading and discussing novels with First Nations Content, responding to First Nations Art, participating in workshops and open houses for students and parents, participating in activities such as the Mini feast for elementary students, planning and participating a field trip to visit college and university First Nations Programs and organizing fundraising activities for the major field trip to Victoria to see the post-secondary institutions.

**Learning Resources:**

Learning Resources:
• Novels – high interest Low-Vocab novels
• Assessment test
• Field trip to Alert Bay
• Digital camera
• Access to computers
• Portfolio materials
The course would be open to all First Nations students and accessed in two ways. Students can volunteer to take the course or teachers can refer students. They would then be given a language skills assessment to see if they have specific language skills that need development. This would be an English Skills Development (ESD) course. The leadership activities are the vehicle used to maintain interest and encourage personal growth.

Course Name: Journalism 12

Course Code: YJOU 12

Category: Other

Grade Level of Course: 10 11 12

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: June 9, 2005

Prerequisites: none, but Journalism 10 or 11 is recommended

Course Synopsis:

Journalism 12 provides the opportunity for students to build on the skills that they developed in Journalism 10 and 11 and to take a leadership role in the production of The Wailer and Carpe Diem, the school yearbook.

This course is designed to teach students the elements of desktop publishing for the production and writing of a school paper and yearbook. Students will improve their writing, layout, photography and other journalism related skills. Therefore, they will be better prepared for careers in journalism and related fields.

Learning Resources:

Resources: may include but are not limited to the following

Teachers Manual for Springboard To Journalism, Helen Smith, Copyright 1992 Columbia Scholastic Press Association

Grade Level of Course:  

Number of Course Credits: 4

Number of Hours of instruction: 120

Date Approved: April, 2006

Prerequisites: none

Course Synopsis:

Leadership 12 is run outside of the timetable. Students and advisors meet once a week during their lunch hour. Most activities are organized before and after school. Because of this, many students start accruing hours beginning in Grade 9 and finishing the requirements in Grade 12. The course is designed to allow students to develop their sense of social responsibility both within the school and the community. Students will have the opportunity to develop their self image, goal setting, decision making, managing their time, communication skills, public speaking, public relations and conflict resolution. The course will allow students the opportunity to add documentation to their graduation portfolios.

12

Number of Course Credits: 2

Number of Hours of instruction: 60

Date Approved: May, 2006

Prerequisites: Teacher Recommendation

Course Synopsis:

By the end of the Peer Tutoring course, a student will have gained knowledge and skills to teaching and learning. This course motivates and prepares students to help fellow students and to develop their own interpersonal skills. Students will be placed in an appropriate setting based on their skills and interests to assist a teacher. Five days a week peer tutors will be involved in tutoring individuals or small groups or assisting the teacher in other ways. Peer tutors will keep a daily journal to keep track of their daily activities. Diverse placement are available to the peer tutor ranging from electives, to academics to special settings such as the Special Education Program or the Learning Assistance Centre. Students will develop skills and knowledge in factors effecting school success, communication, conflict management, interpersonal relationships, leadership and work experience. These skills will be practiced in students' peer tutoring situations.

Course Code: YYB 12

Category: Fine Arts, Design, and Media

Grade Level of Course: 10  11  X 12

Number of Course Credits: 4

Number of Hours of instruction: 100

Date Approved: June 1, 2004

Prerequisites: None

Course Synopsis:

This course has been developed so that students will be able to identify, compare and contrast images of given subjects through the development of a school yearbook. Students learn the use of various cameras, printers, computers, scanners and editing equipment as they follow the steps in creating a yearbook for the school in which they attend.

As a conclusion for their work, the students will have a visual, hands-on result in the form of a book in which to present to the school and community. Learning outcomes for the course can be seen in the curriculum organizers: Layout and Design, Photography, Editing and Technology.

Learning Resources:

-Photography and editing equipment operations manuals
-Previous school yearbooks as well as yearbook samples from printing companies
-Sample books with various bindings and construction methods
-Articles and information about yearbook production on the Internet
-Book: The Step-by-Step Guide to Photography
### Course Synopsis:

Ce cours vise à développer chez l’élève les compétences nécessaires à l’organisation de sorties en plein air sécuritaires et agréables. Le format de leçons par vidéoconférences et de liens Internet avec l’enseignant exige une grande autonomie de la part des élèves. Le désir d’améliorer sa forme physique et de travailler en équipe est essentiel. L’élève développera sa compréhension théorique du plein air pour en arriver à une pratique plus structurée et sécuritaire.

• L'élève est mature et responsable et respecte les autres
• L'élève souhaite travailler avec tous les élèves
• L'élève souhaite communiquer et interagir avec les autres

Course Synopsis:

Le programme aide-camarade donne à l’élève l’occasion d’aider ses camarades avec leurs études dans le contexte de la salle de classe. L’élève est surveillé, évalué et dirigé par un enseignant responsable. L’élève qui réussit le programme reçoit deux ou quatre crédits en compétences pratiques. L’aide-camarade est une ressource inestimable et joue un rôle essentiel dans le processus d’apprentissage.

Additional Information:

Prérequis :
• La recommandation par 2 membres du personnel ou un membre de l’administration ou un conseiller
• L’élève est mature et responsable et respecte les autres
• L’élève souhaite travailler avec tous les élèves
• L’élève souhaite communiquer et interagir avec les autres

Formation spécialisée, locaux ou équipement requis : Aucun

Résumé du cours : Le programme Aide camarade du conseil scolaire N° 67 donne à l’élève l’occasion d’aider ses camarades avec leurs études dans le contexte de la salle de classe. L’aide camarade travaille avec un âge en particulier ou facilite les activités en petits groupes. L’aide camarade est surveillé, dirigé et évalué par l’enseignant responsable (ou plusieurs, selon le cas). Le programme prépare et encourage l’élève à faire preuve de leadership et à aider les personnes dont les besoins sont divers. L’élève pourra développer sa responsabilité communautaire tout en rehaussant sa compétence en matière de communication, de relations interpersonnelles, de leadership et de travail en équipe. L’élève apprendra à apprécier, valoriser et accepter la dignité qui revient à chaque personne – une valeur qu’il conservera tout au long de sa vie. L’aide camarade recevra deux crédits pour 60 heures ou quatre crédits pour avoir réussi 120 heures de travail.

Raison d’être : L’aide camarade contribuera à l’apprentissage en appuyant la présentation du cours dispensé en salle de classe. L’aide camarade sera assigné à un domaine d’enseignement selon ses compétences et son intérêt pour cette matière et selon la disponibilité. Le rôle d’aide camarade est intégré au processus d’apprentissage dans nos trois écoles secondaires et représente une ressource inestimable. Dans ce cours, l’élève pourra acquérir les connaissances de base en matière d’apprentissage et de théories de gestion du comportement appropriées au rôle d’aide camarade.

Structure du programme :

Unité / ThèmeProgramme aide camarade : Temps alloué :
1 Orientation au programme : 10 heures
2 Classement : 2 heures
31ère session 12 / 27 heures
42e session 12 / 27 heures
53e session 12 / 27 heures
64e session 12 / 27 heures
Total 60 / 120 heures

Aide camarade 10/11/12
Description générale :

Le programme aide camarade donne à l’élève l’occasion d’aider ses camarades avec leurs études dans le contexte de la salle de classe. L’élève est surveillé, évalué et dirigé par un enseignant responsable. L’élève qui réussit le programme reçoit deux ou quatre crédits en compétences pratiques. L’aide camarade est une ressource inestimable et joue un rôle essentiel dans le processus d’apprentissage.

Attentes : L’aide camarade doit
• être assidu et arriver à l’heure
• être bien préparé
• participer au meilleur de sa compétence
• assister à toutes les réunions et séminaires tenus à l’heure du dîner
• travailler de près avec l’enseignant responsable afin d’apporter son soutien à l’apprentissage
• respecter tous les élèves et enseignants

Clés du succès : La liste qui suit contient quelques-uns des comportements et qualités que l’aide camarade doit démontrer et rehausser :
• Faire preuve de conduite exemplaire
• Aider d’abord – camaraderie ensuite
• Utiliser une gestuelle positive – Les actes en disent plus que les mots.
• Encourager, faire de nombreux compliments
• Apprendre les noms des élèves et les utiliser
• Montrer un intérêt sincère
• S’appliquer à compléter la tâche
• Laisser passer les comportements inacceptables
• Tirer profit des compétences et de l’expérience de l’enseignant responsable
• Manifester son enthousiasme envers l’apprentissage
• Être juste et cohérent dans ses rapports avec les élèves
• Ne jamais se moquer d’un apprenant. Éviter le sarcasme.
• Tenter de ne pas associer le comportement à la personne

Évaluation :
• L’enseignant responsable offrira de vive voix et à intervalles régulières ses commentaires à l’aide camarade.
• Au cours de chaque session, l’aide camarade fera par écrit une autoévaluation qu’il discutera avec l’enseignant responsable.
• Au cours de chaque session, l’enseignant responsable fera par écrit une évaluation de l’aide camarade. Une copie de l’évaluation sera jointe au bulletin de l’élève.

Soutien : Si un élève a ou une inquiétude ou un problème qui ne peut être résolu avec l’enseignant responsable, il est prié de consulter l’enseignant au secrétariat aussitôt que possible et nous l’aiderons à résoudre la question.

Composante pédagogique :
• Enseignement direct
• Enseignement indirect
• Enseignement interactif
• Étude individuelle
• Observation d’un modèle
• Expérience pratique
• Travail en équipe

L’évaluation comprend les aspects formatifs et sommatifs :
• Observation par l’enseignant

Renseignements supplémentaires

Prérequis :
(Profil de l’élève)

• Recommandé par deux membres du personnel et/ou du service de soutien aux élèves.
• Mature, responsable, respecte les autres
• Souhaite ou s’intéresse à travailler avec les élèves qui ont des besoins particuliers
• Compétent en communication et interaction avec tous

Raison d’être :

Ce cours vise à promouvoir la responsabilité sociale en aidant les élèves à apprécier, valoriser et accepter la dignité accordée à tous.

• Développer l’habileté à travailler et à interagir avec des élèves qui manifestent des besoins variés
• Développer les qualités de leadership
• Acquérir des compétences en communication
• Acquérir des compétences en matière de relations interpersonnelles : les créer et les entretenir
• Acquérir les connaissances fondamentales au sujet de l’apprentissage et de la gestion des comportements dans le contexte de la salle de classe
Attentes :
60 % - compétence en leadership
• Travailler de façon autonome et en collaborant avec les élèves sous la direction de l’enseignant titulaire, ou de l’enseignant responsable du service de soutien aux élèves
• Faire preuve de flexibilité et d’adaptation dans son appui au processus d’apprentissage
• Rehausser sa compréhension du contenu du cours par l’enseignement aux pairs
• Décrire en quoi ses qualités personnelles et connaissances s’appliquent au contexte de l’enseignement aux pairs

20 % - Soutien à l’apprentissage
• Avec l’aide d’un responsable, appliquer des stratégies afin d’approfondir les concepts présentés par l’enseignant
• Donner le bon exemple en présence des élèves
• Étudier les principes de résolution de conflits
• Apporter son appui et son encouragement aux démarches de l’enseignant

10 % - Compétence en matière de responsabilité sociale
• Faire preuve d’efficacité dans le travail en équipe avec l’enseignant et le personnel
• Identifier le besoin d’apprécier et de valoriser toutes les personnes

10 % - composante formative

L’élève pourra profiter d’une gamme d’expériences formatives afin de développer des stratégies dans le but d’aider les élèves à apprendre et à établir des objectifs d’apprentissage. Il restera à déterminer la façon dont ces stratégies seront mises en pratique.

Composante évaluative

L’évaluation de l’élève est basée sur la mesure où l’élève a accompli les objectifs prescrits. L’évaluation est continue et inclut une évaluation par l’élève et l’enseignant des aspects suivants :

• Habileté à travailler et interagir avec des élèves qui ont des besoins particuliers
• Leadership
• Communication efficace
• Habileté à former et entretenir des relations
• Connaissance des théories de l’apprentissage et de la gestion du comportement dans le contexte de la salle de classe

Les méthodes d’évaluation peuvent inclure :

• Observation par l’enseignant
• Rapports des autres enseignants ou des parents
• Barèmes d’évaluation

L’évaluation quotidienne ou hebdomadaire du rendement pourrait inclure :

• Les tâches quotidiennes
• L’utilisation manifeste des compétences et des stratégies
• La manifestation des atouts et des besoins personnels
Prérequis :
• La recommandation par 2 membres du personnel ou un membre de l'administration ou un conseiller

Résumé du cours : Le programme Aide camarade du conseil scolaire N° 67 donne à l’élève l’occasion d’aider ses camarades avec leurs études dans le contexte de la salle de classe. L’aide camarade travaille avec un élève en particulier ou facilite les activités en petits groupes. L’aide camarade est surveillé, dirigé et évalué par l’enseignant responsable (ou plusieurs, selon le cas). Le programme prépare et encourage l’élève à faire preuve de leadership et à aider les personnes dont les besoins sont divers. L’élève pourra développer sa responsabilité communautaire tout en rehaussant sa compétence en matière de communication, de relations interpersonnelles, de leadership et de travail en équipe. L’élève apprendra à apprécier, valoriser et accepter la dignité qui revient à chaque personne – une valeur qu’il conservera tout au long de sa vie. L’aide camarade recevra deux crédits pour 60 heures ou quatre crédits pour avoir réussi 120 heures de travail.

Raison d’être : L’aide camarade contribuera à l’apprentissage en appuyant la présentation du cours dispensé en salle de classe. L’aide camarade sera assigné à un domaine d’enseignement selon ses compétences et son intérêt pour cette matière et selon la disponibilité. Le rôle d’aide camarade est intégré au processus d’apprentissage dans nos trois écoles secondaires et représente une ressource inestimable. Dans ce cours, l’élève pourra acquérir les connaissances de base en matière d’apprentissage et de théories de gestion du comportement appropriées au rôle d’aide camarade.

Structure du programme :

Unité / ThèmeProgramme aide camarade :Temps alloué :
1Orientation au programme	 10 heures
2Classement	   2 heures
Aide camarade 10/11/12
Description générale :

Le programme aide camarade donne à l’élève l’occasion d’aider ses camarades avec leurs études dans le contexte de la salle de classe. L’élève est surveillé, évalué et dirigé par un enseignant responsable. L'élève qui réussit le programme reçoit deux ou quatre crédits en compétences pratiques. L’aide camarade est une ressource inestimable et joue un rôle essentiel dans le processus d'apprentissage.

Attentes : L’aide camarade doit
• être assidu et arriver à l’heure
• être bien préparé
• participer au meilleur de sa compétence
• assister à toutes les réunions et séminaires tenus à l'heure du dîner
• travailler de près avec l'enseignant responsable afin d’apporter son soutien à l’apprentissage
• respecter tous les élèves et enseignants

Clés du succès : La liste qui suit contient quelques-uns des comportements et qualités que l’aide camarade doit démontrer et rehausser :
• Faire preuve de conduite exemplaire
• Aider d'abord – camaraderie ensuite
• Utiliser une gestuelle positive – Les actes en disent plus que les mots.
• Encourager, faire de nombreux compliments
• Apprendre les noms des élèves et les utiliser
• Montrer un intérêt sincère
• S’appliquer à compléter la tâche
• Laisser passer les comportements inacceptables
• Tirer profit des compétences et de l’expérience de l’enseignant responsable
• Manifester son enthousiasme envers l’apprentissage
• Être juste et cohérent dans ses rapports avec les élèves
• Ne jamais se moquer d’un apprenant. Éviter le sarcasme.
• Tenter de ne pas associer le comportement à la personne

Évaluation :
• L’enseignant responsable offrira de vive voix et à intervalles régulières ses commentaires à l’aide camarade.
• Au cours de chaque session, l’aide camarade fera par écrit une autoévaluation qu’il discutera avec l’enseignant responsable.
• Au cours de chaque session, l’enseignant responsable fera par écrit une évaluation de l’aide camarade. Une copie de l’évaluation sera jointe au bulletin de l’élève.

Soutien : Si un élève a ou une inquiétude ou un problème qui ne peut être résolu avec l’enseignant responsable, il est prié de consulter l’enseignant au secrétariat aussitôt que possible et nous l’aiderons à résoudre la question.

Composante pédagogique :
• Enseignement direct
• Enseignement indirect
• Enseignement interactif
• Étude individuelle
• Observation d’un modèle
• Expérience pratique
• Travail en équipe

L’évaluation comprend les aspects formatifs et sommatifs :
• Observation par l’enseignant
Autoévaluation
Évaluation par d'autres enseignants
Séminaires d'élèves
Journal de bord de l'élève
Présentations et démonstrations.

Composantes de l'évaluation :
- Participation (domaine affectif)
- Acquisition de compétences (domaine psychomoteur)
- Acquisition de connaissances (domaine cognitif)

• Développer les qualités de leadership
• Acquérir des compétences en communication
• Acquérir des compétences en matière de relations interpersonnelles : les créer et les entretenir
• Acquérir les connaissances fondamentales au sujet de l’apprentissage et de la gestion des comportements dans le contexte de la salle de classe

Course Synopsis:

Ce cours prépare et motive les élèves à faire preuve de leadership et à aider les individus dont les besoins se manifestent de toutes sortes de façons. Les élèves appliqueront ces compétences dans le contexte de la salle de classe. Les élèves travailleront sous la direction d’un enseignant titulaire qui les aidera dans toute une gamme d’activités formatives. Ils deviendront responsables envers la société tout en acquérant et développant leurs compétences en matière de communication, de responsabilité, de prise de décision, de styles d’apprentissage, de relations interpersonnelles, de leadership et de travail en équipe.

Les élèves aide-enseignants apprendront la valeur et la complexité de la diversité sociale tout en appréciant l’importance de l’apprentissage à vie et de l’aide apportée au prochain.

Course Synopsis:

This course has been developed to enable students whose first language is not English to earn the necessary credits towards high school graduation. It provides students with the opportunity to study literary and informational communications. Students will study a novel and, as a culmination, will complete a Research Project assessing their skills in listening, speaking, reading and writing. Learning outcomes for the course are grouped under the curriculum organizers: Comprehend and Respond, Communicate Ideas and Information and Self and Society. The approach supports student language development and encourages different written and visual forms of literary interpretations.
